CROSS CUT SAWS

We are making, at Hamilton, the most profitable line of Cross Cut Saws and Saws for all purposes that you can buy. Their quality insures a fair profit. That's the secret of our success and popularity. We have a book that describes all patterns. Write and ask for catalog "H M." Let us line you out on cost and resale prices and other details. We have a mighty interesting proposition for you.

ATKINS

Makers of Sterling Saws. Made in Canada.

E. C. ATKINS & CO.

Factory, HAMILTON, ONT. **Branch, 109 Powell St., VANCOUVER, B.C.**

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

F.W. Lamplough & Co., Unity Bldg., Montreal

"It is my opinion that for big game the Ross .280 Rifle is the best in the world."

B. K. Miller, Wild Rose, Wis., U.S.A.

Mr. Miller adds:—"I have hunted and fished in various parts of the world, including British East Africa, but I have never seen a gun the equal of the Ross .280 for big game."

Dealers find this rifle, which is enthusiastically praised by the keenest Canadian as well as American sportsmen, a valuable addition to their stock.

The Ross .303 Sporting Models are also very popular.

Their accuracy and reliability combined with their comparatively low price make them universal favourites.

Another good seller is the Ross .22 Cadet Rifle. It is adopted by the Government for Cadet Corps, and is a strong, reliable and accurate arm suitable for the roughest use on camp or trail.

ROSS RIFLE COMPANY - QUEBEC

The **Magnet** Two Styles

A Hand or Power Washing Machine you can place practically in every home in your community, particularly where gasoline, steam engine, electric or windmill power is available.

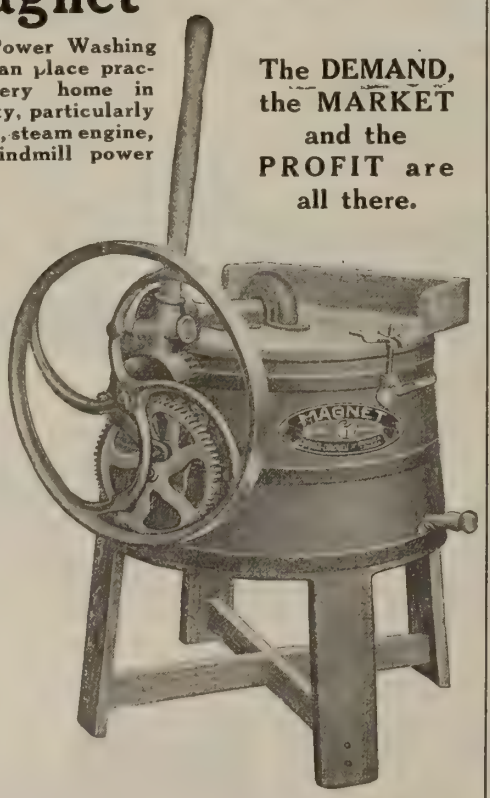
The DEMAND, the MARKET and the PROFIT are all there.



CUMMER-DOWSWELL, Ltd., Hamilton, Canada

PEERLESS Ornamental Fencing

IT is easy to explain the merits of Peerless Ornamental Fencing to a prospective customer. There are so many things in its favor. First, it is really an ornamental fence; second, it is an economical, and at the same time, durable fence; third, it beautifies home surroundings and presents a splendid appearance. Gate and fence match well together. Then, too, there is money in it for you.

Peerless Ornamental Fencing

not only protects, but beautifies property as well. Every stay is made of strong, stiff wire that will not sag. Our fencing is made from galvanized wire. Peerless fence is easy to erect, and will hold its shape for years to come.

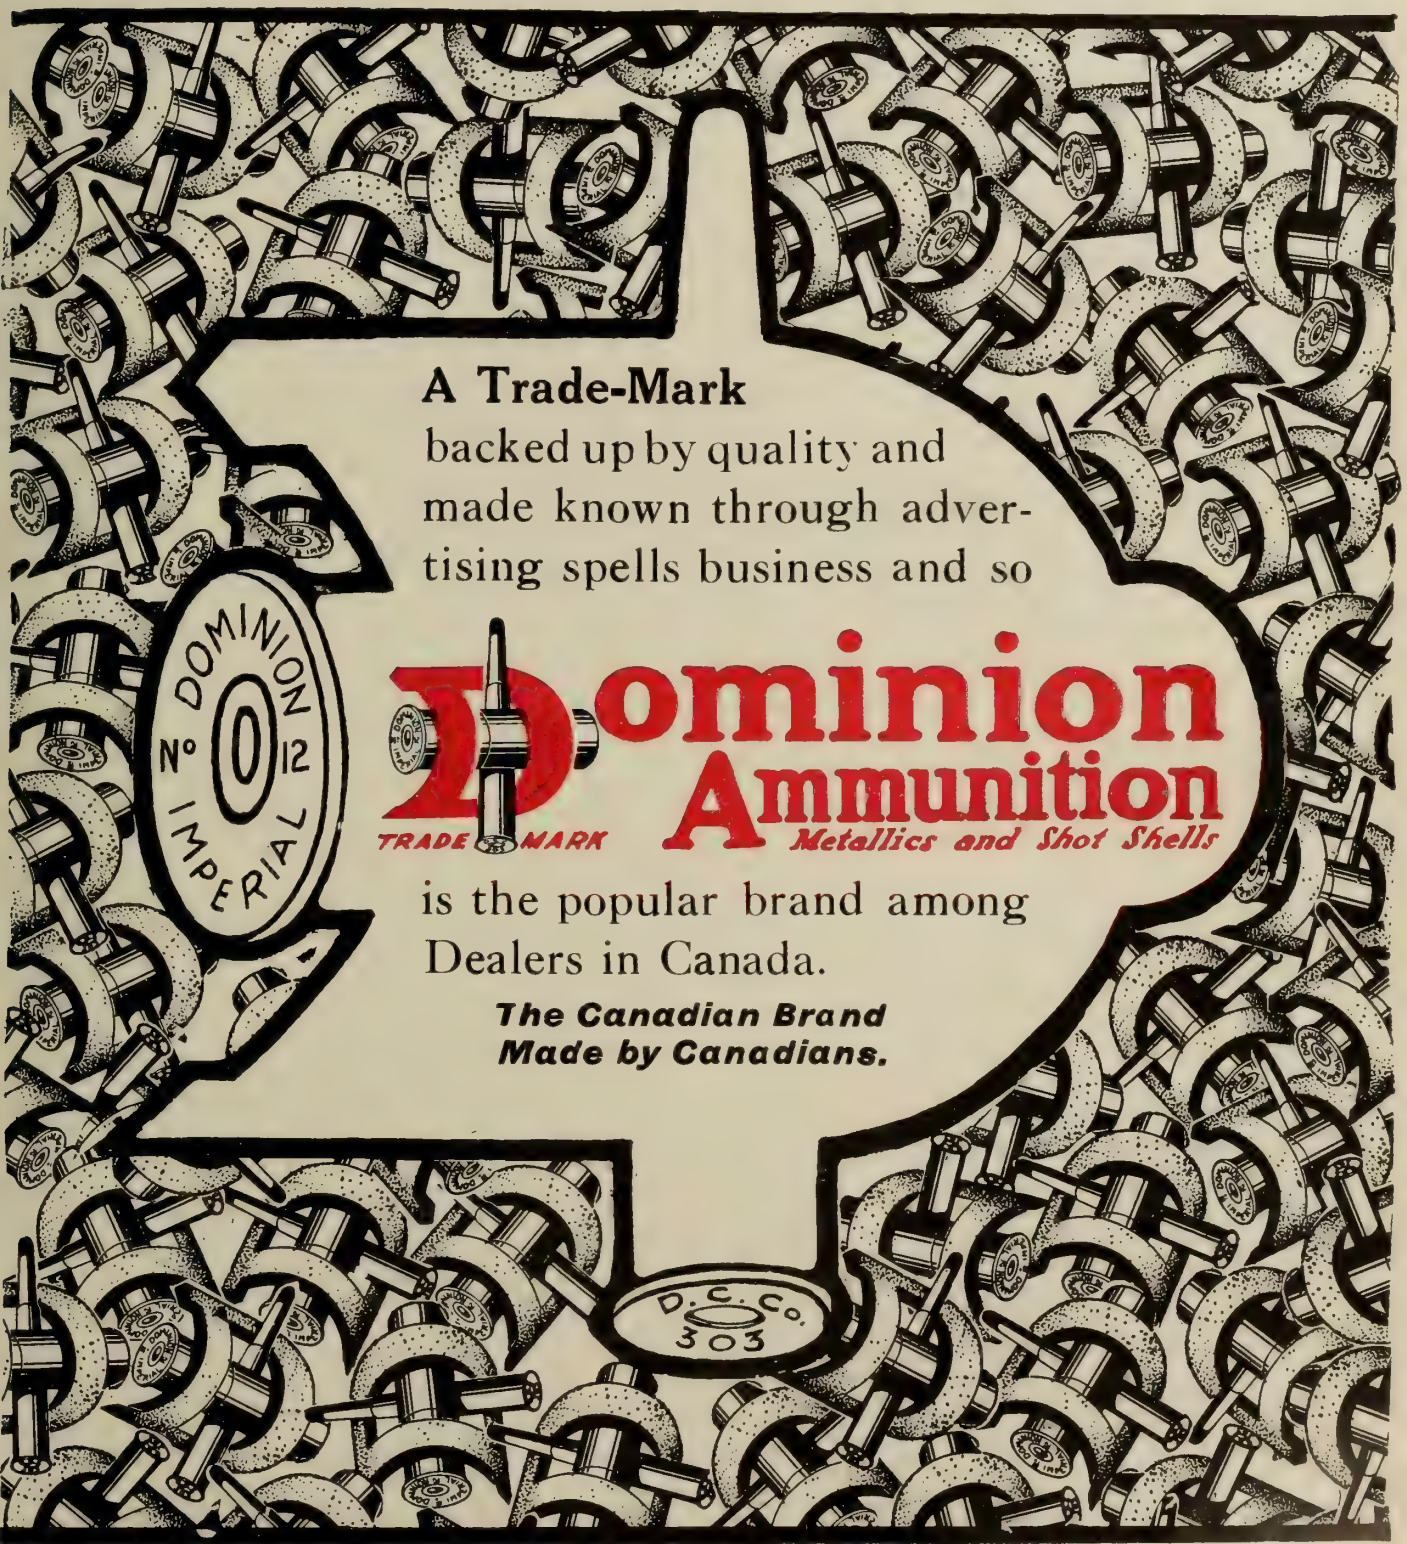
Vol. XXVII PUBLISHED EVERY SATURDAY SINCE 1888 October 30
No. 44 THE MACLEAN PUBLISHING COMPANY, LIMITED 1915
PUBLICATION OFFICE: TORONTO, CANADA



Made in
La Salle, Ill
— by —
Westclox

BIG Ben is the biggest thing to-day in the American alarm clock industry. He has everything in his favor—quality, looks, and style. He runs on time, he rings on time, he stays on time.

Slender, massive, richly plated, he stands seven inches tall, with well-shaped distinct hands and a big broad dial easily visible in the dim morning light.

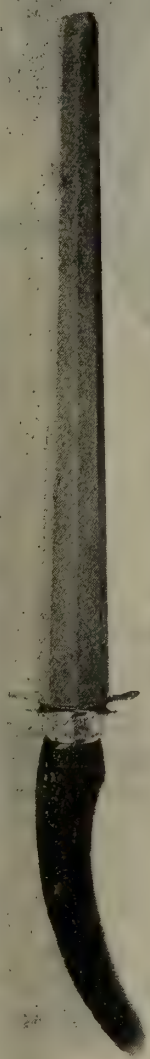
He rings just when you want and either way you want—*five straight minutes* or every other half minute *during ten minutes* unless you shut him off.

His keys are large, strong, easy to wind; his voice deep, jolly, pleasing to hear. The movement plates are bridged like on a Waltham watch— you can change both mainsprings *without taking the movement apart.* The pivots are of hard steel piano wire $\frac{22}{1000}$ of an inch thin. The escapement is a hardened steel pallet escapement—not a pin escapement like that of other alarm clocks.

We are carrying on hand a stock of Big Ben specially put up for *Canadian* trade, 6 in a carton together with a full set of Store Selling Helps, (posters and show cards.) On an order for 12 we give a solid mahogany display stand. On an order for 24 we print your name free on dials and with an order for 48 we send a striking, electric flashing sign, just the thing for your window or counter.

The minimum retail Canadian price is $3.00, and there's a $3.00 resale tag on everyone you buy.

Might We Suggest That You Stock Up On Carborundum Knife Sharpeners Right Now?



OF course, they sell any time, but in the fall when turkey carving days come you have the logical time to push Carborundum Knife Sharpeners still harder. Show them in your windows along with the carving sets—display them on your counters—your customers will surely be interested in a sharpener that puts an edge on any household knife in a twinkling. A sharpener that really cuts—faster, cleaner than the old-time steel.

Made with genuine stag or wood handle—put up in attractive display cartons.

Better stock up now and be prepared for the carving season. Incidentally they help YOU to a nice slice of profit.

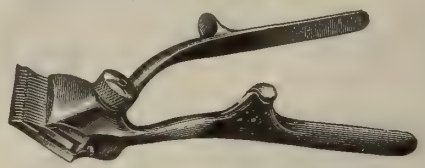
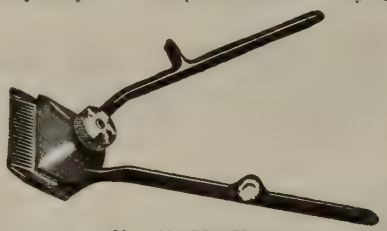
PRIEST'S HORSE and TOILET CLIPPERS

Made by American Shearer Mfg. Co.

present a complete line at a range of prices covering all requirements of the trade. They are all quality goods, and represent best designs and highest standards of workmanship, regardless of price.
Some styles of Toilet Clippers are illustrated below. All are heavily copper plated and polished before nickeling, thus giving a higher finish, which lasts much longer than ordinary plating. The utmost care is used in grinding and tempering the cutting plates, giving cutting qualities whose superiority may be readily demonstrated by comparison. No. 00 and No. 000 Shaver for beard and neck trimming, are clippers of the utmost lightness and refinement. not paralleled by any other American manufacturer.



STANDARD No. 0, No. 1 and No. 2.
Retailing at about $2.50. High-class barber's clipper.



No. 00 SHAVER
A light and elegant Clipper for beard and neck trimming. Retailing at about $2.25.

What Every Dealer Knows

He knows that the **necessary** tool is the tool that sells. And he knows—and his prospective customer soon realizes—that there is no tool more necessary for getting into the out-of-the-way places than

MILLERS FALLS
EXTENSION BIT HOLDER No. 6

For just such jobs as that shown above—carpenters, electricians and metal workers run up against them daily—this is the ideal tool. Outer sleeve telescopes over inner spindle, combining lightness with strength. Chuck with four reliable strong steel jaws, made in one piece, grips firmly over shoulders of bit stock shanks. Will follow bits of 5/8 inch and larger into their bores. Total length, collapsed, 16½ inches; extended, 24 inches. Easily fits into any kit.

Millers Falls Tools that are Business Getters

You should carry this Bit Holder in stock, and also Millers Falls Breast Drill 112, Hand Drill 1980, Hack Saw 1027 and Glass Cutters—all of reliable and durable qualities that make them "easy to talk" and satisfying to sell. Send for catalog showing complete line.

MILLERS FALLS TOOLS

Millers Falls Co.

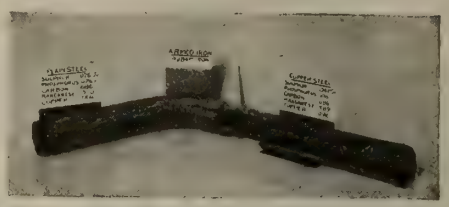
The Millers Falls Exhibit at the Panama-Pacific Exposition is in Block 26, Avenue D, Manufacturers' Building. Don't fail to visit it while at the Fair.

The Test of Any Commodity Is That Of Service



Section of down spout in service under severe conditions for four years. Straight portions of Steel,—elbow of Armco Iron.

As a result of its remarkable purity (never less than 99.84% pure iron) and the care and skill exercised in every phase of its manufacture

ARMCO IRON Resists Rust

far better than steel or any other iron. Gas inclusions in iron or steel greatly accelerate corrosion, besides bringing a train of other evils. The elimination of gases by the methods developed at Middletown is highly successful.

Armco Iron, because of its basic purity, receives and retains a better coat of galvanizing than ordinary material. This, too, adds decidedly to service life.

ARMCO IRON FOR ELECTRICAL PURPOSES

The high conductivity of Armco Iron (50% greater than that of steel) makes it the most available material for many electrical purposes. Its use in the forms of third rails and telegraph and telephone wire is highly practical and economical.

The American Rolling Mill Co.

AMERICAN ARMCO INGOT IRON

The trade mark **ARMCO** carries the assurance that iron bearing that mark is manufactured by The American Rolling Mill Company with the skill, intelligence and fidelity associated with its products, and hence can be depended upon to possess in the highest degree the merit claimed for it.

Licensed Manufacturers under Patents granted to The International Metal Products Company.

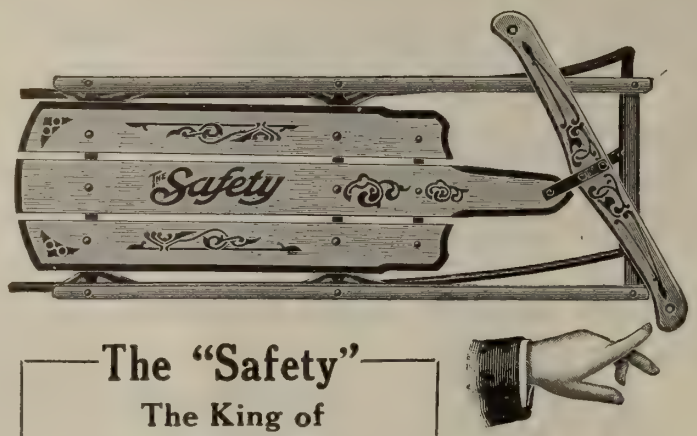
Has every feature desired in table cutlery. No rust or stains, will not become scratched or shabby, always holds its lustre. Can be sharpened on ordinary steel.

GET SAMPLES FROM YOUR JOBBER AT ONCE AND BE IN LINE

A. MACFARLANE & CO., Montreal, Canadian Representatives.



The "Safety"

The King of Self-Steering Sleds

NOTE THE REMARKABLE STEERING RADIUS OBTAINED BY SIMPLY BENDING THE SILVER SPRING STEEL RUNNER, AND NOT THE WOODEN FRAME.

A Quick Sales Producer

The steering is done by simply bending the runner and NOT the wooden frame.

The runner (patented) is made of BEST SILVER SPRING STEEL and for that reason it will always keep its shape, is flexible, lasting and has a smooth running surface and being GROOVED is guaranteed NOT to skid.

The sled bench (patented) is a solid stamping of WROUGHT STEEL, being lighter, neater and stronger than ANY OTHER method of construction.

The top (patented) DOES NOT MOVE, thereby enabling the operator to guide the sled much easier without danger of pinching the fingers as is common with OTHER flexible sleds.

The safety sled is made from the best suitable material and EVERY PART riveted. They are neatly striped and decorated.

Packed two in a bundle. No shipment made of less than 1/6 of a dozen. The best assortment to buy in dozen lots is:—

1/6 of a dozen, 33 inches. 2/3 of a dozen, 37 inches.
1/6 of a dozen, 41 inches.

ONLY MANUFACTURERS OF SELF-FEEDING FURNACES IN CANADA

"I can sift ashes now."

Canada Dustless Ash Sifter

makes ash sifting thorough, easy and clean

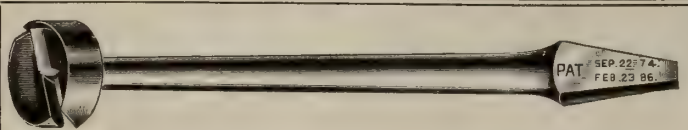
Permits no waste, cuts coal bills in two, and lasts a lifetime. A turn of the handle and ashes sift into barrel. Unburned coal drops into scuttle.

Sell one to a home and you'll soon sell to the next door neighbor, as users invariably recommend them.

Sold by leading hardware dealers.

Write for particulars.

J. SAMUELS, 275 Queen St. W., Toronto, Ontario



THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and a clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace—made for machine. Packed singly—packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

DAVIDSON'S

PREMIER LEADER
Square with High Closet

PREMIER LEADER Steel Range

The general demand this season is for a moderate-priced range.

Many stove dealers are reporting business better than usual on account of the popularity and demand for the Premier Leader. As for ourselves, "Leader" sales have exceeded our own expectations.

Why? For the reason that the Leader is the best value at the price of any range on the market.

When you can get a range, constructed of only high-grade, selected material, one given the most careful workmanship and of a modern and distinctive design, at the exceptional moderate price of the Leader, there is no reason why you should not make sales. Order a sample range and get in on the business.

The Premier Leader is made square, or with reservoir, and can be fitted with high shelf, high closet or attractive Persian closet.

Duplex grates for coal or wood, or wood grates for wood only can be supplied.

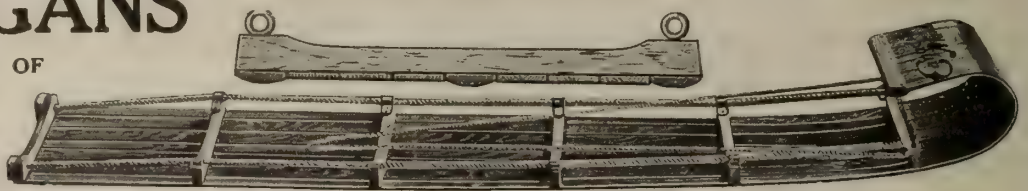
Buck Brothers

Milbury, Mass., U.S.A.

TOBOGGANS—"THE CANADIAN MAID"

TWO GREAT FEATURES OF "THE CANADIAN MAID"



First—The Raised Front. For about eighteen inches the front of the toboggan has a gradual slant. Result—the toboggan does not PUSH the snow in front of it, and thus you have GREATER SPEED, AN EVEN AND COMFORTABLE MOTION and a LONGER RIDE. Note this sketch—which shows how other toboggans without this feature shove the snow along.

Second—The Three Runners—which give emphasis to the above-mentioned feature and which guarantee safety, as it aids in controlling the toboggan. The runners hold the toboggan to the track. With two, six or eight passengers, the "Canadian Maid" No. 4 toboggan is equally easy to control, the runners helping materially. Accidents have occurred which can be explained by the fact that the usual flat-bottom toboggan was used. Iron and steel Runners fitted at slight additional cost.

PACK-TOBOGGANS A SPECIALTY. Full information on request. Write for Prices and Dealers' Discounts.

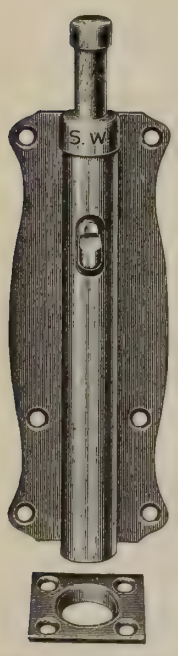
The Strings of Your Piano

are made from the same kind of wire that is used for the springs of Stanley Foot and Chain Bolts.



Cut ¼ size of 10-in.

ONE indication of quality in these bolts is the Stanley Sherardized Spring. This process affords as good a protection against rust as it is possible to obtain, and guarantees long life to the bolt. The springs are made of the best grade of piano wire.

Stanley Wrot Steel Foot Bolts are strongly built, handsomely finished and are as strong sellers as they are strong in service. They exemplify "Stanley Quality" throughout.

The cap and release are of solid bronze. The floor plates are cupped to guide the bolt and have oval-shaped holes to take care of shrinkage in the door without resetting plate.

The 10-inch style is designed for heavy garage and warehouse doors. The 6-inch is for ordinary doors, and the 3-inch for double screen doors, cupboards, closets, etc.

10-inch, one in a box with screws; 6-inch and 3-inch, one-half dozen in a box with screws.

Upward Trend of Iron and Steel

Unusual Conditions in the Iron and Steel Trades, Owing to the War — Many Lines Have Advanced in Price and Further Advances are Probable—Will There be a Steel Famine?

SINCE the 1st of October many important and far-reaching price changes have taken place in iron and steel, and various products which are distributed through the hardware trade. Among the lines affected since the first of the month are iron rivets, bar iron, forged iron, horseshoe iron, Norway iron, mild steel, sleigh shoe steel, domestic, reeled machinery steel, tire steel, toe calk steel, tool steel and other lines. Advances have also taken place in the prices of carriage and machine bolts, sleigh shoe bolts, coach and lag screws, skein bolts, bolt ends, plow bolts, elevator bolts and other lines. Square and hexagon nuts have also been affected. The predicted advance in wire nails has taken place this week; an advance of 10 cents per keg has gone into effect. Although the demand for wire nails at the present time is not heavy, there will in all probability be further advances in the near future. Many dealers would not be surprised to see nails go 20 cents per keg or more higher than the figure to which nails have advanced this week. Prices on steel products in Canada are almost bound to follow the rapid advances which are taking place on steel products in the United States. Men who have been in the steel trade for many years state that the trade to-day is stronger than it has been at any time within the past fifteen years. All quotations are nominal. Some of the large steel concerns in the United States could at the present time sell their entire tonnage of steel in billets at a higher profit than they can get by carrying it through to all the processes which lead up to finished sheets and other products. Some firms have sold their output for the first quarter of 1916, and have inquiries for the second quarter, while a few are inclined to look after their regular customers, and in that way hold a connection which will be very valuable when the war is over, and business in the steel trade is not as active as it is at the present time. Many large steel producers find that the demand far exceeds the supply. The market is said by one prominent authority to be the strongest and most rapidly advancing steel market since 1899. Prices are advancing with alarming rapidity, and some mills are limiting the tonnages they will sell at any price. It is claimed that even with curtailment of sales many of the mills will at the end of the year be filled up for six months in advance. If such is the case, a steel famine will probably result.

The American Metal Market, referring to the trade in the United States, states that sales of steel and iron products last week aggregated over a million tons. The railroads contributed about 340,000 tons of the total, made up of a little less than 250,000 tons of rails, 66,000 tons of bars, plates and shapes to be used in the construction of cars, 15,000 tons of bridgework and 10,000 tons for locomotive building. Buying of war munitions called for about 150,000 tons of round steel bars and billets to be used by manufacturers in the United States. An equal tonnage was booked for direct export, mainly to Great Britain and France where it will be used in the manufacture of high explosive shells. There were also sales of nearly 70,000 tons of wire rods and wire products for export to Canada and Great Britain, and France is still in the market for 25,000 tons. The sales of round steel bars included 30,000 tons, which will be furnished by the Algoma Steel Company, 35,000 tons to be furnished by the Colorado Fuel & Iron Company, and 50,000 tons by steel plants in Central and Eastern Pennsylvania. Sales of miscellaeous products for domestic and foreign shipment, which came to the surface, aggregated between 100,000 and 150,000 tons.

England and France, it will be seen, are now heavy buyers of steel whereas before the war they were large exporters.

Within a comparatively short time the price of wire rods in Canada has advanced about $10 per ton.

A number of nail makers still have contracts for supplies booked some time ago at much lower prices than those in effect to-day. The fact remains, however, that if the price of nails to-day were based on the present cost of wire rods, the quotations would be much higher than at present.

Further advances in other wire products would not be unexpected. The Canadian market will no doubt be influenced to a very considerable extent by conditions in the United States.

A report from Pittsburg states that there is an insistent heavy demand for wire rods from France, England and other countries, but local mills are not taking much of this business as they are sold up and cannot make deliveries. In fact, few rods have been sold in the open market by local makers for some months. Rods are scarce and for early delivery bring high prices. Advanced prices on all wire products went into effect on Thursday of last week. The wire mills are swamped with business, having their output sold for the next three or four months. The export demand for barb wire continues heavy, but local mills are turning it down, as they cannot handle it. The mills are very conservative about entering orders, not now desiring to have further obligations on their books that

(Continued on page 38.)

New Editorial Features

Hardware and Metal's Editorial Department Announces New Features Which Will be Introduced Within a Short Time—Features That Will Appeal to the Trade Throughout Canada

WITHIN the next few weeks a number of new editorial features will be presented to the readers of Hardware and Metal. The editors of this paper believe that "letting good enough alone is standing still," and they are always feeling the pulse of the retail hardware trade of Canada, in an earnest endeavor to ascertain what is most needed by retailers to facilitate the buying, stocking and selling of hardware. During the past two or three years a great many new and practical features have been adopted and we feel sure that the new services which we are about to present, will meet with the approval of the trade in general. In the first place, we will refer back to the electro service which we started some time ago. To say that the "electro service for hardware retailers," inaugurated exclusively by us in Canada, has been a success, is putting it mildly. So far over 4,000 electros have been sold to retailers at the low price of 15 cents each and are now being used in various parts of Canada for newspaper and circular advertising. But, successful as this service has been, we intend to develop it further. We are going to introduce in addition to our regular electro service, what might be termed a special "season service"—that is, at certain seasons of the year special electros are needed by hardwaremen for display purposes in preparing newspaper and circular advertisements. For instance, inquiries made by Hardware and Metal editors have revealed the fact that very few hardwaremen, less than five per cent., have Santa Claus or Xmas electros which could be used for illustrative purposes in advertisements. Many retailers who were interviewed hailed with delight the suggestion that Hardware and Metal would undertake to supply the retailers with Xmas electros. In next week's issue a page of Xmas electros will appear. They will include cuts of Santa Claus and Xmas scenes which are very appropriate. Watch for this feature in next week's issue.

But there is another new feature which will be appreciated by a great many retailers. Commencing next week, Hardware and Metal will run a series of advertising suggestions. These advertisements will be prepared in such a way that they can be used whole or in part as desired. Some time ago a few suggestions were published by Hardware and Metal to see if they would be used by retailers—the results were astonishing—and hundreds of retailers used the suggestions offered. This will be a regular feature in the future and should prove to be one of the most practical services offered by any trade paper to its readers.

Not long ago one of the largest retail firms in Canada (name on request) wrote to Hardware and Metal, asking for some suggestions re the handling of charge accounts. The inquiry—only one of hundreds received and answered in the course of a year by this paper—will be answered in a practical way so that it will be of interest to retailers throughout the Dominion. Commencing next week a new series will commence in Hardware and Metal showing how Canadian retail hardware firms keep books. Theory will be discarded entirely, and reproduction will be shown of the actual forms, etc., which are used by many of Canada's most up-to-date retail firms. This course will be the most practical course in bookkeeping, concerning the handling of accounts that has ever been presented to retail hardware merchants. Every hardware firm, large and small, will be interested in this series.

Commencing in this issue is a series of articles "Talks of Self-Made Merchant" to his clerks. It is intended that the articles under this heading will be of particular interest to both employers and employees.

In next week's issue of Hardware and Metal there will also be an announcement regarding Hardware and Metal's Annual Christmas Window Display Contest. This is an annual event which creates a great deal of interest among hardware window trimmers in all parts of the Dominion. Watch for the announcement next week. There are several other new features to be introduced in the near future and the editors of Hardware and Metal believe that they will be welcomed by the trade. An announcement regarding these will be made in the near future.

Just in closing it might not be out of place to make a slight reference to Hardware and Metal's weekly market reports. Many important price changes and other developments are taking place weekly. From the comments we have heard recently, our market service has been of great benefit to readers in all parts of Canada. Further important developments in hardware markets will take place in the near future. It is important that all readers keep in close touch with Hardware and Metal's weekly report on hardware, metal, stove and paint conditions. This service is given only by Hardware and Metal, Canada's only weekly hardware paper.

Talks of a Selfmade Merchant to his Clerks

The Boss Brings Up a Number of Interesting Subjects at the Weekly Conference—Why Prices Have Advanced—How to Secure New Business —Old Friend Invades Territory.

AS you are probably aware we have been rather neglectful in allowing our weekly conferences to be temporarily discontinued. If my recollections are correct, it is several weeks since we held a conference, and I cannot see any good reason why they should have been, even temporarily, discontinued. Owing to the present state of affairs in the hardware trade it is very important that we should get together every week and talk over various problems which have a direct bearing on our business.

There are several important matters for our consideration to-day. In the first place I will direct your attention to the fact that we have reached the season of the year when there is a heavy demand for late fall, and cold weather goods. I find, however, that we have still on display in the main floor of the store several lawn mowers, a lawn swing, several ice cream freezers which unfortunately did not sell during the warm weather, and a number of other bulky articles that take up considerable floor space, but which are not ready sellers at this season of the year.

On the second floor we have our coal oil heaters, horse blankets, automatic ash sifters, weather strips, and several other seasonable lines which should be "right to the front" these days. We have been fortunate enough to have had a very liberal share of business recently and in the rush we have overlooked the importance of putting the seasonable goods to the front.

Not only have we been slow to display seasonable goods, but we have all wasted considerable time and caused our customers considerable annoyance and delay, in taking them to the second floor of the building in order to see goods which should be down on the main floor. This matter should be attended to just as soon as possible by the man whose duty includes the arrangement of goods on the main floor.

There is another matter to which my attention was directed a couple of days ago and that is the question of prices. We have had considerable "kicking" from customers who have objected to paying higher prices, for certain goods, than they had been accustomed to paying before the war.

As you are aware we have found it necessary to advance our retail prices on a good many lines of goods. Take for instance wire and wire products, nails, etc. All these lines have advanced, and will probably go higher. When customers object to paying higher prices, we must be careful to point out to the customers that most of the advances have been due to influences over which we have no control. Wire rods have advanced to a considerable extent of late and it is only reasonable to expect that makers of wire products would have to advance their prices. Wire mills, especially those in the United States are swamped with business, having their output sold for three and four months ahead. Wire rods are scarce and for early delivery high prices are offered. Yesterday I heard a contractor objecting to our price on wire nails. Our price is not high, and I feel sure that still higher prices will have to be quoted before long. We must be careful to keep in touch with the markets and be able to talk intelligently on the changing markets. I think we can safely figure on a good many hardware lines being higher in price by the end of the year. I have, however, booked poultry netting for spring at a price 5 per cent. lower than last season. I have also booked spades and shovels at the same price as last year.

There is another matter which I think we should go into at this conference. Yesterday I heard a lady ask one of our men why our new "Perfecti" electric iron was one dollar higher in price than the other iron which we have been selling. The salesman put up a very good argument along the lines sugested by the traveller from whom we bought the goods, but there are a few features which the salesman either overlooked or has forgotten. In the first place, we give a guarantee for one year on our new iron. We are fully backed up by the manufacturer in this respect. With the other iron we are always a little afraid to give a guarantee. Furthermore, you will note that the new iron has a nicer handle, a better plated finish, and is a much neater and more convenient iron for the housewife to handle. The main feature, however, and the one that will make the greatest hit with the lady is the heating capacity of the new iron. Owing to the construction of our new iron, it retains heat much longer than the old style, and the iron is just as hot at the point as it is at any other part of the ironing surface. I think we are going to have a good run on this iron. It will be featured in our newspaper advertisement, we can demonstrate it in the store and make a display in the show window. The local electric light company is making a strong bid for the electric iron trade—offering easy terms, etc.—but I believe we have a better iron that consumes less electricity, and we are going to give them a good strong run for their money. If we all put our shoulder to the wheel and start something we can sell a good many irons. You remember how we cleaned up such a large share of the oil stove business with the farmers in the summer—well, we can do the same thing with electric irons in town. A great many have been sold, I'll admit, but I venture to say that not 20 per cent. of the prospective purchasers have been sold, and then don't forget that our town is growing rapidly.

I see our old friend the mail order house has again invaded our territory. Tom was telling me this morning that "Eatems" have sent in a half carload of catalogs, and mailed them from here in order to save postage. It's fine, isn't it, the way our parcel post system is working out to the advantage of the mail-order houses. I wouldn't mind so much if the parcel post was self-supporting, but I have every reason to believe that it is not, and that we smaller retailers are paying a good share towards its support, while the mail-order houses are the greatest benefactors under the present system. However, grumbling won't help much now: the catalogues have been distri-

Standardized Retail Prices in Relation to the Interests of the Wholesaler

Address by William H. Ingersoll before the Atlantic City Convention

AT the recent convention of the National Hardware Association of the United States and the American Hardware Manufacturers' Association, a report of which, appeared in last week's issue of Hardware and Metal, an address was delivered by William H. Ingersoll of Robert H. Ingersoll & Brother, New York City. Mr. Ingersoll's subject was "Standardized Retail Prices in Relation to the Interests of Wholesalers." Mr. Ingersoll is an advocate of the Stevens Bill. Readers of Hardware and Metal are familiar with the provisions of the Stevens Bill on account of the many references made to it through these columns when the Bill was formerly presented to Congress. In brief, the provisions of the Act are to give protection to those who may desire to establish a resale price on their product, not only for the consuming public reached through the wholesalers, but to the wholesalers as well. The "Stevens Bill" has the endorsement of many bodies of retail merchants, and will again be presented at the next session of Congress. Mr. Ingersoll addressed the convention in part as follows:

"One thing above most others dear to the American heart is to keep the way open for individual enterprise. We treasure the tradition that there shall be equal opportunity, and that the man of small means, as well as the man of great means shall have his chance and shall profit in proportion to his ability to serve the public.

"It is from this standpoint that this question of resale price maintenance is of importance, but first, it seems to me, that we need to come to an understanding about the use of terms.

"In the proposition of resale price maintenance, there is no element of combination; and I advocate that the right be granted only to those who are engaged in competitive business.

What Price Standardization Would Prevent

"Sometimes it is easiest to explain what a thing is by showing what it is not.

"To show you what price maintenance is not, I would like to cite an instance of the findings of the 'Association for Improving the Condition of the Poor' in a recent investigation conducted in New York.

"There they found a chain of stores selling coffee out of the same bin at 26c and at 36c, according as to whether one ordered the cheapest or best coffee. Tea out of the same canister brought 35 to 70 cents a pound. Split peas wholesaling at 4 1-5c a pound sold in two of the stores at 8c a pound, and in a third store of the same chain at 9c a pound.

"Now, that is not price maintenance—it is not the same thing at the same price to all buyers, and I submit that it is an infinitely less desirable system from the standpoint of the buying public.

Chain Stores, Department Stores, and Mail Order Houses

"There are three types of great retail institutions which are being rapidly fostered.

"One is the chain stores under which is in reality many retail stores under a single ownership. Second is the department store, which is an aggregation of stores in various lines under one roof, and the third is the mail order house, which transacts its business at long range.

"These three types of retailers are absorbing the retail market so rapidly that those who have kept watch of the tendency are wondering how long it will be before the independent store has been practically eliminated.

"Take the drug line in New York. A few days ago every drug store was operated by the proprietor, who managed it. To-day the drug market there is dominated by a chain of stores which have recently been purchased by the president of a chain of cigar stores which stretches from coast to coast.

"In Philadelphia, the grocery business is being speedily monopolized by chain stores. Notwithstanding the growth of the city there are to-day less than one-half the number of grocery stores there that there were five years ago, and many are wondering how long it will be before Philadelphia is dependent upon a single grocery concern for its food supplies and what it can buy and what it must pay.

"As to the department stores, they are springing up everywhere. Each individual local market is becoming concentrated largely within the department store, and now these department stores are themselves being combined into a great chain, one—for instance—controlling some fifty of these stores, largely dominating nearly fifty of our principal commercial centres and doing a business of about $100,000,000 annually.

"Similarly, the mail order houses are absorbing the business. We have, for instance, in Chicago, a single house so gigantic in proportion that its 1,200-page catalogue is in every third home in the country, and I am told is more actively used than the family Bible. This concern uses two tons of pins a month to pin its correspondence papers together.

"It owns or controls something like 127 factories, I am informed, and does a business of nearly $100,000,000 annually.

"Now a concern of such proportions is several times larger than some of the industrial trusts which the Government has sought to dissolve, and I cite this only to show the immensity of the retail market and the power that will come to those who succeed in dominating it if such a condition is permitted to arise.

Why the Manufacturers are Helpless

"Now, the foregoing is probably familiar to many of you; but there may be some fresh thought in a consideration of the issues involved in the controversy as to the merit of a system of resale price maintenance which is favored by almost the whole business community.

"Why, if this price cutting hurts them, do the manufacturers permit it to go on, you may ask?

"Because under present law they are powerless to prevent it. Having sold their goods to others, they no longer have any power to control the methods by which they are marketed; and the dealers who temporarily own the goods are free to do with them as they please, regardless of how it injures others.

"That is the technical legal ground as at present interpreted by the court. Back of it is the assumption that to allow manufacturers to exercise any control over resale prices would mean high prices, and the further assumption that cut prices mean bargains and savings to the people, and therefore are demanded on grounds of public policy. It is also contended that the freedom of the market demands that there be no control by manufacturers after they have sold their goods.

"Let me quote from the recent report

(Continued on page 38.)

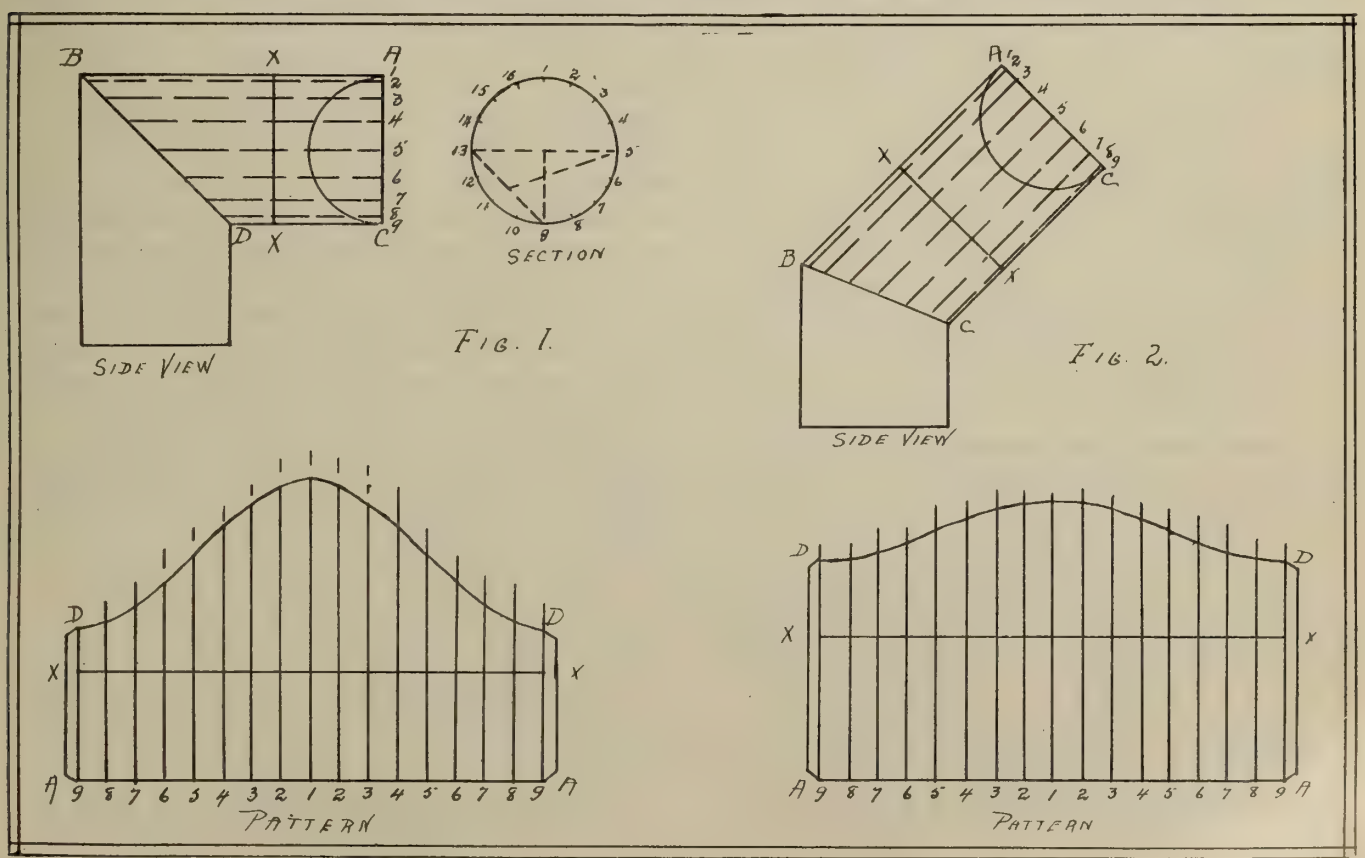
Sheet Metal Workers' Course

By Chas. Sievers

LAST week I received a request to run an article showing the simplest methods of developing elbow patterns. This subject was taken up in the early stages of the series, but for the benefit of new beginners, or any who might not have this lesson on file, this lesson is appearing this week. There are several ways to develop elbow patterns, but the methods shown here will be found to be about as simple as possible, and are used in a great many tinshops at the present time.

In Fig. 1 is shown a right angled 2-piece or 90-degree elbow and Fig. 2 an angle or 45-degree elbow of two pieces. The development of each is done by adopting practically the same method.

Having drawn a side view of the elbow Fig. 1 and obtained the cutting or mitre line, the developing of the pattern can be gone on with. At one end as shown, draw a half circle of the diameter of the pipe and divide into a number of equal parts as shown by 1, 2, 3, 4, 5, 6, 7, 8, 9. Through these divisions draw lines parallel to the sides, cutting the mitre line B-D. To mark off pattern, draw two parallel lines as A-A and X-X, At one end draw a line at right angles connecting them, as A-X. From this point mark off the spaces on section or half circle at end of side view, repeating to make circumference complete, draw lines connecting the different points extending them past X-X. From A-C on side mark off a space equal to the distance apart of the two lines A-X on pattern, as shown by X-X on side view, this line will be used as a point from which to obtain the different lengths. With the compasses or dividers, measure the distance from the line X-X to mitre or cutting line D, and mark off from X on line A-X of pattern; this line corresponds or is the same as division numbered 9. Then measure from the line X-X to D-B on each of the other divisions and mark off in divisions or pattern marked with same number. A line drawn through the points thus obtained will give the outline of the pattern required. The angle elbow shown in Fig. 2 is worked out in the same manner, and requires no further explanation. The dotted lines shown in section in Fig. 1 from the diameter, as shown by the line 5-13, now draw a radius at right angles, as shown by the line to point 9 and draw a line connecting two of the points on the circle, thus obtained, as 9 and 13. Bisect the line 9-13, and from the point obtained draw a line to end of diameter at point 5, the distance from point 5 to X is equal to one-quarter of the circumference.



HARDWARE & METAL

CANADA'S ONLY WEEKLY HARDWARE PAPER

Vol. XXVII. TORONTO, OCTOBER 30, 1915 No. 44

THE PAINT MARKET

FOR some weeks past Hardware and Metal has been predicting lower prices on ready-mixed paints. Our readers were told on several occasions that the decline would probably take place towards the end of October. Our predictions have proved correct and this week a decline of ten cents per gallon has been announced on a number of lines, including house paints (excepting whites) outside porch paints and flat wall paints. On other lines, such as inside floor paints, barn paints, roof paints, cement paints and other miscellaneous lines, the former quotations will prevail. A complete report on the market appears in the weekly market report elsewhere in this issue. The reductions are not as great as some in the trade had expected, but to a merchant who does a large paint trade, a reduction of ten cents per gallon means a considerable saving. Some retailers had hoped for a reduction of twenty cents per gallon, but recent developments in the trade have to be taken into consideration. Linseed oil is on the advance, while turpentine has taken another big jump during the week. Paint manufacturers are paying a high price for zinc, an important ingredient, used to a large extent in paint making. Zinc producers have been unable to promise any relief from the present high price basis so far as future supplies are concerned. These factors have offset the reductions that have been made in lead. Then there is a scarcity of many high colors, and paint manufacturers are forced to pay exceedingly high prices for supplies. Some of the leading manufacturers state that on the present cost of raw materials a reduction is not warranted. Retailers stocks are undoubtedly low at the present time, and as business has been conducted for some time on a hand-to-mouth basis, due to some extent to the expected decline, it is hoped that the lower prices will start a very fair buying movement. Further reductions, it is claimed, may not be looked for unless there is a decided decline in the price of raw materials. If, on the other hand, there should be further advances in the cost of supplies, a reversion to the recent figures is not to be unexpected.

OUR WEEKLY MARKET REPORTS

PRICE changes of an important and far-reaching character are quite numerous this week. For many weeks past there have been large numbers of important price changes to announce each week and many merchants in the trade, who have watched the market developments have profited greatly. On the other hand, there are many merchants, who, having fair stocks of certain goods on hand, have not paid any attention to changing market conditions and have continued to retail their goods at ridiculously low prices, when present costs are considered. The result has been in many cases that retailers, having disposed of certain lines, have had to enter the market and purchase new supplies at exceedingly high prices. Not a few cases have been noted recently where retailers were actually retailing goods singly over the counter at considerably less than what the wholesalers were charging for the same goods in dozen lots. To merchants who have been careless in checking up prices it might not be out of place to remind them of the many extraordinary advances which have taken place in a large number of hardware lines of late, and also to state that they may expect much higher prices on many other lines before another six months have passed. The best way in which to keep posted on the many price changes which take place, and which are expected to take place, is to follow closely the weekly market reports which appear in Hardware and Metal each week. Hardware and Metal is the only weekly hardware paper in Canada giving this service. That it is appreciated by the trade is evidenced by the many letters of appreciation which we receive from our readers.

ON BEING CAUGHT SHORT

IN the various branches of the retail trade where manufactured goods of either domestic or foreign production are handled, the question may be well considered at this time, in relation to both the immediate past and the immediate future, as to whether commercial conservatism cannot be carried too far.

This refers to the buying policy. For the past couple of years, and particularly since the outbreak of the war, business has been on a hand-to-mouth basis. Curbed on the one hand by a weak and uncertain consuming demand and on the other by a tendency to curtail obligations, the general policy has been to only place orders for goods actually required, with the result that stocks have been brought to a very low state. And in a less degree this will apply also to many wholesalers.

While the public demand continued at its lowest ebb the close hand-to-mouth policy had its advantages. But there were few dealers who expected this state of affairs to continue; had they done so they would probably have taken down their signs and gone out of business. They knew that there must surely be an improvement. They believed in the silver lining of the cloud, but there were few who prepared themselves to take advantage of the sunshine.

The result is that the revival of consumers demand, which is already evident in the wake of unusually good crops and the circulation of money derived from war orders, threatens to create a shortage of goods. This has already been the case in many lines in the United States, and the conditions are much the same in this country, with the crop a few weeks later. The retailer who has his stock in shape to meet this demand will undoubtedly gain advantages in service and in prices—in many lines a revival of demand will undoubtedly emphasize the shortness of supplies, and further increases in price are the logical consequence.

With regard to domestic products the conditions related are likely to apply to a number of lines which have a large sale in Canada under normal conditions, but upon which the plants may now be working to fill war orders. With a fair inquiry from the consumer the volume of business is likely to spread through the retail and wholesale trade, where stocks are short, and the manufacturers will not be able to meet it promptly and fill the conditions of their war contracts. With foreign products it can be readily understood that stocks are low and the cost of importation—when the goods can be secured—has been materially increased. So far the slack demand has had a tendency to keep prices close to normal, but with heavier consumption the shortness of stocks will be revealed and prices will undoubtedly advance in many lines. In this connection it might be recalled that the policy of one of the largest retail organizations in Canada (and in America) after the war broke out was to buy up all the European goods available—at advanced prices if necessary—while the average merchant was rather looking to cancel a portion of what he had booked.

ELIMINATING THE WASTE

THERE is a worthy work being done in vacant lot cultivation by an organization in Toronto known as the Rotary Club. The movement was inaugurated in May last and the result has just been felt. A special committee appointed by the club secured a list of vacant lots throughout the city from real estate owners who agreed to loan them and then selected those which they desired for their work. These vacant lots were assigned to a number of the poorer citizens for a rental of $1; plants and seeds were furnished and it was left to the people benefited to obtain as big a harvest as possible. The idea is a philanthropic one for which the Rotary Club deserves commendation. The financial statement of the vacant lot cultivation committee shows that the income was derived from club hospitality funds, garden fees and members of the club. The expenditures included cultivation of the soil, seeds, plants, seed potatoes, lumber for repairing fences, fence wire, signs, tools, plumbing, etc. The annual report shows that 462 men, women and children who cultivated the lots were the beneficiaries and the expenditure amounted to over $500. There were approximately 19 acres tilled in this way and the total yield is estimated at $5,700.

The times in which we are living have had the tendency to make us all operate on a more systematic basis. Intensive cultivation of this kind which benefits the poorer classes is a most worthy sign of the times. There is no reason why vacant land like this should be allowed to go to waste from year to year, and the work of the Rotary Club of the city illustrates what a little organization will do to reform things.

EDITORIAL NOTES

WHEN A man fails to meet an obligation when it is due, he deliberately takes a stone out of the foundation of his credit.

* * *

MERCHANTS should adopt and endeavor to live up to high ideals in some things, and they will tend that way in all things.

* * *

IF YOU make an appointment, keep it. You cannot get ahead any and keep other people waiting for you. They will not wait.

* * *

IF YOU are late to work you take away from your employer something he has paid for, just as much as if you took his goods or his money.

* * *

SPEEDING up a business means first, developing co-operation among the human units connected with it. You cannot increase your business without team work by the employees.

What Other Papers Say

Items of Interest From Other Papers—In Each Instance Credit is Given to the Paper From Which the Item is Taken—Good and Bad Razors—Wire Rope Required in Russia—Origin of the Word "Tariff"—Service

GOOD AND BAD RAZORS

From the Ironmonger, England.

THERE is more than a touch of irony in a letter which appeared recently in a Sheffield newspaper from a Sheffield sergeant at the Front complaining of the quality of the razors served out to the troops. The writer says: "The hardest thing we have to do is to get a good shave after coming out of the trenches, as the razors we get are no good." He writes on behalf of the members of his platoon, nearly all of whom, he says, are Sheffield men. It is notorious that for many years the War Office had bought only the cheapest razors, and that the men keep them merely for kit inspection, and buy a pair for shaving purposes. The man who gets one of the used razors which are being collected by the Master Cutler may be considered fortunate. These gifts are certainly a mixed lot, but those that are good are very, very good, although those that are bad, are horrid. The good razors, however, are in a great majority, and include many costly patterns, which, after being touched up, are as good as new in practice. The inferior ones are dilapidated rubbish.

WIRE ROPE REQUIRED IN RUSSIA

From United States Commerce Report.

THE petroleum producers of the Baku district are experiencing considerable inconvenience from the scarcity of steel-wire rope. Previous to the war wire rope and wire to be made into rope by Russian manufacturers were imported principally from England. At present, in consequence of the limited exports of steel goods from England, steel-wire rope of British manufacture has almost disappeared from the local markets and its price has risen by 300 to 400 per cent. At a conference held in Baku to discuss this subject it was proposed temporarily to substitute for steel-wire ropes, hemp ropes, which it may be possible to obtain from India. It was stated that Swedish wire rope has been found satisfactory for the local requirements of the petroleum industry.

* * *

ORIGIN OF THE WORD "TARIFF"

From Journal of Commerce, Montreal

THE word "tariff" which has such extensive use in the management of railroads, telegraph, telephone and express companies, and in the levying of import duties (in addition to its quadrennial resurrection by political parties in the United States) had an intersting and somewhat historical origin.

In the year 717 A.D. the Saracens, under Tarik, conquered what is now the kingdom of Spain, from the Visigoths. The conquered territory was then ruled by emirs appointed by the caliphs of Damascus until about the year 1462 A.D. After the great battle of Las Navas de Toloso in the year 1212 A.D., between the Moors and the Christians of Castile, there remained in the hands of the Moors only the provinces of Granda and Cordova, which at that time embraced a considerable amount of territory bordering on the Mediterranean Sea opposite Morocco, in Africa.

On the southernmost point of this land, and close to the strait of Gibraltar, stood the city of Tarifa, which was the last stronghold the Moors disputed with the Christians. During the long period that the Moors held possession of the "Pillars of Hercules" (Gibraltar) it was from the city of Tarifa that they levied contributions from all vessels entering or leaving the Mediterranean. Hence the generic name.

* * *

FARMER'S PROFIT GREATER THAN BANKER'S

From Philadelphia Public Ledger.

NEED for that half-billion-dollar Anglo-French loan is graphically set forth by a committee of eminent Americans. In ordinary times our purchases from France and England very nearly match our sales to them. At the present moment our sales exceed our purchases by about $3,000,000 a day. Much the greater part of this huge trade balance goes directly to the American farmer. His product still outclasses the traffic in war munitions. Wheat and cotton, meat and corn bring many more dollars back to the United States than du Pont powder, Bethlehem Steel or Baldwin locomotives, but the country only hears about these latter articles.

The only way that France or England or anybody else can buy from us is to pay for what they purchase. Today they buy so much and sell us so little that they have no means of paying with their own money. Our country of necessity must collectively extend them credit, just as a merchant or an individual would do. It is not a matter of sentiment, not a question of playing favorites in the war, but a business duty of the bankers, who manage our financial resources, to provide the credit as they have done. Rarely have the banks done a better day's work for the 100,000,000 inhabitants of our land. Their direct profit from it will be but a small fraction of the profit that goes to our millions of farmers and factory employees.

* * *

SERVICE

From the Harvester World.

SERVICE is the most determining factor in securing and holding trade, but it was fairly recently that this was first recognized. A merchant who is now world-famous unearthed the early forms of service when he established rest rooms in his department store for out-of-town customers. It gradually developed that resident customers also are appreciative of attention and certainly deserving of consideration. This idea has developed until now we find the owner of a number of hotels teaching his employes that the guest is their employer. This is pretty true in all business. The customer is our boss, and in the long run hires and fires us.

Companies that have been successful in the big way have been companies noted for their service. The farm machine company which is the most successful gives the greatest amount of service to its dealers in selling the machines and to its customers in using and repairing them.

The dealer with foresight puts more stress on nothing than on service and buys only from companies that can extend service to him and his customers. The thing of most importance to the buyer is the company back of the machine, for service and repairs are as important as good materials and workmanship.

Show Cards You Can Make

Illustrations from Advertisements in Hardware and Metal Used in Making Show Cards —How the Card Acts as an Aid to Sales—Three Attractive Show Card Suggestions.

By T. O. CRAWFORD.

COW chains, axes and ammunition are three popular selling lines just now.

Well-arranged window or interior displays of any of these lines will attract

The illustrations used in preparing the above show card suggestion were taken from an advertisement which appeared on page 7 of the October 16 issue of Hardware and Metal.

considerable attention at this season of the year. The displays, however can be made doubly attractive and have much greater pulling power if accompanied by attractive show cards. The three cards shown this week have been produced from advertisements which have recently appeared in Hardware and Metal. They are only three of dozens which could be made from the advertisements which appear in almost every issue of Hardware and Metal.

Readers who have been following this course know how the illustrations used on each card have been secured. But for the benefit of new subscribers and any who have only recently started in the hardware business, it might be well to state that the illustrations shown on the show or store card suggestions have been taken from advertisements which have recently appeared in the advertising pages of Hardware and Metal.

In every issue of this paper you will find in the advertising pages a large number of very attractively gotten-up advertisements. Some of the advertisements can be used just as they appear in the paper, while others, by making slight changes can be transformed into attractive show or window cards.

The tools used in making the accompanying show card sugestions are No. 6 red sable writing brush; heavy ball-pointed pen, ruler, scissors, paint colors, black carbon ink, white cardboard, paste, pencil, eraser.

The illustration used on the card featuring ammunition appeared in an advertisement on page 17 of the October 16 issue of Hardware and Metal. The heading is shown on the card exactly as it appeared in the advertisement.

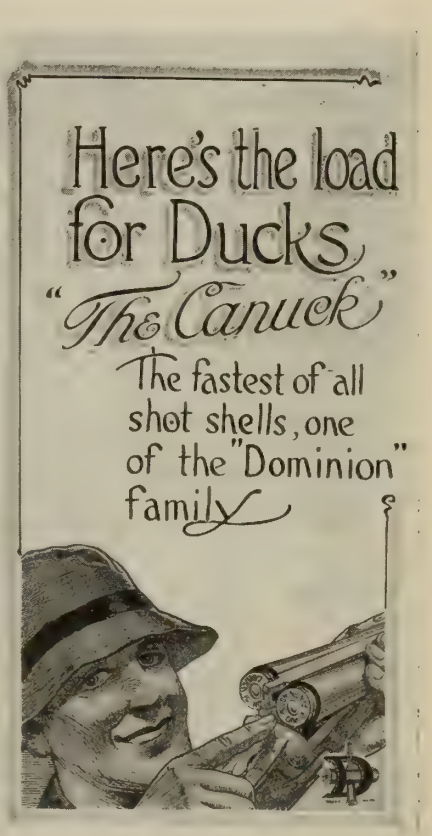
The lettering was done with a ball-pointed pen, and then shaded with light grey.

The balance of the wording on the card was taken from the text matter of the advertisement. The word "Canuck" is a half-script, and the lower lettering is an unfinished Roman type. Both have been made with a heavy ball-pointed pen.

The black ruling was done with the same pen, and the grey with a No. 6 red sable brush.

The illustration used in preparing the "Cow Tie" show card appeared on the front cover of the Oct. 23 issue of Hardware and Metal. The illustration is a

The illustration used in preparing the above show card suggestion was taken from an advertisement on the front cover of the October 23 issue of Hardware and Metal.



The illustration used in preparing the above show card suggestion was taken from an advertisement on page 17 of the October 16 issue of Hardware and Metal.

splendid one for use in show card work and could be used in a number of different lay-outs. The first three words on the card have been outlined with pencil and ink and later filled in with a brush. The remainder of the lettering on the card was made with the ball-pointed pen. The same pen was used to make the blank border. The grey border was made with the No. 6 brush. More than one stroke of the brush was necessary to complete this border. When mounting an illustration of this kind on the cardboard, it is important that the illustration be placed perfectly square on the card, otherwise it will have a lop-sided appearance. The black ruling surrounding the illustration was made with the ball-pointed

(Continued on page 38.)

STANDARDIZED RETAIL PRICES IN RELATION TO THE INTERESTS OF THE WHOLESALER

(Continued from page 32.)

of Secretary Redfield, where he discusses the pros and cons of the matter:

"'Some men, well informed, argue that the fixing of retail prices under conditions where competition in manufacture exists, tends to promote competition. Others say that the refusal to promote the fixing of retail prices tends to monopoly, because in the cut-throat competition certain to follow, obviously the stronger competitor will survive and may eventually have the business in his own hands, for the law forbids the making of agreements to maintain prices and under these circumstances the weakest must go to the wall.'

"Again, let me quote that champion of the people's rights, Mr. Louis D. Brandeis:

"'Americans should be under no illusion as to value or effect of price cutting. It has been the most potent weapon of monopoly, and means of killing the small rival, to which the trusts have resorted most frequently. It is so simple, so effective. Far-seeing organized capital secured by this means the co-operation of the shortsighted unorganized consumer by his own undoing. Thoughtless or weak, he yields to the temptation of trifling, immediate gain; and selling his birthright for a mess of pottage becomes himself an instrument of monopoly.'

"Again, I would like to refer to the case decided in December by the Supreme Court of the State of Washington, and I emphasize the point that this decision has been handed down since any of the decisions by the United States Supreme Court on this question. The Washington court says:

"'It will not do to say that the manufacturer has no interests to protect, by contract, in the goods after he has sold them. They are personally identified and morally guaranteed by his mark and his advertisement.'

Why Standardized Prices Cannot Be Set High

"Let us meet the charge now that if makers are allowed to set the retail prices, that the prices will be set high.

"An intelligent examination of the situation disproves this, not only in theory, but in fact.

"The maker's object is to get a wide consumption for his goods—he wants a big sale—he wants the benefit of the lowered cost of production which results from extensive manufacturing operations. It must be understood that the manufacturer does not receive the retail price. He sells to the wholesaler or to a retailer. Nobody questions, of course, his right to say at what price he will part with his goods to the next man. The controversy comes over his right to say what the next man shall charge the consumer. In other words, it is a question as to whether the manufacturer of a trade-marked product which the public demands on account of his trade-mark, shall say how much profit the retail dealer shall make on that product. Naturally, he will not overpay the retailer, because that would mean an unnecessary high price to the consumer and a restricted consumption. Furthermore, it would provide an opportunity for some one else to come in and set a lower price and get the business. Instead of that, his object will be to set the lowest price which will enable the merchant to sell the goods and have a living profit."

UPWARD TREND OF IRON AND STEEL

(Continued from page 29.)

they can avoid, but at the same time are taking care of their customers as best they can.

Prices on sheets are firmer and a number of advances have been made in the price of certain lines.

Within the past ten days a general advance in prices is the principal feature of the Canadian steel market. The heavy demand for steel has had the natural effect of increasing prices with the result that semi-finished steel and finished products have also advanced. All indications point to a still heavier demand and also higher quotations. Canadian mills have raised their quotations on iron and steel bars to an amount representing an advance of 10c. Reinforcing bars are now quoted at $2.35 bas plus extra for twisting. Warehouse prices are higher in proportion. Pittsburg bars, plates and small shapes for Canadian consumption are now being quoted at 1.40 and steel hoops at 1.60 Pittsburgh.

Wire has advanced 15c and wire nails are up 10c per 100 pounds. Quotations on proof coil chain and electric weld coil chains are higher. Prices on wrought iron pipe are very firm and are expected to advance any time. With the market in the present uncertain condition prices are liable to fluctuate and in some cases orders can only be accepted subject to immediate acceptance. The enormous demand for steel for munitions has been chiefly responsible for the present conditions in the market. Practically every pound of steel that can be made is being used for that or similar purposes. The steel plants are working to capacity to meet the demand which will increase as the shell industry expands and as orders for other steel products increase in volume.

Prices of high speed tool steel continue to advance and the situation is becoming more acute. The most serious feature is the difficult of obtaining supplies in anything like the quantity required. The demand has practically doubled owing principally to the necessity of having high speed tool steel for machining shells. Some producers have withdrawn from the market while others are unable to supply their customers with comparatively small quantities. The scarcity of tungsten, which shows no improvement, is the cause of the trouble, while in addition other alloys have advanced in price as have also the cost of crucibles and labor. A famine in many lines is a probability six months from now. In the meantime many price advances may be expected.

SHOW CARDS YOU CAN MAKE

(Continued from page 37.)

pen. The grey border was made with the No. 6 brush.

Although in the case of the suggestions here offered, grey is the color most used, it is not necessary that the card-writer use this color. Brighter colors may be used if desired. Other suitable colors are gold, light green, light blue, red, etc. The same color should be used for the scrolling as for the borders. The layout of the "ax" show card is almost identical with the layout of the advertisement as it appeared on page 7 of the October 16 issue of Hardware and Metal. The wording and style of lettering, of course, have been changed. The three illustrations of axes, one handled, and two unhandled, appear on the show card in almost the same position as they appeared in the advertisement. The lettering on the card was done with a small brush. The heavy lettering and ruling was done with the No. 6 brush. The small lettering was done with a stub pen.

In making show cards it is a good plan when applying the illustrations to the show cards to lay the illustration face downwards on a sheet of blotting paper. Then apply the paste to the back of the illustration taking care not to get any paste on the face side. A blotter absorbs any paste that goes over the edge of the illustration and eliminates to a great extent the danger of getting any paste on the face of the illustration and thus disfiguring it.

Hardware and Metal requests retail hardwaremen to send in copies of their newspaper advertisements, circulars, catalogues or other advertising matter which they may issue from time to time. Please address all matter to Hardware and Metal, 143-153 University Ave., Toronto.

THE JUNIOR CLERK'S PAGE

Thou Shalt Not Steal Time

By A. F. Sheldon

(Continued from last week)

Don't tell me that it would soon result in a vast "over-production."

I have no sympathy with those who cry "over-production."

The trouble is under-consumption, through lack of capacity to purchase. The "high cost of living" is due to under-production per human unit.

There is no such thing as over-production when millions of people are merely existing and not really living.

The cry of "over-production" is all nonsense while there is one worthy one left who has not enough food, raiment and shelter and then some for the accoutrements of culture.

Don't tell me that employers are generally such a bad selfish lot.

Millions of employers are almost breaking their backs under the burden of proprietorship. These burdens are, in nine cases out of ten, due to the tactics of the time killer.

Don't tell me that they would not increase wages and be glad to do it if everybody would get busy and do his best.

There would then be something besides deficits and borrowed money out of which to pay wages.

Millions of employees are at their jobs just to see "how much they can get out of it" instead of to see "how much they can put into it."

The result is that there is not enough in the business, which is furnishing them the job, to enable the owner of the business to take much out with which to pay big wages.

Go to the bee, thou time killer, study his ways and be wise.

The workers and honey makers in a real beehive have no use for the drones. They kill them off.

If you must kill something, kill the drones, don't kill time for by killing time you yourself become a drone and are deserving of financial death.

An employee in a department store was once standing with his hands in his pockets doing nothing but nothing.

A fellow employee came up to him and said to him, "Take your hands out of my pockets."

The time killer got angry and said, "Mind your own business, I have not got my hands in your pockets."

Whereupon the honey maker answered and said unto the drone, "You are stealing the time of the man I am working for. You are taking the time he has paid you for and idling it away. By doing this you subtract from the profit making power of this business. By subtracting from the power of the business to pay the rest of us, who are doing the best we can, you are literally taking money out of my own pocket and the pockets of your fellow employees; when you kill time standing there with your hands in your pockets doing nothing—when there are plenty of things you could find to do if you were working for this store instead of in it."

Granted, the circumstances of a business beehive employing 100 people. Granted that even ninety per cent. of the employees are rendering faithful service.

Thus do we see the far-reaching evil consequences of the time killer.

Don't kill him literally. Don't commit murder. But unless he mends his ways ostracize him. If you don't know what that means look it up in the dictionary.

Yes, yes, John, my dear fellow, I know full well that there are two sides to this great question.

I know there are employers who in some previous incarnation possibly not remotely removed, undoubtedly belonged to the hog family.

There are still types of the human hog but let me tell you this. He cannot long survive. There are not many of him left. His tribe is rapidly decreasing.

What's more, if I was working for a human hog and he wanted to get great service from me without giving in return I would then build the biggest fire of service possible. I would literally make it hot for him.

Doing so, I know full well that one of two things would be bound to happen to me.

My employer would either become ashamed of himself and begin to distribute the heat of reward or else some worthy employer would find me out.

You cannot hide the light generated by the fire of faithful service under the bushel of any one business.

Let your light (of service) so shine that it shall be seen among men.

If in my prelude of the telling I have seemed harsh upon the time killer and time thief, if perchance you, reader, have unconsciously been one, then remember the wisdom of Shakespeare when he said that we must sometimes be cruel to be kind.

If perchance my words have been very plain, remember it is not that I love the employer or the employee less but truth more and humanity more; and employers and employees are a large part of humanity.

I know that the interests of each are mutual, and may God speed the day when all see it so.

Seeing it so, and the truth of it is self-evident when once made plain, the only sensible thing left for each of us to do is to try it.

And "the way to resume is to resume."

An unwritten law of God has been thundering through the ages since man was made, which if put in writing, would read: "THOU SHALT NOT KILL TIME NEITHER SHALT THOU STEAL TIME."

The human side is always present in both work and business, but we don't always understand it.

Taking a vacation away from one's home and work is often the quickest way to better satisfaction with one's surroundings.

SEND IN YOUR RAZORS.

Razors for the troops are urgently needed now. A shipment will be made in a few days. The troops need them badly. Will you kindly forward without delay all the razors you have collected to Thos. B. Lee, 30 Front St. E., Toronto. Any number from one to one thousand will be gratefully received.

The Card on the Opposite Page Will Bring You Private War Orders for Gillette Razors and Blades

The "boys" at the Front certainly do appreciate the Gillette—and the velvet shave it gives them under even the most unfavorable conditions. You'll be doing them a real service when you recommend the Gillette to customers who want to send "something for Christmas"—for this is one of the few really practical gifts.

Many of the Canadians already have Gillettes—are sharing them freely—and so will need a generous supply of blades. Don't let your customers overlook this.

We are sending you one of the "Dugout" Counter Cards, 11"x14", shown on the page opposite. Make it the centre of a strong Gillette display in your window or on your counter, and just watch it work for you. If you want extra cards, write us.

Gillette Safety Razor Co.

of Canada, Limited

The Gillette Bldg., Montreal

Will Your "Boy" Spend Christmas "Somewhere in France"?

Then help him spend it Merrily!

Lieut.-Col. Canon Almond, Senior Chaplain of the 1st Division Overseas, says: "The boys want books, "smokes", good razors and toilet articles"—the Gillette Safety Razor ranks as a warm favorite, for one of the real luxuries of trench life is a clean, comfortable shave—and it is even more appreciated by the wounded in the hospitals.

It's a luxury the lucky ones share with their pals, so send along plenty of Blades. If he has a Gillette already, a few boxes of blades will go far toward making him the most popular man in his Company.

Choose a Gillette Set to-day. Our Distributors will arrange through us for delivery at the Front.

Gillette Safety Razor Co. of Canada, Limited

GILLETTE BLDG., MONTREAL.

TRADE Gillette MARK

EVENTS IN THE TRADE

Hardware Burglarized

Fort Frances, Ont.—The Wells Hardware Co. was burglarized, and guns, cutlery, and ammunition to the value of $300 taken.

Obituary

Iver Johnson's Arms and Cycle Works announce the sudden death of Mrs. Iver Johnson, their trustee, on Tuesday, October 12th, 1915.

Enlist for Service

Fergus, Ont.—Members of Beatty Bros.' staff who have recently enlisted for active service are W. Williams, T. McLean; B. Glenfield, Lou Ready.

Hardwareman Married

Cargill, Ont.—The marriage took place here recently of F. F. Balsdon, hardware merchant, to Miss Phyllis Clark, daughter of Mr. and Mrs. W. J. Clark, of this town.

Business Changes

Campbellford, Ont.—D. W. Douglass, hardware, has sold out to Owen & Birmingham. The latter firm will move their stock to the Douglass store. Mr. Douglass intends to go into the garage and auto supplies business.

New Branch Store

Lethbridge, Alta.—The Hayr Hardware Co. have opened a branch store at the McKeown Hardware Co.'s old stand at the corner of Fifth Street and Fourth Avenue, where they have moved certain departments of their store. H. Collier has joined the staff, and will be at the new store.

Personal

F. Morton Morse, president of the Miller-Morse Company, Winnipeg, Man., leaves this week for another trip to Europe. Mr. Morse was recently a passenger on the Cunarder Orduna at the time the liner was fired upon by a German submarine, whose torpedo missed the boat by ten feet. He has three sons at the front, whom he hopes to visit.

Industrial

Harriston, Ont.—The Harriston Stove Company has under construction an addition to their plant. The building will be 100 x 70 feet.

Hespeler, Ont.—A. B. Jardine & Co. have started to erect an addition 50 x 60 feet to their plant.

Capt. Crowdy Killed

A cable received in Montreal on Friday last, announces the death of Capt. C. Hutton Crowdy, of the 13th Royal Highlanders of Canada, in action, "somewhere in France." The message was sent by Lt.-Col. F. O. W. Loomis, and simply read, "Regret advise Hutton killed last night. He was buried at Armentieres on the 21st. Please accept my sincere sympathy. Loomis." It is believed that the same shell which killed Capt Crowdy, also killed Capt. Curry, son of Senator Curry, president of the Canada Car & Foundry Co.

Capt. Crowdy was the son of George J. Crowdy, of James Hutton & Co., Montreal, and was twenty-six years of age. He was educated in Montreal and in England, later being engaged in banking, but latterly entering into business with his father, who represented Joseph Rodgers & Sons, Sheffield, England. Capt. Crowdy was a man of fine physique, over 6 ft. 4 ins. in height, and a splendid athlete. The deceased officer was one of the first to offer his services, and has seen much fighting, having been with the 13th Highlanders since shortly after they went to the front, writing recently that he was one of eight surviving officers. Letters from other officers, and the reports of returned men, all spoke of his courage and capacity. It was said that he was absolutely cool in the most difficult engagements, setting an example of duty that was an inspiration to the men under him. It was typical of the pathos of war that within a few hours of the arrival of the cables announcing Capt. Crowd's death, several letters from him were received by his family, in which he wrote most cheerfully of his work, and the prospects of the British forces.

SHORTAGE WIRE CABLE

Size for Ammunition Box Handles Cannot Be Secured

The specifications in connection with many of the ammunition boxes being made in this country call for a handle made of quarter-inch galvanized wire cable. Such has the demand been for this particular material that it is practically impossible to secure delivery of it to-day on a shorter dating than two months. Canadian manufacturers have declined to take orders for cable which they are themselves manufacturing into handles.

JAS. RAMSAY PRESIDENT

Succeeds Late J. R. Henderson as Head of Paint Association

At the meeting of the Canadian Paint, Oil and Varnish Association held at Montreal this week when the price policy of Canadian paint manufacturers for the spring campaign was decided upon, James Ramsay, Sr., of the firm of A. Ramsay & Son Co., was elected to the presidency. He succeeds to an office made vacant recently through the death of Joseph R. Henderson, late president Brandram-Henderson, Limited. Mr. Ramsay is one of the best known figures in the Canadian paint trade, and his long experience well fits him for the duties of the position.

BARBED WIRE FOR ALLIES

Southern Firm, Which Got Busy, Landed Big Business

It is a far stretch from Canada to Alabama to get an illustration of what may be done in securing war orders, but the enterprise of the Gulf State Steel Company at Gladsden, Ala., in going out for business in barbed wire, is an interesting example of what may be done when conditions are met. Hardware and Metal learns that the depressed conditions throughout the South had interfered seriously with the operations of the company referred to until the manager, an Englishman, went across the Atlantic and got into touch with officials on the other side. The result was that he found what was wanted in the war of barbed wire for trench entanglements, and, being able to assure successful production, got substantial orders; in fact, it is stated that the plant will be busy for a couple of years. As has been stated before in connection with barbed wire for war purposes, it must be made of unusually thick wire, with barbs an inch or an inch and a half long and two or two and a half inches apart.

It is announced that a brass and iron foundry will be established at Bathurst, N.B. Frank and Percy McCallum, formerly of Chatham, are at the head of it.

The by-law to grant assistance to the Glass Garden Builders, Georgetown, Ont., has been passed. The company will erect a factory for making green houses.

Hardware Letter Box

Crescent Arms Co.

McMurtry Hardware Co., Galt.—We have a gun marked Crescent Arms Co., Norwich. Can you tell us where the town of Norwich is, or if this is just a trade brand used by a manufacturer. We wish to secure repairs?

The address wanted is Crescent Arms Co., Norwich, Conn.—Ed.

"Kitchen Chef" Range

In response to an inquiry for the name of the maker of the "Kitchen Chef" range, in the issue of October 9 it was inadvertently stated that maker's name was Record Foundry and Machine Co., Moncton, N.B. The item should have stated that the manufacturer of the "Kitchen Chef" is the Enterprise Foundry Co., Sackville, N.B.—Ed.

Lead Tubes

Subscriber, A. W. S., Ottawa.—Kindly advise where I can purchase lead tubes similar to those used for holding tooth paste, etc.

Lead tubes are made by New England Collapsible Tube Co., 22-23 Waller St., New London, Conn., and A. H. Wares & Co., Chester, Pa.—Ed.

ADDRESSING OF MAIL FOR TROOPS AT FRONT

In order to facilitate the handling of mail at the front and to insure prompt delivery, it is requested that all mail be addressed as follows:

(a) Regimental number .....
(b) Rank .....
(c) Name .....
(d) Squadron, Battery, or Company .....
(e) Battalion, Regiment (or other unit), Staff appointment or department .....
(f) Canadian contingent .....
(g) British Expeditionary Force——.
(h) Army Post Office, London, England .....

Unnecessary mention of higher formations, such as brigades, divisions, is strictly forbidden, and causes delay.

Simms' Brushes

T. S. Simms & Co., St. John, N.B., recently issued catalogue No. 41, consisting of 210 pages, featuring Simms brushes and brooms. The new catalogue is exceptionally attractive, and contains several hundred splendid illustrations of the firm's products. Copies of the catalogue will be mailed on request.

St. John, N.B., Notes

A wedding of interest to friends in the trade in Canada took place recently in St. John, when Miss Nita, daughter of Mr. and Mrs. F. C. Kaye, became the bride of George Clifford McAvity, manager of the Mianus Motor Works here. The groom is a son of George McAvity, of T. McAvity & Sons. The ceremony was performed in Trinity Church by Rev. L. R. Sherman. A motor trip followed the wedding. Mr. and Mrs. McAvity will reside in St. John, enjoying the best wishes of many friends for future happiness.

General sympathy will be extended to Senator Nathaniel Curry, of Rhodes, Curry Co., Amherst, N.S., in the loss of his son, Capt. Leon H. Curry, who has been killed in action in France. He was with the 43rd Highlanders. Capt. Curry, who was 30 years of age, had many friends in these parts. He resided in Montreal, where he was vice-president and manager of Canadian Foundries.

A "travellers' platoon" is being organized in St. John for overseas service, and representatives of local hardware houses are interesting themselves in the movement with members from other concerns. Only commercial travellers are to be accepted for service with the unit, which it is planned will be entered for duty with the 104th Battalion under Lieut.-Col. Fowler. Already a nucleus has been had with the signing of more than a dozen "knights of the grip" for foreign duty. Local business houses are aiding the scheme as much as possible.

Local merchants were instrumental in the success of a big movement here recently in the interests of the patriotic fund. It was what was described as a $50,000 patriotic auction" and ran for one week. The returns are not yet completed. The promoters included members of local business houses with local societies, and all worked for the good of the cause, night after night, helping in the selling of the enormous quantity of goods received, after having already aided in its sorting and distribution. Two large rinks were used and the goods donated, which included merchandise of almost every description, were departmentalized. A hardware booth attracted especial interest, displaying tools, stoves, ranges, vacuum cleaners, clocks, ornaments, nails, sporting goods, and a wide range of other articles to be found for sale in the modern hardware establishment. Clerks from local hardware houses were present and assisted greatly. The auction was a splendid success.

Among the recent recruits for the 104th Battalion was Edward F. McDade, of St. John. He enlisted in Fredericton, where he has for some time been a member of the office staff of the hardware firm of James S. Neill & Son.

Trade Inquiries

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

1121. **Tools, machinery, hardware, etc.** —An agent at Genoa, wishes to hear from manufacturers of tools, machine tools, machinery, hardware, etc., G.G.R.

1122. **Lamp glasses, globes, etc.** Manufacturers of lamps, etc., in Italy wish to buy lamp glasses, globes, etc., general fittings and supplies for lighting, lamp-wicks, hardware, household utensils, F.S.S.

1123. **Incubators.** — An agent at Palmero, Italy, wishes to represent in Sicily makers of incubators for poultry rearing. P.I.C.

1126. **Files, steel wire and sheets, machinery.**—Merchants in Italy are open to buy (and would after trying goods be disposed to accept agency), files, steel wire and sheets, machine tools, wood-working machinery, tools, drills, metal-working machinery. Branches at Milan, Genoa and Rome. T.J.T.

1127. **Electrical materials and machinery.**—An agent at Rome would buy for own account or sell on commission with del credere, electrical materials and machinery. Represented Berlin firm for fourteen years. R.D.P.

1130. **Sundries, brass smallwares, etc.** A toy manufacturer at Bologna wishes to hear from Canadian makers of the above. B.A.L.M.

1131. **Italian agents.**—Forwarding agents at Genoa, having opened a department for the representation of foreign firms and having their own travellers, are anxious to hear from manufacturers and shippers of raw materials for industry and articles of any sort. G.G.P.

1132. **Oils, soap, etc.**—Agents at Genoa, have openings for edible oils, oils and greases for soapmaking, soap, sulphate of copper and whale oil. G.C.M.

1133. **Stoves, spirit lamps, etc.**—A wholesale and retail firm at Genoa formerly selling the German article is open to receive quotations from manufacturers of petrol and spirit stoves, spirit cookers, spirit lamps, etc. G.O.R.

1134. **Building materials, sanitary ware, etc.** —An engineer at Rome seeks agencies for Italy in building materials, sanitary apparatus and ware, iron girders, electric lighting materials, woollen piece-goods, and waterproofs. R.N.G.

1135. **Paraffin paper.**—A correspondent at Turin wishes to buy paraffin paper.

1136. **Tinplates, sheet copper, leather, etc.**—An agent at Messina desires to get into touch with manufacturers or shippers of tinplates, sheet copper, leather, boots and shoes, oils and greases for soapmaking. M.G.E.M.

1138. **Coal, foundry coke and pig-iron.**—An agent at Genoa has openings for the above articles.

1139. **Hardware, brassware, celluloid and tools** are required by an agent-traveller at Genoa, working North Italy. G.L.P.

1140. **Steel, files, drills, etc.**—An agent in Genoa would represent steel manufacturers (for tools), also files, drills, springs, especially for motor cars and safety valves. S.L.G.

1142. **Wire.**—A British firm is open to buy paper machine wire—mesh 40 feet by 6 feet and 40 feet 1 inch by 6 feet 10 inches. Prices should include delivery Birmingham. (Sample can be inspected at the Department of Trade and Commerce, Ottawa.)

1144. **Broom stocks.**—A British firm with large connections is open to act as selling agent for the following, birch preferred:

(a) Hair broom stock, plain. Sizes 10½-in. to 14-in.
(b) Hair broom stock, striped. Sizes 10½-in. to 14-in.
(c) Bass broom head, without bevel on sides or ends. Size 11-in. to 16-in.
(d) A baluster stock. Size 7-in. to 10½-in. in blade.

Prices delivered Liverpool. (Samples may be seen at the Department of Trade and Commerce, Ottawa.)

1146. **Structural steel.**—A London firm of constructional engineers asks to be placed in touch with Canadian rolling mills which can supply mild steel sectional material and joists.

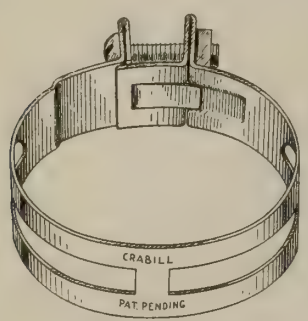
1147. **Glass bottles.**—A Lancashire firm desires the addresses of Canadian manufacturers of second-class type of glass bottles.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

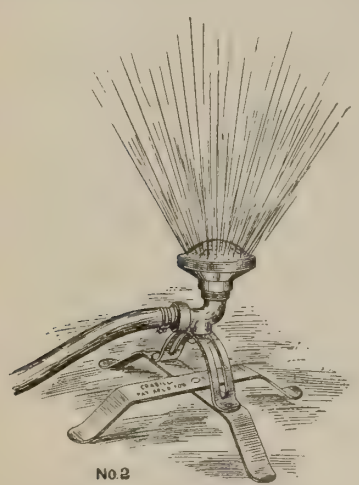
CRABILL HOSE CLAMP AND SPRINKLER

Crabill Hose Clamp Co., Battle Creek, Mich., offers to the Canadian trade the Crabill hose clamp, here illustrated. The makers claim that the construction of the clamp provides for additional strength at the tongue—the point where



The Crabill Hose Clamp

strength is needed most. The metal is embossed to take care of the tongue. This, it is claimed, gives a smooth inside circle that will not injure the hose. The clamps are made in various sizes, in both brass and steel. Special sizes can be made when needed. The company also offers the Crabill lawn sprinkler. The sprinkler has a round edge steel base, which, it is claimed, cannot be tipped over or broken. The sprinkler head

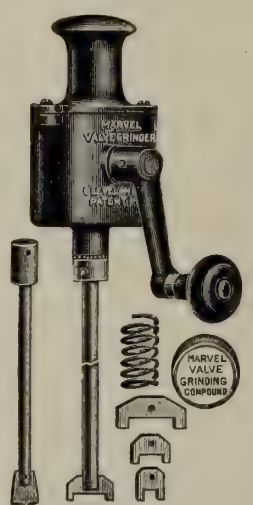


The Crabill Hose Sprinkler

is made of heavy spun brass, in two pieces, with a screw top. By making a screw top with rubber gasket, it is said the danger of leakage is eliminated, and the sprinkler can be taken apart and cleaned quickly. The spray from the sprinkler is very fine. The sprinkler is adjustable for the purpose of sprinkling a square corner or a terrace, or directly upwards if desired. The makers claim that when adjusted as a fountain the sprayer will spray a 30-foot circle with from 40 to 50 pounds pressure.

VALVE GRINDER AND SOCKET WRENCH

The Marvel Accessories Mfg. Co., West 6th Street, corner Lakeside Ave., Cleveland, Ohio, offers to the trade the Marvel valve grinder, here illustrated.



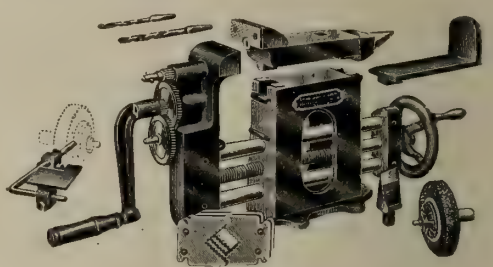
The Marvel Valve Grinder

The makers state that the Marvel grinder saves considerable time in grinding valves, makes a perfect smooth seat, always laps—does not stop at the same spot, cannot leave rings or ridges, insures good compression. To operate, turn the handle in one direction, and the valve turns back and forth, always a little further in one direction than the other. There is no rocking, and the makers state, you don't have to stop every few turns to lift the valve.

The company also offers the Marvel adjustable socket wrench, which, it is claimed, grips like a vise mutilated, rounded or odd-sized nuts, and gets into places inaccessible to the ordinary socket wrench. The wrench is drop forged steel, and consists of three parts.

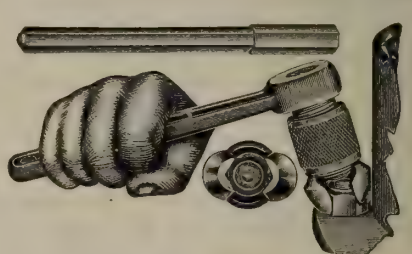
THE STEWART HANDY WORKER

Chicago Flexible Shaft Company, Chicago, Ill., offers to the trade the Stewart handy worker, a combined machine for home workshop, farm workshop or garage. The tool is one which



The Stewart Handy Worker

combines several practical working devices in compact form. All that is necessary is to bolt the device to a table or work bench and it is ready for use. There is a strong powerful vise, with jaw opening of 4½ inches. The jaws are 4 inches in width, and will hold any wood or metal article firmly and securely. There is a pipe vise which will grip pipe up to 1½ inches in diameter. The anvil is strongly and substantially made, and a steel cutting hardie for cutting wire or steel. There is also a drill press, which can be operated at two speeds. There are two drills and a rest to hold the job to the drill. There is a corundum grinding wheel that will keep the edges of wood or metal cutting tools, knives, etc., in good shape. The wheel has three speeds—direct, 4 to 1, and 16 to 1. The weight of the complete outfit,



The Marvel Socket Wrench

boxed for shipment, is 90 pounds. A descriptive booklet will be mailed upon request.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

The Markets at a Glance

Further price changes of an important and far-reaching character have taken place this week. One of the chief advances is the further advance in wire products, including wire, staples, etc. Wire nails have advanced 10 cents per keg, and if present selling prices of nails were based on the prices now being quoted for wire rods, even higher prices would be in effect. Even higher prices may be expected on nails, unless owing to the slack demand, and the fact that some nail makers are protected on wire rods at much lower figures than those in effect to-day, the price is kept down. Many lines of iron and steel products have advanced considerably. Screw and strap hinges, tee, and strap hinges, anvils, vises, tarred felt roofing, padlocks, powder, builders' hardware and other lines have been advanced during the week.

The new paint quotations for which the trade has been looking for some time, have gone into effect, and a decline of ten cents per gallon has taken place on a number of lines. Turpentine is on the up-grade, with remarkable speed, and firmness in linseed oil continues. There is a scarcity of many lines of iron and steel goods and a steel famine six months hence would not be unexpected. The continued warm weather has had a tendency to prolong the sale of late summer and early fall goods, but winter lines are moving slowly. The advent of cooler weather would undoubtedly cause a sudden rush of business for late fall and winter goods. There is considerable price-cutting going on in some lines, particularly sheets, etc. The market reports this week are cram full of interesting and important information for the hardwareman.

MONTREAL

MONTREAL, Oct. 28.—Price readjustments to higher levels, involving many important lines in the hardware, metal and paint trades, have been made in Montreal this week, the activity in this respect being more pronounced than in any period since the reorganization after the application of the special war tariff. Of chief importance is the further advance in wire, affecting plain steel and hay wire, but not galvanized fence wire; the increase is on a basis of 15c, and includes staples and other products. Wire nails have advanced 10c to a base of $2.60 in sympathy. Important also is a further advance in steel as the result of consumption for war purposes; mild, sleigh shoe, tire and toe calk steel are up 10c, and high-speed steel has soared to $1.50 and higher. The Montreal Association has decided upon an increase in builders' hardware of 25 per cent. on the net cost. Yale and Towne locks are now on a basis of 37½ per cent. and padlocks 50 per cent. The discounts on light and heavy tee and strap hinges has been made 70 per cent. and 40 per cent. respectively, and screw hook hinges have been advanced 25c cwt. English anvils and vises are up 1c a pound in some lists; tarred roofing has been advanced 15c; blasting and snapshot powders are higher, and oakum is fractionally increased.

Important Announcement.—In the paint trade the important announcement of the manufacturers as to spring business covers a reduction of 10c on some lines of ready-mixed paints, but the recent advance in raw materials renders the situation very firm. Linseed oil has advanced, and turpentine is soaring. Metals are generally quiet, although antimony has recently shown startling advances. Tin is firmer; spelter steady to strong on spot; lead ¼c higher, and copper steady. Solder shows some advance on last week's reductions.

Business continues satisfactory, with maintained activity in the country districts, and a better tone in the city in heavier lines. Unseasonably warm weather is interfering somewhat with the call for winter goods, and it is felt that this is particularly the case in the city. Altogether the trade sentiment is very favorable.

Tin.—The tone of the tin market, both locally and at New York and London, is distinctly firmer, with the quotations here holding at 40c-41c. American figures for the week are fractionally higher. The foreign situation continues to improve, but why is not just clear, unless it is that the Balkan developments have caused some uneasiness as to London arrivals from the East through the Suez Canal. From the statistical standpoint there are arguments that the position of the supply of the metal in relation to consumption is practically the same as it was a year ago after a nine months' period. New York reports demand as being very quiet, with evidences that there are few buyers looking for spot supplies; the firmness there is on London influences.

Spelter.—Local spot quotations are steady at 19c-20c, but there are easier prices on futures. However, there has been somewhat more interest in futures indicated in the recent transactions in New York, and there have been some advances for first quarter business, while November and December offers have received less attention on the development of weakness in London. The whole situation depends upon the war munitions consumption; the galvanized iron trade shows little, if any, improvement.

Lead.—The local lead quotation has advanced ¼c to 6½c-6¾c, and the tone is inclined to be firm. The increase came with a like advance on the part of the American Trust, which now quotes 4¾c, a figure which is followed by outsiders and second-hands. New York reports the situation firm on the recent advance, but that there is very little inquiry for the metal.

Copper.—The market for copper is steady, and the quotation of 21½c continues. The American situation is holding fairly well, but it is noted that the attitude of the large consumers is to continue their policy of only buying against orders they book, and this is not of sufficient volume to keep the producers entirely comfortable, as stocks are increasing on their hands.

Antimony.—There is an advance in the nominal quotation for antimony from 35c to 37c. It is expected that further increases will be made, as the New York quotation for Japanese, Chinese and American has recently jumped 5c. In the latter market it is stated that recent buying with attendant

advances has been for Canadian account and that American consumers were little affected, having covered themselves in advance.

Aluminum.—There is little new in the aluminum situation, the high price of the metal having taken it beyond the field of general commercial uses. The quotation of 60c is somewhat easier, being a decline of 5c.

Solder.—A firmer tone has developed in the solder market during the week, and there has been another readjustment of prices to higher levels. The present quotations are:

Half-and-half	24c-26c
Strictly	26c-28c

Advances in Steel.—The demand for steel in the manufacture of war munitions has resulted in further advances in this market, the prices on mild, sleigh shoe, tire and toe calk being increased 10c, while there is a big jump in the quotations for high-speed steel, for which there is a strong call. New quotations are:

Mild steel	2.35
Sleigh shoe steel	2.40
Tire steel	2.45
Toe calk steel	2.95
High-speed steel	1.50

Iron is Firm.—Iron is also strong and, although there are no increases recorded, the base for bar at $2.20 is very stiff, and further advances are to be looked for. Forged, refined and horseshoe iron are also very firm.

Copper Products Firm.—With the copper market remaining steady the new prices on bars, sheets and other products, announced last week, are well maintained. Quotations follow:

Bars, ½ to 2 in.	$30.50
Plain sheets, 14 oz., 14 x 28 in., 14 x 60 in.	31.25
Copper sheet, tinned, 14 x 60, 14 oz.	34.75
Copper sheet, planished, 14 x 60, base	41.25
Braziers' in sheets, 6 x 4 base	30.50

Lead Products.—With an advance of ¼c on lead in both American and Canadian markets, the quotations on products of the metal are firmer, although there is no indication of an increase in prices unless the raw material goes higher. Quotations on pipe and sheets follow:

Lead pipe	$0.09½
Lead waste pipe	0.10½
Sheets, 3-lb. sq. ft.	8.25
Sheets, 3½-lb. sq. ft.	8.00
Sheets, 4 to 6 lbs. sq. ft.	7.75

Cut sheets, ½c per lb. extra.
Cut sheets to size, ¾c per lb. extra.

Black Sheets.—Following the higher prices in the market for black sheets, referred to last week, the situation has been firm, and there is talk of further increases in metal roofing materials in general. The following quotations indicate a slight spread in prices as between hardware dealers and metal dealers, being largely the difference between large and small orders:

	Ind.	Assoc.
10 gauge	$3.00	$2.75
12 gauge	3.00	2.80
14 gauge	2.85	2.60
16 gauge	2.85	2.55
18-20 gauge	2.85	2.60
22-24 gauge	2.85	2.70
26 gauge	2.95	2.75
28 gauge	3.00	2.80

Nails Advance.—In common with wire products in general, there has been an advance in the price of wire nails of 10c. The Montreal base is now $2.60. The price of cut nails is unchanged at $2.50. The discount on miscellaneous wire nails continues at 75 per cent.

Staples Advance.—Wire staples have also been advanced, and the quotations for bright and galvanized in kegs and boxes are now as follows:

Fence staples, galvanized, in kegs.	$4.00
Fence staples, galvanized, 25-lb. boxes	4.10
Fence staples, bright, in kegs	3.00
Fence staples, bright, in 25-lb. boxes	3.25

Smooth Steel Wire Advances.—An advance of 15c on smooth steel wire brings the basis for No. 0-9 gauge to a basis of $2.75, with the usual additions as follows; 10 gauge, 6c; 11 gauge, 12c; 12 gauge, 30c; 13 gauge, 30c; 14 gauge, 40c; 15 gauge, 55c; 16 gauge 70c—all extra.

Fence Wire.—Galvanized fence wire is not affected by the advance, but plain wire fencing goes up 15c. Following are quotations:

O and A, No. 10	$2.91
O and A, No. 11	2.97
O and A, No. 12	3.05

Hay Wire Advances.—The wire advance affects hay wire to the extent of 15c. Quotations for coils are now as follows: No. 13, $2.80; No. 14, $2.85; No. 15, $2.95.

Locks Advance.—For the Yale and Towne line of locks, etc., the Montreal wholesalers have adopted a discount of 37½ per cent. On padlocks the discount for the future will be 50 per cent.

Change in Clippers.—A change has been made in the prices on new market horse clippers. The new quotation, as set by the Montreal trade, is $1.35.

Builders' Hardware Advances.—An important decision has been reached by wholesalers with regard to builders' hardware, an increase being made of 25 per cent. on the net cost.

Shovels.—It is reported in the trade that there is a shortage of certain lines of raw materials entering into the manufacture of metal shovels, and that deliveries may be interfered with. This condition of affairs appears to apply particularly to snow shovels, which should be moving shortly.

Advances in Oakum.—There have been general advances recently made in the prices for oakum. This has affected the line handled by hardware dealers for the plumbing trade, the advances being from ¼c to ½c a pound.

Galvanized Sheets.—With spelter tending to somewhat higher levels on the recent movement in the American market, the situation as regards galvanized sheets is somewhat firmer, and it appears that the readjustment to lower levels has been neglected for the time being. Conditions, however, are still somewhat unsettled.

Screw Hook Hinges Advance.—An advance in hinges has been made covering several lines. Screw hook and strap hinges have been increased ¼c per pound as follows:

Under 12 in., per 100 lbs.	$5.25
Over 12 in., per 100 lbs.	4.50

Tee and Strap Hinges Readjusted.—As between net and list prices and discounts, together with some recent advances, the quoted figures on heavy and light tee and strap hinges, quotations have become somewhat confused and misleading. For this reason prices have been brought to an adjustment on the present net basis as follows:

Heavy—	Strap.	Tee.
4-inch doz. pairs	$1.14	$0.96
5-inch doz. pairs	1.38	1.11
6-inch doz. pairs	1.50	1.14
8-inch doz. pairs	2.04	1.53
10-inch doz pairs	3.60	2.52
12-inch doz. pairs	4.51	4.14
14-inch doz. pairs	5.10	4.54
Light —		
3-inch doz. pairs	0.30	0.30
4-inch doz. pairs	0.36	0.33
5-inch doz. pairs	0.42	0.39
6-inch doz. pairs	0.51	0.45
8-inch doz. pairs	0.75	0.54
10-inch doz. pairs	1.05	0.72
12-inch doz. pairs	1.80	1.35
14-inch doz. pairs	...	1.65

These figures cover a discount of 70 per cent. on light and 40 per cent. on heavy off list.

Powder Advances.—The effect of the war demand for explosives is to be found in recent advances in the prices of powder. Blasting powder and snapshot powder, with which the trade is chiefly concerned, have both been affected, the former to the extent of 10c a keg and the latter about 15 per cent. all round.

Anvils and Vises Advance.—In the advance of the metals certain products are being affected, and this particularly applies to imported lines. One of the Montreal wholesale firms reports an increase of 1c a pound in prices on English anvils and vises.

Roofing Felt Higher.—Higher prices are being quoted for tarred felt paper,

affecting the seven-ounce, ten-ounce, and 16-ounce weights. The price is now given as $2.15, as against a former quotation of $2.

Arms and Ammunition.—The re-sorting orders on ammunition continue brisk and very satisfactory. Although the weather has been unseasonably open, it is evident that the fall of the leaves has created better conditions for the sportsmen, and that there are a large number out with their guns.

Mechanics' Tools.—The demand for mechanics' tools continues to be altogether satisfactory, and it is evident that this business in this line is likely to continue brisk, with orders being placed for larger shells and other more varied forms of munitions of war. There may be some difficulty in getting delivery in some lines if the demand continues.

Seasonable Lines. — The unusually open weather continues to interfere with demand for some of the winter lines, such as skates, sleigh bells, snow shovels, etc.; but it is reported by one house that the call for meat choppers and weather strip has been particularly good.

Stoves and Furnaces.—Cold weather would undoubtedly quicken the demand for stoves, but dealers report that, considering the conditions prevailing, there is a very satisfactory movement of both stoves and furnaces. Business compares very favorably with a year ago, but, of course, is not up to normal.

Utensils.—There is still a good demand for utensils of the more useful variety, especially in the country districts. There has been some reduction in boiler ranges, but, with the recent renewed strength in spelter, it is possible that quotations will strengthen again. From the way spelter is acting, it looks as though it would be some time before the manufacture of many galvanized utensils can be successfully carried out to meet competition of cheaper materials.

TORONTO

TORONTO, Oct. 21.—Price changes of importance have been noted again this week and those in a position to know state that many others will follow in the near future. October business with the local jobbers has been very satisfactory, although owing to the continued fine weather there has been an absence of demand for late fall and winter goods. With the advent of cold weather there will be a sudden rush for winter supplies. The decline in paint, expected for some time, has taken place this week and is reported in the weekly paint market report.

The general improvement in trade continues and an optimistic spirit prevails in business circles. The crops, which are an important factor in the development of this country, have been so bountiful this year that they will add materially to the wealth of the community generally and inspire a greater feeling of confidence in manufacturing circles. In addition, the large volume of war orders will contribute to place many of our industries on a very satisfactory basis. The trade returns for six months ending Sept. 30 are very encouraging. The figures show a satisfactory advance over the corresponding period of last year. The export of manufactured goods for September was very heavy, reaching a total of over nine million dollars compared with a total of a little over five millions for Sept., 1914. Imports also showed an improvement. The duties collected on imported goods show an increase of approximately one and one-half million dollars for the six months compared with the corresponding period of 1914.

Developments in the shell industry are being awaited with the greatest interest. A new system of placing contracts for the large calibre shells will be introduced. Canadian manufacturers are being asked to submit tenders for 6-in., 8-in. and 9-in. shells, thus placing the business on a competitive basis. It is reported that orders amounting to $80,000,000 for the larger shells are about to be placed by the British Government through the Shell Committee.

Pig Iron

A large tonnage of low phosphorus pig iron is being imported from the States for steel making. Foundry grades are not so active but have advanced in price. Hamilton and Victoria brands are now quoted at $21 per ton, Toronto. Standard low phosphorus is being quoted $26 at furnace.

Old Material

The market is dull, there being little demand for domestic material with the exception of aluminum, which is very scarce. Buying is of a speculative order and consumers are slow in taking deliveries. Prices are firmer and higher for some materials. Scrap copper has advanced 25c to 50c per 100 lbs. according to grade. No. 1 composition turnings are now quoted at $10. Heavy melting steel is in fair demand and has advanced to $9.50, while machinery cast iron is also higher at $12.

Machine Tools

There is little change to note in the machine tool situation although there will be considerable activity when the orders for the larger calibre shells have been placed. Tenders are being submitted by manufacturers for these shells and the orders will no doubt be placed with as little delay as possible. The shells will be 6-in., 8-in. and 9-in., and heavy lathes will be required to machine them. There is still a steady although lighter demand for tools for 18-pdr. shells, together with a fair movement in second-hand equipment.

Metal Market

The metal market is dull, but prices are keeping steady. The sterling exchange situation, although somewhat easier, continues to have a depressing effect on the metal market. The New York market has been more active recently and is showing a tendency to react in an upward direction. The London market is quiet and steady. The scarcity of aluminum continues and prices have an upward tendency. Spelter is a little higher due to strength in both London and New York. The copper market is easier but, with the recent large new orders for munitions, a buying movement is expected with a possible advance in price. The tin market is firm but unchanged. Antimony and lead are firm but unchanged.

Tin.—The market is firmer but quiet. The uncertainty of the British export-tax question has restrained activity and probably prevented a good movement. Tin is now quoted at 37½c per lb.

Copper.—The market is dull and easier but prices are unchanged. The copper position, however, is a strong one as large orders for munitions continue to be placed which will result in a heavy demand for this metal. Consumers are buying on a hand-to-mouth basis, but may be forced to cover their requirements in a rising market. Producers seem to be in control of the situation, and, as copper must be had by munition manufacturers, higher prices are therefore more probable than otherwise. Locally copper is unchanged at 19½c per pound.

Spelter.—The market is higher both in London and New York, and the situation has improved. Spelter has advanced ½c locally and is now quoted at 17½c per pound.

Lead.—The market is firm with local quotations at 6¼-6½c per pound.

Antimony.—The market is very firm, and there is a scarcity of spot metal. Quotations are unchanged at 35c per pound.

Aluminum.—Prices are nominally unchanged, but the scarcity of this metal is rather more apparent, and holders are inclined to ask higher prices. Local quotations are nominal at 60c per pound.

Hardware Lines. — Unusual warm weather for this season of the year has checked to a certain extent the regular fall business. However, local jobbers state that business is continuing fairly satisfactory, the movement of goods for October showing an improvement over a year ago. Staple hardware lines are moving well, also seasonable goods, but a decided falling off is announced in winter lines that had commenced to move

	Per Imp. gal.
1 barrel lots	80c
2 to 4 barrel lots	79c
5-gal. lots	87c

Linseed Oil.—Linseed oil is firm at last week's quotations and the price of 77c for raw and 80c for boiled seems to be the ruling price on the London markets. It is expected that reductions will take place when the Western crop is marketed, but up to the present time weather conditions have been against the marketing of the grain. Prices are uniform among local jobbers at the following figures:

	Per gal. Raw	Boiled
1 to 2 barrels	77c	80c
3 to 5 barrels	76c	79c
6 to 9 barrels	74c	77c

Wire Nails.—A new base price of $2.55 per keg is being quoted on wire nails. The recent advances in the price of wire rods is responsible for the advance in the price of nails. It is not unlikely that further advances will mature, as the present quotation on wire rods is not considered strong. Cut nails are unchanged and are being quoted at $2.70 per keg base.

Fence Wire.—15c per 100 lbs. is the latest advance on fence wire. This is also due to the advance in wire rods. The demand for fence wire is only fair as the prices are too high. Following are the new prices:

	Per 100 lbs.
Barb	$3.35
No. 9 galvanized	2.95
No. 12 galvanized	3.10
No. 13 galvanized	3.20
No. 9 coil spring	3.00
No. 10 O and A	2.91
No. 11 O and A	2.97
No. 12 O and A	3.05

Fence Staples.—The price of fence staples has been affected to the extent of 15c per 100 lbs., for the same reason as is given on fence wire and nails. The following prices are now being quoted:

	Per 100 lbs.
Galv. Kegs	$3.85
Galv., 25-lb. boxes	4.10
Bright, kegs	3.00
Bright, 25-lb. boxes	3.25

Fence Hooks.—The price of fence hooks has advanced 15c per 100 lbs., and quotations are now made at the following figures:

	Per 100 lbs.
Kegs	$3.85
25-lb. boxes	4.10

Roofing Nails.—Large-head roofing nails are being quoted at 10c per 100 lbs. higher than previously. Kegs are quoted at $6 per 100 lbs., and 25-lb. boxes are quoted at $6.25 per 100 lbs.

Guns.—An advance in the price of Winchester guns has been made by local houses. The increased cost of material which is used in the manufacture of guns has made a further advance necessary. The advance is 5 per cent. over former prices.

Glass.—The demand for glass is not improving, and small shipments are being made at the following discounts:

Single diamond	20%
Double diamond	20%
Cut lights	20%

Rope.—Rope prices are being maintained and a fair volume of business is being transacted at the following figures:

	Lb. base
Pure Manila	16c
British Manila	13½c
African hemp	13½c
Sisal	11½c

WINNIPEG

WINNIPEG, Oct. 28.—Bssiness during the first three weeks of the month has been very good, and it is more than likely that the results for October will come up to expectations.

The latest C. P. R. crop report indicates that with another three weeks of fine weather the greatest percentage of the grain will be threshed and ready to ship. There are over 2,000 cars passing through Winnipeg daily, and at this rate the bulk of the crop should be marketed by the end of the year.

Collections should soon show a decided increase over what they have been during the last month. In spite of the large amount of grain marketed, collections have been none too good, and it is advisable for everyone to keep hard at it.

There are several price changes to note this week, and threatened advances in various wire products have taken place with every indication that further advances will be made shortly.

Nails and Staples Advance.—Annealed wire and wire staples have advanced fifteen cents per 100 pounds. Wire nails have advanced to $3.15 base at Winnipeg and $2.75 base at Fort William

The following are to-day's prices on Galvanized Wire:

Winnipeg prices:—No. 8 gauge, $3.85; No. 9, $3.45; No. 10, $3.90; No. 11, $3.95; No. 12, $3.65; No. 13, $3.65; No. 14, $4.35; No. 15, $4.55; No. 16, $5.10; No. 18, $5.75.

Fort William prices:—No. 9 gauge, $3.05; No. 12, $3.25.

Galvanized Wire:—No. 9 coiled, Winnipeg $3.50, Fort William $3.10.

The above represents an advance of 10c per 100 pounds on all lines.

There has also been an increase on the price of barbed wire and prices quoted below are ruling to-day:

	Winnipeg	Ft. William
Lyman	$3.20	$2.85
Glidden	3.03	2.70
Baker	3.00	2.68

Wire rope has advanced and prices below indicate just to what extent this line has been affected:

¼ in., $4.75; 5-16 in., $5; ⅜ in., $5.25; ½ in., $5.90; ⅝ in., $7.75; ¾ in., $9.50; ⅞ in., $13.30; 1 in., $17.25

Turpentine has advanced over last week's price and is quoted at 81c per gallon in bbl. lots.

Woven fence has advanced and also Banner poultry netting, prices of which are attached herewith. To-day's prices on Banner poultry fence are, per roll:

24-in., $2.65; 36-in., $3.35; 48-in., $3.90; 60-in., $4.65; 72-in., $5.35.

In view of the advances which are noted this week, wholesalers think it would be advisable for merchants to book everything in the line of wire products which they will be likely to use during the coming spring. Also all lines of iron and steel will be more or less affected, and booking of these lines is also advised.

EDMONTON

EDMONTON, Alta., Oct. 20.—Conditions in the hardware trade, both wholesale and retail, are fairly satisfactory at the present time when one considers the small amount of construction work going on. City trade is quiet, but country merchants are reported to be doing a fair volume of business. Heaters have begun to move with their accompanying accessories, stove pipe, coal hods, fire shovels, etc. It is felt that a cold snap would further stimulate business. Merchants who cater to the threshers are disposing of their stocks of belting, oils, valves and other supplies, and the demand is likelv to continue for some time.

With the harvest over threshing operations are in full swing throughout the West. It has recently come to light that there is a serious shortage of separators in this province.

Although threshing has been going on for several weeks now, only a small percentage of the grain has been handled. W. H. Andrews, secretary of the Retail Merchants' Association of Alberta, is credited with saying that there will be a great percentage of the wheat go unthreshed this year as farmers are now trying to get threshing outfits for fifty or sixty days ahead. Mr. Andrews has just completed a trip throughout the province and is in a position to know just haw matters stand. It is fearel that should winter set in early work will have to stop. Implement men claim that there is now no remedy for the shortage of equipment. This means that it will be a long time yet before the majority of farmers can dispose of their grain and get the returns. Weather conditions lately have been very favorable for fall work.

with the cooler weather of two or three weeks ago. The country trade still leads, but while the country trade is the big factor, city trade has improved a little. Price changes are again a feature of the week and several important changes are again in effect. Price-cutting in some branches of the trade is still in evidence and adjustments are being made from time to time.

Advances in Iron and Steel.—Further advances in the price of iron and steel are announced. Requirements for the manufacture of munitions are responsible for the recent advances and as stated previously, steel and iron for commercial purposes are a secondary consideration. The demand for these products, due to the war conditions, makes it hard to predict what levels will be reached. Refined iron is advanced 10c per 100 lbs. Domestic steel has also advanced 25c per 100 lbs. Toe calk steel is advanced 10c per 100 lbs., and mining cast steel has advanced ½c per lb., or 50c per 100 lbs. High-speed tool steel is firm at the recent advance and limited supplies at $1.50 per lb. are available.

Galvanized Sheets.—The conditions that have recently featured the galvanized sheet metal market are still in evidence and price-cutting continues. It is difficult to obtain uniform prices owing to these conditions, and adjustments are being made occasionally by local houses. The present cost of producing galvanized sheets should bring better prices than are being offered to the trade. Adjustments have been made in the price of Apollo brand sheets and are as follows:

22-24 gauge	$4.25
26 gauge	4.40
28 gauge	4.60
10¾ oz.	4.80

14, 16, 18 and 20 gauge remain unchanged.

Nails Advance.—An advance in the price of wire nails has gone into effect during the week. The price of wire rods has increased very rapidly of late and our prediction in last week's issue that another advance was very probable has proved correct. Higher levels are still looked for and if rods advance further the price of nails will have to advance accordingly. The demand for nails at the present time is very slow and regular orders are being filled at the new price of $2.55 per 100-lb. keg base.

Fence Wire Advances.—With the advance in the price of wire rods, comes an advance in the price of fence wire. Last week's advances are again augmented by an increase all round of 15c per 100 lbs. Following are present quotations:

	Per 100 lbs.
Barb	$3.45
No. 9 coil spring	3.45
No. 9 plain galv.	3.15
No. 12 plain galv.	3.30
No. 13 plain galv.	3.45
O and A, No. 10	2.91
O and A, No. 11	2.97
O and A, No. 12	3.05

The above prices are not strong, as further advances are looked for in the near future.

Smooth Steel Wire Advances.—No. 0-9 gauge smooth steel wire is now quoted at $2.75 base, an advance of 15c per 100 lbs. being in effect. The usual extras are as follows:

No. 0-9 gauge, $2.75 base; No. 10 gauge, 6c extra; No. 11 gauge, 12c extra; No. 12 gauge, 30c extra; No. 13 gauge, 30c extra; No. 14 gauge, 40c extra; No. 15 gauge, 55c extra; No. 16 gauge, 70c extra.

Fence Staples Advance.—In sympathy with wire rods, fence wire and nails, the price of fence staples has also been advanced 15c per 100 lbs. The demand for fence staples until quite recently had shown some improvement, but the advances which have taken place of late have been to some extent responsible for the inactivity which exists at the present time. The following prices are now ruling on the local markets:

	Per cwt.
Fence staples, galv., in kegs	$3.85
Fence staples, galv., 25-lb. boxes	4.10
Fence staples, bright, in kegs	3.00
Fence staples, bright, in 25-lb. boxes	3.10
Poultry netting staples, 10-lb. boxes	5.65
Poultry netting staples, 25-lb. boxes	5.10
Poulty netting staples, 100-lb. bxs.	4.85

Bright spear point, 75 p.c.

Lawn Hose for Spring. — Orders for spring delivery of lawn hose are coming in freely, at prices unchanged from those of last year. The following prices and discounts are offered to the trade:

Corrugated, ½-in.	11c ft.
Corrugated, ¾-in.	14½c ft.

Less 5 per cent. for full reels 500 ft.

Rope Unchanged.—A fair volume of business is being transacted by the local jobbers. Prices are unchanged and are firm at the figures shown in the current quotations.

Waste.—It is rumored that waste is due for another advance in price. The situation on the American markets at the present time is very perplexing and the conditions that exist in the U. S. markets are reflected on the Canadian markets. The manufacturers of munitions are using large quantities of waste but the reason for the advances are not due to that, but rather to the fact that waste is a by-product of other cotton goods. There has been a bigger demand for coarser cotton goods, and the coarser threads have been used in the manufacture of these goods instead of using them in the manufacture of waste. It is likely that an advance will go into effect during the coming week. Present prices are shown in the current quotations under paints, oils, etc.

Spades and Shovels for Spring.—Local hardware jobbers are receiving a large number of orders for spring delivery of spades and shovels, and while the prices being quoted at the present time are unchangd from last year, it is stated that advances are very probable. Present quotations are as follows:

1sts	60 per cent. discount
2nds	55-2½ per cent. discount
4ths	45 per cent. discount

Cotton Twines.—Cotton twines are said to be slated for a further advance in the near future. At the time of going to press nothing definite can be ascertained, but the fact that prices in the U. S. markets have advanced 1½c per lb. during the past week is an indication that prices will advance here.

Stoves More Active.—The activity in the demand for stoves which was so noticeable at the early part of the month has been interfered with considerably by the continued warm weather. A demand for better-class ranges is noticed this year over former years, especially from the country districts. The farmers are buying better-quality ranges in all sections of the country.

Seasonable Lines.—Although there is a fair volume of business being transacted on seasonable lines, local jobbers say that more seasonable weather would be beneficial to business, in regard to the movement of these lines. Ammunition and guns are not receiving as much attention as was expected, which is probably due to the continued warm weather.

Builders' Hardware.—It is altogether likely that a number of important changes will be made in builders' hardware lines in the near future. The demand is not brisk owing to the curtailment of building operations.

LONDON

LONDON, Oct. 27.—A steady fall business is being transacted by local jobbers and a fair movement of fall lines is noticeable. Cooler weather would have a tendency to increase the sales on winter lines as dealers are holding back and are only buying staple fall lines. Several price changes have gone into effect during the past week. Nails, wire, staples, turpentine, are the most important changes.

Turpentine.—Two advances of 5c each have taken place on the local markets during the past week. Local jobbers are at a loss to know why the price of turpentine should advance so suddenly, as the demand has not improved any. Several conflicting reasons are given as to the cause of the advances, but it appears as though speculative interests are at work in the primary markets. The prices now being quoted are as follows:

WEEKLY PAINT DEPARTMENT

Can Paint Be Sold in Winter?

Are There Opportunities for Selling Paint During the Winter Months?—What Class of Work Can be Done?—What Lines Can be Sold?

By HENRY LEWIS

THE weather so far this fall in most parts of Canada has been so unusually fine that there is not the usual October demand for cold weather hardware. The outside painting season has been prolonged, however, and a good many merchants have been boosting the sale of paints in order to offset the slackness in other lines. The trade can confidently expect the advent of cooler weather before long, and then there will be a rush for heating equipment and accessories, glass for repair work and many other hardware lines.

When the late fall rush begins, there is an inclination on the part of a few merchants — although the number is growing smaller every year, to overlook the possibilities which exist in some of the other departments in the store. Let us consider for a few moments the possibilities of winter paint sales. It is the general opinion of a number of dealers that after the early fall rush has been satisfied and paints get quiet, that there is no further demand for them until the following spring rush starts in. Some merchants seem to be satisfied to wait for this demand. Why wait for a demand when you could, by throwing out a suggestive hint to your customers, create one? Is it your opinion that the merchant who "waits" makes the same progress as the merchant who is not satisfied to wait, but goes out after this demand and meets it two or three months in advance of his competitor? Which of the two appeals to you as the one to succeed?

Some people will ask, "what class of painting can be carried on during the winter months." Outside work of course is suspended during the cold weather so naturally we will have to direct our attention to inside work, altogether. Now the question arises, what advantages are there in painting at this time of the year. First and foremost comes the answer, temperature. There is but little doubt that when the stoves and furnaces are going that the air as well as the walls and ceiling of any house are much dryer than during the summer, spring and fall, and especially during a wet season such as we have had this year. Therefore, it seems that for inside decorating a better season could not be chosen.

The home of nearly every man is used during the winter months for entertaining, or even spending quiet evenings there, and everyone will admit that the more attractive and pleasant the home appears, the more pride the family will take in it. Almost every man spends quite a number of evenings at home during the winter months and these could be devoted to the brightening up of his home.

These facts will have to be brought to the attention of your customers as most people think the proper time for this work is in the spring. Why should any man live in his house all winter and then as soon as he can take advantage of the outdoor air by enjoying his evenings on the verandah or elsewhere, start to paint up the interior of the house and leave it open all summer?

One of the quickest ways to bring these facts before your customers is to make a window display of paints used for inside work. Possibly a couple of neat window cards bearing helpful suggestions would break the ice, or in other words, bring the attention of your customer or the passer-by to the idea of brightening up his home. It is also a good idea to mention these things to customers who enter your store, as it could be done without any trouble while waiting on them, and point out to them the advantages to be gained by doing this work at the present time.

Some dealers are inclined to scoff at the over-the-counter suggestion idea. Let them scoff. More goods are sold by wide-awake- merchants and salesmen by over-the-counter suggestions than by any other sales method.

The man who simply sells a man what he asks for without throwing out a few gentle reminders about other lines is indeed a poor salesman and his type is becoming extinct.

Perhaps the most redeeming feature of painting up during the winter months by the man who does not do this work himself will be the argument of cost. In the first place, labor is cheaper than in the summer months, as it is the off season of the trade, and naturally those employed in that work are only too anxious for employment and will not make their prices too stiff. Then again, skilled workers could be secured, as there would be a larger field of men to choose from. The lines which would come into prominence would be floor preparations, varnishes, stains and paints for walls, etc. Even if it is impossible for a man of ordinary circumstances to spend the money for labor this work can all be done by an amateur as there are no fancy or delicate parts to paint.

As for the matter of color effects, if a salesman is a thoroughly up-to-date paint salesman, he can make suggestions as to color schemes, and therefore assist the customer to choose wisely.

NEW NAVAL STORES ACT

The Naval stores committee of the National Paint, Oil and Varnish Association of the United States, has been working hard for some time for reforms in the naval stores trade. The committee through its chairman, has proposed a new naval stores bill to be presented to the U.S. Congress at its next session, and suggests that the bill should incorporate the following:—To provide for the establishment of standards and uniform grading and weights; To prohibit the sale of adulterated naval stores; To provide that all naval stores moving in interstate commerce be properly branded as to grade and name of seller; To empower the Department of Agriculture to establish from time to time standards of grades and weights, and to act as arbitrator upon appeal from buyer or seller where disputes arise because of variation in grades and weights; to provide a penalty for violation of the provisions of the bill

No Bristle Shedding Here!

Bristle-shedding brushes are one of the greatest detriments to doing good work quickly.

The compressed nickelled steel ferrules on

Brandram-Henderson Sales Convention

Salesmens' Convention Held at Toronto This Week—Sales Talks, Demonstrations and Window Trimming Competition Interesting Features

THE annual sales convention of Brandram-Henderson, Limited, was held at the Queen's Hotel, Toronto, on October 26 and 27.

The convention discussed ways and means of further increasing the Brandram-Henderson business during the coming year; the firm's present year, which ends in November, has been the most successful in its history in point of sales, but the management believes it can do still more; hence the new preparations now under way.

The convention this year was a purely business meeting, without banquet and other festivities, as on previous occasions, when the world was at peace. Nevertheless, the convention was very interesting, as indicated by the following programme:

October 26th.

10.00 to 11.00 a.m.—Opening Session.
Address by the President, Mr. George Henderson.
Prizes awarded to winners of various Sales Contests, and Sales Contests for 1916 announced.
11.30 to 12.30 p.m.
The B-H Factories behind B-H "English" Paint.—G. M. Edwards.
2.00 to 4.30 p.m.—Salesmen's Session. Sales Talks and Sales Demonstrations.
(a) "Opening a B-H 'English' Paint Account and what it constitutes."—J. E. Fenfound.
(b) "Selling the Full Line."—S. W. Smith.
(c) "Following up Dealer's Prospects and Selling Goods for the Deaer."—M. Winerocpe.
(d) "How Daily Reports Help Develop the Territory."—R. B. H. Cotton.
(e) "Towns where we have No Agent and No Prospect."—E. W. Charlton.
(f) "Selling Oil Colors."—Fred Markum.
(g) "Demonstrating the Sale of B-H 'English' Paint."—R. C. Blakeney and W. A. Church.
(h) "Demonstrating the Sale of B.B. and Anchor Lead."—W. B. Gillespie.
(i) "Demonstrating the Sale of China-Lac."—N. Paradis.
(j) "Demonstrating the Sale of Fresco-Tone."—A. F. Benford.
(k) "How to Handle Complaints."—E. F. Lowe.
5.00 p.m.—Salesmen's Suggestions to Management Regarding Marketing of Products.
Evening: Theatre Party.

October 27th.

9.00 to 10.30 a.m.—Window Dressing Competition.
Maritime, Toronto and Montreal Representatives contesting. Judges: H. W. Parr, of "Hardware and Metal"; James O'Hagan, of "Canadian Hardware Journal"; and Thos. Meredith, of Meredith & Co., Toronto.
10.45 to 11.30 a.m.—Manufacturing Sales Session.
"Some Paint Problems."—R. H. Monk.
12.00 to 1.00 p.m.—Master Painters' Trade Session
Address by A. M. McKenzie, President of International Association Master House Painters and Decorators.
2.00 p.m.—Varnish Session, including China-Lac Demonstration.
E. F. Lowe and G. M. Edwards
3.15 p.m.—Advertising Session.
Outline of Advertising and Sales Promotion Work for 1916.—A. W. Poole.
4.30 p.m.—President's Closing Remarks.
7.00 p.m.—Supper Party, Queen's Hotel.
Evening, 8.15 p.m. Evening Session.
Addressed by F. H. Rowe. Subject: "The Greatest Game in the World."

The firm of Brandram-Henderson is a purely Canadian one, but the original Brandram began business in England in the time of George II. During the Napoleonic wars the Brandram firm supplied quantities of munitions to the English army, and in connection therewith it is interesting to note the fact that at the Brandram-Henderson lead works in Montreal at present the same service is being rendered to King and country. Hundreds of tons of bullets have been shipped from these works for use overseas during the past few months.

For many years, probably many more than a hundred, the Canadian trade bought its supplies of Brandram's white lead in the Old Country. But with the rapid increase of the demand on this side of the Atlantic, a manufactory here became an insistent need, and this was secured by the organizing of the firm of Brandram-Henderson, Limited, a purely Canadian company, and the building of an immense lead corroding plant at Montreal, said to be one of the finest in the world.

WEEKLY PAINT MARKETS

(Continued from page 54.)

unaffected. Turpentine has advanced 10 cents per gallon this week.

Remarkable Advance in Turpentine.—Several theories are afloat regarding the rapid advances that have taken place in the price of turpentine. The reason for the advance of 10c per gallon is said to be the result of heavy export trade to European countries. Another reason given is that a shortage of supplies coming in to the Savannah markets has been noticeable. Still another dealer states that it is due to speculation by those engaged in the business in the Southern markets. Advances during the last two weeks, aggregating 16c per gallon, have been made, which places turpentine on the local markets at the high level of 80c per gallon. Ruling quotations are as follows:

1-barrel lots	80c	per Imp. gal.
2 to 4-barrel lots ...	79c	„ „ „
5-gallon lots	87c	„ „ „

Linseed Oil.—The situation in regard to linseed oil is unchanged. The demand has not improved during the week. The amount of flax seed coming in to the crushers is still very small. American crushers are purchasing large quantities of spot seed for their own markets, which has a slight tendency to keep the Canadian markets firm. Better weather for threshing purposes is now general in the West, and it is expected the situation will become easier as the seed is marketed. Present prices are as follows:

	Raw.	Boiled.
1 to 2 barrels	77c	80c per gal.
3 to 5 barrels	76c	79c „ „
6 to 9 barrels	74c	77c „ „

10 barrels and over open.

Gasoline.—The price of gasoline is holding firm, and it is expected that further advances will take place at an early date. The late open season still calls for gasoline in the same quantities as were sold during the summer, as the automobiles and trucks are not being laid off quite as early as in some years. Prices are shown in the current quotations.

Benzine.—The price of benzine has been adjusted and placed at 21½c per gallon in barrels. This now makes the price of benzine ½c per gallon lower than gasoline in barrels.

Putty.—The demand for putty, like glass, is very small. It is not expected that the business will revive until building operations are on a better footing. Prices are as follows:

	Per 100 lbs.
Bulk, in casks	$2.50
Bulk, in 100-lb. drums.....	2.70
Bulk, in 25-lb. drums.....	2.80
Bladders, in barrels	3.10

Pure putty, 60c per 100 lbs. advance.

Glass.—The movement in glass is said by local houses to be only fair. Most of the demands at present are from the country districts. City trade is quiet. Prices are firm, and are being maintained generally.

White Lead.—Since the reduction in the price of lead the movement has improved. Local jobbers state that low stocks were very prevalent before the reductions, if the present shipments can be taken as a barometer. The present price is $9.60 per 100 lbs. base in ton lots, with 30c per 100 lbs. added for less than ton lots.

TALKS OF A SELF-MADE MERCHANT TO HIS CLERKS

(Continued from page 31.)

buted, and our farmer friends will probably tell us in a few days about the bargains offered in the mail order catalogue. These mail order people are pretty clever merchandisers. They do not try to beat the public. They are competitors of ours and we will have to compete with them and give them a run for their money. They offer a few leaders, of course, but most of their prices are just as high, if not higher, than ours. We will get a copy of their catalogue without delay, and each man can take it home for a night and examine the contents. We can then discuss it at next week's conference.

Pumps that Carry Good Will

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Oct. 28.—The new paint quotations for which the trade has been waiting for weeks, have been announced, and the basis for the fall selling campaign for spring business has thus been established. The feature is a reduction of 10c a gallon on the following lines of ready-mixed: House paints, excepting whites; outside porch paints; flat wall paints.

On inside floor paints, barn paints, roof paints, cement paints and other miscellaneous lines the former quotations will prevail. As between colors—excepting whites—no distinction is made and the spread formerly established on reds and greens and some other shades will continue.

The reductions are probably not so material as the trade had been led to expect. However, attention must be paid to recent developments. The new quotations on zinc to the manufacturers by the producers have indicated little if any relief from the present high basis so far as future supplies are concerned; linseed oil continues to advance; turpentine is jumping rapidly and colors are generally stiff. These factors have largely, if not entirely, offset the reductions which have been made in lead and this is indicated in the firmness of whites.

In fact, a bird's-eye-view of the whole paint situation leads to the conclusion, borne out by statements from manufacturers and other authorities, that on the present basis of raw materials a reduction is not warranted. It has been made evidently rather because the trade had been led to expect it and because there has been a small demand recently and there are no doubt considerable stocks on hand.

With the air thus cleared it is expected that the fall selling campaign now commencing will go with a swing. Retailers have been holding off in their purchases awaiting the new quotations and although the reductions may not be as material as had been hoped for, the outlook from the present market standpoint is that no further cuts are to be expected unless prices for raw materials decline. On the other hand, with a fair demand cleaning up stocks on hand and with the present quotations for oil and turpentine continuing in addition to the high basis of zinc, there is no assurance that the new prices will last and a reversion to the recent figures is not to be unexpected.

Linseed Oil.—The upward tendency in the linseed oil market continues and further advances from 2c to 4c on both raw and boiled are noted. At the same time the spread between quotations has again generally disappeared and both manufacturers and jobbers appear to be on a basis with the present flax market. Some slight shading of prices is reported by jobbers with stocks on hand who are desirous of encouraging demand, but the following figures are generally firm:

	Raw	Boiled
1 to 2 barrels	72c	75c
3 to 5 barrels	71c	74c
6 to 9 barrels	70c	73c

Turpentine.—The turpentine market has been a sensational feature of the week. Higher prices have been predicted as the result of the firmer tendency which had been noted for some time, but such jumps as have taken place were hardly to be expected. Evidently prices have been kept low as long as possible, and the advance has followed with a rush. The result has been that the situation is very much unsettled and there is a big spread in the quotations as between different jobbers. As low as 70c is heard, but this cannot be regarded as indicating the situation in any way, because refiners' prices are at least that high. Above this 72c, 80c and 82c are three quotations which have been heard and the higher figures may be taken as the better indication of the market, with the probability that the lower prices will be moved to that level. The tendency of those with stocks on hand to take small profits to encourage demand is evident in certain quarters as indicated in this wide range in prices.

Zinc.—The zinc situation remains firm. Definite particulars are not available as to the basis for future supplies to manufacturers announced by the zinc producers, but it is stated that zincs are going to be very costly and this may be taken as an important factor in the report that at present a reduction in the prices of ready-mixed paints was not warranted. The fact, too, that whites are not affected by the cut is further evidence of the zinc prices.

White Lead.—There is little change in the white lead situation, the market remaining steady and firm with a fair demand. There is no indication of an immediate change in the quotation of $9.45 for ton lots with 30c added for smaller quantities.

Gasoline and Benzine.—A still further advance of 1c the gallon on gasoline and benzine has gone into effect. The former is now quoted at 20½c for drums and 20c for tank wagon, while the latter is 19½c for drums and 19c tank wagon. The movement is fair to outside points. Oil quotations are unchanged; demand fair.

Glass and Putty.—The volume of orders for putty is rather better than manufacturers had been anticipating in view of the slack building season with the result that there is some difficulty in filling demands promptly. This, however, is rather a welcome state of affairs after some months of dullness. The demand is evidently due to fall requirements in repair work and with it there is a very fair movement of window glass. Still, at best the consumption in both lines is considerably below the normal.

Lamp Black.—After a general withdrawal of prices on lamp black on the part of manufacturers, new quotations with material advances have been given. The rise is due to the sharp increase in the cost of coal tar products used as raw material; in fact, there appears to be a question as to whether sufficient supplies can be secured to meet demands. Advances by jobbers are, therefore, in order.

TORONTO

TORONTO, Oct. 28.—The much-awaited reduction in the price of ready-mixed paints has gone into effect this week. Although the reduction is not as great as was expected in some quarters, it is claimed by manufacturers that owing to recent developments in the price of raw materials, a decline in price is not warranted at the present time. It is well known that retailers' stocks are low, and many retailers have only been buying from hand-to-mouth, in anticipation of a decline in price. It is hoped, therefore, that the lower prices now in effect will create a better feeling and cause a more active buying movement. The lines affected are house colors, outside porch paint, and flat wall colors, all of which are reduced 10 cents per gallon, with the exception of whites. Other lines are

MOORE'S

House Colors

The paint that's a rapid mover

A Moore stock is not a dust gatherer, because it's always on the move—the price makes first sales easy and the quality ensures repeat orders.

Moore's House Colors are easily applied and they cover much surface, look well and are very durable.

Drop a line for proposition—it's a dandy.

Are Your Paint Customers in the Habit of Coming Back For More?

If not, there's something wrong with your Line.

The merchant who secures the exclusive agency in his town or community for Martin-Senour Paints and Varnishes will increase his sales on all other lines of merchandise he handles from the prestige he will establish and from the increased number of customers who will be attracted to his store.

MARTIN-SENOUR
PAINTS AND VARNISHES
Made in Canada but Sold on Merit

If you are devoting a space in your store to Paints and Varnishes, why not give this space to the Martin-Senour Products, which are so well known for their unsurpassed quality and which are so well advertised that they are the easiest and most profitable to sell?

Not the least interesting feature of the Martin-Senour exclusive agency, is the extensive Advertising and Sales Promotion Campaign especially arranged to aid our Dealer Agents. It comprises effective ideas in interior and exterior display, mailing campaigns, follow-up systems. In fact, nothing left undone to boost your sales.

Our message of quality and value in Martin-Senour Products reaches nearly every possible user in Canada through the mediums of the largely circulated daily and weekly press, magazines, farm and religious journals, etc.

Mr. Dealer, just consider whether you would rather have this quality and service working *for* you or *against* you.

No better time than now to drop a line for our Proposition.

A farmer might as well whitewash his barn as put on the ordinary run of cheap barn paint

If the barn paint you are selling is not capable of standing up for six or eight years—it is no wonder your sales are not greater. You must sell a better paint if you wish to sell more.

The one outstanding high-grade barn paint on the market to-day is

HOMESTEAD Liquid RED

The Canada Paint Co. are able to put out this superior Barn paint at a reasonable price, because as crushers of linseed oil we effect a saving in the cost of this ingredient, and have absolute control of its purity and quality. As miners and manufacturers of oxides, owning and operating the largest and purest deposit of oxide ore (95% pure) on the continent, we have unlimited supplies of this perfect paint base to draw upon, at a cost no other manufacturer can possibly duplicate.

Put the facts to your customers who want to preserve their farm buildings at the lowest cost to themselves. A few cents a gallon amounts to a negligible amount on a job, but it means all the difference between a bright, handsome barn that will remain in its present condition for six or eight years, as against a barn that will, in two or three years, have the cheaper paint washed away—leaving no protection to the weather whatever.

In every locality there are a number of farmers—not just one or two—who will act upon your argument and advice regarding Homestead Red; that means possible sales of fifty gallons to three or more times that amount of Homestead Red for you, so whatever else you may be interested in, discuss the Homestead Red Proposition with our Representative when he calls—our special selling proposition will appeal to you, both as practical and profitable.

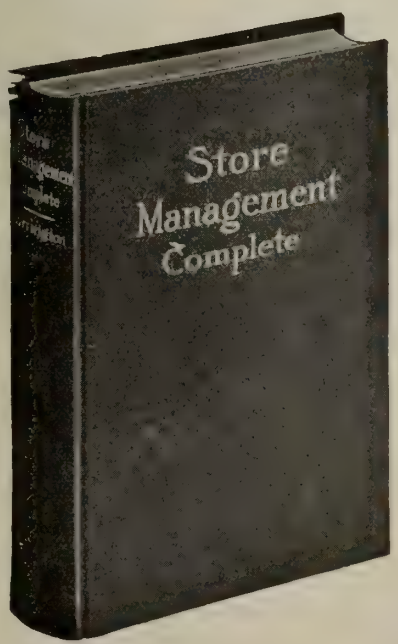
ARE YOU THE MAN AT THE HELM?



Are you running your ship of business along the shortest and safest course to the harbor of success? Or are you going a roundabout way, scratching and scraping along the rocks of loss and failure.

Get in the right course, be on the lookout for new thoughts, ideas, schemes, etc., and you will have a successful run.

STORE MANAGEMENT COMPLETE

is a guide that will show you how to get the maximum trade and profit out of your business. This book is written by Frank Farrington (a companion book to "Retail Advertising Complete.") It tells all about the management of a store. The following is a synopsis of one of the chapters:

CHAPTER V.—THE STORE POLICY—What it should be to hold trade. The money-back plan. Taking back goods. Meeting cut rates. Selling remnants. Delivery goods. Substitution. Handling telephone calls. Courtesy. Rebating railroad fare. Courtesy to customers.

"Store Management—Complete" is bound in cloth, contains 272 pages, 16 full-page illustrations, and 13 chapters. $1.00 brings this book to you postpaid. Money refunded within 10 days if not satisfactory.

ARE YOU GETTING THE MOST OUT OF YOUR BUSINESS—

Are you supplying your local elevator—blacksmith—machinist—contractor, with all the iron or steel bars, beams, plates, bolts, nuts, etc., which they require ?

Are you getting all their orders for standard and miscellaneous steel and iron of all kinds ?

IF NOT, YOU'RE LOSING MONEY—

because we will gladly pay you a commission on all orders you send in to us. Besides the above we will pay for orders for new equipment or repair work. You simply get the order and send it to us, our expert engineers and machinists will do the rest.

Butler's

FAMOUS SHEFFIELD CUTLERY

HAS STOOD THE TEST
FOR MANY GENERATIONS

It is made throughout on their own premises, from finest grade of steel, regardless of cost, by skilled workmen.

Butler's "KEEN" and other Razor brands are BEGUN AND FINISHED at Trinity Works, NOT SENT to Germany for grinding.

"Sheffield made, Both haft and blade."

TRADE-MARKS

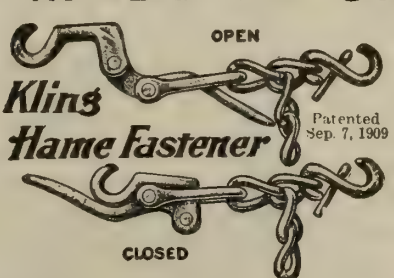
MADE IN CANADA



Like the British Navy, there is no getting away from it. Always ready for instant use. On or off in a jiffy. Holds like grim death. So simple a child can fasten it. Keeps the hames always uniformly tight. Safe and Strong. A fast seller, with a big profit for the dealer.

All Jobbers should or do sell it. $2.25 per dozen.

The "PERFECTION" Steel Ankle Support

PAYS A GOOD PROFIT AND WILL INCREASE YOUR SKATE SALES

Weak ankles keep many a person from enjoying the splendid winter pastime of skating.

Stock and boost the "Perfection" Ankle Support — it is just the thing for weak ankles.

The sale of the "Perfection" will lead to many others and you'll realize a material increase in your skate sales as a result, because people who heretofore couldn't skate on account of their weak ankles can get in on this splendid winter sport by wearing this ankle support —the more that skate the more is the demand for skates.

THE QUALITY CLOTHES DRYER

No. 9

This **STRATFORD** Clothes Dryer has four drying sides, comprising sixteen bars in all, which gives a maximum drying capacity. All the bars can be closed up when not in use, or one side only can be folded against the middle post if not needed.

They are made from clear basswood, and the workmanship is of the best.

If you have not tried this line, write at once for descriptive catalogue giving particulars of our complete line of Ironing and Bake Boards, Step and Extension Ladders, Lawn Swings, etc.

TWO CENTS PER WORD

You can talk across the continent for two cents per word with a WANT ad. in this paper.

A Straight Talk from the Manager

What Do You Lack?

WHENEVER you are asked for some article with which you are not familiar, you will find it a profitable habit to pick up the latest issue of Hardware and Metal, and search the advertising pages for information that will help you to make a sale.

If you should be unable to find any advertisement of the article in which you are interested, drop us a postal and we will send you full information by return mail.

We either have on file, or can readily procure full details on almost any matter pertaining to hardware, and we are only too pleased when our subscribers take advantage of this free service.

J. G. L.

Condensed or "Want" Advertisements

Those who wish to sell or buy business or stocks, obtain competent help, connect with satisfactory positions, or secure aid in starting new enterprises, should not fail to use the Want Ad. Advertisement Page of HARDWARE AND METAL. It is the central market place of the hardware trade throughout Canada. There is always someone somewhere looking for just such proposition as you have to offer. RATES (payable in advance):—2c. per word first insertion, 1c. per word subsequent insertion, 5c. additional each insertion, when Box Number is required. Each figure counts as one word.

WANTED

SASKATCHEWAN, ALBERTA, BRITISH Columbia. A good market for articles used by farmers. Experienced Western traveller wants an engagement. Box 220, Hardware & Metal. (44)

AGENCIES REQUIRED—HOUSEHOLD COMmodities, novelties, and agriculturalists' supplies, made in Canada. Apply to Frederic Sara & Company, Manufacturers' Agents, 326 Ninth Avenue West, Calgary, Canada. (44)

TINSMITH WANTED — MUST BE SOBER. Also state wages and give references. Geo. Phillips & Son, Havelock, Ont., Box 565.

WANTED, AT ONCE—RETAIL HARDWARE salesman with three years' experience. Must be good stockkeeper. None but a good reliable man need apply. State wages expected. Apply to William House, Box 610, Trenton, Ont.

BUSINESS CHANCES

MANUFACTURER OF PROFITABLE SHEET metal specialties, wishing to extend business, offers quarter interest to competent sheet metal man with one thousand dollars. The Simplex Co., Owen Sound, Ont. (45)

MISCELLANEOUS

FIRE INSURANCE. INSURE IN THE HARTford. Agencies everywhere in Canada.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

ADDING TYPEWRITERS WRITE, ADD OR subtract in one operation. Elliott Fisher. Limited, Room 314, Stair Building, Toronto.

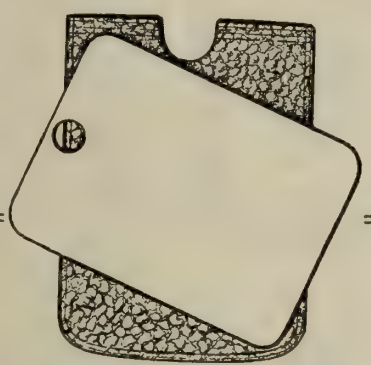
DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B." Otis-Fensom Elevator Co., Toronto.

GOOD STENOGRAPHERS ARE WHAT every employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

ESTIMATING. BY EDWARD NICHOLS, Architect. 128 pp., 22 illus. Cloth binding. Containing invaluable information for the use of Architects, Contractors, Builders, Plumbers and Heaters, Painters, Roofers, Cornice-Makers, and other workers in the building trades. This handbook tells just how to go about the task of making an estimate intelligently. Price, postage paid, $1.00. MacLean Publishing Co., Ltd., 143-153 University Ave., Toronto.

HARDWARE STORE BUSINESS METHODS—The authors of the articles in this book are for the most part practical and progressive hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infinite value to that trade. The 40 subjects discussed include: Rules and Regulations for the Hardware Store; Hardware Buyer; Good Methods in Stock Taking; Prices and Catalogues; Collecting Accounts; The Merchant and His Employees; Changing Business Conditions and How to Meet Them; Profit Figuring System; Starting in Business; Changing a Credit into a Cash Business, etc. 220 pages. Price $1.10, postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE WINDOW DRESSING—THIS IS the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. Size 8x11 inches. Price $2.60 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.



The Metallic Military Mirror

Made of heavy sheet Brass, highly nickel plated, in a neat leatherette case. Is a smooth, perfect mirror and will not rust. Every soldier must shave, but an ordinary mirror cannot be carried without breaking. This mirror, 3¼x4¼, fits the tunic pocket, and besides being useful, is also a protection, and may

Save the Soldier's Life

Metallic Mirrors appeal to those having brothers, sweethearts or friends at the front.

These mirrors are dispatched easily, and make ideal gifts.

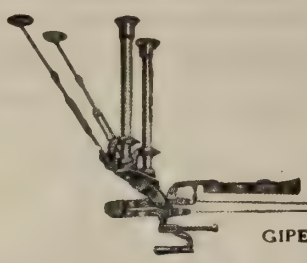
ATTRACTIVE, CONVENIENT, DURABLE, REASONABLE IN PRICE.

Our Patented Metal Shelf Boxes will improve the appearance of your store, and will enable you to give your customers quicker and more efficient service.

Advise us space you have available for shelf boxes and shelving, and we will sketch out plan and give you our best price for same.

Send for illustrated catalogue, it will interest you.

CAMERON AND CAMPBELL, TORONTO



FACTS

We can perform more functions by our modern wire carrier system, and with a greater degree of dispatch and certainty than can be accomplished by any other of this type of machine, all of which means that we can reach more points in a store and do so in a better and more satisfactory manner than has been accomplished heretofore. Remember our ten days' trial. You are invited to put us to the test.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

F.W. Lamplough & Co., Unity Bldg., Montreal

"It is my opinion that for big game the Ross .280 Rifle is the best in the world."

B. K. Miller, Wild Rose, Wis., U.S.A.

Mr. Miller adds:—"I have hunted and fished in various parts of the world, including British East Africa, but I have never seen a gun the equal of the Ross .280 for big game."

Dealers find this rifle, which is enthusiastically praised by the keenest Canadian as well as American sportsmen, a valuable addition to their stock.

The Ross .303 Sporting Models are also very popular.

Their accuracy and reliability combined with their comparatively low price make them universal favourites.

Another good seller is the Ross .22 Cadet Rifle. It is adopted by the Government for Cadet Corps, and is a strong, reliable and accurate arm suitable for the roughest use on camp or trail.

MARTIN-SENOUR SPIC AND SPAN FINISHES

MARTIN-SENOUR 100% PURE PAINT & VARNISHES

The Paints and Varnishes that fortify you against complaints and make a Big Advance in your turnover.

MARTIN-SENOUR
PAINTS AND VARNISHES
(MADE IN CANADA BUT SOLD ON MERIT)

The exclusive Agency for this line is a most valuable asset to any merchant's business. Martin-Senour Paints and Varnishes are now so well known for their unsurpassed quality and from the fact that they are so extensively advertised, that more and more people are attracted to the store where they are handled, and consequently they are the easiest and most profitable to sell.

During a year when many manufacturers have curtailed their advertising, sales help and co-operation to such an extent as to almost handicap the dealer, it has been quite noticeable that Martin-Senour Paints and Varnishes were more strongly advertised than ever before. A message of quality and service was circulated through the largest list of Newspapers, Magazines, Farm and Religious Journals ever used by a Paint Firm in Canada. Nearly every Paint user read this message, and Martin-Senour Dealer Agents reaped the benefit.

Martin-Senour sales help and co-operation is the strongest, consisting of the most effective features of Interior and Exterior Displays, Mailing Campaigns, Follow-Up Systems, and direct help of Salesmen.

This policy will not be curtailed. It will be continued and strengthened.

UNIVERSAL
Four Heat Electric Grill

FAST	CONCENTRATED	MEDIUM	SLOW
560 WATTS	310 WATTS	250 WATTS	140 WATTS

Boils, broils, toasts, steams, fries and stews—fast or slow as desired, with no wasted heat, as only the actual amount of current required is consumed. This saving in current will pay the initial cost of the Grill in no time. For light housekeeping the UNIVERSAL Grill is a most important factor, for by its aid, and without other equipment, innumerable dishes are possible. It may also be used in conjunction with the various utensils found in the average kitchen — percolators, double boilers, small stew pans, etc., and when so used answers every purpose of a small gas or coal range without taking up the space required by either.

The UNIVERSAL Grill will cook an entire meal for two or three persons, right at the dining table if desired.

Don't Forget that Christmas

Is a Good Time to Sell BISSELL'S Sweepers

Useful gifts are the fashion now — people have apparently grown tired of the former annual exchange of useless "junk," as each succeeding Christmas time proves. Therefore a Christmas display of BISSELL'S Carpet Sweepers and *Vacuum* Sweepers is a splendid sales maker all during holiday time — *before* the 25th of December to remind those seeking really acceptable gifts that here is one that will be a source of comfort every day for ten years or more; *after* Christmas day is over to suggest a most useful and desirable article in which to invest that Christmas check.

The popularity of the annual BISSELL'S Christmas offer is convincing testimony that such intensive sales work pays. All our dealers look forward to it, year after year.

As to profits, you know BISSELL'S sales methods — a world-wide business based on manufacturing supremacy; advertising in every national publication of importance; the retail price always stated to protect the dealer's legitimate profit.

Remember, the special Christmas offer includes a *free* BISSELL'S sweeper, presented on terms that are extremely advantageous. They involve a nominal amount of local co-operation that always results in the selling barometer indicating a rise in consumer interest and profits.

Write To-day

and we will send you full explanation of this annual holiday event. Address

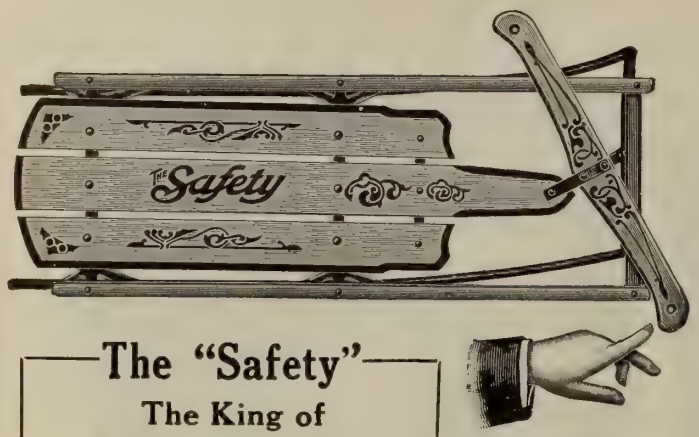
THE SHEET METAL PRODUCTS CO. OF CANADA LIMITED

MONTREAL TORONTO WINNIPEG



A Quick Sales Producer

The steering is done by simply bending the runner and NOT the wooden frame.

The runner (patented) is made of BEST SILVER SPRING STEEL and for that reason it will always keep its shape, is flexible, lasting and has a smooth running surface and being GROOVED is guaranteed NOT to skid.

The sled bench (patented) is a solid stamping of WROUGHT STEEL, being lighter, neater and stronger than ANY OTHER method of construction.

The top (patented) DOES NOT MOVE, thereby enabling the operator to guide the sled much easier without danger of pinching the fingers as is common with OTHER flexible sleds.

The safety sled is made from the best suitable material and EVERY PART riveted. They are neatly striped and decorated.

Packed two in a bundle. No shipment made of less than 1/6 of a dozen. The best assortment to buy in dozen lots is:—

1/6 of a dozen, 33 inches. 2/3 of a dozen, 37 inches.
1/6 of a dozen, 41 inches.

The "Safety"

The King of Self-Steering Sleds

NOTE THE REMARKABLE STEERING RADIUS OBTAINED BY SIMPLY BENDING THE SILVER SPRING STEEL RUNNER, AND NOT THE WOODEN FRAME.

If A Customer Walked Into Your Store

and asked for a file, what would you give him?

Any one of the following five will ensure his future custom:

KEARNEY & FOOT
GREAT WESTERN
AMERICAN
ARCADE
GLOBE

(Made in Canada)

They are Canada's favorites—controlling 90 per cent. of the demand.

Millions are used yearly, and the demand is increasing. Due, in a large measure to our educative advertising campaign—teaching your customers the economy of discarding a file when it has reached its "inefficient" point.

Remind your customers that after a certain point in the life of a file, time is wasted in its use, and the work suffers.

We're helping you. It only remains for you to stock the files with the big demand.

This Book

Sells Tools for Christmas

REALIZING the need there is for useful Christmas Gifts, we have anticipated the demand by preparing an unusually attractive booklet of Christmas suggestions to be used in answering Christmas advertisements and furnished to dealers with their name on the cover.

Mr. Punch is known to several hundred thousand Canadian householders and he will appear in the magazines in December stronger than ever, to suggest tools as useful Christmas gifts. Mr. Punch appears in this booklet with a number of other useful household tools.

A special set of Christmas signs goes to every dealer with these booklets.

How many can you use?

The **Magnet** Two Styles

A Hand or Power Washing Machine you can place practically in every home in your community, particularly where gasoline, steam engine, electric or windmill power is available.

The DEMAND, the MARKET and the PROFIT are all there.

The mechanism is the same on both style machines, except the fly wheel, which for the power machine has a flat rim for belt. The gearing is all on side of tub instead of cover, which can be raised without removing belt or stopping the machine. Get a full description anyway. Made only by

CUMMER-DOWSWELL, Ltd., Hamilton, Canada

WHEN THE CUSTOMER READS

DU PONT

On the Shell Box

NO ARGUMENTS ARE NEEDED TO INDUCE HIM TO BUY

BY experience, or observation of others using this dependable powder, your customer has acquired a preference for this widely known powder.

SIMPLIFY YOUR STOCK

by specifying DUPONT for Smokeless loads, and DU PONT RIFLE for Black Powder in shells or bulk. Do this and tie your store to our continual and effective promotion of trapshooting. Sell the customer DU PONT LOADS. Make a quick, safe and sure sale.

For Powder booklets, Trapshooting Club helps, hangers for display, advertising aids, or any information about powders for any requirements, write Dept. 429.

"COMFY"

Weather-Strip

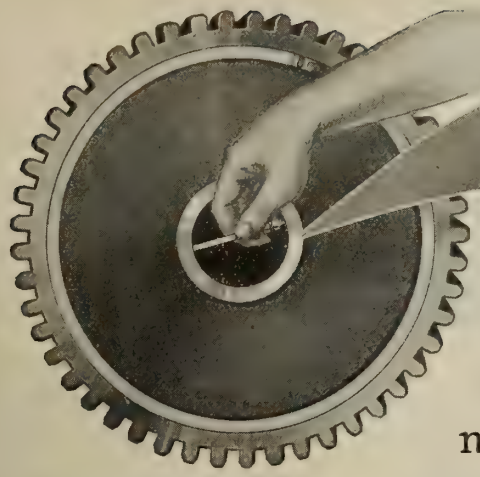
is a line that sells on sight.

Sells at a very low figure in comparison with ordinary weatherstrips, is easily put on, very durable and is in every way as effective in keeping out the cold.

Put up in cartons of one pound each, or 35 feet in carton.

Burlington-Windsor Blanket Co., Limited

TORONTO, CANADA



Fits

The best machinist is the one who can caliper his fits so accurately the jobs never come back for refitting.

The limits of tolerance are so small that the greatest accuracy is required.

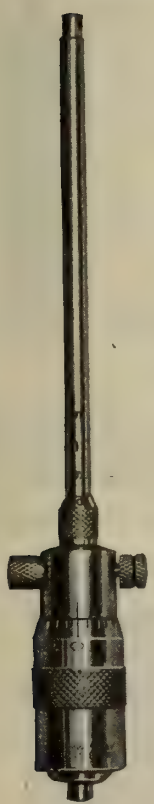
In forced fits 1-1000 of an inch is the limit allowed. This means the machinist must place great dependence upon his instruments.

Starrett Tools

and Instruments of Precision

are absolutely true and are designed for quick, easy adjustment.

For example—the Starrett quick adjusting micrometer can be instantly opened or closed to any point within its capacity. This saves time and combines speed with accuracy. Starrett Tools are well known as standard by all expert machinists and engineers.



2100 styles and sizes—including micrometers, vernier calipers, dividers, combination squares, steel tapes, hack saws. We deal direct with hardware stores. Write for free catalog No. 20-MA terms and prices.

DAVIDSON'S
PREMIER CHIEFTAIN

An exceptionally moderate-priced Cast Range, and the fact that it is a Premier is a positive assurance of its efficiency.

The merits of Premier Stoves and Ranges are well known. The Premier Chieftain is given the same careful workmanship as our Higher-Priced Ranges, and it does its work most efficiently.

It is a very attractive range, has just enough loose nickel to give it a smart appearance.

Just the range for the city trade and for the country, where a small range is required.

The moderate price puts it within reach of all.

The fire box is large and is fitted with duplex grates for coal or wood, and cast iron linings. The oven is large and roomy.

The top and centres are all ribbed.

Premier Chieftain
With Reservoir and High Shelf

Made square or with reservoir, and fitted with Tea Shelf, High Shelf, High Closet or our attractive Persian Closet. Two sizes.

Write for prices of The Premier Chieftain. You will be interested.

Jenkins Bros.' Extra Heavy Gate Valves

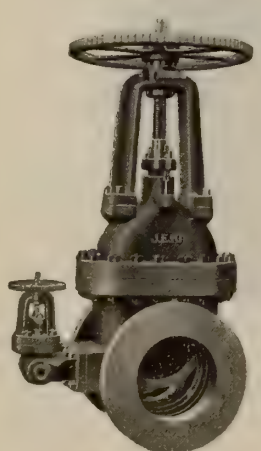

Fig. 204-B

All are guaranteed to stay tight under a working steam pressure of 250 lbs. or a hydraulic pressure of 400 lbs.

The globe-shaped bodies are made of high-grade cast iron and are tapped for renewable bronze seat rings. The wedges are also cast iron, heavily faced with bronze rings which cannot become loose in service. Wedge guides are provided and carefully finished on the inside to insure smooth opening and closing without chattering in a partially opened position.

The glands are of special construction with brass body and sleeve. The corrugated rim of the large hand wheel is a distinguishing mark and is used only on genuine Jenkins Bros.' extra heavy valves.

They are furnished Inside Screw, Stationary Spindle or Outside Screw and Yoke Rising Spindle. Inside Screw Valves have bronze spindles and Outside Screw Valves have steel spindles. Extension Stems, Gearing, Chains and Floor Stands in accordance with particular requirements supplied.

We can build these valves for electric, hydraulic or pneumatic operation to order. Also made in Cast Steel for high pressure superheated steam and hydraulic pressures.

Every engineer should have a copy of the new Jenkins Bros.' No. 8 Catalogue. Write us to-day.

JOHNS-MANVILLE SERVICE
COVERS THE CONTINENT

Winter brings roof repair inquiries; Answer them with

J-M REGAL ROOF COATING

The chief objection to the use of smooth surfaced or so-called "rubber" ready roofing for houses has been the lack of harmonious colors. This difficulty has been swept aside by the perfection of J-M Regal Roof Coating.

J-M Regal Roof Coating is absolutely free from coal tar or pitch —is impervious to weather, will not crack, scale or become discolored under any circumstances. It stays put and looks well wherever it is used—it is good for metal roofs, too. One gallon covers 100 to 250 feet, according to the conditions and age of the roof. Comes in six colors so that it will harmonize with the color scheme of any building. Sold in 1, 2, and 5-gallon cans.

There is a big field for **J-M Elastic Roof Putty.** It adds years to an old roof that is showing defects and leaky joints or flashings. It is plastic and ready for use. Comes in gray, green, brown, red and black; packed in all sizes from small tins to barrels.

Write your nearest branch about this quick-selling proposition.

Do All "Safety Devices" Really Safeguard?

The mere mention of the word "safety" ofttimes gives the impression of absolute infallibility. But, does *safety* always mean just that?

As you know, a pistol is cocked when the *hammer* is held back by the *sear*. To fire a pistol, the sear must be moved to release the hammer and allow it to fall. In some pistols this may be unintentionally caused by a jar

Unless the "safety" positively blocks the sear, it is not a real "safety," but a dangerous substitute.

A COLT is POSITIVELY SAFE in the fullest sense of the word. It means that the COLT GRIP SAFETY blocks the sear and locks the trigger, thus positively preventing the hammer from falling unless this grip safety is pressed in and the trigger pulled.

The Colt, therefore, is *positively locked against* accidental discharge.

A Much Brighter Outlook

The Trade is Buying More Freely—No Unemployment in Canada — Orders Being Placed for Larger Shells—Scarcity of Skilled Help—Retailers Booking for Spring

REPORTS from various hardware centres in Canada this week indicate that there is a much better feeling in all branches of the hardware trade, and that retailers who for some months past have followed a very conservative policy in their buying operations, are now buying more freely. Orders for spring delivery are now being placed freely and jobbers state that the past two weeks have shown a splendid improvement in the volume of business booked for spring. Two reasons are advanced for the steady buying movement which has developed. In the first place retailers feel that prospects for spring business are much brighter than they were a few months ago. The farmers have harvested record crops and are securing good prices for all their products. There is very little unemployment in Canada now, in fact there is a scarcity of mechanics. Skilled machinists are very scarce and employment at high wages could readily be found for hundreds more at the present time. In the second place, retailers are beginning to realize the fact that prices on many lines of hardware are bound to go higher within the next few months. There is also a probability of a shortage in many lines of semi-finished and finished steel products, and also in many other lines which before the war were imported from Europe. European sources of supply have been cut off and already there is a shortage in some lines. A shortage in some lines of cutlery is already being felt. One jobber who had booked orders from retailers for over 1,000 sets of English carvers for Dec. 1, delivery has not been able to get the goods, or even a satisfactory explanation as to why they have not arrived. Many lines of English pocket cutlery are unobtainable and heavy stocks of German cutlery which were held in Canada at the outbreak of the war are now almost depleted. Many lines of fancy brass and copper goods which in former years were imported from Germany are not on the market this year. From present indications it looks as though hardwaremen in Canada are going to secure a "more than usual" amount of the Christmas trade this year, owing to the demand which will develop for practical and useful gifts. The announcement made this week that further heavy orders for shells would be placed in Canada has been welcome news to many in the hardware and metal trade, particularly in view of the fact that many of the new orders will be for 6-inch, 8-inch, and 9.2 high explosive shells. Tenders were submitted by several Canadian firms early in the week and orders will probably have been placed ere this issue of Hardware and Metal is off the press. The orders for the large shells will be divided among some of the largest manufacturers in Canada, while the smaller plants will, in the future, as they have been in the past, continue to make smaller shells.

One feature regarding the manufacture of the large shells worthy of note is that regarding the preparation of the shells for shipping purposes. The smaller shells, such as the 18-pounders, are shipped in wooden boxes, while the 8-inch and larger shells will be shipped in metal cases. One case will be required for each shell. The cases will be cylindrical in form, made of sheet iron or steel with a hinged top. The making of these cases will supply work for several sheet metal-working firms.

Great interest is being manifested in the machine tool trade over the contract for the larger calibre shells. These shells are 6 in., 8 in. and 9.2 in., and weight 180, 250 and 290 lbs. filled, respectively. Heavier tools will, therefore, be required than are being used for the 18-pdr. Lathes with 24 in. and 30 in. swing will be in good demand, although considerable difficulty may be experienced in getting delivery this year on new equipment. The industrial situation continues to improve, and the marked increase in production is shown by the development in the export trade. Exports already far exceed in value the imports for corresponding periods, and

(Continued on page 43.)

IN NEXT ISSUE

Commencing next week Hardware and Metal will show in each issue until Christmas one or more Christmas Window Displays. The displays were entered in Hardware and Metal's annual Christmas window display contest last year. The displays are both attractive and practical and represent the best efforts of the best hardware window trimmers in Canada. This series of window displays will furnish hundreds of ideas which should be of great assistance to window trimmers in arranging their Christmas window displays during the next few weeks. The series will be, by long odds, the best and most practical series ever shown in Canada. A special illustrated article on preparing show and window display cards for the Christmas trade will appear in next week's issue. This article is one of the best that has ever come into the possession of Hardware and Metal, and some mighty good ones have been shown in the past.

Manufacturers to Hold Exhibition

Meeting of Directors of Canadian Hardware Manufacturers Exhibitors' Association Held at Toronto—Decided to Hold a Hardware Exhibition at London, Ontario, During 1916

NEARLY all the directors of the Canadian Hardware Manufacturers' Exhibitors' Association were present at a meeting held at the Queen's Hotel, Toronto, on Friday of last week to discuss business affairs of the association, and also the advisability of holding a hardware exhibition in 1916.

It was definitely decided at the meeting that an exhibition would be held at London, Ont., during 1916, although the date has not yet been decided upon. The Board of Control, London, and the Fair Board, at a meeting last week offered the main building at the Western Fair, to the Exhibitors' Association for the purpose of holding an exhibition in 1916. Secretary F. M. Tobin, of the Canadian Hardware Manufacturers' Exhibitors' Association, has been authorized to proceed immediately with plans for the exhibition.

The following resolution was unanimously carried by the directors:—"Resolved, that the directors of the Canadian Hardware Manufacturers' Exhibitors' Association at their meeting October 29, 1915, in expressing their appreciation of the services rendered to the Empire by the voluntary troops which have enlisted, and who are serving their country at the front, endorse the action of our members, who have expressed a determination to find employment as far as is within their power for any of our men returned from the front, and further wish to record the fact that the Canadian Hardware Manufacturers' Exhibitors' Association, represented by its directors, will adopt a policy to make a place in their employment wherever possible for all men who have served in the defence of the Empire."

ADAM TAYLOR

of the Taylor, Forbes Co., Guelph Ont., President Canadian Hardware Manufacturers' Exhibitors' Association.

It was felt by the directors that the present was an opportune time for calling the attention of the Canadian public, and especially the Canadian hardware trade, to the diversity, quantity and quality of hardware and allied lines made in Canada. Particular effort will be made at the 1916 convention to interest the general public.

The heating question with regard to the main building in the Western Fair, London, was also discussed, and it was pointed out that as troops were quartered in the building last winter, the directors feel that there will be no difficulty about making the building quite comfortable should it be decided to hold the exhibition in the winter time.

In former years the exhibition of the Canadian Hardware Manufacturers' Exhibitors' Association has been held in conjunction with the annual convention of the Ontario Retail Hardware and Stove Dealers' Association. It had been practically decided last year to hold the 1915 exhibition and convention at London, Ont., but owing to the fact that all the large buildings in London were at that time being used by the military authorities, it was found necessary to cancel the exhibition. The retailers held their annual convention at the King Edward Hotel, Toronto.

At a meeting of the Advisory Committee of the Ontario Retail Hardware and Stove Dealers' Association, held at Toronto on October 11 (reported in full in the October 16 issue of Hardware and Metal), it was decided to recommend to the executive of the association that the

(Continued on page 33.)

STILL AN URGENT NEED FOR RAZORS

In last week's issue an article appeared reprinted from an English trade paper which quoted an extract from a letter received from a sergeant at the front who complains about the poor razors served to the troops. The sergeant said in part: "The hardest thing we have to do is to get a good shave after coming out of the trenches, as the razors we get are no good." He writes on behalf of the members of his platoon, and it is quite evident that there is a great scarcity of good razors at the front. It is notorious that for many years the war office has purchased very cheap razors for the use of troops, and the latter have in thousands of cases had to purchase good razors or depend upon gifts from friends.

It is quite evident that there is still a great need for razors, and as the size of the armies increases there will be a still more urgent need for good razors. For some time past a collection campaign for old or spare razors for the use of troops at the front has been carried on in Canada. Many thousands of razors have been collected and forwarded to the front, in fact, to date 20,000 razors have been forwarded from Canada alone. It had been hoped that a total of 25,000 would be reached, and if the hardwaremen of Canada will respond promptly the desired number will be reached within the next week or ten days. This is a wind-up appeal for razors—will you help to make the desired total of 25,000.

It is well known that a great many hardwaremen, who have been assisting in the campaign have on hand collections of two or three razors or upwards. If these small collections are forwarded without delay they will soon swell the collection to the desired number.

Hardwaremen in all parts of Canada are earnestly requested to help in giving the collection campaign a good wind-up. All razors should be addressed to Thos. B. Lee, 30 Front St., W. Toronto.

Handling Charge Accounts

How Canadian Retail Hardwaremen Handle Their Charge Accounts—System Used by a Hamilton Firm—Systems to be Shown in Future Issues. —Reproduction of Forms.

A FEW weeks ago a request was received by Hardware and Metal from a retail hardware firm asking for some information regarding the methods employed by other retailers in handling charge accounts. Hardware and Metal has interviewed a large number of Canadian retailers and secured from them details regarding the forms, etc., which they use. For the benefit of "Inquirer" (name will be supplied upon request), and many others who are sure to be interested in the information gathered a number of articles will appear in this paper, descriptive of systems used by various retail hardware firms in Canada.

Every retailer who does a credit business knows it is very important that a close check be kept on all charge entries. The loss of a single charge entry will sometimes eat up the profits of several sales, and it is very important that all danger of loss through neglect or oversight be eliminated, as far as possible.

The accompanying illustrations show the forms used by the Mills Hardware Co., of Hamilton, Ont. The business of the Mills Co. is largely cash but credit is extended to manufacturing firms and others of good financial standing. The terms of the company are 2 per cent. 30 days or 60 days net. The Mills' system is a very simple yet effective one, entailing only a very reasonable amount of labor for the work accomplished.

Fig. 1 shows the original charge form. These forms are made up in book form, fifty in a book, and each slip is numbered. The form measures 6½ x 6½ inches, and is in triplicate. The top sheet is white in color; this is the original charge, and is retained.

Below the white form is the carbon paper, and then the second sheet, which is blue in color; this sheet is used for obtaining the signature of the receiver of the goods. The third sheet is yellow in color, and is always given to the customer.

By this method it will be seen that when the clerk makes an entry on the original charge form (Fig. 1), it is copied on the blue and yellow sheets. One writing suffices for all. In some stores each clerk is supplied with a counter check book for entering charge accounts. In the Mills store only one book is used at a time. This book is kept in a convenient place in the store and all charge entries are made in this book. Each sheet in the book is numbered. The accompanying illustration is numbered No. 5200. Corresponding numbers appear on the blue and yellow sheets. After the days business is closed the book is taken to the office and the charges are taken therefrom and filed

Talks of a Selfmade Merchant to his Clerks

Important Matters Taken up at the Weekly Conference—How to Beat the Mail Order House Selling Stoves—Getting the Christmas Campaign Under Way.

SINCE our conference last week there have been quite a number of new developments in the hardware trade—also a number of very important price changes. These matters will have to be discussed at to-day's conference; but first of all we had better take up the mail order catalogue question where we left off last week. I took the mail order house catalogue home last night and examined it. I find that as usual they have some leaders which they offer at a very low price. I note, however, that all these leaders are lines which the farmer would seldom order without including in the order a number of other lines on which the prices are fairly high. I have noticed item after item where the mail order price is anywhere from 5 to 20 per cent. higher than our price. So far you boys have only told me of one kick you have had from a customer who stated that our price on the Blank stove is four dollars higher than a similar stove offered by the mail order house under another name. I have looked at the stove illustrated in the mail order catalogue, and as far as you can judge from an illustration it looks identically the same as the stove for which we are asking four dollars more. We will have more kicks. What are we going to do about them? We should be mighty thankful that the customers come in and kick, because it gives us a chance to present our side of the case, whereas if the customer says nothing to us and simply sends an order to the mail order house we have lost the sale.

Now, in the first place, we should all be able to present some excellent arguments to show customers why they should purchase our stoves in preference to the mail order house stoves. Our price on the Blank stove is not high. We cannot afford to sell it any lower, and I know that the manufacturer we buy from is one of the largest and most reliable in Canada, and I feel sure that we get our goods at rock-bottom prices. I know that he does not sell to the mail order house, and, therefore, the latter has not got exactly the same stove as ours. I had an interesting case last year. Some of you boys no doubt remember it. Mrs. Walkins saw in a mail order catalogue a stove which she thought was exactly the same as ours and the price, if I remember correctly, was five dollars less. I tried hard to sell our stove, but the customer was adamant, and decided to send her money to the mail order house. Well, I followed up this case to see the result. The customer sent her money away about the 1st of November, the weather up to that time had been very mild. One week passed and the stove had not arrived. A cold spell set in and the lady needed the stove. She wrote to the mail order house and demanded an explanation. She received a prompt reply stating that they were very sorry, but there had been a big demand for this particular stove, and shipment would be made within the next two days. At the end of two weeks' time the stove arrived at the freight shed here. The usual notification was sent to the consignee. The lady then found that she had to hire a carter to deliver the stove to her home. This added seventy-five cents to the cost of the stove. Then she had to come down here to get a taper pipe, and that cost 20 cents extra. We always give one with every stove we sell. But that was not all. The stove had been exposed somewhere in transportation, evidently in a rainstorm, and there were many rust spots on the stove when it arrived at the lady's home. That meant disappointment and extra work polishing the stove. But that was not all. Although in the catalogue the stove looked the same as ours, it was not the same by any means. It was fifty pounds lighter in weight than the stove we sell, and its finish was very inferior. You can rest assured that the line we sell is not excelled in appearance or finish by any line of stoves in the market. Well, the lady was certainly disappointed; she admitted to me that she would have been money ahead by paying our price. She has been the means of turning our way two or three ladies who had the mail order bug, and were thinking of buying mail order heaters.

I do not think it is a good plan to refer to the mail order house unless you are sure that your customer is interested in the mail order proposition; but when you do find it necessary to fight the mail order house go after them hammer and tongs; be fair with them, do not knock them, but make our proposition look so much sounder than that of the mail order house that your customer will become convinced that it pays to deal here. Point out to the customer that she sees our stove before she buys it. She knows what she is going to get. There is no waiting for two or three weeks. We have the stoves here and can deliver them on an hour's notice. No drayman's charges when stoves are bought from us. If the customer lives here in town we set up the stove in the customer's home. If the customer lives in the country we see that all the parts fit properly before they are sent out, and the farmer will not have any trouble in setting up his stove. We also see that the stoves leave here in good condition—you never saw a rusty stove leave this store. Then there is the question of repairs. As you know, we keep a record of all purchasers of stoves, together with the number, etc., of the stove purchased. If in one or ten years from now the customer needs repairs we can look after his or her needs promptly. What does the mail order stove purchaser do?—writes to the mail order house and attempts to explain what is wanted—more delay—high prices for repairs—annoyance, etc. Then there are many other arguments which I have suggested at some of our former conferences. Our stove trade during October was not up to expectations. The unusually warm weather which prevailed all month had a strong tendency to slacken the demand for stoves, but it will come. I feel sure that as soon as we have a good cold

(Continued on next page)

snap there will be a rush for stoves. Many people put off buying last winter owing to the war. They can't stand another winter, and there is bound to be a good buying movement before long. We have had more "just-looking-around customers" in our stove department this fall than for many years past. These customers, as I have told you before, need careful treatment. Close the sales if you can, but if you can't, then be sure and impress your customer so that there will be a return visit before a purchase is made. Take the names of prospective stove buyers when possible, and we will send them on to the manufacturer. He can follow them up from the factory, and we will do so by letter.

Now there is another question we should bring up. Some paint manufacturers last week announced a decline of ten cents per gallon in the price of ready-mixed paints. Whether conditions warrant the decline or not, I cannot say; but I do know that we cannot lower the retail price of our paint. When that last advance of ten cents per gallon took place some time ago we did not advance our retail prices on quarts or half-gallons. We did advance the price on the gallon size 5 cents per gallon. You can see, therefore, that it would not be wise to lower our retail prices at present; in fact, we cannot afford to do it. Nails will have to go up 10 cents per keg. The wholesalers advanced their price last week, and I believe that nails will go much higher before long. We will also have to revise our prices on hinges and some lines of builders' hardware, as several advances in price went into effect last week.

We will also have to get our Christmas goods to the front. There is going to be a big demand for practical Christmas gifts this year. There is a great scarcity of many lines of Christmas goods which, prior to the war, were imported from Germany and Austria. There is also a scarcity of several lines of English cutlery. We have a great many lines suitable for Christmas gifts, and we must start our campaign early if we hope to get a good share of the business. We will go into this matter more fully next week, but in the meantime let us all do as much as possible to secure early orders for Christmas goods.

MANUFACTURERS TO HOLD EXHIBITION

(Continued from page 30.)

1916 convention be held at Toronto on February 22, 23, 24.

It is altogether probable that officers of the Retailers' Association and of the Manufacturers' Association will get together in the near future and a definite announcement regarding the meeting places and dates will be made.

Christmas Window Contest

FOR many years past it has been customary for Hardware and Metal to conduct a Christmas window display contest each year. The contest has become an event of wide interest for all Canadian retail hardwaremen interested in window trimming, and each succeeding contest competition has been keener and each year has seen a wider and more representative response culminating in the big success of last year.

In accordance with past custom, two contests will be conducted this year—one for stores in places under 5,000 population; the other for places of 5,000 and over. No restrictions will be set on the style of display or the goods used in the arrangement, except that each window must be arranged with goods for the Christmas trade.

Eight prizes will be offered as follows:—

PLACES OF 5,000 AND OVER

First Prize	$10.00
Second Prize	5.00
Third Prize	3.00
Fourth Prize	2.00

PLACES UNDER 5,000

First Prize	$10.00
Second Prize	5.00
Third Prize	3.00
Fourth Prize	2.00

Contestants will note that an equal number of prizes are offered to the small town window trimmer as to those in the larger towns and cities. The prize winners in last year's contest were: Places of 5,000 and over, first prize, H. W. Parr, Sommerville Hardware Co., (Mr. Parr has since joined the staff of Hardware and Metal; second prize, Chas. Buford, of the Bond Hardware Co., Guelph, Ont.; third prize, R. T. Thornhill, of P. Hymmen Co., Berlin, Ont.; fourth prize, Fred. J. Mills, of the Mills Hardware Co., Hamilton, Ont.

Places of 5,000 and under:—First prize, W. A. Evans, of D. Leckie, Kelowna, B.C.; second prize, John F. Bingham, of Binn's Hardware, Newmarket, Ont.; third prize, Carter Bros., Picton, Ont.; fourth prize, A. L. Shiells, Kincardine, Ont. In addition to the prize winning displays last year there were a great many displays which only fell a little short of the standard set by the prize winners.

Since last year's contest a good number of new hardware window trimmers have developed in the Canadian trade and this year's contest promises to be one of the keenest ever held. As Hardware and Metal's contest is the only annual hardware window display contest held in Canada, the results are followed closely by all branches of the trade throughout the Dominion.

Hardware window trimming has advanced wonderfully in Canada during the past few years and in every international competition held in recent years Canadian hardware window trimmers have secured a good number of prizes.

The contest closes on Friday, December 31. No photos received after that date will be entered unless there is proof that they have been delayed in transit.

All matter should be addressed to "The Editor, Hardware and Metal, 143-153 University Avenue, Toronto," and marked "For Christmas window contest."

HARDWARE & METAL

CANADA'S ONLY WEEKLY HARDWARE PAPER

Vol. XXVII. TORONTO, NOVEMBER 6, 1915 No. 45

A BRIGHTER OUTLOOK

A DECIDEDLY optimistic feeling has developed in business circles during the past two or three weeks. Retailers especially those in the towns and villages dependent upon agriculture, have been placing orders more freely, and a better all-round feeling is in evidence in all branches of the trade. City trade is still below normal owing largely to slackness in the building trades, but retailers are looking forward to a good volume of Christmas trade. The continued warm weather of the past six weeks has created dullness in late fall and early winter goods but this business will come with a rush on the advent of cooler weather. In large centres where shell-making is being carried on in a large way, business has been greatly stimulated by the new industry. The announcement made during the early part of the week that further large orders for shells would shortly be placed in Canada has helped to create a feeling that business during the coming winter should be good. The unemployment problem which in former years has been a big problem to deal with, will be non-existent during the coming winter. There is now a great scarcity of mechanics and a great many laborers who were out of work during the summer are now steadily employed. Able bodied men are enlisting in large numbers, and in many cases their places have to be filled by others. And it is quite evident that business will become very active before the end of the year. Usually the crest of the grain movement is reached about the second week in November. By that time this year the real movement will only have commenced its full swing. When navigation closes it is doubtful if 50 per cent. of the exportable surplus of wheat will have reached ports on the eastern side of the lakes. Meanwhile, deliveries at primary points in the West will continue, and against them money will be advanced by the banks, which are in a good position, and probably will remain so, to make the advances. While a very large proportion of the crop proceeds will be utilized in settling old debts, there will be a very large balance go into farmstead improvements and into necessaries of life. The economy of some years and the inevitable wear and tear has created a real need for these that will now be met. Hardware houses report that the demand from the rural points is so strong as to make them anxious as to their ability to get in stocks of some lines from manufacturers, to meet the normal demands of the winter. It is all too obvious that a crop much greater than generally expected has injected into the business situation, especially in the West, a confidence the effect of which will not be fully felt until the early months of 1916.

THE STEEL INDUSTRY

ORDERS for steel to be used in the manufacture of war materials have not diminished in any way. On the contrary, the increasing volume of orders being placed for shells in both Canada and the United States is creating orders to such an extent that some steel companies in the States are limiting their bookings so that they can derive the most benefit from rising prices. Nevertheless, many plants are booked full for three to six months ahead, while orders are booked for a year ahead. An American authority in referring to the demand for steel states that despite the efforts of the larger steel companies to hold the demand in check, signs of a runaway steel market are increasing. Orders are being received at such a rapid rate that all are subject to careful consideration before being accepted. In the case of some materials it is a question of getting deliveries rather than a question of prices. October established a new record in the output of iron and steel, but despite huge production, the heavy demand is causing many mills to fall back in deliveries. The extraordinary demand for open-hearth steel has brought about conditions much similar to those which existed some years ago. Foundries that have open-hearth furnaces are taking contracts for forging billets, and are arranging to have steel ingots bloomed by steel companies which have excess capacity in blooming mills. Barb wire, steel rounds, forging billets, blooms and wire rods are greatly to the fore in the export demand in the United States. Over $40 per ton has been paid for wire rods. Huge sales of barb and other wires have also been made for

export. The magnitude of railroad purchasing is indicated by the fact that 250,000 tons of steel will be required for steel cars recently bought in the Chicago market for several roads. In finished materials, prices are high and the demand is very strong. One American steel plant which has been idle for eleven years is to be rehabilitated to roll large rounds for export. Another steel company is preparing to start a plant which has two 300-ton blast furnaces and a 500-ton Bessemer steel department. This plant has been idle for some years and is only operated when the pressure for steel becomes strong. With the advent of a million-ton-a-week business the steel industry of the U.S. is rapidly reaching the peak of its present capabilities.

MUNITIONS ORDERS ONLY?

DURING the week Canadian industry, particularly the mechanical trades, has been electrified by the statement from D. A. Thomas, who personally represented Lloyd-George in Canada in the reorganization of the system for the placing of munitions orders, to the effect that such business in this country would amount to $500,000,000. Although it has been appreciated that the volume of the shell orders in Canada have been steadily swelling, the statement of the enormous total from such an authority has given an impetus to manufacturing in the lines chiefly affected, evidence of which is to be found in the stock market proceedings.

But while the scale upon which munitions are to be manufactured in Canada has increased enormously and will evidently increase to much greater proportions, there is no present indication that the British business to be placed on this side of the water as regards general field supplies is to be materially developed. This seems rather difficult to explain in view of the extended nature of the campaign indicated in such immense supplies of munitions, but it is a fact that recently there has been little activity in this line.

By those in touch with the situation it was believed that the exchange situation had discouraged the placing of further orders on this side of the water, while excessive freight rates were advanced as another factor. However, this theory seems to be discounted by the recent munitions orders, unless it is that it is hoped that the exchange situation will right itself before the main portion of the munitions are delivered or that by shifting the bulk of the orders to Canada better arrangements will be possible as to credits.

On the other hand, Great Britain has undoubtedly been developing her various industries for the manufacture of general supplies of articles of clothing, foodstuffs, etc., for field use and it may be that she is finding that there is better satisfaction in making these at home. The theory advanced that the British policy has been to develop general industries and buy munitions abroad might almost be considered in these circumstances.

Canadian manufacturers will look hopefully for that increase in general war orders which might be expected with the munitions business.

FIGURING PROFITS

IN a few weeks' time thousands of hardware firms will be taking inventories, and balancing up their books for the year to see whether or not the business of 1915 has yielded the desired profits. At inventory time there is always considerable discussion regarding the correct way to figure profits. It is a well-known fact that many merchants fail in business because they do not figure their profits correctly. There is a variance of opinion regarding the correct way to figure profits, some merchants claiming that profits should be figured on the cost price of goods, while others state that profits should be figured on the selling price. Authorities who have made a close study of the question claim that it is scientifically correct to use either the cost or selling price as a base in figuring the percentage of profit, as long as it is stated and made clear on what base the percentage has been calculated. The majority of successful firms have adapted the method of figuring the percentage of profit on the selling price. The vital issue, however, is the showing of net profit in dollars and cents at the end of the business year, when the inventory has been completed and the books are closed. And in order to make a satisfactory showing, is is necessary that a proper method of figuring profit should be followed throughout the year. Where many men make their mistake, and fool themselves, is in their refusing to see or acknowledge that any per cent. of a smaller sum is a smaller per cent. of a larger sum, or in other words, if 25 is twenty-five per cent. of 100, it is only twenty per cent. of 125.

In an article on the correct way to figure profits which appeared in Hardware and Metal some months ago, an instance was quoted showing how a retail hardwareman had erred in figuring profits. The hardwareman bought steel squares at $1 each. His cost of doing business, so he said, was 25 per cent. (based on gross sales), and he wanted to make a profit of 10 per cent., so he marked the squares to sell at $1.35. His price should have been $1.54 to make a 10 per cent. profit.

This merchant's cost of doing business was 25 per cent. of his selling price, but in pricing his goods he made the frequent and fatal mistake of only adding 25 per cent. of the invoice price. He also made a similar mistake in regard to his 10 per cent. profit.

BRIEF

FARM TRADE is the backbone of the average hardwareman's business. He should cultivate it in every way.

Christmas and the Tool Department

Reasons Why There Should be a Good Sale for Tools During the Next Few Weeks—Manual Training Creates a Demand for Tools—Thousands of Students in Canada—How to Feature Tools

THE festive season is rapidly approaching, and as we look back, it seems as though Christmas of 1914 had been but a few weeks ago. Great world events have taken place since last Christmas. Great nations are still at war, and although the British nation is still in the thick of the contest there is not a sign of pessimism in Canada. Many valuable men have been lost during the past year, but thousands of others are flocking to the colors. Business is being conducted as usual in all parts of Canada, even though there is a slackness in the demand for certain classes of goods. The Christmas festive season will be observed in Canada this year just as it has been in past years, and the fact that Christmas will be observed as usual this year as far as business is concerned, is shown by the activity in the retail stores of our large cities.

Walking down the street in a large Canadian city a few days ago the writer noticed several indications of an approaching Christmas season. Passing a photographer's window I noticed a neat card ornamented with a Christmas design, and bearing the following:

"Secure an appointment at an early date for your Christmas pictures."

Further down the street was a stationery store. The window had a huge sample card of private Christmas greeting cards displayed, and a show card bearing the following: "Our line is complete just at this time—select your cards while the selection is complete."

Further evidence that Christmas is not so very far away could be seen in the show window of a fur store where a show card was exhibited with the following:—"A small deposit and we shall be glad to hold any of these high class furs until Christmas." A candy store featuring high class candies displayed a card suggesting that orders for Christmas candies be placed early, while several jewelery stores were showing advance displays of Christmas goods. One large department store had devoted one window to a large display of toys. Another was showing packages of good things suitable for shipment as Christmas boxes to the troops at the front. What are the retail hardwaremen doing? Some are starting early to drum up Christmas trade, while others are waiting for the annual last minute rush. One hardware firm recently displayed a neat arrangement of mechanics' tools, and accompanying the display was a neat show card bearing the following, "BUY HIM TOOLS FOR CHRISTMAS." And here is a thought for other hardware merchants. There are greater possibilities for selling tools for the Christmas trade of 1915, than have ever existed in any past year. Of late years there has has been a tendency at Christmas time to give practical gifts. This year, more than ever before the tendency will be in the same direction. Owing to the war, supplies of many lines of goods formerly imported have been cut off. Many of these lines were at the most, unpractical. This year, gifts of a practical nature will predominate. Gift-giving will go on as usual, but the buying public today is spending its money wisely, on gifts that will be of some practical use to the recipient. In every hardware store there is a wide range of goods suitable for Christmas gifts. The goods range all the way from wash boilers or food choppers to cut glass and silverplated ware. There is a wide range to choose from, but the goods in order to sell in fairly large quantities have to be featured as being suitable for Christmas gifts.

A splendid display of mechanics' tools arranged by Chas. Byford for the Bond Hardware Co.. Guelph, Ont. Window trimmers can secure many ideas from this trim. Machinists' tools are good sellers at Christmas time. Many

A Good Line

There is one line, however, worthy of special attention at the present time, and that line is tools. From time immemmorial tools have been a necessity. At one time they were only used by mechanics but during recent years there has been a rapidly growing tendency towards men of moderate means having tool kits of their own. Why should a man have to hire a carpenter to hang a screen door, or any one of dozens of small jobs that can easily be done by the householder who is the possessor of a small kit of tools? Every man is more or less interested in tools. Place a good display of tools in your show windows with a price tag attached to each tool and see how many men will stop to examine the display. All classes of men from laborers to professional men will stop to examine a good display of mechanics' tools. And the goods will sell, when shown. Sell a man a hammer and saw and he will soon be back for a plane. Then he will want a brace and some bits, a little later he will find out that he needs a mitre box, a hack saw, an automatic screw driver, a scratch awl, and so on down the line. Once you start

(Continued on page 43)

Sheet Metal Workers' Course

By Chas. Sievers

IN previous articles shown, which dealt with branches, Ys or tee, they were all for branches, etc., which were the same diameter as the pipes or cylinders had to be taken. In this article is shown how a smaller branch or Y pattern must be developed.

Not only will it require a pattern for the branch piece to be developed, but also that of the hole in the larger pipe.

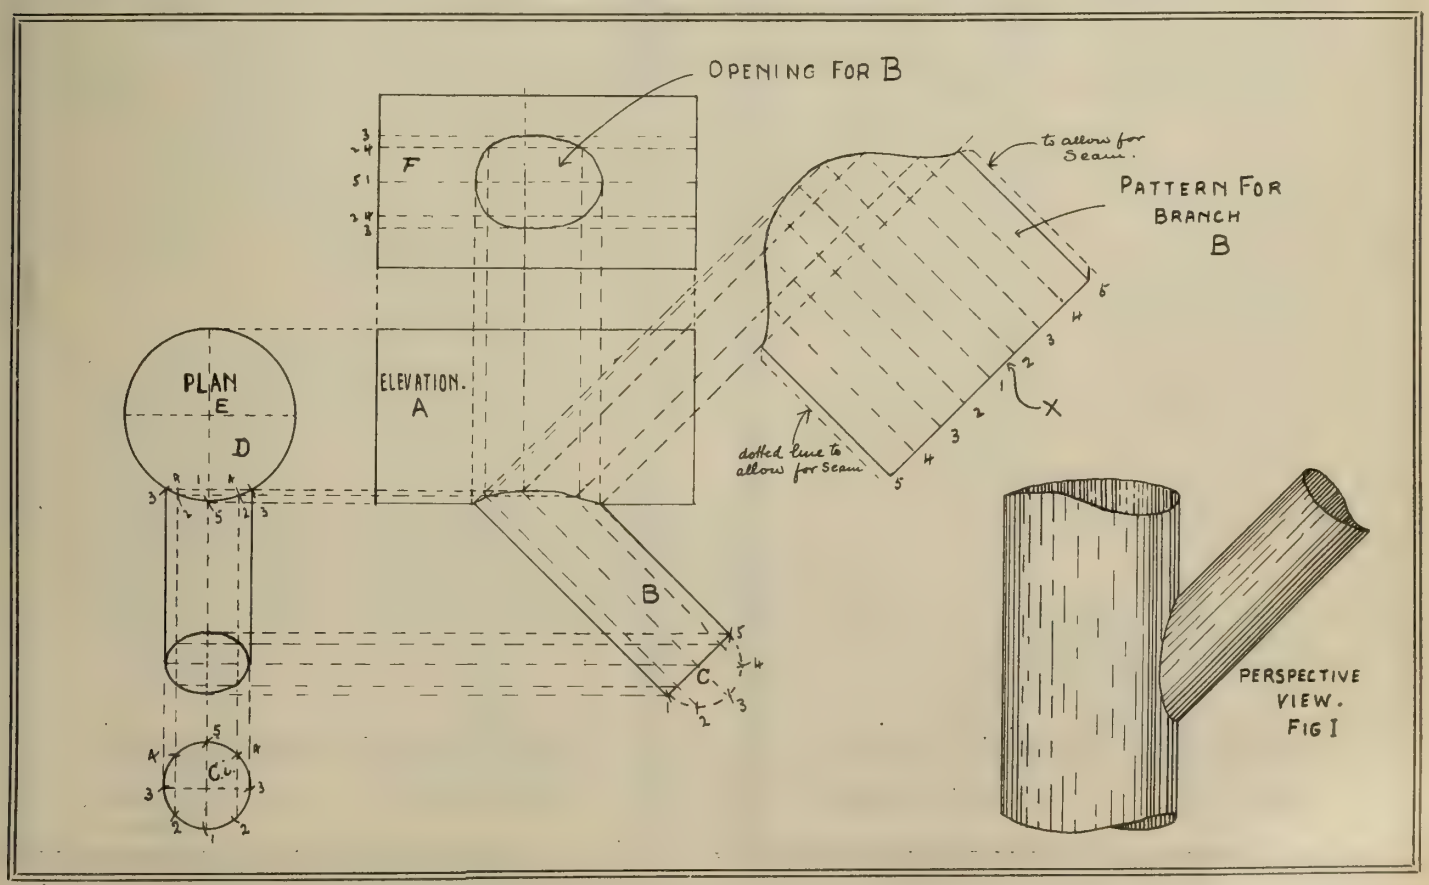
The same method is adopted, whatever angle it may be, the first step in pattern development is to draw an elevation, as shown at A and B. Then draw all lines as shown till they intersect at the various points. It will be seen that the plan D is actually acquired by drawing dotted lines downward. We will show how to develop the taper piece in our next issue.—Editor.

Having drawn the elevation, determine the centres of A and B; then form half-circle C on the branch and full circle on, as shown in plan D. Next place compass at E in plan and transfer the diameter of branch, and in that way determine full plan of both the main cylinder and branch. Next erect the centre line, as shown, and form small dotted circle. Next divide C^1 in equal parts, as shown, transferring same measurements to half-circle C, shown on branch B. Next draw dotted lines, shown at C^1, 1, 2, 3, 4, 5, 4, 3, 2 upwards until same intersects the circle D, and repeat the operation at C, 1, 2, 3, 4, 5 on the branch B. Next draw lines, as shown, from where dotted lines intersect plan to where they will intersect the dotted lines drawn at C, 1, 2, 3, 4, 5.

The next step will be to draw a section of elevation where the pattern of opening may be developed. This is done by extending lines upwards, as shown at F, and it may be stated this opening may be drawn on a small piece of material and afterwards scribed out on the larger sheet which would be used on the actual job. Next transfer the measurements from C_1 to section F, beginning with the centre measurements 5, 1, until all have been transferred; then extend these measurements, as shown across section F. Now erect dotted lines upward from elevation at points where dotted lines from plan D and branch B intersect, and in doing so another set of intersections are formed in F, and at points where these lines intersect is shown the pattern of opening, as described.

Our next step will be to develop pattern of branch. This is done in exactly the same way as a square elbow pattern is developed, except that the points of

(Continued on page 41)



Weekly Advertising Suggestions

The Advertising Suggestions Below Have Been Prepared For Use by Readers of Hardware and Metal. The Suggestions Can be Used in Whole or in Part, as Desired. Retailers Can Insert Their Own Prices Under the Various Headings

A Cold House?—No!

THE first nip of cold weather reminds you that you must get your house in good order for the approaching winter. You may need a new stove—a coal hod—stove pipe enamel—or any one or more of a dozen stove accessories—We have them here waiting for you—at reasonable prices. Several months ago we anticipated your cold weather needs and placed orders for all necessary supplies. If your needs are not listed below let us know what they are—the chances are we have the goods in stock, but if we haven't, we can get them—on short notice.

Stoves and Ranges — A modern line of stoves from the small coal oil or gas heater for heating a single room, to the handsome and powerful range or heater that gives a maximum of service on a minimum of fuel. With every stove you get our personal guarantee. Prices range from $4 to $60.

Coal Hods, Etc.—In many homes a coal hod is a necessity. Coal hods vary in size and quality but we have the assortment you would like to see. Prices range from 25c to 60c each. Stove shovels are made in a variety of sizes also, and we have them at prices ranging from **5c to 25c each.**

Saving Coal Bills—Thousands of tons of coal are wasted every winter because people do not like to sift ashes—it is a mighty disagreeable job unless you have a modern sifter. Ask to see the modern "Savecoal" sifter, absolutely no dust when sifting. Of course we have a number of other styles and the prices range from **15c to to $5 each.**

Furnace Scoops—Do not attempt to feed your furnace with a snow-shovel and scatter the fuel all over the cellar floor. We have a good, strong steel furnace scoop with long or D-top handle, just the right width for a furnace door, and you can buy either style for **40c.**

Stove Pipe Enamel—The life of stove pipes can be greatly lengthened and their appearance greatly improved by using —— stove pipe enamel. A brilliant enamel that is easily applied, does not smoke, nor burn off. We have a sample pipe in the store finished with —— stove pipe enamel. Come in and see it. The enamel is put up in various sized packages, **ranging from 10c to 25c.**

Stove Pipes and Accessories—Do you need a few odd lengths of stove pipes or a complete new outfit? We can supply you with any number from one to a hundred lengths. We have a heavy stock of plain and polished pipe in both 6 and 7-inch sizes, ranging in price from 10c to 13c per length. We also have elbows at 15c and 20c; tees at 35c each; pipe collars at 5c each; tapers at 20c each; flue stoppers at **10c each.**

(Other seasonable lines.)

Weatherstrip—Linoleum Varnish
Floor Paint—Window Glass
Stove Boards

The Blank Hardware Co.

Phone 100 **75 Main Street**

Preventing Losses on the Farm

"CONSERVATION of our resources" is a subject that is being discussed in all parts of Canada — but more in the country districts than in any place we know of. There is not a farmer in the Dominion who can afford to overlook the danger of losses which might occur through very common causes. Most losses are preventable if foreseen in time. You will get a few suggestions, that will help you to save money, by reading the following:—

Loss Through Leaky Roofs

Figures could be presented to show you that there is an extraordinary loss sustained by farmers each year, as a result of leaky roofs—and this loss could be prevented. We can sell you roofing for carriage sheds, outbuildings, kitchens, chicken coops, barns or any other buildings. Our ———— Brand roofing is put up in convenient form with nails, caps, cement, etc., for easy application, and the price is extremely low when quality, durability and ease of application are considered. Let us show you a sample next time you are in town. If you cannot get in right away, drop us a postcard. We will be glad to send a sample of the roofing with booklet, prices, etc., by return mail. Roofing from $1.25 per square and upwards.

Lanterns and Fire Losses

No farmer can afford to take chances with a poor lantern—Imagine losing the rewards of a season's work through fire caused by a defective lantern. We offer you a strictly up-to-date lantern with safety globe guard, patent extinguisher, secure handle and other features which appeal to the farmer. The price is only 75c.

Protect Your Horses

The average farmer takes pride in the condition of his horses—the horse needs attention just the same as the human being—Give your horses the care and attention they deserve and you will increase their efficiency at least fifty per cent.—One way to attain this is to provide them with warm blankets. Let us show you our stock. Prices from $1 to $6.

Farmers Like Good Axes

We know that the average farmer likes a good axe—a poor axe is a time-waster. Our axes have been purchased from one of the best known makers—a leader in his line. We have them in a variety of shapes and sizes—One line in particular—a great favorite with farmers—is absolutely guaranteed in every way. We would like you to have a look at it. Prices range from 75c to $1.50.

Protection for the Hands

The cool, frosty weather at this season of the year, and especially in the early morning—is hard on the hands. Farm chores will be more pleasant if the hands are properly protected. Our stock of lined and unlined mitts and gloves is now complete and the values this year are surprisingly good. We also have canvas gloves for light work. Prices range from 10c to $1.50 per pair.

The Farmer and his family are always welcome here.

Illustrate Your Christmas Advertising

A PICTURE in an Advertisement is an attention-getter. The illustrations shown on this page are all related to Christmas.

Put the Christmas note into advertising by the use of one or more of these illustrations. Advertisements will "pull" better. Put it up to your local merchants.

Select the cuts you desire—order by number. Remit the price with your order. Why not order all the cuts shown on this page?

Electros are sent carefully wrapped, postpaid. You can use them this year, next year and the year after. A good investment. Another assortment is shown on page 67.

What Other Papers Say

Items of Interest From Other Papers—In Each Instance Credit is Given to the Paper From Which the Item is Taken—Some Items of Overseas Trade—Competitions the Retailers' Problems—Study Yourself in the Mirror of Others

SOME ITEMS OF OVERSEAS TRADE

From the Ironmonger, England.

THE value of British exports in September, as seen from the abstract of the Board of Trade Returns, maintained approximately the average of the past six months, and exceeded that of the corresponding month of 1914 by £5,634,000. Iron and steel material shared in the increase by nearly a million pounds, but that increase is wholly accounted for by increased supplies to countries of the Allied Powers, exports to other markets showing a considerable decline. Italy took 19,459 tons and France 9,977 tons of British pig iron, compared respectively with 688 tons and none in September, 1914. Our exports of steel bars, angles, shapes, and sections went up from 13,868 tons to 35,853 tons, of which 26,312 tons went to France, whereas none was sold to that country in September, 1914.

The figures on the import side also contain some interesting items. Last September we imported 5,166 tons of basic pig iron from the United States, whereas in September, 1914, we received none. No iron of this class arrived from Sweden last month; but the import of Swedish forge and foundry iron was 16,555 tons, against 5,626 tons in September, 1914. The total of the latter trade for the nine months was 26,430 tons from January 1 to September 30, 1914. Purchases of steel blooms, billets, and slabs from the United States were maintained at the high level of the past few months, the quantity being 36,900 tons, against 990 tons. During the nine months the United States has sent us 289,230 tons of this material, as compared with 22,347 tons in the corresponding period of 1914. The values returned of the month's purchases averaged nearly £7 10s. per ton c.i.f. A considerable increase is recorded in purchases from abroad of wire rods, wire, hoops and strips.

COMPETITION THE RETAILER'S PROBLEM

From the Credit Men's Journal.

NO question lies closer to the heart of the average retail merchant than that of how to meet competition successfully. To him, this is one of the vital problems of life, one of those things that must always be faced and rarely ever answered.

To-day retail merchandising is on a plane hitherto unknown. The last quarter of a century has brought a vast change in methods. To-day the retailer is confronted with anxieties and troubles undreamed of by his forefathers. The entire system of retailing has undergone re-organization and better methods have come to replace those that are obsolete.

The mail order house has come and progressed like the proverbial mushroom, and while its coming has hurt the retailer, it cannot be classed as an unmixed evil. It has compelled the retail dealer to adopt better business methods, to give closer attention to detail, and to consider more carefully the needs of the community wherein he does business.

* * *

STUDY YOURSELF IN THE MIRROR OF OTHERS

From American Artisan.

ONE of the greatest assets of a retail hardware dealer, if not the greatest of them all, is the personality of himself and of his employees, whether they be salespeople or work in any other capacity in his store.

The dealer who is of pleasant demeanor; who is anxious to please his customers, who is truly courteous; who shows his willingness to render efficient service—such a man is almost certain to make a success as a hardware dealer, even if he may not be exceptionally well equipped as a buyer or salesman.

And yet, isn't it strange that so many owners of hardware stores fail to appreciate the importance of developing these characteristics in themselves or in their employees?

We all recognize the faults of the salesman who waits on us with a surly mien; who shows in his very manner that he doesn't care whether he can help us to decide on our purchase—but why are we so prone to excuse the same faults in ourselves?

The reason for this may be found in the fact that we are unwilling to make any effort toward self-analysis. But that, of course, is no excuse, but rather an additional cause for blame.

Self-study is distinctly worth while. It must, however, be honest and conscientious. But if it is we are bound to benefit materially, for then we will be certain to develop our good qualities and correct our bad habits—and all of this will make us better—not only as salesmen and owners of stores, but most important of all, as men.

* * *

DON'T PUT A SILENCER ON YOUR PEP

From the Sporting Goods Leader.

A SILENCER is a fine thing to be attached to a firearm. They may be all right to attach to men who snore, but don't attempt to use one on your business enthusiasm. If you feel like making a loud report about the volume of business you are doing, get right up on top of the house and shout out the glad tidings. If you have received a shipment of goods of which you are proud, do not attach your Maxim and then get in a sound-proof room to say so. Shout it so everybody will hear what you have to say. Talk loud, but not too fast. Keep the dear people informed on what's going on at your store by using the advertising columns of the newspapers.

This isn't aimed at somebody away off in some other state, dear reader. It is aimed right at you, and the writer sees you just above the top of the gold bead of his No. 6 typewriter. Some men never find anything to fit them except on rare occasions when they occupy seats in the Amen corner, and feel that every eye in the congregation is riveted upon them. If your business isn't what you think it ought to be, don't blame the president. He may not know your business. Don't blame the state administration; don't blame the town and its people. Just take a long look at yourself. Get down under the skin, make a thorough analysis, and see if you can't find the cause of all the bad business. True, business conditions have not been as good as they might have been, but that is no excuse for tossing up the sponge. You may have noticed that the mail order houses have been sending out their voluminous catalogs just the same. They haven't quit; they are going after business with more vim than ever. If you have quit advertising because you can't afford it, change your mind. You have a change coming. "Pep" up: make the sales force "pep" up and see if business won't show a gain.

THE JUNIOR CLERK'S PAGE

The Stimulus of a Great Purpose

By Dr. Orison Swett Marden

IT does not matter how much ability you have, if you lack that power of resolution which knows no surrender, which fixes on its goal and never turns back, you will not achieve anything that is distinctive.

In this day of sharp, close competition it is only those who fling the weight of their whole lives into their vocation who can succeed in any marked, individual way. A half-hearted or indifferent purpose produces only half-hearted results.

A new howitzer in use on the European battlefront throws a shell more than twenty-five miles. But in order to do this there must be a certain amount of propulsive explosive back of the shell. It must be confined and liberated in a certain manner. If the gunner should put in only half the required amount of powder the shell, of course, would never reach its mark. It would fall short just in proportion to the lack of energy back of it. It is not only necessary to have ample powder back of the shell, but it must be the best powder; it must contain the maximum of energy. No army could afford to face the enemy with lifeless powder.

People everywhere are going into the battle of life with poor or insufficient powder, and, naturally, they fall short of their mark.

The projectile power of your ambition depends wholly on the vigor of the determination behind it. What you accomplish will depend on the live energy of your purpose, the enthusiasm and will power you put into your efforts to achieve.

It is pitiable to see multitudes of young men weakly longing for success, but not willing to pay the price for the big things they desire. They do not seem to realize that there is a tremendous difference between wishing to get on and determining to get on, between the desire that has no "must" in it and the desire which grips every fibre of one's being with a determination to win at any cost. They have not had it impressed on them that the difference between a mediocre career and a superb career is the difference between waiting for something favorable to turn up, for some big opportunity, waiting for help, for somebody to boost us, and taking off one's coat and plunging into a career with a grim determination which knows no defeat.

Write it in your heart that there is no success worth the name outside of what a man or woman achieves through his or her own efforts.

The world is full of people who are waiting to be pushed, boosted, helped, but they will never be anything but weaklings. If they do succeed through pull or influence in getting the place they long for, they will not have the ability to hold it. I know men who are always talking of the wonderful things they would have done if they had only had a chance such as others have had; if they could only have gone to college; if they could have had special training for the thing they wanted to do. But they had no one to send them to college, nobody to help them make their lives more complete, their achievement more worth while. Experience and observation have convinced me that those who make such excuses for their mediocre lives would not have amounted to much no matter what their advantages.

The youth who is determined knows that his opportunity for the job above him lies right in the thing he is doing. He knows that the key that will open the door to the thing he desires is in his own hand. The power that sends the man to his mark is not influence, pull, or outside capital; it is the initiative energy, the willingness, the completeness and superiority which he puts into whatever he undertakes. The propelling force is all within himself, and he knows very well that, if this does not open the door to the higher things he is striving for nothing else will.

There is no possibility of holding back the youth who has made up his mind to get on in the world. He finds an opportunity in every study he masters, in every letter he writes, in every errand he does, in his manners, in his dress, in his manly bearing toward his elders, in his chivalric consideration for those weaker than himself. He finds one in his willingness to do more than he is asked to do, more than he is paid for, in being polite and attentive to all with whom he comes in contact. In short, he finds plenty of opportunities every day which will lead to his longed-for advancement and he uses them as stepping stones to promotion. He doesn't have half as much difficulty in finding time to improve them.

I have before me a letter from a young man asking me to tell him "how to make things happen." Now, as I have told this correspondent, the young man who has a definite goal in view, who is in earnest in his purpose to attain his ambition and make his life count will not ask anyone to tell him how he can make things happen. The Gladstones, the Disraelis, the Strathconas, the Liptons, the men of the past and present everywhere who swam up stream to their goal did not ask anyone to tell them how they could make things happen.

SHEET METAL WORKERS' COURSE

(Continued from page 37.)

intersections are used which has been formed by the various intersected dotted lines from plan D, branch B, and vertical lines to section F. Next draw a solid line, as shown in pattern at X, and stretch out measurements from half-circle C on B, beginning at 5, 4, 3, 2, 1, and 2, 3, 4, 4, as shown. It will be seen points 5, 5 are the shortest measurements and point 1 the longest. Next erect dotted lines from the stretch-out X upwards until they intersect the dotted lines last drawn. Then by connecting the various points intersected the pattern the branch is completed.

A business organization may be ever so magnificently constructed; may be organized with almost infinite perfection, yet a few erroneous policies will run this organization into an "iceberg," and the work of years, the experience of many men, all go down in the mad whirl of business blunders.

EVENTS IN THE TRADE

Chas. A. Moore Married.

The marriage took place recently at Stratford, Ont., of Chas. A. Moore, manager and secretary-treasurer of the Stratford Manufacturing Co., to Miss Myrtle Beulah Harris, daughter of Johnson Harris.

Business Changes

Expanse, Sask. — Isabella Schultz, hardware, has sold out to D. A. Reinoehl.

Kandahar, Sask.—P. Johnson, hardware, has been succeeded by F. J. Sanders.

Fort William, Ont.—The stock and fixtures of G. P. McLaughlin have been sold to H. Harvey.

Dominion Incorporations

Premier Sales Co. of Canada capitalized at $100,000, to manufacture machinery of all kinds and deal in wood, metals and minerals, head office, Montreal, Que.

Neely Rotary Engine Company of Canada, Limited, capitalized at $200,000, incorporated to manufacture engines, automobiles, trucks, tools, etc., head office, Toronto, Ont.

Renown Engine and Machine Company, Limited, capitalized at $50,000 to manufacture machinery of all kinds and war munitions, head office, Montreal, Que.

Steel and Radiation, Limited, capitalized at $5,000,000, incorporated to manufacture iron, steel and other metals; head office, Toronto, Ont.

National Steel Products, Limited, capitalized at $100,000, incorporated to manufacture munitions, explosives, projectiles, shells, guns and gun-carriages; head office, Toronto, Ont.

Lachance Nut Lock Co., Limited, capitalized at $300,000, incorporated to manufacture the "Lachance" nut lock and other apparatus; head office, Montreal, Que.

The Canadian Bridge Company, Limited capitalized at $2,000,000, to manufacture and deal in iron, steel and other metals, and to carry on bridge building in all its branches, head office, Walkerville, Ont.

International Gas Company of Canada, Limited, capitalized at $125,000, incorporated to manufacture and distribute petroleum and other oils, also minerals and metallic substances of all kinds, head office at Ottawa, Ont.

SHERWIN-WILLIAMS ANNUAL CONVENTION

Montreal, Nov. 2, 1915.—The annual gathering of all the travelling representatives, managers and heads of departments of The Sherwin-Williams Company of Canada, Ltd., met in annual convention at headquarters, Montreal, Oct. 25, 26, 27 and 28.

At the opening session the convention was addressed by C. C. Ballantyne, vice-president and managing director, and W. H. Cottingham, president, who reviewed the past year's business, which they considered very satisfactory, under existing conditions, and spoke most hopefully about the outlook for the coming year.

Cheques for the winners of the top-notcher and other competitions were distributed by the president, and in each case he extended his heartiest congratulations to the winner.

The convention was of a very practical and thorough nature, all of the company's products being thoroughly explained and their uses by the managers and heads of departments. Short talks were also delivered by some of the travelling representatives on the various products.

The annual banquet was held at the Canada Club, which proved to be a very great success, and speeches were delivered by all the company's officials, as well as the directors and guests.

The president, Mr. Cottingham, offered a personal prize of $1,000, for the coming year, to any of the employees of the Sherwin-Williams Company of Canada, Ltd., or their subsidiaries, that would make the best practical suggestion in any way that would benefit either the company's products or their organization.

Nothing but optimism prevailed throughout the convention and banquet, and all the managers and representatives left for their various territories full of enthusiasm and determination to make the year 1916 the biggest and greatest the company has ever had.

Ontario Incorporations

Manual Constructor Company, Limited, capitalized at $40,000, incorporated to manufacture toys, and light hardware of all descriptions; head office at Toronto, Ont.

Specialty Machine Company, Limited, capitalized at $150,000, to manufacture munitions, specialties, tools and implments and other machinery, head office Toronto, Ont.

The St Catharines Steel and Metal Company, Limited, capitalized at $50,000, to manufacture machinery, tools, and electric apparatus, head office St. Catharines, Ont.

Casey, Harris Mining Company, Limited, capitalized at $100,000, incorporated to acquire and develop mines and mineral lands and deposits; head office at Toronto, Ont.

CATALOGUES AND BOOKLETS

Goodell-Pratt Company, Greenfield, Mass., recently issued an attractively gotten-up 16-page booklet entitled, "What to Give a Boy," for Christmas, 1915. The object of the booklet is to suggest good tools as suitable gifts for the boy, gifts that will be appreciated and used, the cost of which will be money well spent. The booklet is well illustrated, and is for free distribution. Retailers can secure booklets from the above-mentioned firm.

Philadelphia Lawn Mowers

The Philadelphia Lawn Mower Co., Philadelphia, Pa., recently completed its forty-eighth annual catalogue of Philadelphia lawn mowers. The catalogue consists of 28 pages, and is neatly gotten up, and well illustrated. Two new types of lawn mowers, not in last year's catalogue, are shown in the latest issue. Among the special features of the catalogue is an interesting description of the Philadelphia roller bearing and its relation to the ball bearing. Copies of the new catalogue will be supplied on request.

Coal and Wood Chutes

O-Rib-O Manufacturing Co., Winnipeg, Man., have issued a special booklet featuring the Gibboney self-locking coal and wood chutes. The chutes are made for receiving coal, wood, or vegetables, and can be used in residences, business blocks, churches and other public buildings. Copies will be mailed on request.

Trade Inquiries

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

1148. **Enameled Hospital Supplies.**—A St. John's firm desires to be put into touch with Canadian manufacturers of enameled steel hospital supplies.

1149. **Steel Tubes.**—An inquiry has reached the department from Birmingham for cabled quotations on two thousand solid drawn steel tubes, 11 feet 2 inches by one three-quarters No. 12 I.W.G. swelled to seven-eighths for (2nd sheet 23) 4 inches at one end and reduced to one five-eighths for 2 inches other end, solid preferred, but lap-welded considered. Earliest delivery desired.

1152. **Tools and Paper.**—A Durban firm of merchants, who also act as commission agents, are anxious to be put in touch with Canadian manufacturers of the following articles: Miners' shovels, picks (two weights required, 2½ pounds and 3 pounds); handles, good quality maple or oak; brattice cloth; wrapping paper, of which the size must be 29 inches by 45 inches, in two weights, one 40 pounds per ream and the other 56 pounds per ream; grease-proof paper in size 20 inches by 30 inches, and must weigh about 18 pounds per ream; vegetable parchment paper, size required, 23 inches by 36 inches.

1153. **Hardware, Handles, Organs, etc.**—A South African firm, with headquarters in East London, asks for catalogues and price lists from Canadian firms prepared for export on hardware, all kinds, shovels, axes, woodenware, handles, store trucks, hand carts, chairs of all kinds except office, tables, organs, brushware, wrapping paper, paper bags, bacon and hams, cheese (small sizes), and condensed milk.

1155. **South African Agency.**—A Durban commission agent in close touch with all Natal mines is prepared to take up agencies for mining material and supplies generally, including machinery and appliances. Will also consider agencies for fencing material, iron standards and wire, agricultural and other machinery, motor vehicles and power lorries, printing and wrapping paper, calcium carbide, caustic soda, condensed milk, handles and other lines.

1156. **Enamelware.**—A South African commission house is prepared to take up the agency for enamelware, blue with white lining, in general kitchen utensils.

1157. **Rubber Boots and Shoes.**—A firm in Glasgow, having a large wholesale connection, prepared to furnish satisfactory bank references, wishes to obtain the agency of a Canadian exporting house.

1159. **Leather.**—A London firm asks to be placed in touch with Canadian manufacturers of dressed and patent leathers, in calf and sides, also glace kid, sole leather, etc., which they are prepared to handle upon a commission basis or to purchase outright.

1161. **Graphite.**—A London pencil manufacturing company is desirous of obtaining from Canada supplies of graphite, according to samples which are being forwarded to the Department of Trade and Commerce, Ottawa, and invites offers from producers.

CHRISTMAS AND THE TOOL DEPARTMENT

(Continued from page 36.)

a man gathering a set of tools, if you treat him right, he becomes a steady customer for years. With some men, doing odd jobs around the house is a hobby, and men of this type are always on the look out for new tools.

There are many professional men in Canada who have more elaborate and complete tool kits than some of the mechanics.

The manual training school is a rapidly growing institution in Canada. Thousands of tools of various kinds are required annually to equip manual training schools which are constantly being equipped and enlarged. How about the students attending these schools—all are prospective tool purchasers on a fairly large scale. The boy receiving training in the manual training schools is being trained in the use of good and up-to-date tools. The boy of to-day is not looking for a toy or a cheap makeshift of a tool.

Thousands of boys in Canada to-day are attending manual training schools. Parents of these boys are going to buy Christmas presents for them. What are they going to buy? That depends largely upon the retail hardwaremen. If the latter go after this trade good and hard during the next seven weeks, the sale of tools of all kinds will be greatly stimulated. There is an unlimited field for the sale of tools of all kinds, but the lines have to be pushed. Give it the attention it deserves and you can increase the volume of sales in your tool department during the Christmas season several hundred per cent. over the corresponding periods of former years.

Hardwaremen from now on will receive many enquiries, such as, "What can I buy for a boy?" or "What can I buy for a man?

Along with many other lines you can suggest tools. Why not have a special Christmas tool display this year. It will pay you. Windows, circulars, or newspaper advertisements can also be successfully used in pushing the sale of tools suitable for Christmas gifts.

Hardware Letter Box

Store Ladders

Young & Cross, Hanover, Ont.—Will you kindly let us know who makes store ladders, with track, etc.?

Store ladders are made by Richard Wilcox Canadian Co., London, Ont., and F. E. Myers & Bro., Ashland, Ohio.—Ed.

A MUCH BRIGHTER OUTLOOK

(Continued from page 29.)

there is every indication that this tendency will continue for several months. As a result of the war, Canadian manufacturers are producing many articles which were previously imported. This should prove a permanent benefit to the country and increase the number of industries in Canada. In addition, outputs have considerably increased in products which have been manufactured in Canada for some years, thus assisting materially in consolidating the position of the industries affected.

The Minister of Finance in an address at Montreal this week showed how an adverse trade balance in 1913, amounting to $300,000,000 had been changed into a trade balance in Canada's favor of $45,000,000, which was increasing every month. Purchases of munitions and war supplies in Canada now amounted to $20,000,000 monthly, while this year was the greatest, from the point of view of agricultural production in Canada's history.

The unusually mild weather during October had a tendency to curtail the buying of winter goods, but nevertheless, October, with hardware jobbers, was one of the most satisfactory months of the year. It looks at present as though a great deal of business which usually takes place in October will this year be transacted in November. With the advent of real cool weather there is bound to be a rush of business that will be felt in all branches of the trade.

Iver Johnson 1916 Catalogue

Iver Johnson's Arms and Cycle Works, Fitchburg, Mass., recently issued a new 1916 composite catalogue featuring bicycles, motorcycles, and firearms. The catalogue consists of 80 pages, is exceptionally well illustrated throughout, and should prove a valuable reference book for dealers. A number of changes recently made in the bicycle and motorcycle line are shown in the new catalogue, copies of which may be secured by sending a request to the manufacturer.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

GILMORE'S POLISH MOP.

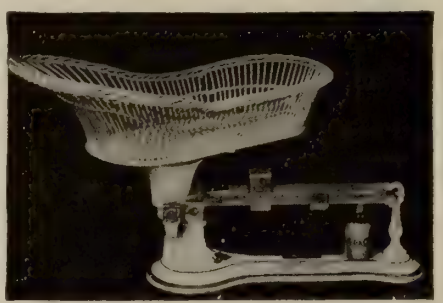
Gilmore Manufacturing Co., 180 North Dearborn Street, Chicago, Ill., offers to the trade Gilmore's polish mop, here illustrated. The makers claim that Gilmore's polish mop, "the mop with fingers," conquers corners and that the extended fingers reach every nook and corner and pick all the dust and dirt. With the Gilmore the makers state it is easy to dust under radiators, around all furniture and radiator legs, stair railings, etc. The improved self-adjusting handle permits a free movement of the mop at any angle. It is shaped so that it sets extremely low—a desirable feature when dusting under radiators, pianos and other low-setting furniture. By reversing the handle between the "fingers" the mop is in the proper position for dusting plate rails, mouldings, doors, etc.

The Gilmore Polish Mop.

The mop slips on the "fingers" through button-holes in the mop band, and is securely fastened to the steel frame by a snap button—just like a glove. The makers state it is very simple and easy to remove from frame for washing and renewing, and can be run through a wringer. The mop is made in three sizes. The firm also makes Gilmore's polish, put up in various sized packages. Complete descriptive matter will be supplied by the manufacturers on request.

INFANT SCALE

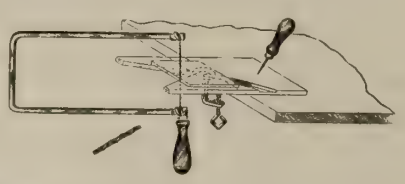
Jacobs Brothers, 78 Warren Street, New York, offer to the trade a new infant scale, which weighs up to thirty-one pounds by quarter ounces without any loose weights. The new scale, called the J. B. Springless "Perfection" Hospital and Nursery Scale, is said by the makers to be an ideal scale for accuracy and fine weighing. The construction of the scale is simple. It is equipped with two brass beams, one showing ounces divided into quarter-ounce notches, and the other beam showing pounds, as illustrated. The pivots and bearings on which the scale works are of tool steel and hardened, thus incurring durability and accuracy. The scale is compact and attractive in appearance. If at any time the scale is not needed to weigh the baby, it can be used as a household scale for weighing all kinds of commodities. The scale is made in two finishes—No. 230 blue finish, with white enamel basket, and No. 331, white enamel finish, with white enamel basket. The firm also makes several other types of infant scales. Descriptive matter will be mailed upon request.



J. B. Springless "Perfection" Hospital and Nursery Scale.

FRET-SAW SET NO. 427

Fret-saw Set No. 427 is the style of a fret-sawing outfit just put on the market by the Millers Falls Co. of Millers Falls, Mass. The unique feature is a small table that is clamped on the workbench or ordinary table and provided with a V-aperture. This auxiliary table supports the work close to the sawing point and prevents cracking or splitting delicate material. A burnished spring steel frame is provided, 12 inches deep, taking 5-inch saw blades, and having an enameled hardwood handle. The set also includes a dozen saw blades, an awl, a sheet of assorted fret-saw designs and a sheet of carbon paper for tracing the designs onto wood. The outfit is claimed to be adapted to all kinds of fret-saw work down to the most delicate, and will be found useful in cutting out picture puzzles.



Millers Falls Co. No. 427 Fret Saw Set.

BISSELL'S VAC SWEEPER

Bissell Carpet Sweeper Co., Grand Rapids, Michigan, and Niagara Falls, Ont., announces the "Grand Rapids" vacuum sweeper. The makers state that the new "Grand Rapids" vacuum sweeper will be to their vacuum line just what their "Grand Rapids" carpet sweeper is to the carpet sweeper line—a practical and fully efficient line at a popular price.

Grand Rapids Vacuum Sweeper.

Coincident with the announcement of the new "Grand Rapids" vacuum sweeper, the Bissell Company explains that their present suction machine, which they have called simply "Bissell's Vacuum Sweeper," will hereafter have the name "Superba" incorporated into its title to better differentiate it from their other models. Literature descriptive of the machine will be supplied upon request.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

The Markets at a Glance

THE markets are again the centre of interest. Several important price changes have taken place and advances are expected on black sheets, black pipe, boiler tubes and other lines. The advent of cooler weather towards the end of the week has had a tendency to stimulate the demand for cold weather hardware lines. Country business is improving and there has also been a decided improvement in the city trade. There is a much better feeling in all branches of the trade than has existed for some time past. The metal markets are all firmer this week and a number of advances in price have taken place. The steel market is very firm and further advances in the price of many steel products will go into effect in the near future. Dry batteries have declined in price. There have been some important changes in the price of woodenware lines, mostly in an upward direction. The continued open weather has interfered to some extent with the stove trade, but with the advent of cold weather there should be a heavy demand for all kinds of heating equipment.

Reports from Winnipeg indicate that booking orders for woven wire fencing, nails, wire, screen wire cloth and doors, etc., are coming in quite freely, which would seem to show that merchants hold a very optimistic view regarding prospects for next year. Among the several lines which have advanced in price at Winnipeg during the week are annealed wire, tinners' wire, and turpentine.

The outlook in the steel trades indicates a real shortage of basic steel, which will probably affect all lines of semi-finished and finished products from steel. Among the various lines which advanced in price at Toronto this week are waste, oakum, pitch, roofing felt, gasoline, benzine, tee and strap hinges, hemp and dry box twines and jute baling twine. Finished cotton twine has also advanced.

MONTREAL

MONTREAL, Nov. 5.—The many changes in prices in the hardware trade reported last week have been followed by readjustments which have generally left the market in a firm condition with small prospect that any of the lines affected will be materially reduced while the state of war prevails—in fact, on the other hand, the tendency appears to be continually upward with few exceptions. The increases in wire products referred to last week have been added to by an advance in galvanized fencing of 15c but there appears to be a difference of opinion as to whether or not barb is included. Tin has advanced 2c and is very firm, the effect being to create higher prices for solder. Lead is up another ¼c and copper, spelter, antimony and aluminum are all very firm. Dry batteries have been reduced 2c.

However, the more important price tendencies of the present week might be said to be more prospective rather than actual. On information from reliable sources, and in view of the present market conditions, Hardware and Metal is in a position to predict that the prices of black sheets and black pipe will be advanced in the very near future, probably within the week, and further, that boiler tubes will probably be readjusted to higher levels and that soil pipe will be firmer in discount allowances if not in actual prices. Solder is almost certain to advance further in the next week and brass sheets, rods and tubing appear to be due for an upward movement in view of the position of zinc and copper. The general tendency of the metals should be to homewhat higher levels in view of the present outside influences, but here nothing can be forecast with any degree of certainty.

Business has shown some slight further improvement. In addition to the active movement of general goods to country districts there is a better demand all round in the city. On heavy goods the approaching close of navigation is having an encouraging effect; the lack of construction operations, however, permits small demand for heavy lines in the larger centres. There appears to be evidence that in addition to the Eastern crop returns, there is a more general circulation of money from shell manufacture, and that also the movement of the Western crop is an influence for better sentiment. October was not only a much better month than the same period a year ago, but it made a much better showing than September. In some lines of winter goods a cold snap is being awaited to awaken a delayed demand.

Tin.—Following the firmer trend of the tin market referred to last week there have been material advances. The local quotations have been advanced 2c to a level of 42c-43c, and, from the tone of the American market, higher prices are to be looked for. The American advance as shown in New York is fractionally over 2c and nearly 3c for the past ten days, the firmness being not only for spot but over the first quarter of next year. The rise has come in sympathy with foreign markets, being a movement so important and unexpected as to leave the dealers puzzled for an explanation. Had the increase been made by London only, it might have been explained in transportation difficulties or tariff possibilities, says the American Metal Market, but, being as the influence is also felt in Eastern markets, the indications are that October statistics to be announced shortly will show small Indian shipments; there is no reason to believe in a curtailment of output in the Straits. The American attitude on the higher prices is to hold off and wait for an explanation. There is still a feeling that one market may be reacting on the other, each going one better.

Spelter.—In this market spelter is steady at 19c-20, with spot tending to a firmness which is even more more noticeable in futures. Spelter in New York is fractionally higher, with a material advance in London. The latter market has advanced £10 the ton since the 21st of October. The offerings of November and December in New York are so small that if there were anything like a normal domestic consumption in the States it is figured that there would be ma-

terially higher quotations. The recent advances have been 1c for spot and 2c on futures, and producers who were eager to dispose of futures a short time ago are now indifferent about selling at the higher prices.

Lead.—A further advance of ¼c has been made in lead, the local market now being 6¾c-7c, and the tone is still firm. The American Trust basis is now $4.90, but it is pointed out that in the recent movement, while there was an advance of 40c scored on this side, there were material declines in London. This leads to the opinion that when the big American interest has foreign lead available for export, the American quotation is made higher than London; but when there are no such supplies, the price is reduced to encourage the exportation of domestic products.

Copper.—While the local copper quotation remains at 21½c, this price has materially stiffened, and advances are likely to be made if the present trend continues. New York shows an advance of ¼c, and there appears to be a movement to improve prices with a view to stimulating American orders. However, there are some evidences of manipulation in the movement, and, while big buyers are showing an interest in the reports that the market is to be put higher, this interest has not yet resulted in important purchases being made so far as can be traced.

Antimony.—The advance of last week to 37c has been followed by firm conditions, and higher prices are warranted by the New York quotation of 35½c to 36c for Japanese and Chinese and 34½c to 35c for American. Recent reports from that market are that ½c higher is being asked and that futures are being neglected owing to the very high price of the metal.

Aluminum.—In this market the quotation remains normal at 60c, with a very narrow demand for normal consumption. New York has recently advanced 1c to 55c-57c, but there has been no material change in the market conditions there.

Solder.—Higher prices are in order on solder owing to the advancing price of tin. The quotations are given as a week ago, but the tendency is to the top of the range, and a readjustment will probably be made in the course of a few days. A difficulty in quoting a solid basis in this market, however, is that there are a wide variety of grades handled by different makers, and the proportions of the ingredients used have an important effect on the quality and the price. The following quotations cover the bulk of the business:

Half-and-half	24c-26c
Strictly	26c-28c

Steel and Iron.—The steel situation is very unsettled, and prices are generally very firm on the recent advances. American mills are working to their capacity, and on different varieties orders are being taken for deliveries three to five months in advance only. Under these conditions still higher prices may be expected. The iron market is also very strong, and in some quarters the new basis of $2.20 is being advanced to $2.25 on small quantities. The following quotations should be followed closely:

Mild steel	$2.35
Sleigh shoe steel	2.40
Tire steel	2.45
Toe calk steel	2.95
High-speed steel	1.50
Bar iron	2.20

Brass and Copper Products.—Copper products are very steady on recent advances, and there is a feeling in the trade that important changes in the prices for brass sheets, rods and tubing are due. This prediction is made on the strength of the zinc and copper markets and the tendency of manufacturers to keep prices down as long as possible, and then to make sharp advances. This has the effect of making the increase in products appear greater than in the raw materials, but is generally explained in that efforts were made to maintain the low market until accumulated increases in raw materials forced a change of front and a big advance. The present brass quotations are, therefore, interesting:

Springs, sheets, up to 20 gauge	$0.45
Rods, base ½ to 1 in. round	0.42
Tubing, seamless base	0.42
Tubing, iron pipe size, 1 in. base	0.45

Copper tubing, same as brass.

Lead Products.—Additional firmness has been given to the market for lead products by the further advance in pig. The quotations are, therefore, firm, although advances are hardly expected unless the upward trend continues further. Present prices follow:

Lead pipe	$0.09½
Lead waste pipe	0.10½
Sheets, 3-lb. sq. ft.	8.25
Sheets, 3½-lb. sq. ft.	8.00
Sheets, 4 to 6 lbs. sq. ft.	7.75

Cut sheets, ½c per lb. extra.

Cut sheets, to size, ¾c per lb. extra.

Black Sheets.—The talk of further advances in sheets, referred to last week, has taken more definite form, and higher prices are predicted shortly, probably before the publication of another issue. The present quotations, as given by association members and metal dealers, are as follows:

	Assoc.	Ind.
10 gauge	$3.00	$2.75
12 gauge	3.00	2.80
14 gauge	2.85	2.60
16 gauge	2.85	2.55
18-20 gauge	2.85	2.60
22-24 gauge	2.85	2.70
26 gauge	2.95	2.75
28 gauge	3.00	2.80

The increase will probably just apply to the lower schedule, which is the better indication of the market for large quantities.

Nails and Wire.—The advances in the prices of nails, staples, hay wire, smooth steel wire, fence wire, etc., included in last week's report, have all been absorbed, and the market is generally strong on the higher figures. Further increases rather than declines are to be looked for during the period of the war.

Galvanized Wire.—An increase is also announced this week in galvanized fence wire, but it is not clear whether or not this applies to barbed wire. One barb quotation is heard at $3.60, while generally the price is $3.47½ as before. Other galvanized wire quotations are now as follows:

No. 9 coil spring	$3.25
No. 9 plain galvanized	3.20
No. 12 plain galvanized	3.35
No. 13 plain galvanized	3.45

Builders' Hardware.—In connection with advances in builders' hardware, it may be explained for the benefit of the trade that readjustments have been and are being continually made in the prices. The markets for raw materials are so unsettled that evidently the manufacturers adjust their quotations on the basis of cost, as batches of new articles are turned out to replace exhausted stocks.

Galvanized Sheets.—Although the tendency to higher prices in black sheets does not extend to galvanized sheets, the recent renewed upward movement in spelter has had a steading influence in this market and the quotations as given for some time are much firmer than during a recent period, when there was a tendency displayed by some dealers to cut prices.

Pipe.—There is a stronger tendency in ths pipe market, and it is predicted that advances will be made shortly, probably before the publication of another issue. It is not expected that galvanized will be affected in this movement. The present quotations are of interest in view of this probability:

Buttweld Size.	Per 100 feet Black	Galv.
¼ in. and ⅜ in.	$ 2 22	$ 3 69
½ in.	2 72	4 46
¾ in.	3 11	5 46
1 in.	4 59	8 08
1¼ in.	6 21	10 93
1½ in.	7 43	13 06
2 in.	9 99	17 58
2½ in.	15 80	27 79
3 in.	20 66	36 34
3½ in.	24 84	43 70
4 in.	29 43	51 78
Lapweld.		
2 in.	11 47	19 06
2½ in.	16 38	28 37

3 in.	21 42	37 10
3½ in.	25 76	44 62
4 in.	30 52	52 87
4½ in.	38 10	64 14
5 in.	44 40	74 74
6 in.	57 60	96 96
7 in.	78 54	132 10
8 in. x 25 lbs. per ft.	82 50	138 75
8 in. x 28 lbs. per ft.	85 04	159 84
9 in.	113 85	191 48
10 in. x 32 lbs. per ft.	105 60	177 60
10 in. x 40 lbs. per ft.	135 96	228 60

Soil Pipe.—There is also a stronger tendency in the market for soil pipe, and, although the quotations may not be materially altered, assurance is given that the list basis will be much more closely adhered to. Present quotations are:

Medium and extra heavy pipe up to 6-inch, 65 p.c. and 10 off.

7 and 8-inch, 45 p.c. off.

Boiler Tubes.—The rising market for hollow metal products, as indicated in the fact that American mills are asking seven to nine months on deliveries, is also affecting boiler tubes, and advances in the near future are predicted. The present quotations are:

100 ft., ½ in.	$10 45
100 ft., 2 in.	9 60
100 ft., 2½ in.	12 25
100 ft., 3 in.	13 30
100 ft., 3½ in.	15 55
100 ft., 4 in.	19 80

Batteries Decline.—Following the many advances which have taken place in the price of dry batteries since the beginning of the war, on account of the effect on the prices of zinc and manganese, the news of a decline of 2c a cell will be welcome to the trade. This reduction is now in effect.

Horseshoes Firm.—Although there has been no change recently in the price of horseshoes, the market is very firm, and an advance would not be surprising in view of the higher price prevailing for horseshoe steel.

Arms and Ammunition.—While the weather has been rather unseasonably warm this fall, the large number of fine days and the delay in the break-up has encouraged a long shooting season and the demand for loaded shells continues very satisfactory, considering that the 1st of November has been passed.

Woodenware.—There have recently been some important changes in the prices of woodenware, and wholesalers who desire to replenish stocks of wooden bowls and such lines find that they have to pay materially higher prices.

Mechanics' Tools.—The recent intimation from Ottawa that the shell orders in Canada are to be on a much broader basis in the future indicates the spread of the munitions industry to still wider fields, and an attendant increased demand for mechanics' tools, in which line the hardware trade has been doing a thriving busines for some months.

Seasonable Lines. — Although the "break-up" is still being delayed by unusually open weather, there is a fair demand for winter lines; but it is felt that thi swill be very much improved, especially in the city, by the arrival of a cold snap. There are indications that the people are delaying purchases until the last moment, and that the retailers are following their example.

Stoves.—The continued open weather has interfered to some extent with the demand for stoves in the city, although the satisfactory movement to outside points continues. It is expected that a cold snap, which cannot be much longer delayed, will have the effect of bringing a rush demand in Montreal and the other provincial cities.

Utensils.—The demand for utensils is very fair, all things considered. The advance in aluminum, galvanized copper and some other wares has had the effect of increasing the popularity of enameled ware, and for this there is now a very steady and strong demand—and it promises to continue, at least until the metal markets right themselves.

TORONTO

TORONTO, Nov. 5.—October was a very satisfactory month for local hardware jobbers. Although the open weather had a tendency to hold back the buying of regular fall and early winter lines, there was a prolonged demand for late summer goods.

The advent of cold weather will cause a rush for early winter lines. Price changes are numerous this week and further important changes are predicted.

Iron and Steel

Although several advances were referred to in last week's issue it is stated on good authority that several further changes would take place in the very near future. Bar iron, angles, refined iron, horeshoe iron, sleigh shoe steel tire steel, and other lines will be advanced in price.

Extraordinary activity prevails in the steel market and the demand for steel for munitions continues to increase. The production of steel rounds has reached a heavy tonnage and mills have all the business they can handle. The Algoma Steel Co. is the latest concern to take up this class of work, they having secured an order through J. P. Morgan & Co. for 30,000 tons of rounds, while other contracts involving 20,000 tons of rounds have been closed. The contracts for the larger calibre shells, which will be placed shortly, will call for a considerable increased production of steel.

Conditions in the galvanized sheet trade are still somewhat unsettled. Owing to the increase in the price of black sheets and the possibility of higher prices for spelter, galvanized sheets have an upward tendency, although there is no change in prices to be noted this week. Black sheets are strong, No. 28 gauge being firmly held at $2.10 Pittsburg basis for early delivery, and mills are refusing to sell for extended shipments. Local prices are shown in current quotations.

The steel trade in the States is in a very satisfactory condition. There is no abatement in the demand for various lines of steel, which is in excess of the producing capacity of the mills. Makers are still unable to meet the heavy demand for large rounds for shells, and the mill capacity is sold up months ahead. In addition to steel rounds, there is a good export demand for barb wire, forging billets, blooms and wire rods. The continued heavy demand for billets is forcing prices upward. Bessemers billets are now quoted at $25, open-hearth billets $26, and forging billets $40 base f.o.b. Pittsburg.

Metals

The market is holding steady, and, with the exception of an advance in tin and lead there are no price changes to note. The copper market is still quiet, and the buying movement has not started, although it is anticipated that there will be one shortly. Spelter is higher in London, but unchanged locally. The antimony situation is unchanged, and prices are holding firm. There is a continued scarcity of aluminum, and supplies of this metal are almost unobtainable. The situation in the metal market locally is unchanged, and trade reports show business as being brisk in metals for munitions.

Tin.—A more active demand for spot and near-by tin has had a favorable effect on the market. There is, however, no improvement in actual consumption and so change in the visible supply. It is doubtful, therefore, if the advance is justified by conditions. Tin has advanced 2c, and is now quoted at 39c to 40c per pound.

Copper.—There is no change in the situation; the market is quiet, and there is little business doing. It is reported that producers are in control of the market—which indicates a possibility of higher prices. Local quotations are firm and unchanged at 19½c per pound.

Spelter.—The London market has advanced, but it has not affected New York except to make that market firmer. The market is uncertain, and consumers are inclined to defer buying, except those making munitions, until the situation clears up. There is every possibility that the demand for spelter for galvanizing will increase, as the substitutes which have been tried have not proved a success, and there is also a possibility of the demand for sheets increasing.

Local prices of spelter are unchanged and firm at 17½c per pound.

Antimony.—There is no improvement to be recorded in the market for antimony, which is under the control, for all practical purposes, of the British Government. There is a tremendous demand for this metal, and English makers have practically ceased to export any except to the Dominions, and then only for munitions. Quotations are firm and unchanged at 35c per pound.

Lead

The demand for lead has improved and following advances in the States, local quotations have advanced ¼c per lb. making local quotations 6¼c to 6½c per pound.

Wire

Wire rods are still high with prospects of further advances in price. Prospects at present indicate even higher prices on wire products than those which have recently gone into effect. Wire nails are still quoted at $2.55 per keg.

Roofing Felt

Higher prices are being quoted by local jobbers on roofing felt, the 7, 10, and 16-oz lines being affected. The shortage of wool rags and also the high price which is asked for wool rags which enter very largely into the manufacture of roofing felt is said to be the cause for the advance. Toronto price is now $2.20 per 100 lbs. per roll as against $2.10 per 100 lbs. formerly.

Black Wire Cloth

The prices which are being quoted on black wire cloth for spring delivery are expected to be withdrawn at any time The remarkable advances on all wire products makes this prediction more than likely, as present costs of raw material would not permit the price of black wire cloth to be offered at the present quotations.

Rope

A fair volume of business is being transacted by the local jobbers. Prices are unchanged but are very firm at the figures shown in the current quotations.

Pipe

The prospects for future prices on pipe, both wrought and galvanized, are that they will advance. The increased costs of raw materials will probably cause an advance. Nothing definite is known at the present time but it is altogether likely that the advances will be forthcoming in a short time.

Twines

The prediction in last week's issue that twines were likely to be advanced in price has proven correct. The prices on cotton wrapping twines have not yet been adjusted but other twines have advanced as also finished cotton twine. Three cents per pound is the advance on finished cotton twine, while hemp, dry box, and jute baling twines have advanced one cent per pound. The reason for the advance in the price of these lines is that hemp is very hard to procure. Russian ports are said to be loaded with stocks of hemp ready for export, but are unable to get away with them.

Oakum

The price of oakum is again receiving attention and plumber's oakum has been advanced 25c per 100 lbs. The demand for oakum has improved of late.

Stoves and Heaters

Stove manufacturers state that business is only fair, all things considered. They realize that the weather has been responsible for the slow demand in heaters, but that this has been offset to some extent by a good demand for better class ranges. The farmers seem to be buying a more substantial range than they have in previous years. Furnaces are moving slowly, the country trade are buying more than was expected, while the city trade calls for more repairs than new furnaces.

Tee and Strap Hinges

The prices of tee and strap hinges have been advanced and a re-adjustment of prices has gone into effect. The following list represents the prices being quoted on the Toronto markets:

Heavy—	Strap.	Tee.
4-inch doz. pairs	$1.14	$0.96
5-inch doz. pairs	1.38	1.11
6-inch doz. pairs	1.50	1.14
8-inch doz. pairs	2.04	1.53
10-inch doz. pairs	3.60	2.52
12-inch doz. pairs	4.51	4.14
14-inch doz. pairs	5.10	4.54
Light—		
3-inch doz. pairs	0.30	0.30
4-inch doz. pairs	0.36	0.33
5-inch doz. pairs	0,42	0.39
6-inch doz. pairs	0.51	0.45
8-inch doz. pairs	0.75	0.54
10-inch doz. pairs	1.05	0.71
12-inch doz. pairs	1.80	1.35
14-inch doz. pairs	...	1.65

These figures cover a discount of 70 per cent. on light and 40 per cent. on heavy off list.

Waste

It was stated in last week's issue that an advance in the price of waste was expected. The advance is now in effect on the local markets, the advance bein ½c a pound in the majority of the lines quoted. The demand for coarser goods such as tents, duck, etc., are responsible to a large extent for the recent increase in the cost of waste as the coarse threads which are used in the manufacture of waste are being used for the lines mentioned above. Present prices are shown in the current quotations.

Pitch

A shortage of pitch on the Canadian market has been responsible for an advance of 50c per barrel.

A large export trade in pitch is being done from the American markets which has its usual reaction on the local markets. Black and green pine pitch are similarly affected. Local houses quote as follows:

Pine, black, per barrel	$4.75
Pine, green, per barrel	5.25

LONDON

LONDON, Ont., Nov. 5.—Business among the local jobbers has been fair during the past week. Colder weather is helping to improve the sale of fall lines, although real cool weather is desired to place business on a good footing.

The sale of fall lines has been unsatisfactory on account of the late season, but it is expected that a reaction will occur with the advent of cooler weather. There are fewer price changes to note this week. The price of turpentine seems very unsteady and a further advance is reported on the local markets. Tarred felt advances, and several lines of shot-guns have had price adjustments.

Linseed Oil

The price of linseed oil is still firm. A very poor demand is noticed by local jobbers. It is not likely that the demand will improve until a lower level has been reached.

Present prices are as follows:

	Per gal. Raw	Boiled
1 to 2 barrels	77c	80c
3 to 5 barrels	76c	79c
6 to 9 barrels	74c	77c

White Lead

A fair volume of business is being done by local jobbers in white lead. The price is holding firm. Quotations at $9.50 per 100 lbs. in ton lots being the base.

Turpentine

A further advance of 2c per gallon is in effect on the local markets. This places turpentine at the fairly high price of 82c per Imp. gal.

The primary markets are very unsettled and it is suggested in some quarters that manipulation is the cause for the present condition of the turpentine market. Present prices are as follows:

	Per Imp. Gal.
1 barrel lots	82c
2 to 4 barrel lots	81c
5 gal. lots	89c

Rope

Rope prices are being maintained and fair business is being transacted by local jobbers. The following prices are general on the London markets:

	Lb. base
Pure Manila	16c
British Manila	13½c
African hemp	13½c
Sisal	11½c

Tarred Felt

Tarred felt in rolls has advanced 10c per 100 lbs. This increase makes quotations on 7, 10, and 16-oz. tarred felt at $2.20 per 100 lbs. as against $2.10 formerly. A good demand for tarred felt is experienced by the local jobbers.

Glass

There is some improvement shown in the sale of glass. Recently the demand has increased in big proportions as the majority of the retailers had very light stocks and had to stock up to meet the regular fall demands. The following discounts are general:

Single diamond	20%
Double diamond	20%
Cut light	20%

Fence Wire

Recent advances have had a bad effect on the sale of various lines of fence wire. There has been a noticeable falling off in the demand owing to the high prices. Following are the prices quoted by the local houses:

	Per 100 lbs.
Barb	$3.35
No. 9 galvanized	2.95
No. 12 galvanized	3.10
No. 13 galvanized	3.20
No. 9 coil spring	3.00
No. 10 O and A	2.91
No. 11 O and A	2.97
No. 12 O and A	3.05

Guns Advance

Several lines of arms have recently advanced in price and to meet the increased prices on these lines the prices of Savage, Remington and Winchester shotguns have been adjusted. A 5 per cent. advance is general on these three lines.

Fence Staples

The recent advances which have affected the sale of fence wire have likewise affected the sale of fence staples and a decided falling off in demand is noticed.

	Per 100 lbs.
Galv. kegs	$3.85
Galv. 25-lb. boxes	4.10
Bright, kegs	3.00
Bright, 25-lb. boxes	3.25

Sash Cord

Sash cord has also been more active of late and fairly good business has been transacted by local jobbers.

The following prices are general on the local markets.

Nos. 8, 9, 10, 12	27½c lb.
No. 7	28c lb.
No. 6	29c lb.

WINNIPEG

WINNIPEG, Nov. 4, 1915.—The first figures obtainable for October sales indicate a considerable increase was made over last year's figures, and prospects for this month are bright for a corresponding or even better increase than shown above. Outside of a few districts the weather has been exceptionally good and threshing is progressing at a remarkably fast rate.

Seasonable lines which have commenced to move quite freely are skates, snow shoes, hockey sticks, boxing gloves, cutlery and plated ware, and cut glass. Merchants are buying Christmas goods quite freely, and now is the time to arrange for getting supplies on hand, and arranging for show cases and show windows. The tendency during the past two or three years has been to buy useful Christmas presents, and it is surprising to note how quickly the hardware store has come to the front in supplying this demand. There are innumerable lines which the hardwareman can carry, and which belong in the hardware store. Among these are silver-plated ware, electric irons, electric grills, toys, hockey skates and sticks, playing cards, game boards, pocket knives, razors and shaving accessories. Good displays can be made of these lines, and they are selling freely.

Booking Orders

Booking orders for woven fencing wire nails, barbed wire, screen wire cloth, screen doors, etc., are coming in quite freely, which would seem to indicate that merchants hold a very optimistic view regarding prospects for next year. All lines of wire products are advancing, and latest advices last week contain notice of these changes which we make mention of more in detail at this time. Annealed wire has advanced 15c per 100 lbs., and ruling prices are given herewith:

Wire, Annealed—

0-9, $3.15; 10, $3.21; 11, $3.17; 12, $3.35; 13, $3.45; 14, $3.55; 15, $3.70; 16, $3.85.

Bright tinners' wire has also taken an advance, and prices below show how this line has been affected.

Bright Tinners' Wire—	Per 100 lbs.
Base 3—9 ga.	$3.50
10 ga.	3.56
11 ga.	3.62
12 ga.	3.70
13 ga.	3.80
14 ga.	3.90
15 ga.	4.05
16 ga.	4.20

Wire staples are quoted at $3.45 Winnipeg and $3.05 Fort William. Wire nails are quoted at $3.15 Winnipeg and $2.75 Fort William. Turpentine advanced 6c per gallon, making the price to-day 81c.

With regard to the above advances in wire and steel, latest advices would indicate that not only are further advances to be made, but deliveries are somewhat of a problem, and one New York agent, in reporting on the steel situation, writes as follows:

"Steel Deliveries.—Too much emphasis cannot be placed upon the seriousness of to-day's situation as respects deliveries on steel products, and the fact that this is growing worse, with indications of a real serious shortage of basic steel, which will probably affect all lines of semi-finished and finished products made from steel. The outlook to-day is for a fancy price market by the first of the year, with increasing difficulty in securing shipments. The threatened British embargo on steel will put more pressure on American mills, who now are turning down premium offers for quick delivery. The demand for war purposes and export is increasing each month and at prices that show considerably more profit than domestic business. Do not neglect to anticipate requirements and specify as far ahead as possible. From present indications to-day's prices will be a good purchase for the first half of 1916."

Hardware and Metal last week gave a very clear statement dealing with the upward trend of iron and steel, and it will be well worth anyone's while to read this article carefully.

HANDLING CHARGE ACCOUNTS

(Continued from page 31.)

alphabetically. For example let us say that Blank's Mill has made four purchases during the day, all at different times, and the numbers of the sheets on which the entries are made are: No's 5,200, 5,203, 5,208, 5,213. The sheets are all filed alphabetically and in order according to number.

The total of sheet 5,200 is carried forward to sheet 5,203, from there to sheet 5,208, and then to sheet 5,213, the last charge against Blank's Mill during the day. The grand total is then carried to the ledger and entered under the number of entry No. 5,213.

It will be noted that under this the file of original charges all numbered, and arranged alphabetically takes the place of a day book.

The invoices (reproduction of invoice form is shown in Fig. 2), are made from the original charges. Invoices are sent out semi-weekly.

Statements are made out monthly. A reproduction of the statement form is shown in Fig. 3.

Nelson Mills, vice-president and general manager of the company, states that the system in use has proved a very satisfactory one. A number of other systems used by retailers will appear in succeeding issues.

WEEKLY PAINT DEPARTMENT

The Naval Store Situation

Meteoric Advance in Price of Turpentine—Production Two-Thirds of Former Years—Will U. S. Prohibit Exports—An American View of Situation.

MANY merchants have been rather perplexed by the sensational advances which have taken place in the price of turpentine during the past two weeks. An advance of approximately sixteen cents per gallon in two weeks' time has made the trade set up and take notice, and many theories have been advanced in explanation of the upward trend of the price of "turps." Some paint men claim that the sudden and rapid advance has been due to manipulation. Others claim that there is a shortage of supplies in the primary markets, while a few claim that the advance is due to a big demand from Europe not previously anticipated. As is well known in Canada, the trade in this country is dependent upon the United States for supplies. Prior to the war, turpentine was on the free list—admitted to Canada free of duty—but since the tariff changes went into effect some time ago, and the free list was practically abolished, turpentine has been subject to a duty of 7½ per cent.

This 7½ per cent. tax, together with the fact that in Canada turpentine is sold per Imperial gallon while in the United States the price per gallon is for wine measure, there is a big spread between United States and Canadian prices even after transportation charges, etc., have been allowed for.

The three primary markets of the United States are Savannah, Pensacola and Jacksonville. Recently it has been predicted that in a few months time there will be a great scarcity of both turpentine and rosin in the United States. It is claimed that the consumption for the season is far above the production.

A representative of the Paint, Oil and Drug Review and American Journal, in writing from Pensacola, Fla., towards the end of October, stated that:

The sustained increase in naval stores for the past two weeks, the strong demand as evidenced by sales and the increased activity as noted at the three primary markets of the country, Savannah, Pensacola and Jacksonville, indicates that consumers at last are beginning to realize that consumption for the season is far above production and that it will be only a month or two, three months at the very limit when there will be neither rosin or turpentine in the United States.

Statistically the naval stores market has never been better. It has occupied this position all the year, but producers, factors, buyers and financiers seemed to judge the situation as in former years, when the crop was immense, and apparently waited for the remainder of the crop to be sent to market. Two weeks or more ago they seemed to awake to a realization of the fact that the season, so far advanced that four-fifths of the crop had been marketed, had produced only about two-thirds of former years, that Europe, supposed to be in such a position that buyers were holding aloof, had consumed and is consuming a quantity of turpentine and rosin almost equal to previous years and that consumption in the United States each day was in excess of receipts. This is the predicament that faces the consumers to-day, and a meteoric rise of both spirits and rosin is the forecast for the immediate future. The situation developed slowly, so slowly in fact that producers and factors themselves, in a somewhat demoralized state for the past two years, did not realize it. Then figures were compiled of stocks held at the three markets. These showed that on April 1, when the new crop began to reach the market, the stocks of both spirits and rosin were considerably in excess of those on hand to-day, despite the fact that each day witnessed the arrival of the product. Statisticians compiled an estimate of the unmarketed crops and found very small quantities in the woods. The "scraping" crop was then looked into and similar condition found, for the producers, reluctant to lease new stumpage, had boxed small trees from which no "scrapings" would be secured.

Looking over the entire producing section, estimating the consumption, compiling reliable statistics of all ports, their receipts, stocks and consumption, it can readily be seen that at the present rate of consumption there will not be a pound of rosin or a pint of spirits in the United States by Feb. 15, 1916. Should the United States prohibit the exportation of the product, and the estimate of the amount of stock held in the woods be even 20 per cent. smaller that is really held, the United States will be depleted of both rosin and turpentine by April 1.

Operators and factors have just begun to realize this fact. Buyers, too, apparently, are taking the same view, for the are rushing the markets in the hope of securing sufficient stock to supply their needs before the real situation dawns upon others. A steady climb of spirits and all grades of rosin has resulted. From $2.85 to $2.90 the lower grades have advanced to $3.75 and $3.80, while the pales have shown a corresponding advance.

Several weeks ago it was thought that Europe, having exported at the rate of twenty thousand barrels of rosin and considerable spirits, per month, had filled its needs, that the French production would be sufficient to supply England as well, and Germany was unable to buy because it could not be delivered. Letters from firms, some of which have been in business for half a century, state that in France the exportation of the rosin and turpentine is prohibited and that England will be a stronger and heavier bidder in the future, while one German firm says that Germany already is buying, because they realize, there, that with the end of the war prices will soar. Stocks are being purchased and held by German firms. At the present any grade of

THE TURPENTINE SITUATION

Although despatches from the United States predict a scarcity of turpentine it is well known that at least some Canadian firms have fairly large stocks of turpentine on hand. These stocks were purchased some time ago when prices were much lower than they are at the present time. A wide range of prices is being quoted in some centres as shown in the weekly paint market reports.

rosin in that country brings $42 per barrel. The depleted stocks are, therefore, reflected, and if Germany buys to any extent before the end of the present season it will mean that the United States will be without rosin and turpentine much sooner than had been estimated.

What the real situation is can be gleaned from the following figures of receipts and stocks at the three ports:

RECEIPTS—TURPENTINE

	This Year	Last Year
Savannah	73,410	104,888
Jacksonville	74,024	81,888

WINDOW GLASS OUTLOOK

OWING to the fact that the Canadian trade is dependent almost entirely upon American manufacturers for present supplies of window glass, any developments which take place in the American market are particularly interesting to Canadian dealers. A number of conferences were recently held at Pittsburg, Pa.

But for the intervention of the European war the window glass trade in America might have been ruined by the Democratic party's smashing of the protective tariff, according to the opinion of many glass manufacturers in attendance at the annual autumn meeting of their national association in the Fort Pitt hotel recently and reported in the Paint, Oil and Drug Review.

Until the Democratic party took over the reins of national government this vast business prospered under the broad wing of a substantial Republican tariff. When the Wilson policy of low tariff went into effect a severe blow was delivered the window glass industry. Belgium was making 9,000,000 boxes of window glass a year, which was 1,000,000 in excess of that made by the American manufacturers. Then, too, 500,000 boxes of the Belgian output were coming into America. With those conditions existing, the great Republican tariff wall was practically demolished by the Democratic regime and window glass manufacturers throughout the United States were left dazed and helpless.

Then came the war. Belgium promptly lost the "world's championship" at window glass making. France, which was America's other keenest competitor, with most of her factories in the northern part of her territory, became involved and she promptly dropped out of the race. In addition to having ceased as window glass producers, the warring countries themselves are doing all in their power to create a market for the American manufacturer by "smashing every window pane" that they can train their guns on, is the word of one of the American makers at Thursday's important conference.

"With the outbreak of the war," said J. R. Johnston, secretary of the National Association of Window Glass Manufacturers, "the Democratic low tariff was not given a chance really to show what havoc it could raise among American window glass men. Most of us believe the havoc would have been terrific. Today the outlook for our industry is brilliant. China and South America must have window glass. Belgium and France heretofore have had a monopoly of the business of those countries. It is up to America to supply the demands now. Not only that, but Belgium herself, her window glass factories now paralized, must have our product. France, Great Britain, Italy, Germany, Austria, in fact the entire old world must turn to America now for window glass. Then, too, American consumers must use American-made window glass."

This year's working period will be from November 1 to May 29, whereas last year's was from Oct. 27 to May 28.

GOING AFTER BRUSH TRADE

Selling Brushes to Master Painters

A good stock of brushes will help a hardware man to build up a business with master painters; but unless a complete line is carried it is useless to look for brush trade in this quarter. Brush manufacturers as a rule do not care to sell direct to painters, but if the hardware man will not put in a fair stock, and the painter goes to the brush manufacturer, it is hard for the latter to refuse to supply the painter with goods. In some places the hardware men make a bid for the lead, color and oil trade of the master painter by supplying him with brushes at close prices, or by giving the local painter an opportunity to select what he wants from the traveler's samples when the salesman visits the town.

The brush trade must be cultivated just as assiduously as the paint or any other branch of trade, and dealers who neglect it or do not carry the stock can hardly expect to get the business.

WEEKLY PAINT MARKET

(Continued from page 54.)

have been very unsteady, advances and declines both, featuring the Southern markets. It is thought in some quarters that lower prices will take effect at an early date, as the demand has practically dropped off altogether. The following range of prices covers the local quotations:

	Per Imp. Gal.
1 barrel lots	76c to 82c
2 to 4 barrel lots	75c to 81c
5-gal. lots	83c to 89c

White Lead

The demand for white lead has improved of late and fairly large shipments have been made by local houses. The price remains firm at the base price of $9.60 per 100 lbs. in ton lots, with 30c per 100 lbs. added for less than ton lots.

Benzine

The price of benzine has advanced considerably during the week. Benzine is now quoted at 25½c per gal. in barrels, as against a price of 18 cents two weeks ago. There is no explanation given for the sharp advances which have taken place in the price of benzine.

Gasoline

Gasoline has again advanced in price. Our prediction in last week's issue that higher prices could be looked for have proved correct. A shortage exists on the U.S. markets and the prolonged open weather has kept the demand up to a certain point, which has also had the effect of firming up the market. The following prices are general on the Toronto market:

	Per Gal.
Any quantity, in barrels	23c
Drums (40-gal.)	21c
Tank wagon	19½c

Glass

The glass situation remains unchanged. Quotations are being maintained by the majority of the trade, but one or two smaller outside firms have started a series of cut prices. This is not expected to last, as it is said that these firms cannot fill complete orders of all sizes and will soon have depleted stocks.

Putty

The demand for putty has improved among the local dealers. While the improvement does not resemble a boom, it is distinctly noticeable among the jobbers, as the demand for putty has been dormant for some time. The following prices are ruling on the local markets:

	Per 100 lbs.
Bulk, in casks	$2.50
Bulk, in 100-lb. drums	2.70
Bulk, in 25-lb. drums	2.80
Bladders, in barrels	3.10

Pure putty, 60c per 100 lbs. advance.

Handle your Oils and Gasoline with the

WAYNE PUMP

IT PREVENTS WASTE DUE TO EVAPORATION, LEAKAGE AND SPILLING AND MAKES THESE GOODS MORE PROFITABLE.

It saves time and labor, as there is no constant filling and handling of measuring cups, and does away with dust and unpleasantness.
Throws a pint, quart, half-gallon or gallon, and measures exactly.
Works easily, and when not in use can be securely locked. Gears are completely housed. All parts accurately machined and thoroughly tested, and are interchangeable.
If you are interested in a clean, safe, money-saving way of handling oils and gasolines, jot down a line for full particulars on the Wayne System NOW.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Nov. 5. — While there has been a much better tone to the paint market since the establishment of the new schedule for the fall campaign, and the attendant clearing of unsettled conditions, it is yet early to report definite results in the placing of orders. Most of the manufacturers put their travellers out at the commencement of the week and while their last reports indicated that stocks in the hands of dealers were very low and that orders were being held up in view of the expected reduction, it yet remains for the actual returns to show how the new prices have been accepted.

Undoubtedly the trade had been looking for more substantial reductions and the makers had also expected that more important concessions could be made. However, the continued high position of zinc, the shortage of colors and the rise in turpentine and oil must be taken into consideration. And recently there has also been a firmer tendency in white lead, indicating that a reduction in that quarter is not to be expected immediately. Altogether there is material support for the contention that no reduction whatever was warranted in view of the cost of raw materials.

The outlook as to the future of the market indicates that the present level will be as teadily maintained as can be expected when the costs of ingredients are liable to be subject to violent fluctuation. In fact, the recent tendencies have been towards a higher rather than a lower basis.

Linseed Oil.—The movement in the linseed oil market is to still higher levels. Instead of the even basis of 72c and 75c for raw and boiled respectively, which was quoted last week, there is now a considerable range with the figures given at the bottom and likely to disappear if the present strength continues. On the other hand, figures as high as 77c and 80c for raw and boiled have been heard but these prices were only temporary and little business was done. The market is so unsettled and prices are fluctuating so rapidly that, with a comparatively small demand, it is difficult to regulate quotations as between what is warranted by the actual market and what a dealer may be prepared to take for supplies on hand. The following prices are a fair indication:

	Raw	Boiled
1 to 2 barrels	72c-73c	75c-76c
3 to 5 barrels	71c-72c	74c-75c
6 to 9 barrels	70c-71c	73c-74c

Turpentine.—When it is stated that mid-week quotations for turpentine in the Montreal trade covered a range of 10c a gallon as between the high and the low prices, it will be realized that the market is in a very unsettled condition. The fluctuation in original markets is emphasized by comparatively small demand and the tendency of some dealers to follow their own costs as a basis rather than the actual prices prevailing. However, as to the outside figures of the range mentioned they are certainly the exceptions, and a price half way between, say 72c, would give a better indication; the majority of figures given were between 75c and 77c. Reports as to strong and weak tendencies for the immediate future were conflicting.

White Lead.—Recent advances in the pig lead market have been accompanied by an increase of 25c a hundred on dry white lead. These advances have caused a firmer tendency in the market for lead in oil and have more than justified the course taken some weeks ago in making reductions of $1 when it was felt in some quarters that the cut should have been greater. Any prospects of lower quotations in the immediate future have thus been dispelled and additional strength has been given to the situation in mixed paints.

Zinc.—Conditions in the zinc market are still very unsettled. Hoped-for declines have not materialized and the indications are that prices are going to remain high while the war lasts owing to the heavy demand for munitions purposes.

Gasoline and Benzine.—Gasoline is on the jump. Following several advances in the past few weeks another increase has been made which takes the price in drums to 22c and in wood to 24c; the quotation for tank wagon remains the same at 20c, but this figure is likely to be raised immediately. On benzine the prices are 1c under all round. Coal oil quotations are unchanged.

Glass and Putty.—A fair demand for putty continues and some manufacturers report that they are still behind with their orders owing to the fact that, while consumption on the whole has not been up to normal, there has been a good business in the fall window trade. There is no change in the glass situation and demand is dull except for smaller window sizes.

TORONTO

TORONTO, Nov. 5.—The recent reduction in the price of ready-mixed paints has had a tendency to stimulate the demand and retailers are buying more freely. Some firms have put the reduced prices into effect as announced in last week's issue, while others still hold to their former prices and claim that the present cost of raw materials does not warrant a reduction in price. Linseed oil remains firm and turpentine is very unsteady. Benzine and gasoline have again advanced.

Linseed Oil

The situation in the linseed oil market is practically unchanged from that of a week ago. The movement of flax seed has improved a little, and Eastern crushers have received bigger shipments during the last week. American crushers are still busy buying spot seed in the Western Canadian markets, and this is a big factor in maintaining the price of linseed oil. It is anticipated that lower prices will be quoted very shortly, as local jobbers have fairly large stocks of oil on hand which they wish to dispose of, but realize that the stocks will not be reduced on the present system of buying, as it is practically all on the hand-to-mouth policy.

Prices on the local markets are as follows:

	Raw.	Boiled.
1 to 2 barrels....	77c	80c per gal.
3 to 5 barrels....	76c	79c per gal.
6 to 9 barrels....	74c	77c per gal.

10 barrels and over open.

Turpentine

The attitude of some of the local jobbers in regard to the recent advances in the price of turpentine is perplexing. The fact that the Savannah markets are very unsettled reflects a similar condition on the local markets. A range of prices is quoted, and it is known that fairly large stocks of turpentine are in the possession of some jobbers who are not holding out for speculator's prices. In some quarters the price has advanced 2c per gallon over the price of last week and is now quoted at 82c per gallon. The Savannah markets during the past week

(Continued on page 52.)

NOT "ON," BUT "IN"

Brandram's B.B. White Lead

is protective and durable, because when mixed with the right proportion of Linseed Oil, it penetrates the pores of the wood, holding on with thousands of tiny tentacles.

Instead of resting *on* the surface, it incorporates itself *with* it.

This characteristic is only true of WHITE LEAD when it is properly corroded and properly ground.

This property has made

Brandram's B.B. Genuine White Lead

the standard of the world.

Small Town Dealers' Success

HERE is proof that Pratt & Lambert keep faith with their dealers—help them get Pratt & Lambert goods off their shelves, whether business generally is "looking up" or whether it is not so good. Last year H. R. Tinsley & Co. increased their sales on Pratt & Lambert Varnishes over 60 per cent. Read their letter. Here is part of what they say: "We believe that this increase is largely attributable to the fact that you have kept up full speed in your advertising and promotion work despite the fact that conditions for the past season or two have caused other manufacturers to discontinue to some extent these sales helps to the dealer." If you want to be associated with varnish manufacturers who are more than just fair weather friends

Write for Pratt & Lambert Dealers' Proposition.

Gentlemen-

The hearty co-operation that we received this past year from your Sales Promotion Department prompts us to write you of the large gains we have made in the sales of your product.

Our business on your goods for the past year shows an increase of over 60% over the year previous with practically 50% of this business on "38", "61" and Vitralite. We also notice a very large increase on our sales of Andrews Nukote. We consider that this year's business on P&L goods to be the largest we have had in the last fifteen years that we have been handling the P&L Line. We believe that this increase is largely attributable to the fact that you have kept up full speed in your advertising and promotion works in spite of the fact that business conditions for the past season or two have caused other manufacturers in your line to discontinue to some extent these sales helps to the dealer.

We have noticed your magazine advertising and cannot see how they could be improved upon. Your advertising seems to cover the field thoroughly from every point and your plan of furnishing window posters showing the same designs and colors seem to be a scientific idea to connect up with our store the advertisements the people have seen in the magazines and your method of referring inquiries and your Advisory Department to whom we can refer a painter or customer who has technical problems, are all features extremely helpful in your dealers sales.

We can truthfully say that in our 49 years of retail business that we have never dealt with a better firm than the P&L Co. We think that the P&L Line of varnishes are the leaders and that "61" Floor Varnish is known in every home in our city. We hope to increase our sales next year over this year by at least 60%.

Any dealer who is looking for a line of varnishes backed with a real selling plan would do well to look into your proposition.

Youre very truly,

P.S. We are sending you photo of part of our paint and varnish department. Please notice old relics on wall.

Facts About Varnish

The Varnish gums used in Sherwin-Williams Varnishes are bought on the world's markets in such large quantities that we secure the choicest gums at rock-bottom prices, and enjoy other advantages in delivery, etc., which necessarily come only from buying in tremendous quantities.

All the linseed oil used in making our varnishes is pressed, filtered, and aged in our large Linseed Oil Mills in Montreal. The purity and quality of this important ingredient is constantly maintained to our exacting standard by means of the modern facilities we own.

In addition to the great care exercised in purchasing and supplying the raw materials of which our varnishes are made, the Sherwin-Williams Co. has large and modernly equipped varnish factories and storage warehouses, and skilled varnish makers whose knowledge in this particular line cannot be duplicated in Canada.

S-W varnishes are always of high, uniform quality, and perfectly adapted for the uses for which we recommend them.

There is, therefore, a great opportunity for paint and varnish dealers to build up a large and profitable varnish business with Sherwin-Williams Varnishes. Remember our leaders—Mar-not for floors, Scar-not for inside woodwork, Rexpar for severe outside exposure.

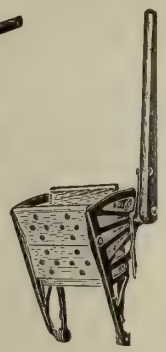
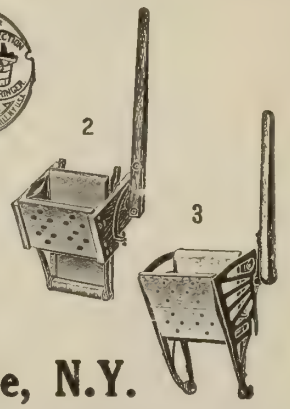
always bears this trade-mark

LOOK FOR IT.



Janitors and Housekeepers praise these wringers, because they wring easily and neatly, are durable, practical and useful.

Ask your jobber for them or write to us.

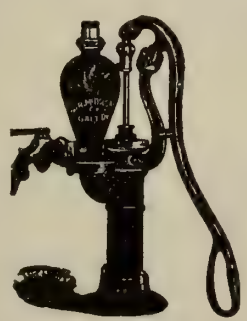


White Mop Wringer Co., Fultonville, N.Y.

More-Profit Pumps ---Real Profit

No use to sell a pump that makes trouble for a dealer with his customer.

The trouble is remembered The cost of repairs is dead loss of time and temper. The dealer suffers.



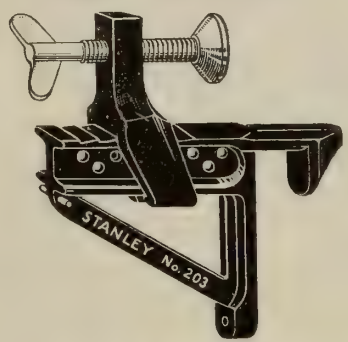
"Aremacdee" hand and motor metal pumps for force or lift use, every kind, are shown in the big catalogue.

Dealers, ask for prices and terms. Get real profits on your metal pump sales.

The R. McDougall Co., Limited

GALT, CANADA

Stanley Tools



STANLEY BENCH BRACKET

No. 203

A tool that will immediately commend itself to the Carpenter, the Cabinet Maker, or in fact to any one occupied or interested in carpentry or woodworking of any kind where a bench is necessary.

It simply requires that one or more holes (not smaller than one inch) be bored in the front of the bench. The shape of the tool is such that when the jaw or nose is put through the hole, it is automatically held in place, and by means of the screw clamp, the board being worked upon is quickly and firmly secured.

The body of the Bracket is made of iron—japanned, and the clamp screw is strong, well threaded and nickel plated.

YOU WILL FIND THIS TO BE A GOOD SELLER. WRITE US FOR PRICES, ETC.

STANLEY RULE & LEVEL CO.
NEW BRITAIN, CONN. U.S.A.

BOOKS FOR HARDWAREMEN

Every hardwareman can get valuable pointers and make his business a more profitable proposition if he will study the experiences of experts who have 'made good.' Our Technical Books for hardwaremen cover a wide range of subjects, among which may be mentioned Metal Working Books, Hardware Window Dressing, Store Business Methods, Paints and Painting, Salesmanship and Sales Plans and Advertising. We have also the very latest books on the plumbing and heating problems.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

Big Profit and Satisfaction in Selling

"AYLMER" Force Pumps

They are certain to sell easily because it has several advantages over the ordinary style.
Has longer stroke, more power, and works easier.
While designed for hand use it can be **readily converted into a Windmill Pump** by the addition of a flat bar, which screws into the cross head at top.
It will be to your interest to write for full particulars now.

NICKEL

SHOT—High and Low Carbon
INGOTS—Two Sizes 25 lb., 50 lb.

Electrolytic Nickel 99.80%

Prime Metals for the manufacture of Nickel Steel, German Silver, Anodes, and all remelting purposes. Our Nickel is produced as rods, sheets, strip stock, wire and tubes.

MONEL METAL

We are Sole Refiners of this natural, stronger than steel, non-corrosible alloy. Produced as rods, flats, castings, tubes, sheets, strip stock and wire. Ask for descriptive booklet.

Send inquiries direct to us.

THE INTERNATIONAL NICKEL COMPANY

43 Exchange Place, New York.

LONDON HIGH GRADE BARIRON

We have economical and correct methods of production, which means that you get bar iron that is absolutely reliable in toughness, strength and workability at the lowest prices.
The consignments you receive from time to time are the same through and through.
Carry a stock for your customers—a splendid profit awaits you. If you prefer we can ship direct from mill.

London Rolling Mills Co., Limited, London, Canada
Sales Agents:

You can talk across the continent for two cents per word with a WANT AD. in this paper.

A Straight Talk from the Manager

As Others See Us

AS a reader of Hardware and Metal, you no doubt appreciate how valuable to you is the information it gives you from week to week in its advertising as well as its editorial pages.

But do you fully realize how high Hardware and Metal stands among the trade papers of the *world?*

At a recent banquet in Montreal, Walter H. Cottingham, President of The Sherwin-Williams Company, who has achieved an international success as a business leader, said, in introducing the Hardware and Metal representative:

"Hardware and Metal is the best trade paper in Canada, and I do not know of a better one in the United States."

Canadian hardwaremen have every reason to feel proud of the pre-eminence of their trade paper, and we are determined that it shall continue to hold that commanding position in the future.

J. G. L.

Condensed or "Want" Advertisements

Those who wish to sell or buy business or stocks, obtain competent help, connect with satisfactory positions, or secure aid in starting new enterprises, should not fail to use the Want Ad. Advertisement Page of HARDWARE AND METAL. It is the central market place of the hardware trade throughout Canada. There is always someone somewhere looking for just such proposition as you have to offer. RATES (payable in advance):—2c. per word first insertion, 1c. per word subsequent insertion, 5c. additional each insertion, when Box Number is required. Each figure counts as one word.

WANTED

WANTED AT ONCE—FIRST-CLASS HARDwareman to invest from three to five thousand dollars in good hardware business in eastern Ontario city. Apply Box 224, Hardware and Metal. (46)

SASKATCHEWAN, ALBERTA, BRITISH Columbia. A good market for articles used by farmers. Experienced Western traveller wants an engagement. Box 220, Hardware & Metal. (44)

AGENCIES REQUIRED—HOUSEHOLD COMmodities, novelties, and agriculturalists' supplies, made in Canada. Apply to Frederic Sara & Company, Manufacturers' Agents, 326 Ninth Avenue West, Calgary, Canada. (44)

TINSMITH WANTED — MUST BE SOBER. Also state wages and give references. Geo. Phillips & Son. Havelock, Ont., Box 565.

WANTED, AT ONCE—RETAIL HARDWARE salesman with three years' experience. Must be good stockkeeper. None but a good reliable man need apply. State wages expected. Apply to William House, Box 610, Trenton, Ont.

BUSINESS CHANCES

MANUFACTURER OF PROFITABLE SHEET metal specialties, wishing to extend business, offers quarter interest to competent sheet metal man with one thousand dollars. The Simplex Co., Owen Sound, Ont. (45)

MISCELLANEOUS

FIRE INSURANCE. INSURE IN THE HARTford. Agencies everywhere in Canada.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

ADDING TYPEWRITERS WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314, Stair Building, Toronto.

GOOD STENOGRAPHERS ARE WHAT every employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

ESTIMATING. BY EDWARD NICHOLS, Architect. 128 pp., 22 illus. Cloth binding. Containing invaluable information for the use of Architects, Contractors, Builders, Plumbers and Heaters, Painters, Roofers, Cornice-Makers, and other workers in the building trades. This handbook tells just how to go about the task of making an estimate intelligently. Price, postage paid, $1.00. MacLean Publishing Co., Ltd., 143-153 University Ave., Toronto.

HARDWARE STORE BUSINESS METHODS—The authors of the articles in this book are for the most part practical and progressive hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infinite value to that trade. The 40 subjects discussed include: Rules and Regulations for the Hardware Store; Hardware Buyer; Good Methods in Stock Taking; Prices and Catalogues; Collecting Accounts; The Merchant and His Employees; Changing Business Conditions and How to Meet Them; Profit Figuring System; Starting in Business; Changing a Credit into a Cash Business, etc. 220 pages. Price $1.10, postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B." Otis-Fensom Elevator Co., Toronto.

HARDWARE WINDOW DRESSING—THIS IS the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. Size 8x11 inches. Price $2.60 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.

The firms who advertise are the firms who invite your patronage, and are most deserving of it. A product that is persistently advertised to the critical dealer is a product that can be relied upon to give the satisfaction desired, for the maker behind that product must have confidence that it will earn your approval; otherwise, he would not dream of holding it up for your and your customer's criticism.

Selling for an immediate profit or building for a big future business?

Delta Files

Are ultimately the most profitable

because their popularity means a big increase in sales of files and the connection you build up by supplying files regularly will materially increase your sales of other mill supplies.

Delta Service means more work in a given time—and its durability less file expense. The consistency of this distinctive service has made our line of files much sought after by particular file buyers.

The "DELTA" IS THE ONLY LINE OF FILES FROM 3 TO 24 INCHES MADE ABSOLUTELY OF CRUCIBLE STEEL.

There is a shape and size for every purpose.

TRADE MARK DELTA

The trade mark on the tang is your guarantee of satisfaction.

Order from your jobber

RESULTS

from small investments. Read Hardware & Metal's Want Ad. Page.

Addition to Electro Assortment

ON this page is shown an addition to Hardware and Metal's electro assortment for retail hardware dealers. With the cuts shown below the assortment now totals 219. These electros are supplied to hardwaremen at the small cost of fifteen cents each. Cash with order. Sheets showing the whole assortment will be mailed on request. Since the introduction of this service by Hardware and Metal a few months ago, orders have been received from all parts of Canada and many of the largest retail concerns in Canada are now using Hardware and Metal electros regularly in their newspaper and circular advertising. Many merchants in the small towns have also taken advantage of this service. Be sure and order by number.

"It is my opinion that for big game the Ross .280 Rifle is the best in the world."

B. K. Miller, Wild Rose, Wis., U.S.A.

Mr. Miller adds:—"I have hunted and fished in various parts of the world, including British East Africa, but I have never seen a gun the equal of the Ross .280 for big game."

Dealers find this rifle, which is enthusiastically praised by the keenest Canadian as well as American sportsmen, a valuable addition to their stock.

The Ross .303 Sporting Models are also very popular.

Their accuracy and reliability combined with their comparatively low price make them universal favourites.

Another good seller is the Ross .22 Cadet Rifle. It is adopted by the Government for Cadet Corps, and is a strong, reliable and accurate arm suitable for the roughest use on camp or trail.

ROSS RIFLE COMPANY - QUEBEC

CROSS CUT SAWS

We are making, at Hamilton, the most profitable line of Cross Cut Saws and Saws for all purposes that you can buy. Their quality insures a fair profit. That's the secret of our success and popularity. We have a book that describes all patterns. Write and ask for catalog "H M." Let us line you out on cost and resale prices and other details. We have a mighty interesting proposition for you.

Reasons why the Kyanize Line is a Profit Producer

KY-AN-IZE

IF *you* could ask individually the several thousand Kyanize dealers why they were enthusiastic over the sales and profits of their Kyanize Exclusive Agency, they would one and all tell you that—

Kyanize was the best varnish at the most reasonable price upon the market—and that

Kyanize had behind it from the factory the most consistent, the biggest, the most sales-producing *punch* ever given a dealer in a scientific, merchandising, co-operative way—

First, the product — the best varnish made at the most reasonable price.

Second, the Exclusive Agency—one dealer to a territory.

Third, the wonderful co-operative sales-help of the factory *behind* and *with* the dealer all the time.

Frost Fence First

The "Men Who Know" Use "FROST" FENCE

FROST QUALITY means extra business to you, just as it has meant extra business to many other hardware merchants. B. E. French, Caledonia, Ontario, sold **seven** carloads the first year he held the exclusive agency for Frost products. In previous years his fence business was usually one car. We can give you just such actual proofs from nearly every section of the Province.

Moreover, we own and operate our own wire mills, the only complete wire drawing and galvanizing mills in Ontario. Frost products, right from the raw material to the finished fence, are made in such a way that the quality sticks out. You get service in after years as well as now.

IT IS THE ONLY FENCE THAT HAS LATERALS AND STAYS EVENLY SPACED AND LOCKS OR BINDINGS WHICH ARE REALLY SECURE

The "FROST" Fence and Frost Galvanized Gates will put you on a road to better sales the instant they enter your store.

Woven Wire Fence, Galvanized Gates, Ornamental Wire and Iron Fence, Coiled Wire, Staples and Supplies, Oiled and Annealed Wire, Hay Wire and Bale Ties. Write for 1916 prices and terms.

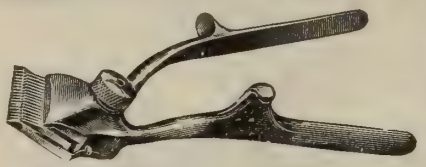
PRIEST'S HORSE and TOILET CLIPPERS

Made by American Shearer Mfg. Co.

present a complete line at a range of prices covering all requirements of the trade. They are all quality goods, and represent best designs and highest standards of workmanship, regardless of price.
Some styles of Toilet Clippers are illustrated below. All are heavily copper plated and polished before nickeling, thus giving a higher finish, which lasts much longer than ordinary plating. The utmost care is used in grinding and tempering the cutting plates, giving cutting qualities whose superiority may be readily demonstrated by comparison. No. 00 and No. 000 Shaver for beard and neck trimming, are clippers of the utmost lightness and refinement, not paralleled by any other American manufacturer.



STANDARD No. 0, No. 1 and No. 2.
Retailing at about $2.50. High-class barber's clipper.

No. 00 SHAVER
A light and elegant Clipper for beard and neck trimming. Retailing at about $2.25.

SPEED

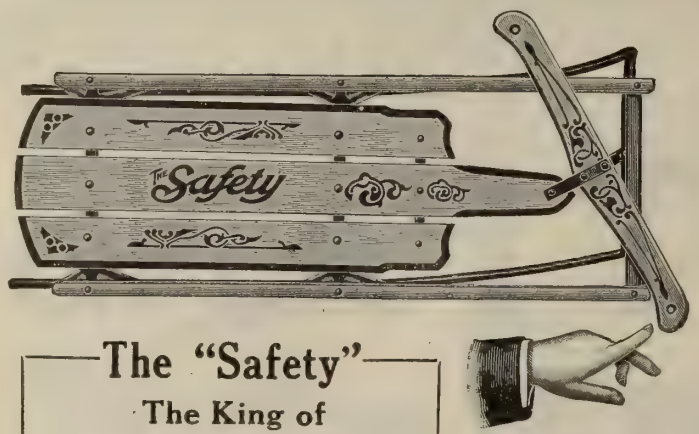
SHIPMENTS MADE PROMPTLY

THE SHEET METAL PRODUCTS CO. OF CANADA LIMITED

MONTREAL TORONTO WINNIPEG



A Quick Sales Producer

The steering is done by simply bending the runner and NOT the wooden frame.

The runner (patented) is made of BEST SILVER SPRING STEEL and for that reason it will always keep its shape, is flexible, lasting and has a smooth running surface and being GROOVED is guaranteed NOT to skid.

The sled bench (patented) is a solid stamping of WROUGHT STEEL, being lighter, neater and stronger than ANY OTHER method of construction.

The top (patented) DOES NOT MOVE, thereby enabling the operator to guide the sled much easier without danger of pinching the fingers as is common with OTHER flexible sleds.

The safety sled is made from the best suitable material and EVERY PART riveted. They are neatly striped and decorated.

Packed two in a bundle. No shipment made of less than 1/6 of a dozen. The best assortment to buy in dozen lots is:—

1/6 of a dozen, 33 inches. 2/3 of a dozen, 37 inches.
1/6 of a dozen, 41 inches.

The "Safety"

The King of Self-Steering Sleds

NOTE THE REMARKABLE STEERING RADIUS OBTAINED BY SIMPLY BENDING THE SILVER SPRING STEEL RUNNER, AND NOT THE WOODEN FRAME.

The Most Economical Roofing---

By giving your customers economical roofing you gain their friendship and future trade. Many hundred dealers and tinsmiths in Canada have increased their business by RECOMMENDING—

Rust-Resisting Anti-Corrosive

TONCAN METAL

ROOFING

Toncan Metal Roofing is rust and corrosion-resisting because it is as pure as it is possible to make commercial sheet metal, uniform in structure and very dense.

The buildings shown above are typical Toncan Metal installations. Years of service on hundreds of buildings like these has conclusively proven the extreme durability of Toncan Metal.

Toncan Metal is also made up into siding, eavestrough, conductor pipe, ventilators, skylights, cornices, window frames, etc., black, painted or galvanized.

CLARK HEATERS

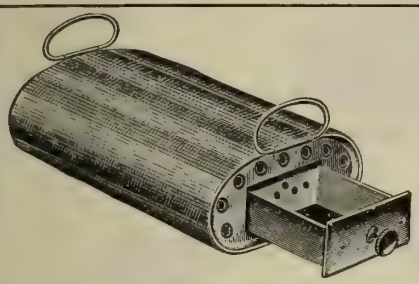
COST NO MORE

than the cheap, ***cast end*** makeshifts sometimes offered to dealers who have not had an opportunity to examine and know the Clark heaters.

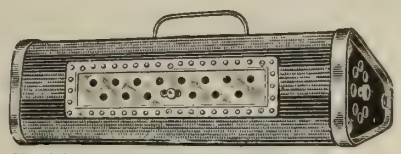
The cheaply constructed cast end heater is liable to break at any time if it is brought in forcible contact with any hard object.

There are no castings of any kind in a Clark heater.

A Clark heater will not bend or break. Each one is guaranteed to please or money refunded.



No. 5B Clark Heater



No. 7D, showing side and end ventilators.

No. 7D Clark Heater

No. 7X Clark Heater

This is a profitable winter line to handle. Clark heaters are the most extensively advertised to your customers of all heaters.

All the leading jobbers of Canada carry Clark heaters. Insist on them, for they cost no more and please better.

CLARK CARBON

is the recognized king of heater fuels. Every brick is guaranteed to give 25 per cent more heat than any other prepared fuel on the market.

Our ABC Coal is guaranteed to equal any coal on the market, outside of our Clark Carbon.

Get this fuel, which has a reputation, and lives up to it. It means satisfaction to you and your customers.

Chicago Flexible Shaft Co., 250 Ontario Street, Chicago

You can put a stop to faulty hot water systems by installing

The Knickerbocker Generator

It is a positive remedy that is easily applied to the open or closed systems of hot water heating.

Entirely automatic.

Connects with one-inch nipple to outlet of expansion tank.

Makes a hot water system equivalent to a low pressure steam plant.

Increases radiation from 25 to 30% with same firing.

Reduces the size of pipes and fittings.

Temperature of water can be varied up to 250 degrees.

A top-notch profit producer.

You Can Always Spot a Well-Shod Horse

Draft horses hauling heavy loads slip continually unless their shoes are properly calked. They labor on the shortest hills, even in dry weather, while well-shod horses pass by on a run.

For every horse there is a Neverslip Red Tip Calk. Neverslips can be inserted in twenty minutes without removing the shoe. They save horses' lives, drivers' lives and the lives of pedestrians. What better reason for stocking them!

TOBOGGANS—"THE CANADIAN MAID"

TWO GREAT FEATURES OF "THE CANADIAN MAID"

First—The Raised Front. For about eighteen inches the front of the toboggan has a gradual slant. Result—the toboggan does not PUSH the snow in front of it, and thus you have GREATER SPEED, AN EVEN AND COMFORTABLE MOTION and a LONGER RIDE. Note this sketch—which shows how other toboggans without this feature shove the snow along.

Second—The Three Runners—which give emphasis to the above-mentioned feature and which guarantee safety, as it aids in controlling the toboggan. The runners hold the toboggan to the track. With two, six or eight passengers, the "Canadian Maid" No. 4 toboggan is equally easy to control, the runners helping materially. Accidents have occurred which can be explained by the fact that the usual flat-bottom toboggan was used. Iron and steel Runners fitted at slight additional cost.

PACK-TOBOGGANS A SPECIALTY. Full information on request. Write for Prices and Dealers' Discounts.

WALTER DEAN ∴ Foot of York Street ∴ TORONTO, CANADA

It stops the Big Fellows.
It's speed and penetration that do things. They get what they're after. This is true of all sporting cartridges of the Dominion family, each one of which may be relied upon *absolutely* under every shooting condition.
Recommend Dominion Big Game cartridges to your customers who are going into the woods for big and dangerous game. Explain to them the many superior features of Dominion Ammunition. Tell them that the materials are the best obtainable—that the manufacturing methods are exact in every detail—that a rigid system of inspection and testing follows every Dominion Shot Shell and Metallic through each manufacturing stage from shell drawing to crimping the bullet. And tell them that all this means accuracy, power and thorough dependability.
Tell them that Dominion is "the ammunition made wholly in Canada."

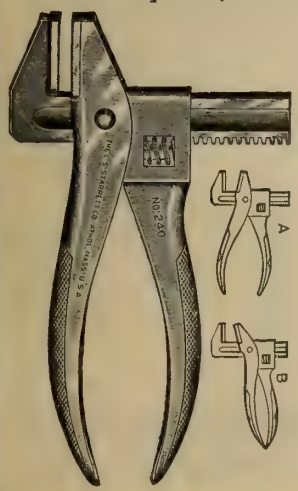
Starrett Tools for Motorists

Starrett Tools are known throughout the world as tools for fine mechanical work. Among these tools are several especially adapted for use on automobiles.

The Starrett Ratchet Wrench $15

includes 28 sockets for all standard hex nuts—handle with ratchet and reversible pawl, universal joint, drilling attachment, spark plug socket, screwdriver.



Expansion Pliers $2

Jaws are adjustable, will take any shape up to 1¼ inch. Handles are always just right to squeeze. Great leverage gives powerful grip. Quicker than a wrench for small adjustments.

Hack Saws and Frames

Flexible back blades for hand work prevent breakage. Adjustable hack saw frames take 8, 10 and 12 inch blades and permit turning the blades to saw in any position.

Starret Tools and Instruments include 2100 styles and sizes of fine tools and hack saws.

We deal direct with retail dealers. Send for free catalog No. 20-MA. prices, etc.

National Oval Slide Vises

This Vise is given the same care in manufacture as our more costly Machinists' Vises and material used is of the same grade.

Jaws are carefully milled.

For a general purpose Vise for the country trade, there is not a better made.

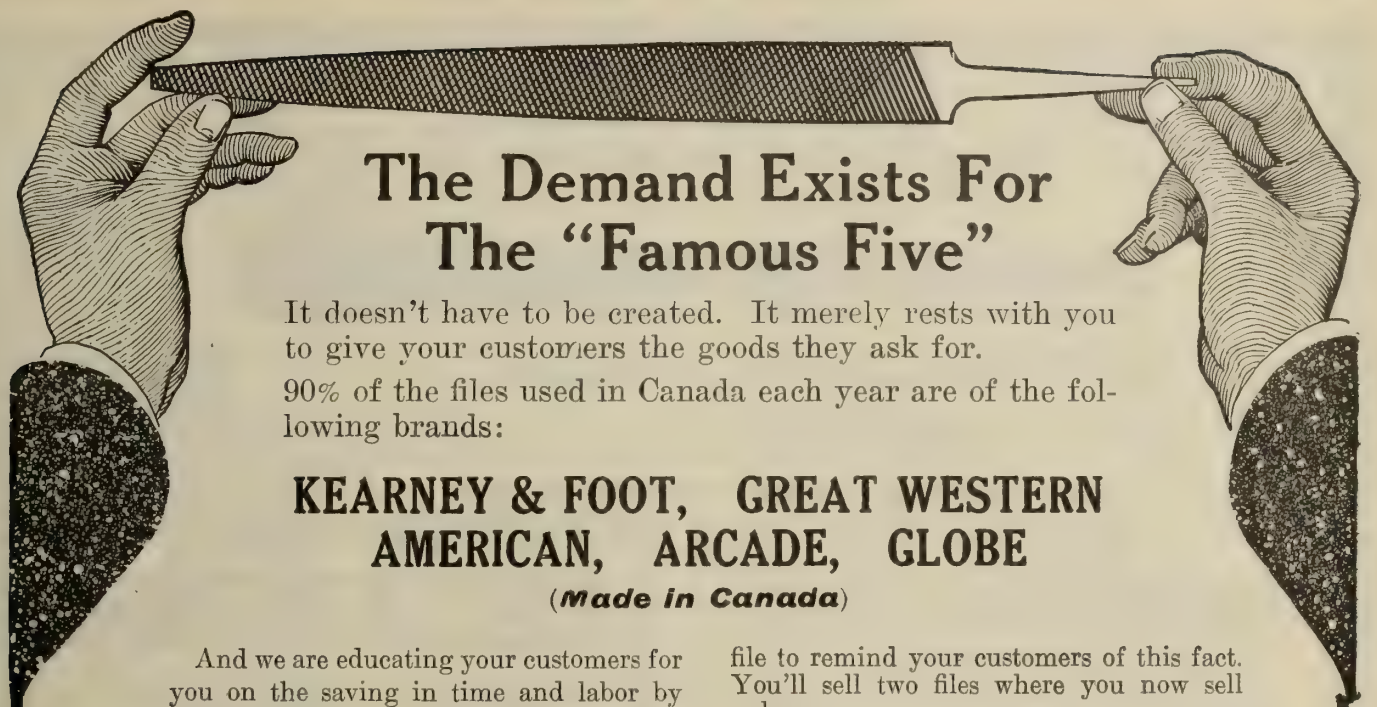
It will give your trade a top-notch service—and you will make a good profit.

Made in six sizes from 2½" to 5".

Be sure to write for our illustrated catalog of machinists' and woodworkers' tools. It contains actual photographs of the goods.

National Machinery & Supply Co., Ltd.

HAMILTON - CANADA



The Demand Exists For The "Famous Five"

It doesn't have to be created. It merely rests with you to give your customers the goods they ask for.

90% of the files used in Canada each year are of the following brands:

KEARNEY & FOOT, GREAT WESTERN AMERICAN, ARCADE, GLOBE

(*Made in Canada*)

And we are educating your customers for you on the saving in time and labor by discarding a file when it is half worn, and replacing it with a new one.

It only remains for you when selling a file to remind your customers of this fact. You'll sell two files where you now sell only one.

The line, therefore, for you to push is the one for which there is a big demand—the "Famous Five."

DAVIDSON'S
PREMIER LEADER
Steel Range

The general demand this season is for a moderate-priced range.

Many stove dealers are reporting business better than usual on account of the popularity and demand for the Premier Leader. As for ourselves, "Leader" sales have exceeded our own expectations.

Why? For the reason that the Leader is the best value at the price of any range on the market.

When you can get a range, constructed of only high-grade, selected material, one given the most careful workmanship and of a modern and distinctive design, at the exceptional moderate price of the Leader, there is no reason why you should not make sales. Order a sample range and get in on the business.

The Premier Leader is made square, or with reservoir, and can be fitted with high shelf, high closet or attractive Persian closet.

Duplex grates for coal or wood, or wood grates for wood only can be supplied.

"Canuck" Bread Mixers

ECONOMY

RIGHT NOW, when every Canadian is responding so liberally to frequent calls in support and relief of those who are at war for Canada and the Empire—RIGHT NOW is the time to practise ECONOMY in the HOME—to cut all UNNECESSARY COSTS in personal and household expenses.

You can cut your bread bill in HALF by buying your OWN FLOUR, and making your OWN BREAD.

And the "CANUCK" positively GUARANTEES every batch—right from START to FINISH.

"CANUCK" Bread is TWICE THE VALUE and HALF THE PRICE of bakers' bread.

The "CANUCK" effects ECONOMY in one of the main departments of household expenditure—the food bill.

CLEANLINESS

IN THESE DAYS, when the lesson of the importance of CLEANLINESS is impressed upon us daily through the medium of our newspapers, magazines, doctors, health authorities, and hygienic teachers — SANITATIVE METHODS merit our best consideration. And PARTICULARLY SO pertaining to the FOODS WE EAT. That which goes into OUR MOUTHS must be ABSOLUTELY CLEAN AND PURE, or our instincts of cleanliness will reject it.

Hence the obvious advantages of preparing food materials AT HOME, from HOME RECIPES, by your own HOME METHODS, under HOME SUPERVISION.

The "CANUCK" gives you HOME-MADE BREAD—light, sweet, wholesome, CLEAN.

Outlook for Christmas Trade

Christmas Buying This Year Has Started Almost a Month Earlier Than Usual—Retail Hardwaremen Are Optimistic—A Demand for Practical Gifts—Opportunities For Business Exist

"DO your Christmas shopping early," is a slogan that has been used extensively during the past few years, usually during the three or four weeks preceding Christmas.

The slogan originated some years ago in a department store that was conducting an educational campaign to educate the public to buy early, and thus avoid the last minute Christmas buying rush which a few years ago was quite noticeable. At that time most people left off their buying until the week before Christmas, and then there was a grand rush, resulting in overworked salesstaffs, badly disorganized stocks, and very often dissatisfied customers.

The educational campaign was taken up by merchants in all parts of Canada and the result has been that during the past five or six years Christmas buying has become quite active shortly after Dec. 1, and continued steadily until Christmas eve.

The result has been very satisfactory to both the public and the merchants. The former, when inspecting stocks early have a better opportunity of examining at leisure the many lines which the merchants have to offer. Sales staffs can give more attention to the wants of customers.

New Condition This Year

The educational campaigns, combined with the extraordinary conditions which prevail this year, have resulted in a condition not noticeable in former years—a tendency on the part of the public to do a considerable amount of Christmas buying in November.

During the past two weeks thousands of dollars' worth of gift goods have been sold in Canada, mostly in the form of dainties for the thousands of Canadian soldiers who are in France, Belgium, and in the training camps in England. Included in the gift packages, which right at the present time are being made up by the thousand, and will continue to be made up for the next three or four weeks, are large numbers of razors both of the safety and ordinary variety, brushes, strops, soap, shaving mirrors, etc.

Then there are many thousands of sol-

(Continued on page 43.)

Details regarding the above excellent display of Christmas goods are given in the accompanying article. Many good suggestions for trimming are offered in this display.

Toronto Selected for Convention

Eleventh Annual Convention of Ontario Retail Hardware and Stove Dealers' Association Will be Held at Toronto in February—Manufacturers to Hold Exhibition at London in June.

THE eleventh annual convention of the Ontario Retail Hardware and Stove Dealers' Association, will be held at the King Edward Hotel, Toronto on February 22, 23, 24,1916.

In the Oct. 16 issue of Hardware and Metal, it was announced that the Advisory Committee of the Ontario Retail Hardware and Stove Dealers' Association had recommended to the executive of the association that Toronto be the meeting place on the above dates. Members of the executive were unanimously in favor of Toronto as the city in which the 1916 convention should be held.

In last week's issue of Hardware and Metal it was announced that the Canadian Hardware Manufacturers' Exhibitor's Association had decided to hold its hardware exhibition at London, Ont.

In former years the retailers' convention and the manufacturers' exhibition were held jointly. This year owing to the war the exhibitors were unable to secure suitable accommodation for the mammoth hardware exhibition, and it was therefore cancelled. The retailers held their convention at Toronto in February, and although the manufacturers did not hold an exhibition, many of them were present in Toronto during convention week. At the close of the convention the retailers' association was tendered a splendid banquet by the manufacturers' association. A short time ago the officers of the exhibitors' association were assured that they would be able to secure the main building, at the London fair grounds for holding a hardware exhibition in 1916. It was decided to go ahead with plans for an exhibition in 1916, to be held at London, Ont.

Joint Meeting

A meeting of the Advisory Committee of the Ontario Retail Hardware and Stove Dealers' Association, and a subcommittee of the Board of Directors of the Canadian Hardware Manufacturers' Exhibitors' Association was held in Toronto on Friday last, and the following resolution adopted:—

"It was unanimously resolved that the Ontario Retail Hardware and Stove Dealers' Association attend the Hardware Week to be held in London, Ont., during the third week in June, 1916. It was further resolved that the annual convention of the Ontario Retail Hardware and Stove Dealers' Association be held in Toronto during the third week in February without the attendance of the Canadian Hardware Manufacturers' Exhibitors. It was resolved that the hardware week and exhibition be the occasion reserved for the meeting of the manufacturers and dealers."

Hardware Exhibition

Secretary F. M. Tobin, of the Canadian Hardware Manufacturers' Exhibitors' Association, has been authorized to proceed immediately with plans for the London exhibition. The exhibition will be held during the third week in June, at the main fair building at the Western Fair grounds, London, Ont.

The site selected for holding the exhibition is an ideal one. The commodious main building at the Western Fair grounds is located almost at the entrance to the Exhibition grounds, or Queen's Park, the name by which the exhibition grounds is familiarly known to Londoners. There is an excellent car service from the business centre of the city to where the exhibition will be held. A ten-minute car ride will take the visitor from the business centre to the exhibition building.

It is expected that a large number of retail hardwaremen will visit the exhibition in June. The public will also be admitted.

In former years the exhibition of the Canadian Hardware Manufacturers' Exhibitors' Association has been held in conjunction with the annual convention of the Ontario Retail Hardware and Stove Dealers' Association. It had been practically decided last year to hold the 1915 exhibition and convention at London, Ont., but owing to

KING EDWARD HOTEL, TORONTO,
Where Retail Hardware Convention will be held in February.

Main Building at Western Fair Grounds, London, Ont., where the hardware exhibition of the Canadian Hardware Manufacturers' Exhibitors' Association will be held during the third week in June, 1916.

the fact that all the large buildings in London were at that time being used by the military authorities, it was found necessary to cancel the exhibition.

The Retailers' Convention

President Conn, Secretary Macpherson and other officers of the Ontario Retail Hardware and Stove Dealers' Association, are going right ahead with plans to make a huge success of the eleventh convention of the association, which will be held at the King Edward Hotel, Toronto, on Feb. 22, 23 24.

It is expected that the 1916 convention will be the best in the history of the association. This year's convention, held at Toronto in February, while not the largest from the standpoint of attendance, was one of the most practical and enthusiastic conventions ever held by the association.

The meetings were closed, and only members of the association, and the trade press were allowed to be present at the discussions. The result was that retailers expressed their views more freely, than they had at previous conventions where outsiders frequently secured admittance to the various sessions.

Considerable progress has been made since the last was held, and the officers have accomplished a great deal, both in securing new members and in creating a greater interest on the part of individual members in the work of the association.

One of the results of the efforts of the officers of the association has been the increase in membership. Since April 1, 78 retailers and 41 travelers have been added to the association membership.

Many retailers have joined in order to secure a copy of the new association price book which was compiled by Secretary Macpherson, and has been supplied free to members of the association.

It is expected that the membership will be further increased to a very great extent before the next convention is held.

IN NEXT ISSUE

In addition to the regular weekly features in next week's issue of Hardware and Metal, the third of a series of "Talks of a Self-made Merchant to His Clerks" will appear. An illustrated article by Wm. Crawford will show how attractive window display cards can be made, by using illustrations which have been taken from advertisements which have appeared in Hardware and Metal. Two advertising suggestions for use by retailers, appeared in last week's issue. Two more, featuring seasonable goods will appear in the next issue. The second of a series of Christmas window displays will also appear next week. The clerk's department will next week contain an exceptionally interesting article telling of the rapid rise of one of the best known men in the builders' hardware trade in America. The third article of a series on retail accounting will also appear in the next issue, along with a number of other interesting features which should appeal strongly to readers.

The fee for retail hardwaremen is three dollars per year, which includes in addition to membership, a copy of the association price book and several other services which are offered to members. Travelers and clerks may become associated members on payment of a $1 fee.

A STEEL HELMET

A helmet with a foundation of thin sheet steel has been designed by William Robertson, a Montreal hatter, and the metal parts for this and other models of steel reinforced military headgear for active service have been manufactured by the Thos. Davidson Co., of that city. The idea has been worked out largely on the inspiration of Sir Conan Doyle's recent statements, and consists of a thin shell of steel covered with khaki canvas, so as to take the appearance of the regulation sun helmet favored in campaigns in the Far East. It weighs only about a pound as compared with half a pound which is the weight of the cork model.

On the same principle, steel linings have been designed for the regulation military cap, which has been so extensively used in recent years, and also for the Scotch cap of the Highlanders, and even for a fur model for winter wear, but it is questionable as to the resisting powers of the latter shapes with their flat surfaces, as compared with the rounded cone of the helmet which has the additional advantage of an extended rim providing a certain amount of protection for the face and neck from shrapnel bullets and shell splinters.

HARDWARE & METAL

CANADA'S ONLY WEEKLY HARDWARE PAPER

Vol. XXVII. TORONTO, NOVEMBER 13, 1915 No. 46

THE STEEL TRADES

ON many occasions during the past few months we have referred to the extraordinary conditions which prevailed in the steel trades. Editorials and our weekly market reports have repeatedly referred to the fact that the situation is unprecedented.

Men who have been engaged in the iron and steel trades for many years state that they have never known conditions to compare with those prevailing to-day.

During the past week, buyers of steel have realized more than at any time since the outbreak of the war, the acuteness of the situation.

There is a feeling of expectant uncertainty about the future that causes apprehension as to what developments will be. The scarcity of certain forms of material is even more serious than the advances in price.

Many people have been under the impression that the excitement in the steel market has been due almost entirely to the war. Such is not the case, for domestic demand in the United States and in Canada has grown rapidly of late.

All lines of semi-finished and finished steel goods are on the up-grade and, as our market reports have indicated, there have been during the past few weeks many important price changes of a far-reaching nature.

Quite a number of advances have taken place this week and the trade can rest assured that more will follow.

Referring to the industry in the United States, the Iron Age states that the Steel Corporation's statement that its unfilled orders increased 847,000 tons last month gave the first definite measure of the steel trade's sensational leap forward in October. This is an unparalleled record but is thus only in keeping with all other developments in the current market.

Price advances have had no effect of curtailing demand; it is in fact heavier now than at any other stage in the present remarkable movement. In the past week pig iron, billets, and a number of finished products have gone higher. Output of some manufacturing consumers is likely to be curtailed because steel cannot be had. In the flood of orders in October, domestic business figured to a larger extent than in many months.

BOOKKEEPING AND CRIMINAL CODE

LAST week a Toronto merchant was up for trial on a charge of not having kept books as required by the Criminal Code of Canada. The merchant commenced business in August, 1914, and later operated three stores in Toronto. In June, 1915, the merchant made an assignment for the benefit of his creditors under such circumstances as to raise in the minds of the officers of the Canadian Credit Men's Association a suspicion that he had not acted honestly with his creditors. His trade liabilities amounted to more than $75,000 at this time and there was a considerable deficit shown by the statement prepared by the assignee. The Canadian Credit Men's Association handled the estate and decided to prosecute the merchant under the section of the Criminal Code which requires a retail merchant to produce books of account, in case of insolvency.

This section reads as follows:

"417. Every one is guilty of an indictable offence and liable to a fine of eight hundred dollars and to one year's imprisonment who, being a trader and indebted to an amount exceeding one thousand dollars, is unable to pay his creditors in full and has not for five years next before such inability kept such books of account as according to the usual course of any trade or business in which he may have been engaged, are necessary to exhibit or explain his transactions, unless he be able to account for his losses to the satisfaction of the court or judge and to show that the absence of such books was not intended to defraud his creditors." The important part of this section is the five year clause.

This is ambiguous for it may mean that a trader must be in business for five years before he is required to keep books or it may mean that a trader may destroy his books which have to do with business prior to the five-year period next before his in-

solvency. The latter, of course, is the intention of Parliament in passing the section but the merchant in question relied on the technical interpretation that as he had only been in business for nine months the section did not apply to him at all.

The Judge who heard the case disagreed with the interpretation placed upon the section by the merchant's counsel, and found the merchant guilty but consented to reserve sentence until the Appellate Division of the Supreme Court could be asked for an interpretation of the section. This will be done in December.

It will be noticed that it is not a criminal offence for a trader to do business without books but it is a crime to become insolvent and not be able to produce books. Further it should be noticed that if books are not produced the trader must be able to explain his transactions to the satisfaction of his creditors.

THE SCARCITY OF CUTLERY

ON several occasions recently we have referred to the scarcity of many lines of English cutlery. Some jobbing firms in Canada have booked orders for December 1 delivery, but from prospects at the present time it looks as though the orders in a number of instances, will not be completed with the goods originally ordered.

An English authority on the cutlery situation states that the present position of the cutlery trade in Sheffield is unique, for the city has sent nearly forty thousand of its sons to the war. Of this number, it is estimated that one-sixth were formerly engaged in the cutlery industry.

Not only have makers of heavy pocket knives given up their usual work to make knives for the troops, but also makers who formerly made high grade pen-knives, sporting knives, etc.

The pocket-knife branch of the Sheffield cutlery trade has made several million knives for the troops, and consequently, since the outbreak of the war, very few, heavy pocket knives have been made for the ordinary trade.

The result of this diversion of labor, and the continued demand for supplies from regular sources, has depleted the stocks in the warehouses of the cutlery makers.

The English authority states further that another contract for 1½ millions of special knives for the soldiers has recently been placed and this will greatly accentuate the shortage of labor, so that for many months to come there will be few knives of any description to be had for private trade. In the scissors branch of the trade the demand for surgical and bandage scissors and medical forceps has to a large extent monopolized the output of the scissor hands. The razor branch is almost entirely engaged on razors for the troops, hence only the smallest quantities of higher-grade razors of the best hollow-ground type are being made, and in normal times the entire razor output of Sheffield is only 60,000 a week. The War Office alone now requires 2½ millions. It will take a considerable time before these contracts are completed, and during that time the trade will, it is claimed be unable to meet the demand for the higher grade goods. In the table-knife department, the demand for table, butchers', cooks',farriers', and other knives for the Navy and Army is keeping practically all the workmen engaged.

Huge inquiries from abroad have had to be shelved for the time being, and makers are doing their very best, against tremendous odds, to meet the needs of their customers. Many months must elapse before the cutlery trade can resume anything like its normal state, and in the meantime it looks as though buyers will have to be content with the limited supplies which they are able to obtain.

THE AMERICAN NOTE

WHILE there has been considerable surprise and not a little concern and apprehension felt regarding the relations between Great Britain and the United States as the result of the most recent note of protest against the British naval program in preventing direct and indirect trade with Germany, it is interesting to note that American shipping men and exporters appear to attach little importance to it. One is inclined to think that the comment made in England that it was Democratic material for the next political campaign might not be so very wide of the mark.

There is probably no branch of American trade more concerned with the British policy in relation to neutral trade than that dealing in metals, and if there was any great chance of a change in that policy the export interests at New York would be the first to speculate thereon. However, we find, according to the American Metal Market, that shipping men and exporters do not look forward to any immediate change in the policy of Great Britain as regards America's trade with European neutrals as the result of the Lansing note—protesting against the interference with American commerce and declaring the British blockade to be ineffective, etc.

New York shippers are of the opinion that Great Britain is not likely to let down the bars or yield any point which will directly or indirectly make possible the shipment of goods into Germany which she does not desire Germany to have and there is little chance that the status of exports from the United States to Scandinavia, Swedish and Norwegian ports will be changed.

All things considered, it looks as though Mr. Lansing is putting the United States on record rather than demanding action.

Retail Accounting Systems

Office Accounting From the Inside Standpoint—Second Article of a Series on Retail Accounting Systems—How Accounts are Handled by the Vokes Hardware Co., Ltd., Toronto.

Written for Hardware and Metal by Norman H. Bilbrough, Accountant, The Vokes Hardware Co., Ltd., Toronto.

IN considering the merits or demerits of any accounting system, it should always be the aim and object to obtain the maximum amount of information connected particularly with that business in which one is engaged, with a minimum outlay, both in time and expense.

In the development of the system which we have at present in operation, it has been our constant idea to utilize every device known to modern accounting in the saving of much unnecessary clerical work, but at the same time to have at one's finger tips, so to speak, the exact information connected with any particular transaction or group of transactions which may have been put through the records in any given period.

In the carrying on of a business which is more confined to the retail than to the wholesale trade, and where our total sales for, say, a month cover a multitude of transactions, made up generally in very small amounts, and comprised of such a variety of goods which can only be fully realized by those who are intimately connected with the retail hardware trade, it was necessary to devise some reliable scheme whereby every one of these items could be taken care of, in detail, and at the same time, if necessity occurred, at any particular moment to be able to have that information tabulated, in clear and concise form, without having to go through innumerable books, sheets, etc., with the loss of valuable time, and necessitating an amount of clerical work which, under many old-fashioned systems, was painful in the extreme.

Prompt Service

The idea of the thing, in considering the bookkeeping branch of the business in its contact with the customers, is this: Say, if a gentleman came to the office desiring to make a settlement of his account, at any given time, it should be possible to turn up that customer's account in the ledger, and also in the current sales journal, so that you could give that gentleman the accurate amount of his account, at such short notice, that you were not putting a tax on his patience, by losing his valuable time, and without much labor on your part.

A customer who comes to the office to settle his account, to continue the example, and who is given the exact information, with every detail that he may desire, with promptitude, accuracy and courtesy, generally pays that account and goes on his way with a feeling that it has been a pleasure to do that business with you, and who can calculate the value, as an asset to one's business, of a satisfied customer, especially so if it is a firm's desire to deal with every lady or gentleman in the same upright, honest and courteous manner.

To give you some idea of the clerical work involved in putting through the records of the various sales, I will give you a brief outline, with illustrations, of the life of a sale, if I may call it such, from the moment a customer comes into the store with his particular needs on a bit of paper, or at the back of his mind, to the close of his possible numerous transactions at the end of a month.

We will suppose Wm. Johnson called at our store at 9 a.m. on September 1, 1915, and purchased one keg std. wire nails, 2½ in., to be delivered to his address, 36 Shaw Street, the same day.

Our sales clerk would immediately ascertain from the office if Mr. Johnson had a credit account open with us, and if that was satisfactory would enter up the details of the sale in his sales book, as per illustration.

This sales book is made up of 100 sheets in duplicate, numbered consecutively, and, of course, details of the sale are written out, by the use of carbon paper, in duplicate.

The top and bottom sheet connected with the sale are of a different color. The top copy is sent direct to the filing clerk in the office, to be put on file, according to the date, filed alphabetically, and, if the customer resides in Toronto, on the special file for city customers. The bottom, or carbon copy of the sale, goes to our credit manager, who initials it for the sanctioning of the credit.

When the sales clerk has obtained the official authority for the shipping of the goods he has the keg of nails labeled and passed through to the shipping department, initialing the ticket that he has faithfully carried out his share of the transaction.

The shipper, on receiving the goods, along with the sales ticket, prepares a special delivery slip for the purpose, which is also written out in duplicate, the top and bottom sheets both possessing the same numbers. This delivery slip is signed by Mr. Johnson on delivery of the goods. One copy is handed to him, the other is passed through to our office for filing purposes, to constitute our guarantee of the delivery of the goods.

After the shipper has sent out the nails, he initials the sheet, as shown, and passes through the record to the

pricing department, where the goods are priced, at the rock bottom current rates, and initialed by the pricer. The sheet is then sent to the office for the extension of the prices to be made and checked, and then an invoice is made out on a special invoice form and sent to the customer.

This completed, sale ticket is then taken by our filing clerk, and put on the file to replace the top sheet A1, which was sent through as soon as the sale was made. We will now consider a number of transactions of a similar nature.

"Running Statement Journal"

From these completed sale records a clerk makes up each month what is known to the accounting world as a "Running Statement Journal." At the beginning of each month a statement is headed for each customer from the various files current, and on these statements, which are made up in duplicate, is posted daily the file folios, date and amount of each sale. This keeps a record running through each month of each customer's purchases to any given point, and to all intents and purposes is subsidiary to the sales ledger. Alphabetical, numerical and datal order is observed in both files and running statement journal.

At the end of each month these statements are totaled; the bottom sheet is used as a unit of the sales journal, and the total of each client's purchases is posted to the account in the sales ledger in one item covering the total sales for the month.

The top sheet is detached at the perforation, and after comparison with the ledger and the statement completed in the usual way, is sent out to the customer.

I have sketched you this brief summary of the various processes a sale has to go through, in accordance with our system, which will possibly convey to the reader some idea of the clerical work involved in dealing with credit sales.

Collection Department

To consider the collection department, as soon as the statements are sent out to each customer, the ledgers are all gone through, and a list completed, each month, of the balance due to us on each customer's account, and that total is analyzed as to what amount is overdue and how long, to enable the department to form a clear idea of their work for the month.

Illustration A1.—Sheet from Sales Book Used by Vokes Hardware Co., Ltd., Toronto.

The major part of our country trade is dealt with through drafts and notes, and to prove the value of this method of collection, I may say that out of our country sales for the last four years, which have totaled many thousands of dollars, the whole amount of our bad debts does not amount to two hundred dollars.

This fact in itself speaks volumes for the efficient work in the credit department, and the scrupulous attention given to each draft or note from its inception to its payment.

Adjustments Made Promptly

Whenever a draft or note is returned unaccepted, the cause is discovered without delay, and every adjustment that may be necessary is made, and either the draft sent back for acceptance, or a new one presented, and only by keeping a very close eye on the follow-up process have we accomplished such a satisfactory result.

If much care is exercised in the rendering of the monthly statements and the drafts or note corresponds with that statement, both as regards amount and terms of sale, then much friction with the customer is avoided, and the drafts or notes are taken care of with a minimum amount of worry every month.

I always think a ledger keeper should be prepared to swear by every statement he sends out, to vouch for its accuracy, as efficiency in that particular point is one of the most essential factors in the collection of accounts.

I have not attempted to outline at all the methods adopted in dealing with the purchasing side of the business, but

Attractive Xmas Card Suggestions

Eleventh of series, Cardwriting Made Easy

AS regularly as the Christmas season comes around the question arises in the cardwriter's mind: What about Christmas Cards? You feel the desire for something new, something different. You want to get away from that stiffness which is often displayed on lithographed cards. So hunt up all your Christmas ideas, anything of a holly or poinsettia nature, Winter scenes, pictures of Santa Claus and let us see what can be made from them that will look new and different to other years' cards.

There is one thing that should be impressed upon the cardwriters and that is the advisability of getting these cards made up, ready to letter, before the Christmas rush sets in. If the making of them is put off until they are required, they are often skimped; so utilize every spare minute from now on.

Illustrations and ideas for illustrations can be secured from many different sources. The main one is from the Christmas postcards. You can obtain more ideas from these than all other ways put together. They seem to obtain limitless suggestions which can be worked up into attractive holiday showcards. From magazines, journals, children's Christmas books, etc., many useful ideas can be obtained. Whenever you see a suggestion that can be worked up into a showcard, keep it, because if you cannot use it immediately you will later.

A spray of holly leaves makes an exceptionally good one for copying, especially if there is not much detail about it, such as the one shown in Fig. 1. Fig. 1 illustrates the different steps required in order to make a completed drawing. When you have obtained a good holly spray, one that is suitable for the corner of a card, place a piece of transparent tracing paper over it and trace the main lines with a soft pencil. When this is done place carbon paper under tracing tissue and place in desired position on the card, then trace again all lines. These will be very light and this must be traced with a coarse pen and waterproof ink. It is imperative that waterproof ink be used because of the coloring operations.

The final stage to complete the drawing is the coloring to make it look like natural holly. Use only transparent colors for this work. If only a small amount of work is to be done, use transparent photo tints, but should you require large quantities of color it is advisable to use bottle inks or mix them from aniline dyes.

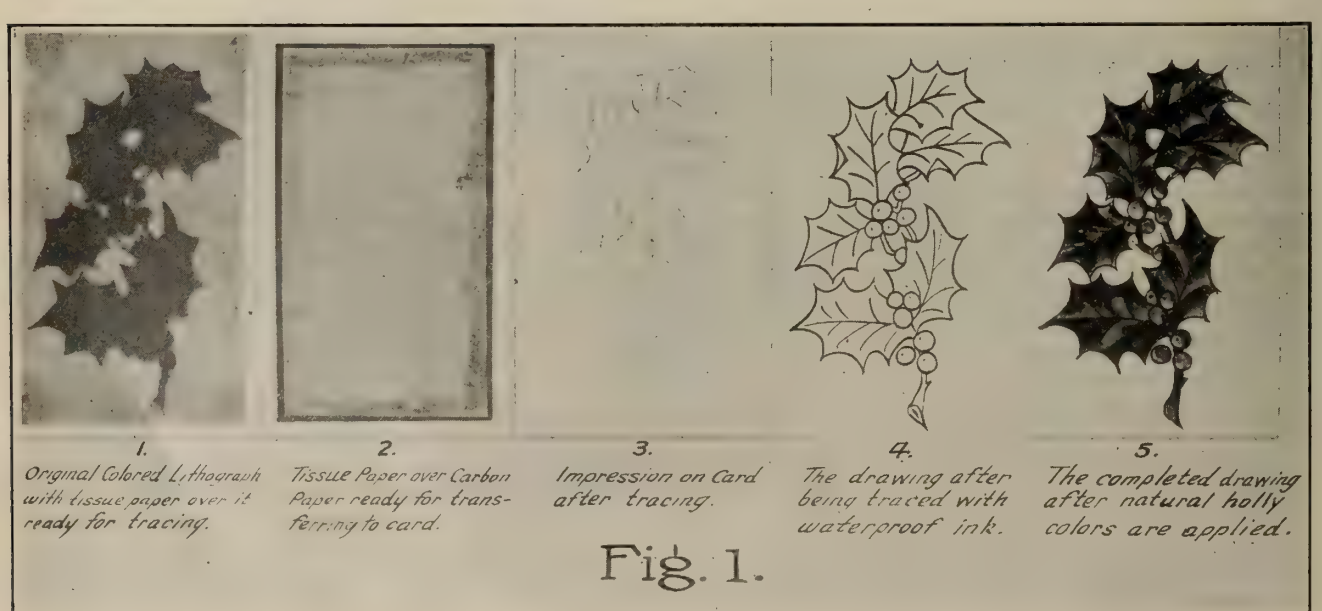
To color the leaves, first apply a light coat of pale green. When dry, shade with the darker color in desired places. The berries should be of a bright scarlet, touched up with white and black, to give a round appearance.

Experience is the best way for you to learn to shade these drawings. Always keep a blotting paper within reach in case you add too much color; in such case the blotter will absorb the surplus fluid.

The Cards

The collection of cards shown gives a fair idea of many ways in which to work up Christmas cards. I do not pretend to say that there is any great work of art about any of these, but the idea is to assist the beginner to make a good, presentable card for Christmas. The followers of these lessons will find in these cards what I have taught in the previous lessons and when there is anything that is new I will endeavor to explain as I go along.

Card No. 1 has a very simple layout, but do not neglect to measure it all accurately before applying the pen or brush. The two illustrations must be equal distances from the ends of the cards and also parallel with the edges of the card. They also must be placed the same distance from the bottom as from the top. These points are absolutely necessary on cards where two similar illustrations are used in the same manner. The heavy ruling on this card is a pea green shade and applied with a number six red sable writer. The color must be in good flowing order,



1. Original Colored Lithograph with tissue paper over it ready for tracing.
2. Tissue Paper over Carbon Paper ready for transferring to card.
3. Impression on Card after tracing.
4. The drawing after being traced with waterproof ink.
5. The completed drawing after natural holly colors are applied.

Fig. 1.

not too thick. The fine line ruling is of black ink made with a stub pen. The heavy square-faced lettering is of black and made with the No. 6 brush as already shown. The small lettering is the work of the stub pen which was used for outline work in the first two lessons of this series some months ago.

The scrolling has not been taken up as yet in lesson form, but must be made very quickly with very little color in the brush. The color used must be of a light shade, such as pale mauve, so as not to detract from the reading matter and yet harmonize with the green border.

These two illustrations were taken from two postcards. They are both Winter scenes and give that Christmas feeling which all Christmas cards should impart.

Card No. 2

Card No. 2 is not one of a showy nature at all, in fact it is inclined to be the opposite. The only thing about it which denotes Christmas is the design in the corner. This is drawn on the card, not cut out and pasted on as in the previous case. The design was taken from a private greeting card with the exception of the monogram in the centre which was added. The border on this card can be made a bright green and the narrow ruling black. The heavy lettering was taught in lesson No. 8 and the shading in last month's. Cards after this nature can be used in the better class of displays.

TOOLS AND MATERIALS

Here are the tools and materials which are required to make cards shown in this article:

No. 6 red sable writer, stub pens and holder; good, straight ruler, black waterproof ink, cardwriter's black for brush, and for pen; two shades of green, Opaque color; transparent colors for tinting; paste; transparent tracing paper; carbon paper; coated white cardboard; soft pencil; scissors; Christmas cards, and illustrations for cutting out; blotting paper.

Card No. 3

The evergreen trees laden with snow, shown on card 3, are drawn with pen and ink and were taken from a newspaper illustration used in last year's Christmas advertisements. This was transferred direct from the newspaper to the card by means of carbon paper, on account of the thinness of the paper which allowed an impression to go through it. When the paper is too thick for this the method shown in Fig. 1 is the best.

The waterproof ink is used for tracing and the transparent colors are used to color the background. Leave the trees the natural cardboard white. The heavy ruling around the oblong panel is made with one stroke of the flat brush and the fine line is ruled with the stub pen. The lettering is the same as taught in previous lessons. Any name can be substituted at the bottom. You should have no difficulty now in being able to master this work.

The children must not be forgotten by the showcard writer. They are just as important when it comes to getting the Christmas business as the grown-ups. So we must make showcards that will attract their childish eyes and fill their hearts with gladness and what more does a child desire than to see the smiling face of old Santa. To them he is quite real and they dearly love to think and tell of what they want St. Nick to bring them. So I think a showcard with a picture of Santa Claus on, in a display which interests the children, is a good business-getter. Card No. 4 is just one of hundreds of different suggestions for children's Christmas showcards. The illustration was taken from a lithographed postcard. The lettering is a square-face block type as taught before. The little spray of holly was drawn with waterproof ink and colored with natural holly colors. The scroll work can be done in either pale green or gilt. The wide border is of pale green and the narrow ruling is made with the pen.

Use of Illuminated Capitals

Card 5 shows the use of the illuminated capitals. Illuminated caps are used extensively throughout the showcard world and I can safely say that there is no branch

(Continued on page 45)

Sheet Metal Workers' Course

By Chas. Sievers

THE problems which we will consider here are bends and offsets in connection with square or rectangular pipe, and also a couple of the regular end joints for same. In laying out an offset, the same or similar to the one shown in Fig. 1, the angle and height are, of course, to be governed by the conditions which are to be overcome in the course of putting up of pipe. Care should be taken to see that the centre piece of pipe is of the correct width, and not narrowed down. In Fig. 2 we show an elbow for square pipe. This elbow, as shown, is square in the throat, while the back has been rounded off to a quarter circle in profile.

In Fig. 3 we show an elbow somewhat similar, but with both throat and back cut off on an angle, making it appear like a three-pieced elbow.

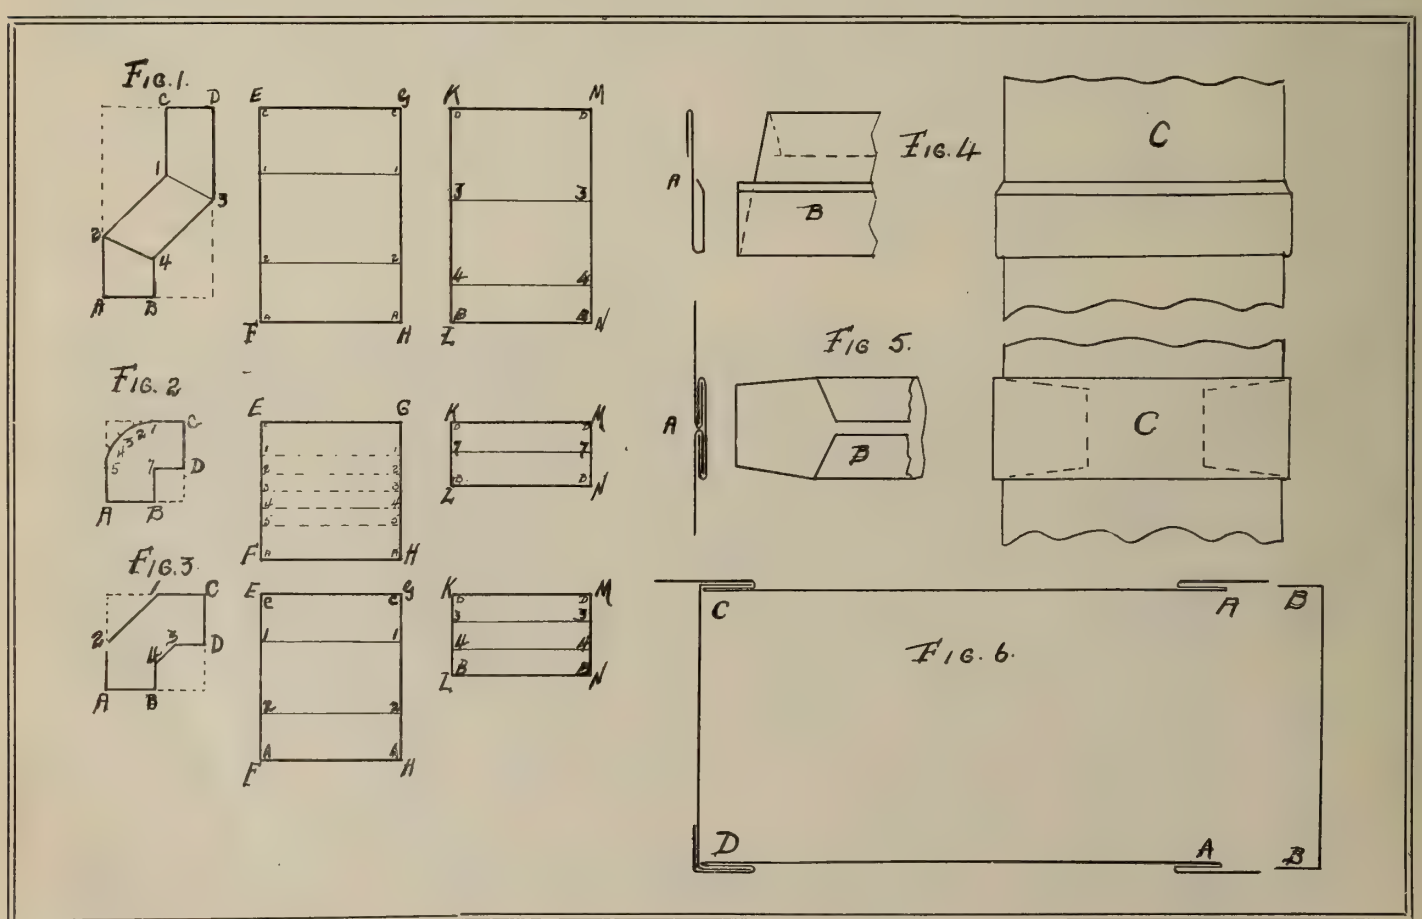
To mark out pattern for the offset in Fig. 1, it is first necessary to draw an elevation of the end or side of pipe with offset and height required.

In Fig. 1, let A-B-C-D be the elevation of the one required. While this shows the end or narrow way of the pipe, the method is the same if the offset be on the width of the pipe.

Draw a line as E-F, from E-F draw G-H a distance away equal to the width of the pipe required. Draw a line square with E-F at, say, E-G. From E and G mark off a space equal to C-1 on elevation from point 1. This obtained, mark off a space equal to 1-2 on elevation; from 2 mark off a space equal to 2-A on elevation. Connect points A-A, completing pattern of side on line A-2-1-C. To obtain pattern of opposite side, draw two lines, as K-L and M-N, a distance apart equal to width of pipe required; draw a line square with K-L to, say, at K-M; from K and M mark off a space equal to D-3 on elevation; from point 3 mark off a space equal to 3 to 4 on elevation; from 4 mark off a space equal to 4-B on elevation. Connect B-B, making pattern on line B-4-3-D of elevation complete. That the elevation is the pattern of the ends is, of course, understood.

In Fig. 2 divide the circular back of elbow into a number of equal parts, as shown by 1-2-3-4-5.

Draw two lines, as E-F and G-H, a



distance apart equal to the width of the required pipe. Square from E-F, draw a line at, say, E-G from E and G; mark off a space equal to C-1 on the elevation. From this point 1 mark off the four spaces on rounded part of elbow, as shown by 2-3-4-5; from 5 mark off a distance equal to 5-A on the elevation. Connect point A-A, completing pattern of wide side on line B-C of elevation. Draw two lines, as K-L and M-N, a distance apart equal to width required; square from K-L; draw a line as, say, K-M; from K and M mark off a space equal to D-7 on elevation; from 7 mark off a distance equal to 7-B on elevation. Connect points B-B, completing pattern of wide side of pipe on line B-7-D of elevation.

The method of drawing pattern of elbow, shown in Fig. 3, is the same as described in Fig. 1. In each case the elevation is pattern of end, and the numbers and letters on drawings are the same, so that the problem can be followed out.

In Fig. 4 is shown the cleat joint, which is usually used on square pipe.

At A is shown a section through the cleat. At B a part elevation of cleat shows the end cut to allow pipes to enter one another, and at C a section of pipe with a cleat joint.

In Fig. 5 is shown what might be called a locked jointed cleat. At A is shown a part section of one side of two pipes, with edges or folds turned back on the pipe, and the cleat in place over and locked into them. At B is shown a part elevation of a locked cleat with lays on end. At C is shown a section of pipe locked jointed with this cleat, dotted lines showing the lays under the ends of cleats.

In Fig. 6 is shown a joint used either on the corners of square pipes or elbows and angles, etc. At A is shown the double fold. At B the single fold or edge which fits into the double fold. At C is shown the single edge entered into the double fold, and at D the joint complete.

This style of lock is handy for large square pipe and for the elbows. In using this joint for elbows or offsets, the single edge at B is put on ends, as shown by A-B-C and D in elevations at Figs. 1, 2 and 3, and the double fold on the straight sections of the patterns.

THE OUTLOOK FOR CHRISTMAS TRADE

(Continued from page 33.)

diers under arms in Canada, and they too, will be the recipients of many gifts from friends.

According to retail merchants in several of the larger cities, this early buying of Christmas gifts for the troops has had a tendency to place the general public in a Christmas buying-mood, earlier than usual.

And as a result of this tendency, the public has had the unusual opportunity this year of seeing large displays of toys, gift suggestions, etc., displayed in city department stores nearly a month earlier than usual. This action on the part of several leading department stores is proof that the Christmas buying movement has really started and is almost a month earlier than in former years. The highly trained managers of the department stores are men whose foresight has enabled them to correctly size-up changing conditions, and the present and future needs of the buying public. They have observed the early-buying tendency which prevails, and are already placing their wares prominently before the public.

Retailers Optimistic

Hardware and Metal has recently interviewed a large number of retail hardwaremen and asked their opinions regarding the outlook for the Christmas trade. In nearly all cases the retailers expressed the view that Christmas trade this year should be equal to or ahead of former years.

Several merchants stated they believed that more people would this year look around for practical gifts, than they ever have in the past, and the needs of the public are growing every day.

During recent years a great many labor-saving, and time economizing devices have been placed on the market. A large percentage of these new lines are being marketed through the hardware trade. Many of these lines if pushed will be ready sellers during the next few weeks.

Farmers will have more money to spend on Christmas gifts this year, owing to the bountiful harvest and the good prices which they are receiving for all their products.

Mechanics of all kinds are now employed at good wages. Last year there was considerable unemployment.

Then there is another phase of the situation. In former years huge quantities of Christmas gift goods were imported from abroad. At the outbreak of the war there were fairly heavy stocks of many of these lines in Canada, but they were mostly all cleared out in the Christmas trade of last year. Since that time it has been impossible to secure further supplies.

Many fancy novelty lines which were offered to the public in former years are not on the market this year. Their place, will in all probability be taken, by more useful and practical gifts, such as you would expect to find in hardware stores.

But it is up to the retail hardwaremen of Canada to put their lines to the front and make a strong bid for Christmas trade. The opportunities for business exist.

Hardware and Metal will in succeeding issues publish many valuable suggestions, which should be of great assistance in helping hardwaremen to secure a good volume of Christmas trade.

The window display accompanying this article is the first of a series which will run weekly in Hardware and Metal. This display appeared in one of the show windows of the Sommerville Co., Edmonton, Alta., and was entered in Hardware and Metal's annual Christmas window display contest last year. This display had a double background effect. The real background was of white feet, with green and yellow festoon drapings. The large panel with "The Season's Greetings to All," was made of wall board, and surrounding the message was a 7-inch border of puffed cheese cloth, with red and white lights, each lamp half red, and half white. The pillar effect design in front of the background was cut from wall board, and there were pots at each end, holding a liberal supply of ferns and wistaria, vines and sprays. The vases of the design, and the posts were sprayed a light-green color, with air brush. The sloping platform was covered with green plush, on which was displayed cutlery and flatware. The half circle at the outer edge of the window was puffed cheese cloth. The show cards in the window were made of brown mottled mat board, and were neatly lettered. One or more displays will be shown in each issue of Hardware and Metal from now until Christmas.

CATALOGUES AND BOOKLETS

Challenge Cutlery

The Challenge Cutlery Corporation, Bridgeport, Conn., U.S.A., represented by Wiebusch & Hilgar (sole selling agents), 106-110 Lafayette Street, New York, N.Y., have issued an attractively gotten up 68-page catalogue, illustrating and describing about 400 popular patterns in pocket cutlery lines, which are always carried in stock. The catalogue is splendidly illustrated.

The company claims that the complete line, which includes patterns to be made to order with Challenge or dealers' special brands and trade marks, comprises practically every style of pocket knife made. Copies of the catalogue will be supplied on request.

EVENTS IN THE TRADE

Fire Losses

Sorel, Que.—Fire destroyed E. Gauthier's tinshop and residence.

Business Changes

Bruce Mines, Ont.—O. T. Ballentine, hardware, has sold out to F. G. Brathwaite.

Port Stanley, Ont.—H. M. Ellison, hardware, has sold out to Fred J. Mitchell.

Died at Shorncliffe

Calgary, Alta.—The death took place recently at Shorncliffe Hospital of Corporal J. S. Miller, of this city. Prior to enlisting he was employed by the J. H. Ashdown Hardware Co. as manager of the firm's housefurnishing department in the Calgary store.

Moved to Larger Premises

Toronto, Ont.—The Dominion Register Co. have removed from 90 Ontario Street to 235-245 Carlaw Avenue, where they will have more than three times their former floor space, in one of the most modern manufacturing buildings in the city.

Ontario Incorporations

Utilities Equipment Company, capitalized at $40,000, head office, Montreal, to make and sell electrical and mechanical apparatus, etc.

The Western Oil Refining Company, of St. Catharines, capitalized at $40,000, head office, St. Catharines, Ont., to manufacture, buy and sell petroleum, etc.

Industrial

hatham, Ont.—Mayor Wanless has ounced that the American Weil ks Company of Aurora, Ill., will blish a Canadian plant in this city. said that the new company will pay ast $50,000 per year in wages.

scott, Ont.—If a by-law, to be voted by the people of the town, on Nober 15, carries, a Canadian branch he Newell Mfg. Co., Ogdensburg, , will be located here. The company make brass curtain rods, trimmings.

Obituary

y'esbury, Sask.—While fighting a rie fire south of this town, last week, eph Souply, hardware merchant and e of the town, was fatally burned died in the Regina Hospital the following morning. Mr. Souply went out with a neighbor and in some manner got ahead of the fire, and while working along in a slough, became surrounded by the flames and his clothing was burned from his body. He was rushed to the hospital, but died the next day. He leaves a wife and two children. Deceased was a Belgian by birth, and one of the most prominent merchants in the district.

Winnipeg Notes

L. A. Blackwood and J. M. Lynch, general manager and buyer respectively of the Miller-Morse Hardware Co., Winnipeg, until the 1st of November, have assumed similar duties with the Merrick-Anderson Co., Winnipeg.

G. G. Johnstone, for ten years one of the leading salesmen of the Miller-Morse Hardware Co., has taken the position of buyer with the same concern, to fill the vacancy caused by the departure of J. M. Lynch. W. M. Irwin will be assistant to Mr. Johnstone in his new duties.

Geo. E. Thompson has been appointed sales manager of the Miller-Morse Hardware Co., Winnipeg.

F. C. J. Hawkins, credit manager for the J. H. Ashdown Hardware Co., was found dead in bed on Tuesday morning last. The late Mr. Hawkins was thirty years of age and a member of the Canadian Credit Men's Association.

Personal

George Browne, the veteran traveller of Caverhill, Learmont & Co., Montreal, in the Eastern townships and Quebec, has recently returned to his field after a trying illness. The genial salesman will receive a warm welcome from many old friends.

Geo. H. Cornell, head of the accounting department of Caverhill, Learmont & Co., Montreal, was recently taken severely ill and will be laid up for some time.

Arthur Dagenais, who has been connected with A. E. Bregent, wholesale sporting goods in Montreal, for the past three years, has joined the staff of Caverhill, Learmont & Co., in the position of city salesman.

Robert D. Stevens, a member of the office staff of the Canada Paint Co., Montreal, has severed connection with that firm to join the Fourth University Corps for overseas service. On the occasion of his departure he was presented with a gold ring and pair of military hair brushes.

James Purvis, of Purvis Bros., Sudbury, Ont., was a visitor at the Toronto office of Hardware and Metal this week. Mr. Purvis has been in the hardware business for over forty years and has been a subscriber to Hardware and Metal since the first issue. Speaking of business conditions, Mr. Purvis expressed the opinion that business is again on the upgrade and there should be a steady improvement from now on.

Dominion Incorporations

Transcona Shell Company, capitalized at $50,000, head office, Montreal, to manufacture and deal in shells, bombs, fuses, cartridge cases, etc.

Yukon Copper, Ltd., capitalized at $200,000, head office, Ottawa, Ont., to carry on the business of a mining, smelting, refining and development company, etc.

Lachance Nut Lock Co., capitalized at $300,000, head office, Montreal, to manufacture and deal in steel and other products entering into the manufacture of bolts, under the invention made by J. Lachance, and to deal in forges or other steel products, to manufacture shells or other war materials.

National Steel Products, Ltd., capitalized at $100,000, head office, Toronto, to import, export and deal in munitions, etc.

National Jobbers and Importers, Ltd., capitalized at $75,000, head office, Montreal, Que., to carry on a general jobbing and agency business.

The Eastern Machinery Co., of Montreal, capitalized at $45,000, head office, Montreal, to engage in and carry on the business of machinists, tool-makers, brass founders, etc.

Steel and Radiation, Ltd., capitalized at $5,000,000, head office, Toronto, to manufacture and deal in iron, steel and other metals, and to carry on a manufacturing business.

The Roxton Pond Mfg. Co., capitalized at $100,000, head office, Roxton Falls, Que., to manufacture in every way articles of lead, copper, iron, wood, etc., and to manufacture arms and ammunition.

HARDWARE LETTER BOX

Slate Pencils

James Simmonds, Halifax, N.S.—Kindly advise who sells slate pencils for use in schools.

Slate pencil makers are represented in Canada by A. J. McCrae, 23 Scott Street, Toronto; the Copp, Clark Co., Toronto.—Ed.

Silver-plated Ware

New Subscriber (name on request).—Kindly give names of manufacturers of silver-plated ware.

Silver-plated ware may be purchased from Canadian Wm. A. Rogers Co., Toronto; the McGlashlan, Clarke Co., Niagara Falls, N.Y.; Oneida Community, Ltd., Oneida, N.Y.; Meriden Britannia Co., Hamilton, Ont.; A. McFarlane & Co., Montreal, Que.—Ed.

Repairs for Pilot Range

Patterson & Park, Dumner, Sask.—Kindly advise where we can secure parts for the Pilot steel range. We understand it was at one time made in Windsor, Ont.

Repairs for the Walker Pilot range can be secured from the Hall Zryd Foundry Co., Hespeler, Ont.—Ed.

Hockey Sticks

Subscriber, S. & B. (name on request).—Kindly give names of makers of hockey sticks.

Hockey sticks are made by St. Mary's Wood Specialty Co., St. Mary's, Ont.; E. B. Salyerds, Preston, Ont.; J. H. Still Mfg. Co., St. Thomas.—Ed.

Hand Sleighs

New Subscriber (name on request).—Kindly give names of firms handling hand sleighs.

Hand sleighs are carried by nearly all hardware jobbers, and are made by Canadian Buffalo Sled Co., Preston, Ont.; Canadian Warren Axe and Tool Co., St. Catharines; Gendron Mfg. Co., Toronto.—Ed.

Correction

In the issue of October 16 an inquiry appeared from the Fraser Hardware Co., Galt, Ont., asking for the name of the maker of "Mallet" locks. The reply should have stated that Mallett locks are sold by B. & S. H. Thompson, Birmingham, Eng., represented by Geo. B. Jenkinson, manufacturers agent, Toronto. "Mallett" is the proprietory trade mark of B. & S. H. Thompson, Birmingham, Eng.

CARDWRITING MADE EASY

(Continued from page 41.)

of the work where more variety can be had. The different styles and designs are almost limitless. This card in particular shows a fancy "G" with two-tone green used to make it stand out; pale green for the background and darker green for the shadow of the letter. It is necessary that a white space be shown all around the letter.

This card shows a few leaves and a Christmas bell cut from a postcard. The bordering is one that was taught in last month's lesson. This style of lettering has not been taken up as yet, but is the work of the stub pen. A small brush would do the same work.

Christmas From Start to Fnish

Card No. 6 is an exceptionally fine one for all classes of displays. It is Christmas from start to finish. The Winter scene with the holly entwined around it and the snow-covered letters, all make it a good card for any store. The snow scene was cut from a small picture and retouched with white to make the snow stand out more prominently. The spray of holly was drawn free-hand, not being copied from anything in particular. This holly should be drawn with the pen and waterproof ink and colored lightly with green and red. It should not be made as heavy as the holly shown in Fig. 1 because the scene is the main thing on the card and the spray must not detract from it.

Snow-Covered Lettering

The snow-covered lettering is an innovation in these lessons. The style of letter is the same as taught in previous lessons and as shown on card 4. After the lettering is made and dry, apply white to the top sides of the letters, having it hang down to give it a natural snow appearance. The shading is applied to make the work stand out in relief.

The illustration on card 7 was taken from separate postcards, the holly square from one and the birds from another. This class of showcard is exceptionally fine for dainty displays.

The letters at the bottom of this card can be changed to suit the firm for which the card is used.

RETAIL ACCOUNTING SYSTEM

(Continued from page 39.)

confined my remarks to that part of our trade as it particularly affects our clients.

I do not claim that our accounting method is the acme of perfection, but if much thought and careful attention to the mastering of each difficulty as it has arisen in the development of the system could make that method perfect well ours would certainly be "ne plus ultra."

Having had a number of years experience in the joys and sorrows of an accountant, I would like to say that it has always been a pleasure to me to be of assistance in adjusting the clerical worries and anxieties of our clients, and thereby promoting happier and more cordial relations between our numerous and ever growing number of customers and our company.

From Inside Standpoint

To look at office accounting from the inside standpoint—it seems unfortunate that at the present day, in the rush and turmoil of business life there is a tendency with some Companies to look upon the office administration, as an unproductive end of the business, and consequently bring the principles of economy to bear as stringently as possible there.

If, however, proprietors of businesses realized how greatly the success and development of an enterprise depended on the courteous but efficient and accurate administration of the office, that ill considered idea of office unproductiveness, to coin the phrase, would undoubtedly disappear, and the office executive would certainly be included as one of the decidedly "tangible assets" of the company.

To a person unaccustomed to the "Debits" and "Credits" of book-keeping it is rather a difficult matter to sketch a particular branch of office routine to make it interesting and to avoid a bore, but if this brief sketch provides some gleam of inspiration to any of the readers of Hardware and Metal and is of assistance in more efficient accounting, particularly in the hardware business we all have the privilege to be engaged in, my few moments have not been spent in vain.

TRADE INQUIRIES

1172. **Tools, woodenware, wire nails**—A Birmingham firm is open to purchase the following: Mechanics' hand tools, picks, hammers and hatchets, wooden handles for brooms, washboards and skewers, also large quantities of wire nails. Prices should include delivery Birmingham.

1174. **Sieve rims**.—A London manufacturer seeks supplies of beech binder sieve rims and invites quotations from Canadian manufacturers. The dimensions are as follows: Thickness, 3-16 inch, depth 3½ inches, and lengths 3 feet 3 inches, 3 feet 6 inches, and 3 feet 9 inches. Prices should be about 1s. 3d., 1s. 9d., and 2s. 1d. per dozen, respectively, c.i.f. London. The rims must be already bent, and are usually packed in half-dozens. A trial order would be given for 40 gross assorted sizes.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

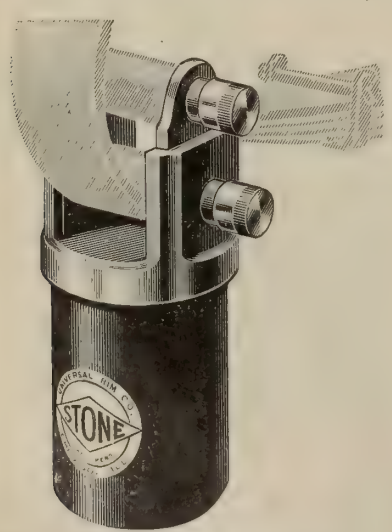
AUTO DEFLECTORS

The Springfield Auto Deflector Co., Inc., Springfield, Ohio, offers to the trade Wheeler's scientific auto deflectors. The makers claim the deflector is a practical safety first device that will absolutely eliminate the glare in the large head-lights of electric-lighted cars.

Wheeler Scientific Auto Deflector.

The deflectors are said to be built on the scientific principle of condensing the light rays and throwing them on the road directly ahead of the car. The light is always the same in city or country. No switches to throw or buttons to press to take the attention of the driver.

It is said that the deflectors provide ample light for driving, making clearly visible approaching objects, bad road and stones, etc. The rays of light strike an approaching horse no higher than his breast or pit of his throat, and while doing all of these things the glare is eliminated, the direct cause of many fatal accidents.



The Stone Shock Absorber

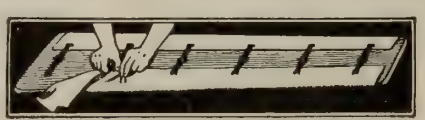
The deflectors are made of featherweight spring brass, highly polished. They are so constructed that they are adjustable to 12, 16, 20, and 24-candle power bulbs. They weigh 1½ ounces per pair.

STONE SHOCK ABSORBERS

Universal Rim Company, Chicago, Ill., offers to the trade the Stone shock absorber, here illustrated. The absorbers are of double coil spring construction, with rebound preventer, and adjustment with a range of 1,500 lbs. The makers state that they guarantee the absorber to be satisfactory in workmanship, material and design, and will replace without charge any part which proves defective within one year after date of purchase. The Stone absorbers will sell to car-owners in Canada at $12 per pair.

IRONING BOARD CLIPS

The Ironing Board Clip Co., Inc., Station B, Cleveland, Ohio, offers to the trade quick-catch clips, here illustrated.



The Quick-Catch Clip

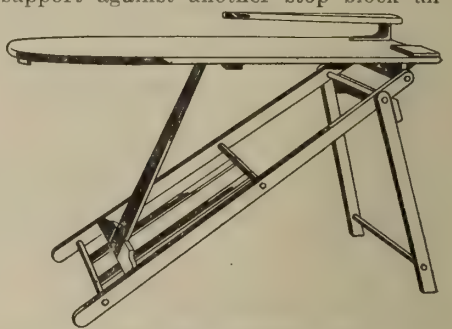
The clips are used for holding in position ironing board covers. The makers claim that the quick-catch clips enable any woman to change ironing board covers in half a minute. With the clips no pinning or tacking is necessary. The clips will, it is claimed, hold several thicknesses of cloth, as well as they do one. The clips can be easily attached to an ironing board in a few minutes. Complete descriptive matter, with illustrations showing the goods in use, may be secured from the above-named company.

AUTOMATIC IRONING BOARD

The Schultz Bros. Co., Brantford, Ont., announce that they have recently made a number of improvements in their Becker's automatic ironing board. The makers state that the improved board is scientifically constructed with due consideration for the laws of mechanics and the proper placing of loads, fulcrums and levers.

To set it up, you drop the upright stand and automatically the entire stand sets solid and firm, without any kicking with feet or manoeuvring with two hands where you should have three. Then raise the board and adjust the swinging support against the stop block under the board.

To iron skirts, drop the swinging support and slip the skirt over the end of the board. Then adjust the swinging support against another stop block under the end of the board, which, it is claimed, leaves the board solidly supported at each end and a clean space under the whole of it. The strips keep the skirt well off the floor.



Schultz Bros. automatic ironing board.

The sleeve board is mounted on an iron stand, is attached, and works on a pivot swinging out of the way when not in use. An iron holder is attached to the board. The board has a selected wood top, 15 x 54 inches; sleeve board, 5 x 27 inches; weight, 30 lbs.

Trade Inquiries

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

1168. **Insecticides and fungicides.**—A firm in Cape Town who makes a specialty of these lines and is organized for the sale of same in large quantities, having advertised extensively, requests immediate and complete information on these lines and on spraying machinery of all kinds.

1170. **Boiler tubes.**—A British railway company is prepared to consider quotations on steel locomotive boiler tubes delivered Derby.

1171. **Nails.**—A Birmingham firm inquires for quotations, delivered Calcutta, on British American bright dowell nails in wooden kegs of 1 cwt. each; 15 cwt. 1½ inch by 13 B.W.G. and 15 cwts. 1¾-inch by 13 B.W.G. State earliest delivery.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

The Markets at a Glance

LAST week it was predicted in the weekly market reports that higher prices would soon go into effect on black pipe, boiler tubes, black sheets, soil pipe, screen wire cloth, butts, and many other products. That the predictions were well founded is to be seen in the important and far-reaching price changes which have gone into effect on the above and other lines this week. There is an exceptionally heavy budget of price changes this week, nearly all in an upward direction. Chief interest in the market situation this week centres around the conditions in the iron and steel trade. Men who have been in the metal trade for years state that they have never known conditions to compare with those prevailing to-day. The situation at present is not only unprecedented, but there is a vagueness about the future that causes apprehension as to what developments may be a few months hence.

Among the many lines which have been affected by price changes this week are spelter, lead, copper, antimony, solder, steel and iron, black sheets, black iron pipe, galvanized sheets, roofings, brooms, wire cloth, copper and nickel ware, linseed oil, turpentine and other lines.

In the paint trade business is showing up favorably with a year ago. Manufacturing demands are also developing in certain lines. The linseed oil and turpentine markets are still on the upward trend and there is a wide spread in the range of prices quoted, as indicated by the weekly reports on the following pages. Zinc and lead are firmer and if present costs of raw materials go much higher, it would not be surprising to see ready-mixed paints advance to the prices which were in effect before the recent decline. Western Canada jobbers state that business during the first week in November has been very good. Grain shipments are passing through Winnipeg in record time and are being transported to Eastern ports very quickly. Several price changes are shown in the Winnipeg report this week.

MONTREAL

MONTREAL, Nov. 12.—Chief interest in the market situation this week centres around the conditions in the steel and kindred trades—and this deserves first mention as compared with reference to the continued improvement in business. Men who have studied the conditions in the metal markets for years state that they have never known conditions to compare with those prevailing to-day; the situation is not only unprecedented but there is a vagueness about the future that causes apprehension as to what the developments may be regarding both prices and deliveries. Steel is chiefly concerned, but there are so many branches of the metal trades which are influenced thereby or which to a more or less extent depend upon the same sources for raw materials, that the effect is widespread and extends throughought a number of the most important lines of manufacture in both light and heavy hardware. When it is stated that some big American steel mills are not only asking months in which to make deliveries but are even declining, with thanks, to take orders at all, it will be appreciated that the situation is becoming serious.

Last week Hardware and Metal predicted the advance of prices on black sheets and black pipe with probable advances in boiler tubes and soil pipe, while solder and brass products were considered to be on their way up and metals in general following the rising tendency. That this prediction was well founded is to be seen in the higher cost to the trade of black pipe and black sheets and solder, while boiler tubes and soil pipe are undoubtedly now below the market level. But such have been the developments that these changes but slightly indicate the situation. Galvanized sheets are due to advance quickly and materially. Tinned iron seems uncertain to go up at the same time. Not only brass, but copper as well, should logically advance on the position of raw materials. Another material advance has already been made in such items of steel as, mild, sleigh shoe, reeled machinery, tire, toe calk, spring and band steel—and the indications are that throughout the whole of the lists influenced by the steel market there will be higher prices if the present market tendencies continue. In addition spelter, lead, copper and antimony are all quoted higher and they, with tin and aluminum, seem more likely to continue upward than to decline. Important advances have been made in roofing materials, and wire cloth and brooms are higher. On the other hand there is one note of weakness—unexplained but still evident—in a decline in the trade price of copper and nickel ware.

The improvement in trade conditions is largely in the country districts and in the heavier goods that is no doubt considerably influenced by the approaching close of navigation. A comparison with the trade of a year ago is very satisfying to the wholesalers. A break in the weather is being awaited to stir up the demand for winter lines and this especially applies to the city. The paint business is fairly satisfactory, although there is still a tendency to be conservative on booking; ammunition is still in fair demand and there have been a few orders for builders' hardware cropping up with the end of the season.

Tin Firmer

Although the local quotations remain at 42c-43c, the position of the market is slightly stronger than at last report with a continuance of the upward tendency. New York is about ½c higher than a week ago with prospects that the November situation will become a tight one before the end of the month. Unless there are substantial shipments from London in the next ten days, it is predicted that higher prices will be in order. The situation is one of shortage of supplies rather than an attempt at exploitation and the demand from consumers both for spot and November is very moderate.

Spelter Advances.

Strength having developed in the spelter market during the week, a further advance in the local quotation of ½c, to a basis of 20c to 21c, has been made. In sympathy with this advance there are reports in the trade that manufacturers of

galvanized sheets are about to make material increases in their quotations. When it is stated that since the 18th of October the American situation has shown an increase of 2½c per pound for prompt deliveries and 3½c per pound on futures, it will be appreciated that spelter has been steadily working back to old high levels. Late New York reports are of a further development of strength on heavy business.

Lead Moves Upward

The upward movement of lead continues, and the local quotation has been advanced another ¼c, now being 7c to 7¼c—and the tone is firm. Since last report, the American Trust has advanced 10c cwt. to a basis of 5c a pound. On this advance the market appears to be sound with nothing to interfere with the Trust's control of prices. Independents are pretty well sold up and second hands are doing little or nothing in the American market

Advance in Copper

The strength in the copper market to which reference has been made for several weeks has resulted in a change in the Montreal quotation to 22½c, covering an advance of 1c. The American reports indicate that consumers are extremely busy, despite the fact that not many war orders have been placed there of late. On the other hand the talk of big munitions business in Canada is undoubtedly a factor for strength on this side of the line. However the whole movement to advance the position of the copper stocks on Wall Street seems to be meeting with very little result

Antimony Advances

The statement made in last report that higher prices for antimony were warranted, finds confirmation in the advance this week of the nominal quotation from 37c to 40c a pound. This places the Canadian market on a more even footing with the American. However, in the latter the recent increases continue, the present prices being ½c higher; Chinese and Japanese 36c to 36½c, and American 35½ to 36c. The trading situation is quiet and consumers seem to be fairly well supplied.

High Price of Aluminum

While the nominal quotation for aluminum remains at 60c in the local market, it is safe to say that little business could be done on that basis in view of the American situation. New York continues to advance and at last report quotations were 56c to 58c, which does not leave much margin on a Canadian figure of 60c. An adjustment to a higher level for this market seems almost certain. The demand is naturally very narrow at such prices.

Solder Advances

At last report it was stated that higher prices were in order for solder. These have generally gone into effect, although there is such a wide range as between the different products, in relation to proportion of ingredients used, that it is difficult to strike a basis to cover all brands offered. The new quotations given here are 1c to 2c above those of a week ago:

Half-and-half	25c-27c
Strictly	28c-29c

Unprecedented Condition of Steel and Iron

Canadian dealers closely in touch with the steel trade state that present conditions are absolutely unprecedented. Not only is the present unsettled but the future is very vague and as regards a number of products disorganization of the trade is threatened. This week there is another advance on practically all varieties of steel, the increase being 10c in most instances. New quotations follow:

Mild steel	$2.45
Sleigh shoe steel	2.45
Reeled machinery steel	2.90
Tire steel	2.55
Toe calk steel	3.05
Spring steel	2.90
Band steel	2.45

Iron continues very firm on the basis of $2.20 for bar.

Brass Products to Go Higher

The whole situation in metals, as explained in last report, indicates that there will be higher prices for brass products. And when the increases come it is predicted that they will be of a material character as the tendency of producers is to stay below the market as long as they can and then catch up in sharp order, taking up the advances in raw materials and usually going a little bit above. The following quotations for brass are very firm:

Springs, sheets, up to 20 gauge	$0.45
Rods, base ½ to 1 in. round	0.42
Tubing, seamless base	0.42
Tubing, iron pipe size, 1 in. base	0.45

Copper Goods Firm

Copper products are also subject to the same market influences as brass. However, this section of the market is not likely to see such marked changes in prices in the event of manufacturers starting an upward movement, because there have been adjustments made from time to time. Still the following prices are very firm:

Bars, ½ to 2 in.	$30.50
Plain sheets, 14 oz., 14x28 in., 14x60 in.	31.25
Copper sheet, tinned 14x60, 14 oz.	34.75
Copper sheet, planished, 14x60 base	41.25
Braziers' in sheets, 6x4 base	30.50

Lead Sheets and Pipe Firm

The further advance in the market for pig lead, which now makes a total of ½c for the recent movement, has created a very firm market for lead sheets and pipe. For some weeks it has been pointed out that the quotations for lead products have not been materially affected because reductions were not made on the same basis as the decline of the raw material. However, an advance of ½c is a material change and, therefore, higher prices would not be surprising. Present prices are very firm:

Lead pipe	$0.09½
Lead waste pipe	0.10½
Sheets, 3-lb. sq. ft.	8.25
Sheets, 3½-lb. sq. ft.	8.00
Sheets, 4 to 6 lbs. sq. ft.	7.75

Cut sheets, ½c per lb. extra.

Cut sheets, to size, ¾c per lb. extra.

Black Sheets Advanced

As predicted last week there has been some readjustment of prices on black sheets in an upward direction but the situation remains very much unsettled. Certain wholesalers state that they have not changed their quotations and metal dealers handling larger business, in most cases, give no change in the figures established a few weeks ago but state that the prices are now absolutely net. Evidently the advance has been adjusted by taking up certain allowances below the list. The two lists still heard locally are as follows:

	Assoc.	Ind.
10 gauge	$3.00	$2.75
12 gauge	3.00	2.80
14 gauge	2.85	2.60
16 gauge	2.85	2.55
18-20 gauge	2.85	2.60
22-24 gauge	2.85	2.70
26 gauge	2.95	2.75
28 gauge	3.00	2.80

Black Pipe Advances

The prediction of higher prices on black pipe made last week has been followed by an advance of about 4 per cent. The quotations on galvanized pipe remain unchanged for the time being. Adjustments on the lapweld have not yet been announced. The higher prices are the result of the whole upward trend of the metal markets. The new prices on buttweld, black, are as follows:

Size.	100 ft.
¼ in. and ⅜ in.	$2.28
½ in.	2.81
¾ in.	3.22
1 in.	4.76
1¼ in.	6.44
1½ in.	7.70
2 in.	10.36
2½ in.	16.38
3 in.	21:42
3½ in.	25.76
4 in.	30.52

Galvanized Sheets Firm

Advances, material and almost immediate, may be looked for on galvanized sheets. Intimation to this effect has been given by the manufacturers. This is the result of the new upward movement in the price of spelter and the general tendency to higher levels on the part of steel materials.

Tinned Iron to Advance

In common with the upward movement in the steel market, as reflected in quota-

tions on sheets, etc., higher quotations on tinned iron may be looked for in the very near future, as there has not been a readjustment in this market for some little time.

Boiler Tubes Firm

The prices on boiler tubes are very firm following the advance on black pipe and the general tendency of metal products. Readjustments to higher levels are to be looked for, as stated last week. The same conditions also apply to soil pipe where a firmer application of the discounts is to be expected. The medium discount has been 65 and 10 per cent. off and the heavy 45 per cent. off. Boiler tubes are firm as follows:

100 ft., ½ in.	$10.45
100 ft., 2 in.	9.60
100 ft., 2½ in.	12.25
100 ft., 3 in.	13.30
100 ft., 3½ in.	15.55
100 ft., 4 in.	19.80

Nails and Wire Firm

The recent advances on nails and wire have not by any means eased the situation in this market and, with the steel market continuing as it has been doing for some weeks, further increases are more probable than changes in the other direction. The basis for wire nails is $2.60.

Advances on Building Papers

The recent advance in tarred felt has been followed by another important advance which brings this item of roofing to $2.40, while ready-roofing and carpet felt are also quoted at higher prices. New quotations are as follows:

Tarred felt, 7-10-16 oz.	$2.40
2-ply R.R.	85
3-ply R.R.	1.10
Carpet felt	2.75

Brooms Advance

A number of the Montreal wholesalers have recently made an advance in their quotations for brooms. The price is now 25c higher.

Brushes

Reports from brush manufacturers are to the effect that there has recently been an improvement in the situation as regards raw materials and, with quotations maintaining the advances made, the outlook is cleared. One firm of manufacturers recently gave this information in putting out a new price list.

Improved Demand For Bolts and Screws

There has recently been a tendency to order bolts and screws more freely, the trade evidently recognizing that from the developments in the iron and steel markets that there are likely to be further advances in the near future. Deliveries of those sizes of screws in demand for the manufacture of ammunition boxes have improved.

Advance on Wire Cloth

The price on wire cloth has been advanced to the following basis: 100-foot rolls, $1.70 per 100 sq. ft.; 50-foot rolls, $1.75 per 100 sq. ft.

Change in Copper and Nickel Ware

A rather interesting change in the prices on copper and nickel ware is announced, the discount on boilers, kettles, tea and coffee pots being changed from 33 1-3 per cent. to 40 per cent. The reason for the decline in price is not explained and is rather a surprise in view of the present position of the copper market.

Demand For Builders' Hardware

With the end of a building season that could hardly be called such, it has been noted that there have been a few rather good orders for builders' hardware cropping up. For the most part these are in the city and are for schools or other public buildings or institutions.

Seasonable Lines Moving

There has been a noticeable improvement in the movement of winter lines and the demand for lumbering supplies is in evidence, including axes and axe handles, shoe calks, etc. However, it still seems to require a fall of snow to start the movement of a number of seasonable lines which have been rather neglected; the policy of delaying purchases until there is an actual demand for the goods is still popular evidently.

HARDWARE AND METAL'S ELECTRO SERVICE

In last week's issue of Hardware and Metal there appeared two new assortments of electros, suitable for use by retailers in preparing advertisements for securing Christmas trade. A large number of retailers have secured electros from the electro service department of Hardware and Metal, in fact, over 4,000 Hardware and Metal electros are now being used by retail hardwaremen in various parts of Canada. Proof sheets showing the complete assortment of nearly 300 electros will be mailed free to readers of Hardware and Metal upon request.

Stove Business Satisfactory

Although there has been a little cooler weather of late the indications in the stove trade are that it will require a fall of snow and a real touch of winter to bring another active movement. Altogether, however, the season has been satisfactory compared with a year ago and considering the existing conditions.

TORONTO

TORONTO, Ont., Nov. 11.—Business in the hardware trade is showing some improvement, but cooler weather is needed to create a better demand for more seasonable lines. Stocks are inclined to be light, but with the improvement in conditions generally and a more optimistic feeling as regards the outlook in the trade, dealers will have more confidence in replenishing their stocks. The country trade continues good, while a slight improvement is noticeable in the city.

A number of price changes have been made, due principally to the increasing cost of iron and steel. The steel trade is extraordinarily active, and is naturally affecting the hardware market. Indications point to still higher levels, and so further changes in hardware lines are expected from time to time. Iron and steel bars, horseshoe iron, sleigh shoe steel, toe calk steel, etc., have all advanced sharply. Galvanized and black sheets are hig[illegible]. Other lines affected include black wrought iron pipe, hinges and butts, black wire cloth, roofing materials and leather belting. The high ocean freight rates are a serious handicap to importers, and are adding considerable to the cost of imported goods.

The developments in the shell industry are being followed with the greatest interest, which is to be expected, considering the large amount of money involved. The contracts for the 6-in., 8-in., and 9.2-in. shells are being allotted gradually, and it is pretty well understood who are likely to be awarded contracts, although the size of the contracts have not been given out officially. A large number of tenders for shells and shell parts have been submitted, and their consideration requires considerable time and attention. The reorganization of the Shell Committee will probably not take place until the awarding of the various contracts has been completed. Sir Frederick Donaldson has left for England, where he will report to the War Office as to the conditions in Canada and the feasibility of establishing ordnance works here.

Iron and Steel

Quotations on semi-finished and finished steel products continue to advance. Prices of steel bars have been withdrawn on account of the unsettled condition of the market, due to the heavy demand for steel and difficulty in making delivery in anything like the time usually required. Bar iron ex warehouse is now being quoted at $2.40 base and steel bars at $2.50 base per 100 lbs. Other new prices are as follows: Angles, $2.75; refined iron, $2.95; horseshoe iron, $2.95; sleigh shoe steel, $2.60; tire steel, $2.75. The steel trade at present is exceedingly active, due largely to the very heavy demand for steel for munitions. The increase in price of iron and steel is, of course, affecting many lines in the hardware trade. Prices of electric weld coil chain have been reduced slightly, but in all probability will only be effective a short time. With a higher tendency on all steel products, chain

cannot help but be affected. Proof coil chain, fire welded, is unchanged, but an advance is looked for in the near future. Boiler tubes, seamless, are very firm at last week's advance, and may go still higher.

The high-speed tool steel situation may fairly be said to be acute. The scarcity, especially under present conditions, is very serious, and is arousing considerable anxiety to makers of munitions. Although prices are advancing all the time, ranging from $2.50 to $3.50 per pound, the makers are unable to promise either a definite delivery date or the amount specified. Stocks in Canada are very low and supplies are difficult to obtain from Sheffield, England, on account of the restrictions placed on exports of tool steel by the British Government because of the enormous demand and the necessity of conserving supplies. The heavy demand in the States also makes it exceedingly difficult to obtain supplies from the mills in that country.

The extraordinary demand in the States for steel, principally for munitions, continues, and the mills are overwhelmed with orders. The output is expanding rapidly, and prices are steadily advancing. For domestic delivery all makers are quoting bars at 1.50 Pittsburgh, but export business is being booked at considerably higher figures. The heavy demand for billets continues, and prices are still advancing. Bessemer billets are now being quoted at $26; open-hearth billets, $28; and forging billets range from $35 to $45 f.o.b. Pittsburgh.

Pig Iron

There is an increased demand for low phosphorus pig iron, and there appears to be some scarcity of this grade. It is reported that Canadian buyers are unable to satisfy their requirements, one interest being in the market for several thousand tons monthly. Foundry grades are in better demand, but the tonnage is comparatively light.

Machine Tools

Although it is understood that no contracts for the large shells have been signed up, a number of firms, who are practically certain of getting some of the business, are making preparations to this end. Inquiries have been sent out for heavy lathes, but few orders have actually been placed, although considerable activity is expected very shortly. The situation is interesting for local dealers, and also the builders of suitable tools.

Old Materials

The market for scrap iron and steel is weaker, Canadian mills having covered for their requirements meantime. No. 1 wrought iron and heavy melting steel are both lower, having dropped 50c a ton. Machinery cast iron is stronger, and has advanced 50c per ton. The market for scrap copper, brass, zinc and lead is reasonably active. The United States market is said to be over-supplied, and a reaction may be expected. Quotations on the above-mentioned metals are unchanged, and are quoted at 10c per pound.

Metals

The general situation in the metal market is much the same as last week. The upward movement in tin continues, and lead has also advanced slightly. There is no change in the copper market, but the position of this metal is a good one, and higher prices are more likely than otherwise. The spelter market is much firmer, and indications point to higher prices in the near future. There is nothing of particular importance to note with regard to antimony and aluminum except that supplies of the last-named metal are practically unobtainable. Solders are firmer and higher prices may develop shortly.

Tin.—Considerable activity has developed in the tin market, and the upward movement continues. The market is in a sound position, but there is a possibility of a revival in speculation. Tin has advanced 2c, and is quoted at 42c to 43c per pound.

Copper.—The market is steady and firm. Production is going on at a rapid rate, but at the same time consumption exceeds the output. The position of this metal is a strong one, as consumption will increase rather than decrease. Local quotations are firm at 19½c per pound.

Spelter.—The market is strong, and is starting to move more rapidly. There is an improvement in demand in New York, both domestic and exports. Spelter has advanced 1c, and is quoted locally at 18c to 20c per pound.

Lead.—The New York market is firm at the "Trust" price, which is 5c per pound, while the London market has also advanced. The advance is attributed to increased demand for munitions. Lead has advanced ½c locally, and is now quoted at 6¾c to 7¾c per pound.

Antimony.—The market is fairly active, but the general situation is unchanged. Antimony has advanced 5c, and is quoted locally at 40c per pound.

Aluminium.—The situation is unchanged, and supplies locally are almost unobtainable. Quotations are nominal at 60c per pound.

Sheets

There is a fair demand for galvanized sheets, and prices are very firm, with an upward tendency owing to increasing cost of spelter acid and black sheets. New prices for "Premier" galvanized sheets have been announced, while "Apollo" sheets have also advanced, ranging from 20c to 40c, according to gauge. Prices of black sheets have advanced 10c for all gauges.

Wrought Iron Pipe Advances

As predicted in last week's issue of Hardware and Metal, an advance has been made in black standard wrought iron pipe. The new prices are given below, and it will be noted that galvanized pipe has not been affected. The advance is due to the increasing cost of raw materials and scarcity of the same owing to the unusual activity in the iron and steel trade.

Size.	Per 100 feet Black	Galv.
Buttweld.		
⅛ in.	$ 3 00	$ ....
¼ in. and ⅜ in.	2 28	3 69
½ in.	2 81	4 46
¾ in.	3 22	5 46
1 in.	4 76	8 08
1¼ in.	6 44	10 93
1½ in.	7 70	13 03
2 in.	10 36	17 58
2½ in.	16 38	27 79
3 in.	21 42	36 34
3½ in.	25 76	43 70
4 in.	30 52	51 78
Lapweld.		
2 in.	11 84	19 06
2½ in.	16 97	28 37
3 in.	22 19	37 10
3½ in.	26 68	44 62
4 in.	31 61	52 87
4½ in.	39 37	64 14
5 in.	45 88	74 74
6 in.	59 52	96 96
7 in.	80 92	132 10
8 in. x 25 lbs. per ft.	85 00	138 75
8 in. x 28 lbs. per ft.	97 92	159 84
9 in.	117 30	191 48
10 in. x 32 lbs. per ft.	108 80	177 60
10 in. x 40 lbs. per ft.	140 08	228 60

Hinges and Butts Advance

Prices are stronger for these lines, and the following new discounts have been announced. Wrought butts, No. 804 and No. 840, 65 and 10 per cent.; No. 800 and No. 835, 67½ per cent. Heavy tee strap hinges are unchanged at 40 per cent., but light tee strap hinges are higher at 67½ per cent. The higher prices are due to increased cost of raw materials.

Roofing Advances

Price changes in some lines of roofing material have been made, which are as follows: Tarred felt, 7-10-16 oz.. $2 40 per roll of 100 lbs.; two-ply red star ready roofing, 85c per roll; while the same brand in three-ply is now quoted at $1.10 per roll. "Amatite" roofing is quoted at $1.85 per roll, and carpet felt, 16 oz., at $2.75 per 100 lbs.

Screws and Nails

Owing to the high cost of raw material, an immediate advance in many lines of screws is expected. Higher prices for wire nails are also anticipated for the same reason. Wire nails are quoted at $2.55, and cut nails at $2.70 per keg.

Cutlery Situation Serious

The cutlery situation is becoming daily more acute owing to the difficulty in obtaining shipments from Sheffield. Cutlery manufacturers are so busy with orders for the War Office that other requirements have to take second place. The situation is further complicated by

the demand for cutlery for the Christmas trade.

Household Utensils

Prices of galvanized and tin ware are very firm, and are expected to advance. Sheets are higher in price and delivery is very backward; the strength in the metal market is also an important factor to be considered. There is a good demand from the country for various lines of ware, but stocks generally are moderate and buyers are cautious. Prices of copper ware are weaker, but this is only temporary, as the tendency is for higher prices.

The Stove Trade

There is a good demand for ranges and cook stoves, but heaters are moving rather slowly. There is a better demand for furnaces in the country than in the city. The trade is looking for cooler weather to stimulate business.

Wire Cloth Advanced

A sharp advance, anticipated in these columns last week, has been made in black wire cloth. The new prices are 20c per 100 square feet higher, and are as follows: In 100 ft. rolls $1.70, and in 50 ft. rolls $1.75 per 100 square feet. The advance is due to the high cost of wire, and indications point to still higher prices.

Rope Trade Good

Business in the rope trade is good, and prices are very firm, with a higher tendency. The situation in Mexico has improved, but an advance in sisal is expected. The high ocean freight rates at present prevailing are adding considerably to the cost of raw materials, with no relief in sight. Stocks of Russian and Italian hemp are low, and there is very little coming through. Prices are shown in current quotations.

Belting Has Advanced

The long-expected advance in leather belting has materialized. There is a big demand for belting, and there is also a lot of leather being used for making war equipment. The new discounts are as follows: Extra heavy double and single 10 per cent. and standard quality 50 per cent.

LONDON

LONDON, Ont., Nov. 9.—A number of important price changes have taken place this week. Some of them lines affected are linseed oil, turpentine, black iron pipe, heavy tee, and strap hinges. Changes are expected in the near future in screen wire cloth, butts and other lines of steel products.

Business this week has been very fair, although it is generally felt that there would be a great improvement if colder weather set in. Christmas lines are beginning to sell.

Collections are good. Merchants are still buying carefully, but there is a better all-round feeling in business circles.

Linseed Oil Advances

Linseed oil has advanced 4 cents per gallon and is now quoted locally as follows:

	Raw.	Boiled.
1 to 2 bbls.	81c	84c
3 to 5 bbls.	80c	83c
6 to 9 bbls.	79c	82c

Turpentine Advances

A further advance of three cents per gallon has taken place in turpentine this week and quotations are as follows:

	Per Imp. Gal.
1 bbl. lots	85c
2 to 4 bbl. lots	84c
5-gal lots	92c

Advance on Pipe

As predicted by Hardware and Metal last week, there has been an advance in the price of black iron pipe. Galvanized pipe remains unchanged. Quotations locally are as follows:

	Black	Galvanized
¼	$ 2 28	$ 3 69
⅜	2 28	3 69
½	2 81	4 46
¾	3 22	5 46
1	4 76	8 08
1¼	6 44	10 93
1½	7 70	13 06
2	10 36	17 58
2½	16 38	27 79
3	24 42	36 34
3½	25 76	43 70
4	30 52	51 78

Advance on Hinges

An advance has taken place on light tee and strap hinges which are now quoted at 70 per cent. discount. Screw and strap hinges are quoted as follows: 6 in. to 12 in., $5.25 per 100 lbs.; 14 in. and larger, $4.50 per 100 lbs.

Nails, Wire, Etc.

Nails are firm at $2.55 base for wire, and $2.70 base for cut nails. Fence wire remains unchanged but firm at former quotations.

Other Lines

There is a fair demand for glass. Quotations remain as follows: single dia., 20 per cent.; double dia., 20 per cent.; cut lights, 20 per cent. Bar iron is firm at $2.25 base.

Spring Booking

Rope is being booked for spring delivery at present prices. Harvest tools are being booked for spring at 40-12½ per cent; poultry netting is quoted at 45 per cent.; spades and shovels, 1sts, 60 per cent.; 2nds, 55-2½ per cent.; 4ths, 45 per cent.

WINNIPEG

WINNIPEG, Nov. 11.—The month of October exceeded all records in the output of steel, and, in spite of this, the mills are getting worse off with regard to deliveries than they have been at any previous date. It is not an uncommon thing to hear of a mill being from three to six months behind with their orders, and unheard-of prices are being paid to get delivery on some products.

The activity in the wire trade shows no sign of letting up, and barbed wire, both galvanized and painted, is in great demand by the allied nations. It is more likely that further advances in prices will be recorded, affecting these two lines, and in addition, wire nails, plain and annealed wire, plain galvanized wire and fence staples.

Demand for Sheets

The demand for galvanized and black sheets has increased during the past week, and may be termed now as being very heavy. It is more than likely further advances will be made in galvanized sheets, and reference is made below to changes going into effect on black sheets.

Business during the first week of November has been very good, and all the jobbers expect to make a very creditable showing at the end of the month.

Winnipeg suffered its first heavy snowfall Sunday night, and if this is general, there will be a lull in threshing operations for a few days. Grain shipments continue to come through in record time, and are being transported through to the Eastern ocean ports very quickly.

The fall of snow is bound to increase the demand for sleighs and snow shoes, and heavier shipments will undoubtedly be made during the next week or ten days. Other seasonable lines, such as skates, hockey sticks and Christmas cutlery continue to move freely.

There is one change to note in the price of boiler tubes, this being in the 2-in. size, and the following prices are in effect here:

Boiler tubes—

2 in., per foot, 12½c; 2½ in., 14½c; 3 in., 17½c.

Linseed Oil Advanced

Linseed oil has advanced another 4c, and on account of the scarcity of flax, combined with the high price being paid for same, it is more than likely further advances will be noted in the very near future. To-day's ruling prices are as follows:

Linseed Oil—

Raw, per gal., 87c; boiled, per gal., 90c.

These prices are for barrels. Less amounts 5c per gal. extra, with additional charges for cans, etc.

Black Sheets Advance

A change has taken place in black steel sheets. The advance amounts to 25c per 100 lbs., and to-day's ruling prices are as follows:

Black Steel Sheets—

10-12 gauge	3.40
14-16 gauge	3.35
17-24 gauge	3.60
26 gauge	3.70
28 gauge	3.85

WEEKLY PAINT DEPARTMENT

Prices of Paint in Canada

Many Retailers Still Selling Paint on Old Cost Basis—Analysis of Actual Business Working of Advances Some Time Ago—The Future Outlook

By J. W. TYSON

DESPITE the recent decline in several of the more important lines of ready-mixed paints, the majority of retailers will this fall pay more for their stocks than at any time in the past. This, on the face of it, appears to be an anomalous statement and requires explanation, but before making that explanation let us follow it with another statement based thereon. The hardware trade is at the present time in the position of having to ask higher resale prices on many lines, when the market is nominally lower than for some months—or of taking lower profits. The moral of this article, and it is to be hoped the retailer can see it, is that the prices to the consumer should be advanced on the basis of the cost price. To those dealers who followed the April advance by manufacturers this is not directed, but rather to those who bought before the rise and gave their customers the benefit of their judgment—and Hardware and Metal understands they were many.

The situation is one which can only be understood by an analysis of the actual business working of the advances made some months ago, as compared with the obvious or superficial aspects of the market. In the first place, the advances applied to all lines, and meant an addition of ten cents at least, and in many cases much more, while the decline was not more than ten cents, and only applied to a few lines. In the second place, the dealers who were in touch with conditions and had sound business judgment did not pay the advance at all, but got their orders in on the old basis. These are the men who now face the higher prices for the first time. That is the reason why they have been holding for lower prices, and that is also the reason the manufacturers, believing they would be able to make extensive reductions, encouraged the idea, until advancing prices for raw materials forced them to change their plans. And both of these reasons account for the tendency this summer of buying for actual wants only and allowing stocks to run to low ebb.

The Advance and the Decline

To go back to the April advance, we find that in the issue of April 10th Hardware and Metal announced the advances to go into effect on the 15th and applying to deliveries after May 1st. The advances were: General lines of mixed, including floor and porch paints and enamels, 10c a gallon, excepting bright reds, on which the increase was 25c.; flat oil paints, 10c a gallon, with 50c a gallon for bright reds; barn paints, 5c a gallon; carriage paints, a small advance for all colors, excepting reds, which went up 33 1/3 per cent.; wagon paints, 10 per cent. advance on all colors, excepting reds, which advanced 25 per cent. Colors, in oil—Greens, 1c lb.; other colors, 2c lb., excepting vermilions, Prussian blues, Chinese blues and Japan colors, which were withdrawn.

Against these advances the declines were narrow. On October 30th Hardware and Metal announced changes as follows: A reduction of 10c a gallon on house paints (excepting whites), outside porch paints and flat wall paints. On inside floor paints, barn paints, roof paints, cement paints and other lines, the former advanced quotations were continued. As between colors—excepting whites—no distinction was made, and the spread between reds and greens and some other shades continued.

Thus, while the minimum advance was 10c on all lines, with many as much as 25c and 50c the maximum, the only decline was 10c, and this applied to a few lines only. But this does not explain why many dealers are now paying more than they did for their summer stocks. This requires the analysis of the actual working of the advances, to which reference has been made.

Dealers Beat the Market

It will be noted that on April 10 Hardware and Metal gave the actual advances taking effect on the 15th of the month, but not actually operative until the 1st of May. Prior to this, for some weeks the market indications had shown definitely that mixed paints were going to advance, and the reports in this paper had shown this and forecast the rise in prices. Also it is taken for granted that the travellers of the different manufacturers had done the same thing, especially after the advances had been definitely decided upon. Thus, for at least three weeks, the retailer had an opportunity to get in his stocks at low prices. Needless to say, all the discerning dealers, particularly those who had been following the market reports, bought accordingly. Throughout the summer they have had cheap stocks, and they were looking for a decline before they had to replenish.

Failed to Profit by Foresight

However, many of the retailers have gained an advantage over the market by foresight in placing their orders for the summer supply failed to reap their harvest. They took the attitude that they would extend their advantage to their customers and maintained the usual prices. In this they no doubt were influenced by the general feeling that before another season the abnormal conditions would be removed and that they would be able to buy at the old prices without being affected by the rise; also there was the consideration that with comparatively small consumption and hard times prevailing it would not be propitious to make advances.

Entitled to Full Profits

Thus is logically established the position of many retailers to-day where they find that the reduction in prices has not been commensurate with the advances, and they have to face for the first time quotations which have actually been established for six months. Rising costs of raw materials have forced the manufacturers to keep prices up in many lines, and the indications are few that there will be material declines until there is a radical change in the general conditions prevailing. The retailer naturally is somewhat reluctant to make advances to his customers at this time when the market is nominally weaker, and when conditions do not encourage a very active consumption. But this is the only logical course.

The retailer who gave his customers

the advantage of his good buying, and who fixed his profits on his actual costs, should now have no compunction in making full advances on the price which he has to pay. If the customer objects, he should meet him with the argument that for six months he has been given the advantage of a price which was below the market. The wise merchant who decided in May that he was going to sell paint for what it was actually worth, and who kept the extra profit himself, does not need this advice.

Sales and Rising Market

Just a word of advice to the retailer who may think that if he makes the advances required by the higher costs he will interfere with his trade. Past experience indicates that there need be little fear in this direction. When ready-mixed paints first came into the Canadian market and began what has been, at certain periods, an uphill fight for popularity, the prices were not more than one-half what they are to-day. Prices have been steadily increasing, but the Canadian paint industry, with its immense manufacturing plants, is conclusive evidence in itself that rising costs have not interfered with either consumption or popularity—largely because those advances, as in the present case, have been based upon the actual prevailing market conditions in relation to raw materials.

CANADA PAINT COMPANY'S ANNUAL CONVENTION

Montreal, Nov. 6, 1915.—The convention held here last week at the head offices of the company was the largest and most successful in the history of The Canada Paint Co. It was attended by all the travelling representatives, sales managers, and heads of departments.

The convention was opened by the manager, W. H. Aird, who was thoroughly optimistic in his address, and spoke with great confidence regarding the prospects for the coming year. He expressed the deep appreciation of the management for the splendid work done during the past twelve months under most trying conditions.

Many of the men were happily surprised to learn that they figured among the top-notchers and estimate winners, and the cheques and prizes were received with much hand-clapping and enthusiasm.

During the convention the lines produced by the company were thoroughly dealt with, and many beautiful exhibits displayed, so that the quality and uses of the various finishes were very strongly impressed upon all present.

On Wednesday evening a most enjoyable banquet was held at the Canada Club, during which there were speeches by the company's officials and guests, as well as music and good things to eat. Probably the most striking event of the evening was the toast to "Our Absent Ones," whose names were inscribed on the roll of honor above the head table. A fund was made up to send each member of the organization at the front a suitable and useful Christmas package.

Everyone took the fullest advantage during the various sessions to increase his knowledge of the many lines put out by the company. Optimism and enthusiasm proved contagious to all concerned with the convention, including factories, offices, and men on the road, and will greatly help in the determination to make the ensuing year a record one for the Canada Paint Co.

WEEKLY PAINT MARKETS

(Continued from page 56.)

ed, the former being ½c higher than the latter. White lead is firm and stationary. Resins have advanced. High ocean freight rates are adding considerably to the cost of imported materials. Collections continue fair.

Linseed Oil Advances Further

Flax seed is very high and supplies are coming in slowly to the grinders. The result is that linseed oil has advanced 2c. Stocks are said to be light locally and buying is on a hand-to-mouth basis. The following prices for linseed oil are generally being quoted in Toronto:

	Raw.	Boiled.
1 to 2 barrels....	81c	84c per gal.
3 to 5 barrels....	80c	83c per gal.
6 to 9 barrels....	78c	81c per gal.

10 barrels and over open.

Later Advance

Just before going to press, an announcement has been made by a number of Toronto jobbers that owing to the high price of flaxseed a further advance has been found necessary on linseed oil prices. They are quoting raw linseed oil at 85c per gallon in single barrel lots, and boiled oil at 88c per gallon, with the usual reductions for larger quantities.

Turpentine Advances

Large shipments of turpentine from Savannah to Europe have stiffened the market as stocks are being depleted. The local market is quiet. Prices have advanced 3c, which makes a high level of 85c; some jobbers, however, are quoting as low as 77c, making a considerable range. The following quotations, however, are being more generally made locally: 1 barrel lots, 85c; 2 to 4 barrel lots, 84c and 5 gallon lots, 92c per Imperial gallon.

Mixed Paints

The reduced prices for ready-mixed paints recently in effect are not expected to remain in for very long. The cost of zinc oxide is considerably higher than was anticipated when the last schedule of prices went into effect. Linseed oil and turpentine are also advancing, which was not anticipated. The big demand for lead has resulted in white lead being very firm. With raw materials thus tending to higher prices makes it possible that mixed paints may have to be advanced.

White Lead

The general situation is unchanged and prices are firm. The heavy demand for lead for munitions is keeping the market very strong, although no advance in white lead is anticipated, in the immediate future. The base price of $9.60 per 100 lbs. in ton lots is being maintained.

Resin

There is a good demand for resin and prices have advanced $1 to $2 per barrel for all grades, especially "G" quality. The jobber's price for re-sale is 3½c per pound, gross weight.

Gasoline and Benzine

Prices have been readjusted to bring gasoline ½c higher than benzine. A shortage in supplies of gasoline is being experienced and the demand is quite brisk, resulting in a very firm market. Gasoline is now ½c higher and is quoted at 23½c for any quantity in barrels. Benzine has declined 2½c and is quoted at 23c per gallon in barrels.

Glass

Fair business is reported in the trade, but prices are generally considered to be far too low. The situation generally is unchanged.

Putty

Putty is moving out better, but business is under normal. Prices continue firm and are as follows in Toronto:

	Per 100 lbs.
Bulk, in casks	$2.50
Bulk, in 100-lb. drums	2.70
Bulk, in 25-lb. drums	2.80
Bladders, in barrels	3.10

Pure Putty, 60c per 100 lbs. advance.

Oil for England

William H. Evans, Montreal, recently made a shipment of 30 tons of Canadian linseed oil to London, England. The order called for oil "expressed from seed grown in Canada only."

C. W. McGuire, manager London, Ont., branch Imperial Oil Co., was elected president by acclamation at the annual meeting of the Ontario Commercial Travellers' Association.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Nov. 12.—The trade has evidently settled down to adjust itself to the basis of prices as decided upon by the paint manufacturers as one of the conditions of the war times prevailing. This is indicated in the improvement in business which has come with the opening of the fall campaign for spring booking. The disappointment generally felt that the reductions on last spring's advances were not more substantial and more general, in consequence of which many merchants are facing higher actual costs than ever before (the bulk of the spring stocks having been put in before the April increases), has been offset by the increasing strength of the markets for raw materials. At the time the reduction was announced it was considered by the makers as being unwarranted by conditions, and since then the upward trend of oil, turpentine and lead has been such as to cause some talk of further increases. However, there is still a certain reluctance indicated on the part of the retailers to place their full spring orders, not that they may think the present prices too high in relation to manufacturing costs, but they regard the ever-changing conditions as likely to bring about reductions as advances on the already abnormally high quotations; besides the tendency in most branches of business at present is to avoid future responsibilities so far as possible. At the same time, there can be no doubt about the soundness of the prediction in the manufacturing trade, that if there is not soon some relief from the rising costs of ingredients higher prices are inevitable.

Speaking generally, business is showing up very favorably compared with the same period a year ago. Retailers' stocks had been run down so low with the outlook for lower prices that even though the fall season is so far advanced, there are fair requirements for immediate demand in addition to the booking. Manufacturing demands are also developing in certain lines. The situation as regards prices continues very interesting, with linseed oil and turpentine still on the upward trend and the cost of pig lead rising to a level where quotations are very firm, and are being restricted as to deferred deliveries.

Linseed Oil.—The linseed oil market continues to advance to higher levels, and with the upward movement the spread in quotations between different jobbing houses widens. The situation appears to be that while some prices are based upon the actual market value of the product, others relate to the cost of stocks on hand, and are evidently being held down in competition for the business going. On the present quotations of linseed crushers it is stated that the basis for raw oil should be about 80c—that it could not be bought to-day and sold for less to allow anything like a reasonable margin of profit. This appears to be the view of the situation as taken by several of the prominent jobbers, where the quotations were given as 79c to 80c for raw and 82c to 83c for boiled, with the usual discounts under this basis for orders up to five and from five to ten barrels. However, the rise in the market has not eliminated some of the old quotations, and from a couple of houses, usually considered as important factors in the market, the price of 73c and 76c for raw and boiled respectively is submitted, but these figures are likely to be changed at any time.

Turpentine.—Much the same conditions as noted in the linseed oil market apply to turpentine also. The recent advances have been so rapid that there has not been a general readjustment, and a wide spread in prices has been created as between the present cost basis and the price paid by some jobbers for their supplies on hand. Refiners who have been recently advancing about 5c a week report another rise of 3c in the past few days. Jobbers' quotations generally range from 75c to 78c, with the usual discounts on quantities, but as high as 80c and 82c are figures heard from other houses, which claim that a fair margin based on the present cost warrants such prices.

White Lead Firm

With a still further advance in the price of pig lead, making a total of 50c cwt. for the movement of the past five weeks, the situation as regards white lead has become even stronger. Reports indicate that the upward movement has now more than made up for the margin allowed when the last decline in lead in oil was made, and the fact that restrictions as to futures are being placed on orders, may be taken as an indication that an advance is now warranted, or would be, with any further increase in cost of raw material. The present figures are $9.45, with 30c added for less than ton lots.

Zinc Still High

There has been little to relieve the zinc situation. Not only are the manufacturers of paint paying higher prices than they had expected, but there does not appear to be any chance of a decline while the present conditions prevail. Zinc continues to be an important factor in the high prices of paints.

Gasoline and Benzine Prices Readjusted

There has been some slight readjustment on the increase in gasoline and benzine, as announced a week ago, the tank wagon price being raised to 20½c and the figure for drums reduced to 21½c, the change being ½c in each case. Benzine quotations are 1c under in each instance, with 23c in wood. The approaching close of navigation is causing a very good movement of gasoline, raw and refined oils, etc. Gasoline quotations are:

Gasoline, in wood	24c
Gasoline, in drums	21½c
Gasoline, tank wagon	20½c

Benzine 1c lower.

Glass and Putty

There is still a fair fall trade being done in putty at the old prices, which are firmly held. Whiting is an important factor in the putty market, and not only is the first cost of this material higher, but there is an important increase in freight rates to consider. Glass is steady and dull, except for some window sizes, which are still moving fairly well.

TORONTO

TORONTO, Ont., Nov. 11—Business is inclined to be quiet, although this month so far is rather better than October. Travelers are beginning to go out, but it is too early to tell what spring bookings will be like. Stocks are light and there is a tendency to carry only moderate stocks. Prices are firm and advances are looked for in some lines. Mixed paints are not expected to stay long at the present prices, as raw materials are going up. Linseed and turpentine have both advanced and are very firm at present quotations. Prices of gasoline and benzine have been readjust-

(Continued on page 54.)

The Ground, The Sowing and The Harvest

The yearly round of the farmer's life illustrates very simply the story of

B-H "ENGLISH" PAINT SALES

The Ground in Canada has been in preparation for years through education and development, and all over the country there is a great and growing demand for house paint, particularly B-H "ENGLISH" PAINT containing B.B. GENUINE WHITE LEAD.

The Sowing of the seed of advertising has been going on for years and we are planting more of it, and better this year. The

B-H "ENGLISH" PAINT

Advertising Campaign should develop very large orders for the agent who handles this paint.

Thus **the Harvest** is bound to be good, and the best way to reap most of it is to make enquiries to-day, about our B-H 1916 Campaign.

THE TRADE-MARK
WHICH GUARANTEES SATISFACTION

MARTIN-SENOUR
PAINTS AND VARNISHES

(MADE IN CANADA—SOLD ON MERIT)

Martin-Senour Paints and Varnishes are the easiest and most profitable to sell because they are well known for their unsurpassed quality, **because** our message of quality in Martin-Senour Products reaches and is read by nearly every possible user in Canada, through the mediums of largely circulated daily and weekly press, magazines, farm and religious journals, etc.—**because** our sales help and co-operation consists of most effective features of interior and exterior displays, mailing campaigns, follow-up systems, and direct help of salesmen.

Many of our Dealer Agents consider the exclusive agency for Martin-Senour products one of the bulwarks of their business.

It will pay you to get full particulars re our exclusive agency proposition.

That SAW is a good seller

SIMONDS No. 237 with Lion Handle

This one-man cross-cut saw, fitted with this special handle, is being preferred for many kinds of work, and we believe you could sell several of them if you ordered a few from your regular jobber. All leading wholesalers carry Simonds Crescent Ground Cross-Cut Saws, One-Man Saws, Hand Saws, and Files. For prices or other information write direct to our factory at Montreal.

Simonds Canada Saw Company, Limited

St. Remi Street and Acorn Avenue, MONTREAL, QUE.

Vancouver, B.C. **St. John, N.B.**

"I can sift ashes now."

Canada Dustless Ash Sifter

makes ash sifting thorough, easy and clean

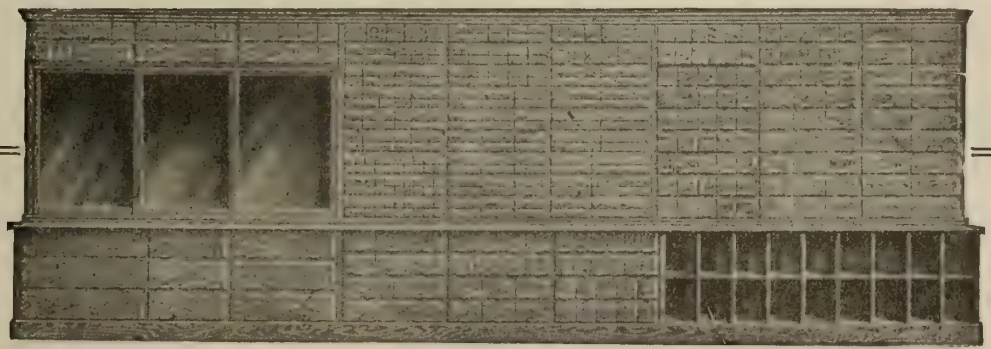
Permits no waste, cuts coal bills in two, and lasts a lifetime. A turn of the handle and ashes sift into barrel. Unburned coal drops into scuttle.

Sell one to a home and you'll soon sell to the next door neighbor, as users invariably recommend them.

Sold by leading hardware dealers.

Write for particulars.

J. SAMUELS, 275 Queen St. W., Toronto, Ontario



ATTRACTIVE, CONVENIENT, DURABLE, REASONABLE IN PRICE.

Our Patented Metal Shelf Boxes will improve the appearance of your store, and will enable you to give your customers quicker and more efficient service.

Advise us space you have available for shelf boxes and shelving, and we will sketch out plan and give you our best price for same.

Send for illustrated catalogue, it will interest you.

Your Profits Depend on Yourself!

There's money in taking orders for us. You don't have to handle the goods, simply take the orders, we will ship direct. Tell your local elevator man, blacksmith, machinist and contractor that you want to place his next order for standard or miscellaneous steel or iron, machinery, or repairs, etc., we will quote a price that will get you the order, besides allowing you a liberal profit.

You Get the Order—We Will Do the Rest

Our big shops, expert engineers, and machinists are ready to fill your orders correctly and with promptness. If you require any mechanical information, or help in any way to secure business, we will be glad to hear from you.

IF YOU ARE NOT RECEIVING OUR MONTHLY STOCK LIST REGULARLY LET US KNOW

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

Big Profit and Satisfaction in Selling

"AYLMER" Force Pumps

They are certain to sell easily because it has several advantages over the ordinary style.
Has longer stroke, more power, and works easier.
While designed for hand use it can be readily converted into a Windmill Pump by the addition of a flat bar, which screws into the cross head at top.
It will be to your interest to write for full particulars now.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and a clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace—made for machine. Packed singly—packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

GOOD BROOMS AT LOW COST

Our Brooms are all made in Canada from the finest American Corn. We have them to retail at 25c. to 60c. Our 25c. line is better than some selling at 60c.

NICKEL

SHOT—High and Low Carbon
INGOTS—Two Sizes 25 lb., 50 lb.
Electrolytic Nickel 99.80%

Prime Metals for the manufacture of Nickel Steel, German Silver, Anodes, and all remelting purposes. Our Nickel is produced as rods, sheets, strip stock, wire and tubes.

MONEL METAL

We are Sole Refiners of this natural, stronger than steel, non-corrosible alloy. Produced as rods, flats, castings, tubes, sheets, strip stock and wire. Ask for descriptive booklet.

Send inquiries direct to us.

THE INTERNATIONAL NICKEL COMPANY
43 Exchange Place, New York.

LONDON BAR IRON

High Grade

Our iron bars are tough, fibrous and corrosion-resisting, just such bars as your blacksmith friends want to use. Why not carry them in stock for your customers, or if you prefer, have them direct shipped from the mill?

London Rolling Mill Co., Limited
LONDON, - ONTARIO

SALES AGENTS
Manitoba — Bissett & Webb, Ltd., Winnipeg.
British Columbia — McPherson & Teetzel, Vancouver.

Safe Investments

The Financial Post of Canada is the recognized authority on Canadian investments.

Each week it gives much exclusive information respecting Canadian companies; also reliable news on bond and stock issues, mining and real estate conditions.

The INVESTOR'S INFORMATION BUREAU is maintained free to subscribers and answers by letter all inquiries about investments. Write for sample copy and our subscription offer.

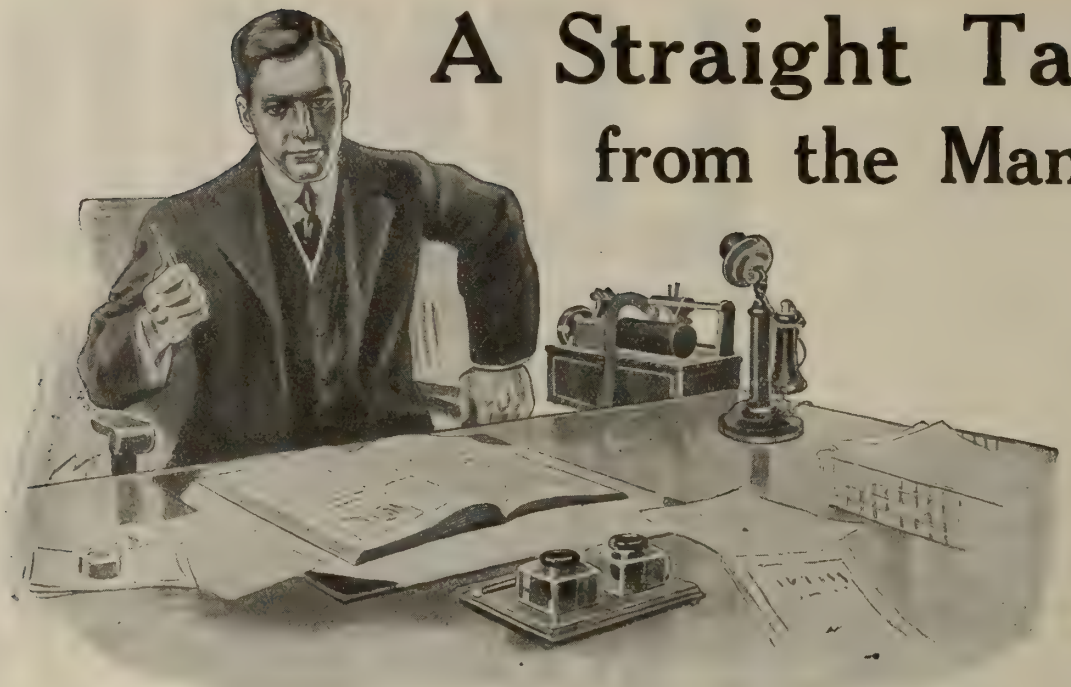
A want ad. in this paper will bring replies from all parts of Canada.

You can talk across the continent for two cents per word with a WANT AD. in this paper.

A Straight Talk from the Manager



Records of Progress

IF you were to compare the advertising pages in recent issues of Hardware and Metal with those of twenty-five years ago, you would be amazed at the number of articles now before the trade which were not even dreamed of in the younger days of Hardware and Metal.

The hardware manufacturing industry has made great advances in the past quarter century, and this progress has inevitably been reflected in the class of goods advertised from week to week in Hardware and Metal. Manufacturers with new and meritorious goods know that the quickest way to make them known throughout the Canadian trade is to advertise them in Hardware and Metal.

Every issue of Hardware and Metal contains new advertisements of goods that will make big profits for you, if you will take them up at once, before your competitors have a chance to beat you out. You stand to lose a good opportunity for money-making if you do not read the advertisements every week.

J. G. L.

Condensed or "Want" Advertisements

Those who wish to sell or buy business or stocks, obtain competent help, connect with satisfactory positions, or secure aid in starting new enterprises, should not fail to use the Want Ad. Advertisement Page of HARDWARE AND METAL. It is the central market place of the hardware trade throughout Canada. There is always someone somewhere looking for just such proposition as you have to offer. RATES (payable in advance):—2c. per word first insertion, 1c. per word subsequent insertion, 5c. additional each insertion, when Box Number is required. Each figure counts as one word.

WANTED

WANTED AT ONCE—FIRST-CLASS HARDwareman to invest from three to five thousand dollars in good hardware business in eastern Ontario city. Apply Box 224, Hardware and Metal. (46)

WANTED — HARDWARE CLERK WITH three or four years' experience. We prefer a man with experience in heavy as well as shelf hardware. Apply Northern Canada Supply Co., Cobalt, Ont.

TINSMITH WANTED — MUST BE SOBER. Also state wages and give references. Geo. Phillips & Son, Havelock, Ont., Box 565.

A SOBER, INDUSTRIOUS, COMPETENT, young married man desires position as manager and buyer of Western retail hardware store. Ten years' experience. Best references. Can guarantee results. Box 225, Hardware and Metal. (49)

MISCELLANEOUS

FIRE INSURANCE. INSURE IN THE HARTford. Agencies everywhere in Canada.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

ADDING TYPEWRITERS WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314, Stair Building, Toronto.

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B." Otis-Fensom Elevator Co., Toronto.

GOOD STENOGRAPHERS ARE WHAT every employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

ESTIMATING. BY EDWARD NICHOLS, Architect. 128 pp., 22 illus. Cloth binding. Containing invaluable information for the use of Architects, Contractors, Builders, Plumbers and Heaters, Painters, Roofers, Cornice-Makers, and other workers in the building trades. This handbook tells just how to go about the task of making an estimate intelligently. Price, postage paid, $1.00. MacLean Publishing Co., Ltd., 143-153 University Ave., Toronto.

HARDWARE STORE BUSINESS METHODS—The authors of the articles in this book are for the most part practical and progressive hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infinite value to that trade. The 40 subjects discussed include: Rules and Regulations for the Hardware Store; Hardware Buyer; Good Methods in Stock Taking; Prices and Catalogues; Collecting Accounts; The Merchant and His Employees; Changing Business Conditions and How to Meet Them; Profit Figuring System; Starting in Business; Changing a Credit into a Cash Business, etc. 220 pages. Price $1.10, postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE WINDOW DRESSING—THIS IS the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. Size 8x11 inches. Price $2.60 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.

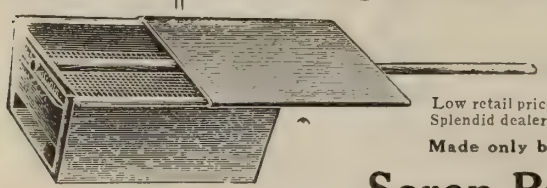
The "Daisy" Makes Quick Sales

This is a strong, reliable sifter. Positively dustless and very easy to handle. Slight shaking separates ashes from valuable unburnt coal into lower compartment. Ashes and coal removed without soiling the clothes.



Low retail price. Splendid dealers' profit.

Made only by

Soren Bros.

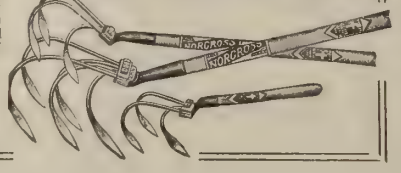
The day of the ordinary hoe is past

NORCROSS

CULTIVATOR-HOES AND WEEDERS

do this work scientifically

They are light and strong and cultivate closer to plants without marring them than any other kind of implement, leaving the soil level, loose and untrampled. Cost but little more than the ordinary hoe—accomplish much more and better work with less labor. They cultivate the soil. Your opportunity for more profit. Drop a card for our 16-page Cultivation Booklet and address of nearest Canadian Jobber.

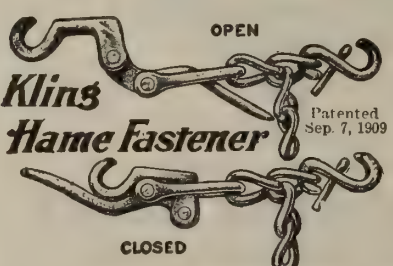


C. S. NORCROSS & SONS

Sole Mfrs.

BUSHNELL, ILL., U.S.A.

MADE IN CANADA



Like the British Navy, there is no getting away from it. Always ready for instant use. On or off in a jiffy. Holds like grim death. So simple a child can fasten it. Keeps the hames always uniformly tight. Safe and Strong. A fast seller, with a big profit for the dealer.

All Jobbers should or do sell it. $2.25 per dozen.

D. C. ROSS & COMPANY

56 Colborne Street Toronto, Ontario

SALES AGENTS

The "PERFECTION" Steel Ankle Support

PAYS A GOOD PROFIT AND WILL INCREASE YOUR SKATE SALES

Weak ankles keep many a person from enjoying the splendid winter pastime of skating.

Stock and boost the "Perfection" Ankle Support — it is just the thing for weak ankles.

The sale of the "Perfection" will lead to many others and you'll realize a material increase in your skate sales as a result, because people who heretofore couldn't skate on account of their weak ankles can get in on this splendid winter sport by wearing this ankle support —the more that skate the more is the demand for skates.

You Keep Your Store Open

just so long as you get a quick turnover on goods with a fair margin of profit.

Nowhere else can you find a line of files that gives you such a quick turnover as the five following brands:

KEARNEY & FOOT
GREAT WESTERN
AMERICAN
ARCADE
GLOBE

(Made in Canada)

With an output representing 90% of Canada's file requirements, they may justly be termed Canada's national files.

With a continuous, never-let-up campaign educating your customers on the economy of throwing away half-used files, the demand for the "famous five" is rapidly increasing.

It only remains for you to impress upon your customers that when a file is half worn, its efficiency point has been passed. They are wasting time and losing money by its continued use.

You'll sell two files where you now sell only one. Good business for you.

Cashing In on C.O.D's.

Third Article of Series on Retail Accounting System Tells How Western Canada Hardware Firm Handles Charge Accounts and Keeps a Strict Tab on all C.O.D.'s —Danger of Leaks Through Carelessness

IN many retail stores, especially in those where system is not closely adhered to, there is great danger of loss through the careless handling of C.O.D.'s. There are very few retail concerns, especially in the large towns and cities, who do not find it necessary to send out a great many orders C.O.D. Especially where a large telephone business is done, as in many city stores, it is absolutely necessary to have an up-to-date system for looking after this important phase of collecting.

This article, the third of a series on retailing accounting systems, tells how a Western Canada hardware firm handles all charge accounts, and in addition, keeps a close tab on all C.O.D.'s.

The details have been secured from J. L. S. Hutchinson, of the Saskatoon Hardware Co., Saskatoon, Sask., and explains the system used by the above firm.

The system was put into use about two years ago, and has proven very satisfactory.

The Forms Used

The accompanying illustration is a reproduction of a page from The Saskatoon Hardware Co.'s counter cheque book, and shows the top sheet, No. A-3750. This form is made up in quadruplicate. The top sheet is yellow in color, while the other three are green, yellow and white tissue.

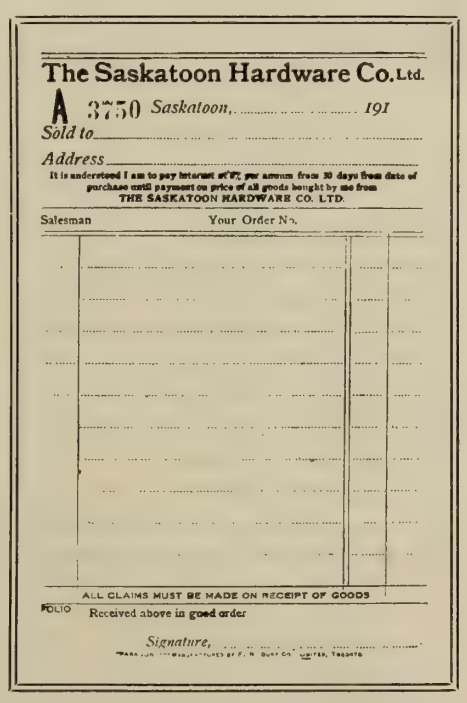
The top sheet or original charge is posted direct to the ledger, the copy is mailed to the customer once a week, except in the case of farmers or accounts that are only rendered monthly, and these are rendered at the end of the month.

The tissue paper form is used for deliveries around the city, and is left with the parties who receive the goods.

The green form is signed for at the time the goods are delivered, and is taken back to the store by the driver, as an evidence that the goods have been delivered in good order. Mr. Hutchinson states that this works out very satisfactorily and avoids disputes and misunderstandings.

Interest On Overdue Accounts

The reader will note that on the original slip (as shown in the accompanying reproduction) there appears the following: "It is understood I am to pay interest at 8 per cent. per annum from 30 days from date of purchase until payments on price of all goods bought by me from the Saskatoon Hardware Co., are paid." The slip, when signed by the person who purchases the goods over the counter, forms an agreement and cannot be disputed in the law courts. This goes a long way towards avoiding disputes over accounts and also has a tendency to create promptness in settling accounts at the end of thirty days.



The Saskatoon Hardware Co. Ltd.

A 3750 Saskatoon, ... 191

It is understood I am to pay interest at 8% per annum from 30 days from date of purchase until payment on price of all goods bought by me from THE SASKATOON HARDWARE CO. LTD.

Salesman Your Order No.

ALL CLAIMS MUST BE MADE ON RECEIPT OF GOODS

FOLIO Received above in good order

Signature, ...

A sheet from the counter check book of the Saskatoon Hardware Co. These sheets are in quadruplicate, consisting of two yellow, one green, and one white tissue paper sheet. The entries are written on the top sheet and carbon copies are made on the three additional sheets. Note provision made for signature of receiver of goods, order number, salesman's initials, and other features explained in the accompanying article.

Posted in Bulk

These invoices are posted in bulk in the sales ledger, giving the invoice number and amount. Referring to this phase of accounting, Mr. Hutchinson stated, "We do not post them in detail any longer as we find it is not necessary, and in this way we save considerable time and expense.

Each Transaction Registered

In order to keep a strictly accurate record of each transaction, a cash register called the "triple printer," is used. After an entry has been made in the counter check book, the two top slips are torn out and put through the cash register. This shows on the slips, and also on the cash register, whether the item is a cash item, C.O.D. item in or out, also gives the number of the clerk, the day, month and year, the consecutive number and the year, which is an absolute check on every transaction which goes through daily.

The slips are numbered consecutively, so that if a slip is destroyed or lost, the error can be detected.

A very complete record is kept of C. O.D.'s out and C.O.D.'s in, through the cash register so that it is almost impossible to make mistakes, or for any leaks to take place.

All C.O.D.'s that go out whether they be in the city or out of town are registered through the machine, although the amount is not included in the total of the machine; when the C.O.D.'s come in they are registered in, and the amount registered in adds in to the total, which keeps the cash straight. By this method, if an amount goes out C.O.D., it must be accounted for automatically.

Mr. Hutchinson believes that one of

(Continued on page 27.)

To Sell Fifty Cars in 1916

Hardware Merchant in a Small Town Contracts for Fifty Cars for 1916—Two Billion Dollars Spent on Autos in Six Years — Immensity of Field for Sale of Auto Accessories

FORTUNES have been made, giant mercantile institutions established, and small paying businesses developed into huge successes, by men whose foresight has enabled them to size up changing conditions in the business world and the future needs and demands of the public.

Two years ago a hardware merchant in an Ontario town, foresaw the possibilities for sales of automobiles to farmers in the community. The merchant felt sure that within the next few years sales of automobiles were going to be made to farmers, in large numbers. Farmers need cars, both for business and pleasure, just the same as city people, and the farmers have the cash to pay for cars.

Sold Twenty-Five Cars

Taking advantage of an opportunity, the merchant got busy, worked the town and surrounding district thoroughly, and during the season sold twenty-five cars. The same merchant expects to sell fifty cars in 1916.

This merchant made a very fair margin of profit on the cars he sold, but that was not all. He now has a steady demand for oils, greases, spark plugs, tires, dry batteries, wrenches, tools, cements, polish, wax, electric bulbs and other articles which need replacement from time to time.

Another hardware merchant who has built up an exceptionally successful hardware business during the past eight years, owes a great deal of his success to his ability to foresee the possibilities for sales of new lines which are constantly being placed on the market.

This merchant is located in a town of about five thousand population, surrounded by an excellent farming community.

His predecessor was a man who was very adverse to stocking any of the new fangled products which came on the market, and consequently stuck to the old-time staple lines, which although necessary in every hardware business, carry as a general rule, a very limited margin of profit. The result was that the business did not pay very well, and the older merchant was glad to sell out. The present proprietor, as previously stated, was able to foresee the needs of the public. He bought carefully, but wisely and he was soon selling electric irons, vacuum cleaners, floor wax, etc., to residents of the town. These lines had never been sold to any extent in the town before, due largely to the fact that the goods had not been carried in stock or shown to the public.

Saw an Opening

Towards the end of last year this merchant thought the opportune time had arrived for selling motor cars. He started early in 1915 to hunt up prospects and during the year has disposed of a good number of cars.

Prospects are so good for 1916, that the merchant has contracted for fifty cars, and expects to sell the bulk of the cars to farmers. Although this merchant expects, and rightly so, that he will make a good profit on the cars, he is also looking forward to the steady stream of repeat business which he will secure for the auto-accessory department of his hardware business.

SPECIAL PRIZE FOR WINDOW TRIMMERS

Next week's issue of Hardware and Metal will be the annual Christmas Goods Number, and will contain the advertisements of a large number of manufacturers who make goods suitable for the Christmas trade. In addition to the annual Christmas window display contest, in which eight cash prizes are offered, Hardware and Metal has decided to offer a special cash prize of $15, or a watch of equal value, suitably engraved, for the best window display, in which the products of manufacturers whose advertisements appear in next week's issue, are used. This does not mean that only goods featured in the advertisements next week can be used. There is no restriction as to the goods shown in the displays, as long as they are the products of firms whose advertisements appear in next week's issue. A special announcement will appear in next week's issue (Nov. 27). Watch for it.

Another hardware merchant in a Western Canada town of five hundred population, sold fifty automobiles to farmers in one season. He too, is doing a big business in auto accessories.

These three cases have been cited, simply to show what some hardwaremen are doing. Dozens of similar cases could be quoted to show how hardwaremen are selling automobiles in rural districts.

And in order to show how rapidly the demand for cars is developing in rural districts, it will be interesting to note that in one month (August) the sales of cars, by one prominent maker, in rural districts, were 222 per cent. greater than during the corresponding month of last year. This demonstrates the ever close relation between successful crop conditions and motor car sales—and also auto accessories.

In addition to the hardwaremen who are selling automobiles, there are hundreds of sales agencies, garages, etc., scattered throughout the Dominion—all busily engaged in selling automobiles, both in city, town and country.

Statistics gathered last year show that during the six years from 1909 to 1914 the total retail sales of cars in America amounted to two billion dollars.

If this amount of money was spent on cars, millions of dollars must have been spent on upkeep, extras, oils, greases and accessories of every description.

During the past few years, hundreds of hardwaremen in Canada have been forging right ahead in the automobile and accessory selling game.

On the other hand, there are merchants who do not appear to have realized the immensity of this industry.

In some cases, there are merchants who have an idea that auto accessories are sold largely by firms selling automobiles, and by garages. It is true that the garages are doing a large business in accessories, but it is equally true that there are hundreds of hardware firms who do not sell automobiles, or conduct garages, but who do sell auto accessories —and on a large scale.

Most of these firms started handling accessories in a small way and have gradually expanded until their business in auto accessories reached large proportions.

A representative of Hardware and Metal recently completed a tour of Eastern Canada, and in his travels called on hundreds of hardware firms.

Although he found that auto accessories were being carried in a good many stores, he was greatly impressed by the exceptionally large number of hardware merchants who expressed their intention of adding auto accessory departments in the near future.

In Western Canada, the hardware trade took up the auto accessory line much more quickly than the trade in Eastern Canada.

Present indications are that 1916 will prove a record year for sales of both automobiles and accessories.

Danger of Steel Famine in Canada?

Action of American Corporation has Direct Bearing on Canadian Trade—Danger of Famine if Munitions Demand Continues—Effect Would be Very Widespread—Comparative Prices

THE recent developments in the steel trade have been such as to cause considerable apprehension as to the future of the market for that and kindred metals and their products. For some weeks there were steady advances accompanying the increased volume of business as the result of munitions orders and a revival of domestic consumption in the United States and, to a less extent, in Canada. The big American mills recorded heavier and heavier bookings and advanced their delivery dates from weeks to months. But it remained for the action of the Canadian selling organization of the United States Steel Corporation to bring the Canadian market face to face with the serious nature of the situation, when last week the announcement was made that prices had been withdrawn and that business negotiations had been practically suspended for the time being at least.

In order that it may be at once established that this action of the big American steel concern has a direct bearing upon the Canadian trade, it need only be stated that on the day of the withdrawal a paper was delivered in Montreal prepared by Col. Cantley, the president of the Nova Scotia Steel Company, in which he pointed out that even in the banner year of 1913, Canada imported half of her steel from the United States and made the observation, which may be taken as a serious prophetic one, that there was danger of a steel famine in Canada in the event of the munitions demand being continued.

The action of the United States Steel Company does not indicate a real shortage for the present, as the majority of requirements for some months have been booked, but, with the prospect of large munitions orders to be given out at Ottawa and a continued growing demand in many other directions, there is certain to be competition for supplies which will have the effect of driving prices to higher levels. Every effort is being made to increase both the American and the Canadian production, but it is doubtful if this increase will keep pace with the rapidly growing demand; the withdrawal of prices may be taken as an indication that there is a serious danger that it will not be.

The effect of a steel famine would be very widespread in the different branches of the metal trades, and there are few lines of hardware that might not be eventually affected. The action of the United States Steel includes all their products with the exception of tubes and pipe and some railway materials for switches and crossings. Already in the upward movement, however, both tubes and pipes have been affected. Sheets, wire, nails, and the different brands of steel, including mild, sleighshoe, tire, toe calk, etc., etc., are directly concerned and further advances are to be expected, while eventually a continuation of the high market would have the effect of advancing the many lines of manufactured articles into which steel enters.

Even more widespread, however, may be the influence, for there is a feeling in the trade that the tendency of steel will be followed in many of the other metal markets. Altogether the oldest of the Canadian metal houses state that there has been nothing in their history which they could use for precedent or even a basis for comparison. The future is vague and altogether uncertain.

COMPARATIVE PRICES—MONTREAL BASIS.

Movement is Recent

The developments in the steel situation have been comparatively recent and they have presented another of those unforeseen and surprising situations which have resulted from the great war and the attendant upheaval in world industries. For a period after the war broke out the steel situation was very much depressed. The domestic consumption fell to low levels with the railroads buying but little. The war consumption was apparently not considered as an important factor. In fact, such were the influences that prices declined and, as will be seen from the accompanying table, they were lower a year after the war broke out than when the great conflict started.

Within the past few weeks there has been a great change. The manufacture of munitions has finally made itself felt in the consumption of steel and not only is there the war consumption to contend with, but in the United States, and to a less extent in Canada, there has been a revival of the domestic demand. The result has been that the great U. S. Steel Corporation finds its books filled up with deferred orders to such an extent that Canada has been cut off for the time being. There have been several advances in prices accompanying the buying movement and, if the demand continues in volume greater than the production, in both countries rising values are the logical developments.

War and Other Metals

In connection with the accompanying table, showing the position of steel and other metals and metal products when the war broke out, one year later and at the present time, it is interesting to note the different course taken by other commodities. This is not an effort to trace their movements but to give their position at the different periods. There were

(Continued on page 34.)

Talks of a Selfmade Merchant to his Clerks

Each Salesman Asked to Increase his Sales $25 Per Week—How Carelessness Affected Sales—How Many Sales are Being Lost?

THE improvement in business during the past two months has been decidedly encouraging. October sales have shown a splendid increase over those of the corresponding month of last year. It looks as though business is going to show a steady improvement from now on.

November business so far has been brisk. The recent cold snap has stimulated the demand for cold weather goods, heating equipment, etc., and there should soon be a very fair movement in Christmas gift lines.

We must not, however, lose sight of the fact that we will have to plug hard in order to make a favorable showing at the close of the year.

The slackness in the building trades has hit us pretty hard this year. Had it not been for the fact that we have worked hard to offset the losses in the builders' department, by pushing other lines, our sales would have dropped to a very low level. I have noticed of late that one or two of our men, evidently believing that prosperity has returned, have fallen back into a rut, and have not been making their efforts felt as they did a few months ago. At that time business was quiet, and we were all working hard to keep our sales up to a high level. Now, the point I want to impress upon you to-day, is that there is plenty of business to be had if we only go after it. Suppose that each man by working hard, could increase his sales $25 per week, each week from now until the end of the year. That would mean an increase of $150 for each salesman. We have six salesmen who should be able to do this easily. If they do, it will mean an increase of at least $800 in our sales during the next six weeks.

But that is not all. I feel reasonably sure that if each salesman tries to increase his sales $25 per week, his increase will probably be double that amount.

We cannot afford to fall into a rut. commercial reports show that most of the firms which have assigned recently, are firms that had fallen into a rut. When times were good, enough business came their way to keep things running. When business became quiet and the general public, began to tighten up the purse strings, these firms did not kick themselves into action. They remained in the same old rut and wondered why business had gone to the dogs.

The Kicker

I recently read an article which stated that kickers are said to be useful as instigators of progress.

They are, provided they kick against stagnation—"innocuous desuetude" as Grover Cleveland so eruditely phrased it.

But the most valuable kicker of all is the self-kicker—the automatic disturber of self-satisfaction. One of Nature's immutable laws is change. Nothing stands still. This is as true of a man as of a rock or a river or a tree.

Physiologists tell us the entire human body renews itself every seven years. Some part of us dies every second. It is replaced by another molecule which is either stronger or weaker — never the same.

Thus, habit or falling into a rut spells degeneracy. Habit seems to be doing the same thing always the same way. Really it means doing the same thing each time a shade less efficiently because no better.

Thus we come to the self-kicker, the man who is never satisfied with the way he did a thing nor what he was the day before. His ambition ever spurs him on to progressive action. He fights constantly against habit—the deadly "rut" disease. He knows that once a man surrenders to thoughtless, automatic habit, he has become ripe, and that ripening is the prelude to decay.

Self-kickers are rare and come high. All others pay to be kicked out of the financial rewards they are physically and mentally capable of earning but do not earn.

The moral to this is that we should watch our work with an eye keen to detect flagging energy, and then use the spur, and kick ourselves into 100 per cent. activity before the greased plank starts us gently on the road to inglorious mediocrity.

Going After Business

There is plenty of business for us in this community if we go after it the right way.

We must go after it more aggressively. Of late, we have fallen into a rut. Our window displays have not been as attractive as they should be.

Our newspaper advertising has very often been allowed to run two or three weeks in succession. This is bad business. Our ad. should be changed at least once a week. Our window displays should be changed every week.

About a year ago, as you know, we installed six tables, and placed them down the centre aisle of our store featuring household hardware at prices ranging from 5c to 25c. For several months we picked up a large amount of extra business as a result of customers buying from these tables. We are still selling goods from the tables, but the sales are few and far between. How do you account for this? I believe it is simply because we have not looked after the tables properly.

Out of Season Goods

Look for example at the 10-cent table. On the table we are still showing fly swatters, fly traps, hose couplings, hose clamps, scythe stones, hammock hooks and several other lines which are unseasonable.

At this season of the year we should be showing canvas gloves, flue stoppers, stove pipe collars, stove pipe enamel, lantern globes, lantern burners, putty knives and dozens of other seasonable lines.

The same rule applies to all the other tables. Examine them all and you will find that at least 25 per cent. of the goods on display are unseasonable. This I believe accounts for the falling-off in sales from the tables.

Losing Sales

Just in closing, there is another mat-

ter I would like to refer to. The other day one of our men was showing a lady our line of washing machines and wringers. I noticed that he did not make a sale. What was the reason?

Yesterday one of our men had an enquiry for prices on mechanics' tools but no sale was made.

To-day a lady customer asked to see weatherstrip. She had the sizes of the doors, windows, etc., with her, but she did not buy. I saw another lady customer looking at varnish stain. She appeared to be greatly interested, but she did not buy.

These observations have been made within the last three days, and caused me to wonder how many sales we lose in the course of a year, and why we lose them. I know that in some cases, enquiring customers are not in a position to place an order on their first visit, but it seems to me that altogether too many customers are passing out without buying.

If there is anything wrong with the lines we are offering for sale I would like to know of it. If our stock is incomplete, it is very important that we should have the defect remedied, and not lose sales as a result of not having the goods we stock. If it is the fault of our salesmen it is up to them, to find out their weaknesses.

Don't console yourself with the idea that when a customer goes out without buying, that he will come back—a large number of such customers do not come back, and the sale is lost as far as we are concerned.

If we lose one customer or sale a day we lose 300 or more in a year.

From now on a very close record is going to be kept of the sale of each clerk. I will have more to say regarding this at our next conference.

CASHING IN ON C.O.D.'S.

(Continued from page 23.)

the biggest risks in retail business, is loss through careless handling of C.O.D.'s, and the proprietor very often does not know whether he gets all of the money or not.

Mr. Hutchinson has tried to eliminate all danger from losses of this nature.

Steamer Refloated

Despatches from Quebec are to the effect that the steamer Lady of Gaspe, which was wrecked a few weeks ago in the Louise Basin, has been refloated, and has been handed over to the Wrecking Commission by the harbor superintendent. Montreal hardware wholesalers have been considerably interested in the wreck, as there were a number of substantial shipments on board which had to be replaced.

Christmas Window Contest

FOR many years past it has been customary for Hardware and Metal to conduct a Christmas window display contest each year. The contest has become an event of wide interest for all Canadian retail hardwaremen interested in window trimming, and each succeeding contest competition has been keener and each year has seen a wider and more representative response culminating in the big success of last year.

In accordance with past custom, two contests will be conducted this year—one for stores in places under 5,000 population; the other for places of 5,000 and over. No restrictions will be set on the style of display or the goods used in the arrangement, except that each window must be arranged with goods for the Christmas trade.

Eight prizes will be offered as follows:—

PLACES OF 5,000 AND OVER

First Prize	$10.00
Second Prize	5.00
Third Prize	3.00
Fourth Prize	2.00

PLACES UNDER 5,000

First Prize	$10.00
Second Prize	5.00
Third Prize	3.00
Fourth Prize	2.00

Contestants will note that an equal number of prizes are offered to the small town window trimmer as to those in the larger towns and cities. The prize winners in last year's contest were: Places of 5,000 and over, first prize, H. W. Parr, Sommerville Hardware Co., second prize, Chas. Buford, of the Bond Hardware Co., Guelph, Ont.; third prize, R. T. Thornhill, of P. Hymmen Co., Berlin, Ont.; fourth prize, Fred. J. Mills, of the Mills Hardware Co., Hamilton, Ont.

Places of 5,000 and under:—First prize, W. A. Evans, of D. Leckie, Kelowna, B.C.; second prize, John F. Bingham, of Binn's Hardware, Newmarket, Ont.; third prize, Carter Bros., Picton, Ont.; fourth prize, A. L. Shiells, Kincardine, Ont. In addition to the prize winning displays last year there were a great many displays which only fell a little short of the standard set by the prize winners.

Since last year's contest a good number of new hardware window trimmers have developed in the Canadian trade and this year's contest promises to be one of the keenest ever held. As Hardware and Metal's contest is the only annual hardware window display contest held in Canada, the results are followed closely by all branches of the trade throughout the Dominion.

Hardware window trimming has advanced wonderfully in Canada during the past few years and in every international competition held in recent years Canadian hardware window trimmers have secured a good number of prizes.

The contest closes on Friday, December 31. No photos received after that date will be entered unless there is proof that they have been delayed in transit.

All matter should be addressed to "The Editor, Hardware and Metal, 143-153 University Avenue, Toronto," and marked "For Christmas window contest."

SEE SPECIAL PRIZE ANNOUNCEMENT ELSE WHERE IN THIS ISSUE

HARDWARE & METAL

CANADA'S ONLY WEEKLY HARDWARE PAPER

Vol. XXVII. TORONTO, NOVEMBER 20, 1915 No. 47

SPECIAL PRIZE OFFERED

HUNDREDS of hardware window trimmers in all parts of Canada will be interested in an announcement of a special prize which is being offered by Hardware and Metal.

Some weeks ago the annual Christmas window display contest of Hardware and Metal was announced. This contest will be conducted as usual, as indicated by the announcement elsewhere in this issue. In addition to offering eight cash prizes in the annual Christmas window display contest, Hardware and Metal has decided to offer a special prize of $15 cash, or a watch of equal value, suitably engraved, to the Canadian hardware window trimmer who sends in the best window display of goods made by manufacturers whose advertisements appear in next week's issue of Hardware and Metal.

No restrictions will be placed on the goods to be shown in the window displays as long as they are the products of firms whose advertisements appear in next week's issue.

Each contestant will be expected to send in, along with photograph of the window display, a list of the articles appearing in the display, and also the names of the manufacturers of the goods shown.

It might be explained here, that next week's issue of Hardware and Metal will be the "Annual Christmas Goods Number," and will contain, in addition to appropriate editorial matter, the advertisements of many manufacturers, featuring goods suitable for the Christmas trade.

Hardware window trimmers should watch for next week's issue, in which an announcement giving complete details will appear. Remember the date, November 27.

ACTIVITY IN METALS

AFTER a period of comparative quietness the market for ingot metals has become very active, due entirely to conditions prevailing in the primary markets.

For some weeks there was only a slight variation in prices and the market was dull, the tendency, however, has always been towards higher prices. The market recently has been in a healthy condition and more or less free from the speculative element; there are, however, indications that with the increased activity, manipulation may develop.

Conditions prevailing in the metal market at the present time are, of course, abnormal, and the enormous demand for some metals, such as copper, antimony and lead, and in a lesser degree spelter for brass, has created a situation in which high prices are inevitable. Increase in production, above normal, is perhaps the only thing that would tend to keep prices within reasonable limits, but even this has failed, which is clearly shown in the prices now ruling.

It is thus difficult and at the same time perhaps unwise to predict what levels prices of the more active metals will reach. Taking everything into consideration, copper has been remarkably steady and there are no indications of a wild market. Consumption of this metal increased rapidly, but producers increased their output until the demand could be taken care of and are now said to be in control of the market.

The tin market has suddenly become nervous, owing to the submarine menace in the Mediterranean and will probably remain in this condition until the possibility of ships being lost has been removed. In any event, considerable delay will be caused to shipments of tin from the far East and spot metal will be high in proportion to futures.

The spelter situation is considerably easier than it was some months ago and the market is in a more healthy condition and firm. Zinc ore has recently advanced sharply, being quoted as high as $110 a ton, St. Louis. Zinc at $100 was at one time considered phenomenal.

Lead continues to move upward and is in strong position. There is an enormous amount of lead being consumed in munitions alone, so it is within the range of possibility that the market will go higher, especially in view of the fact that prices recently have been on a conservative basis. Antimony, another war metal, has been very steady for several weeks and only lately became at all active.

The reason for this is not hard to find, as the consumption of this metal has been very heavy since the war started and there has been a scarcity for some months.

The British Government has to all intents and purposes got control of the antimony market which will to a large extent account for the steadiness. There has been for some time a scarcity of aluminum and supplies are practically unobtainable locally. This metal, valuable for war equipment, is in great demand and production cannot keep pace with consumption, resulting in the present high price which is nominal.

NOTE OF WARNING

MANY more important advances in the price of steel products have taken place during the past week, indicating that the steel market it still on the upward trend. It has been stated in previous issues of this paper that the conditions which have prevailed for some time past, are unprecedented. The present condition of the steel market is an entirely new one and precedents do not count precisely. The *American Metal Market,* in referring to the steel trades pace, states that it is conventional that a "note of warning" should be sounded when the steel market gets to advancing rapidly. Here and there one encounters this note of warning now, but those who preach conservatism are certainly a very small minority indeed. Often one finds truth in the adage that majorities are always wrong, but of course there are limitations. The majority of the people in the United States have believed in the Declaration of Independence for quite a long while, but that does not prove they are wrong.

While a sharply advancing market is always a dangerous one, whatever the market, there are distinctions to be drawn. When the steel market proceeds as it did in 1909 and 1912, piling up forward contracts, with perhaps none too large a volume of actual specifications, there is danger.

When, as in the present market, the business done is trending more and more towards specific business, and away from open contracts, there is a very valuable compensation. The specific business is not at all likely to be canceled.

There is another point in this market that is in its favor, and that is that if consumption is curtailed by high prices, as it certainly will be at points, the demand may back up so as to support the market if it turns to a decline.

Hitherto the steel market has never started declining without running its whole course. This time, wherever the top point, the decline may be only fractional. The present pace of price advances is one that cannot be maintained indefinitely. It is a new condition, and precedents do not count, but the overriding of precedents can proceed only so far. It is yet to be seen where the limit will be found.

THE PROOF OF THE—PREDICTION

THE proof of the pudding is said to be in the eating and the proof of the prediction is in the fulfilment thereof. Hardware and Metal does not desire to pose as a prophet—nor yet the seventh son—but if by proving that a forecast as to market tendencies has been correct, we can thereby emphasize a repetition of the advice thus given the trade, we may perhaps be forgiven for once, overcoming our editorial modesty. If the reader will turn back to his copy of this journal of October 30, he will find an editorial article headed "On Being Caught Short." This article propounded the question as to whether the policy of commercial conservatism which has been generally followed for the past year or so had not been carried too far—in other words was the trade prepared to take advantage of that revival in business which it confidently expected. We argued in the first place "yes" and in the second place "no" and we believe that the developments since have justified those arguments.

Aside from the market changes which have followed, which have all been in an upward direction and have included such lines as sheets, pipe, waste, oakum, pitch, roofing, gasoline and benzine, hinges, turpentine, linseed oil, all kinds of steel, and several of the leading metals, etc., etc., we would desire to draw the attention of the reader to the fact that the theory has been unmistakably sustained in the action of the whole steel market as evidenced by the action of the United States Steel Corporation in withdrawing quotations to the Canadian trade. The principal point we made two weeks ago was—and we will quote—"With a fair inquiry from the consumer the volume of business is likely to spread through the retail and wholesale trade, where stocks are short, and the manufacturers will not be able to meet it and promptly fill their war contracts." Just this, exactly, has happened in the steel trade. Filled with war orders the manufacturers have had to face a big demand, largely in the United States 'tis true—for domestic wants, with the result that, from being deferred to months in advance, new Canadian orders have been suspended—for the time being at least.

Steel is such an important factor in the hardware trade than anything like a famine in that and kindred metals—and a famine is quite possible with Canada depending upon the United States for about half her supply—will have far reaching effects. Already the advances are being recorded in products of the metal and the finer manufactures thereof will undoubtedly be involved as the present stocks are exhausted, especially with a return of a normal domestic demand. The actual problem is one of the future and it may be met by increased production but all indications are now that there will be shortage and with such prospects higher prices are the logical consequence.

Ad Suggestions for Retailers

The Advertising Suggestions Below Have Been Prepared For Use by Readers of Hardware and Metal. The Suggestions Can be Used in Whole or in Part, as Desired. Retailers Can Insert Their Own Prices Under the Various Headings

Splendid Values in Winter Goods

Only four, of hundreds of seasonable articles carried in our store, are featured in this advertisement. If you need heating equipment, glass, interior paints, tools, cutlery, building materials, kitchen utensils, sporting goods or any one of the many lines carried in a hardware store, we would like to have an opportunity of serving you.

STOVE BRUSHES

WINTER MITTS

GOOD LANTERN

OIL HEATERS

We sell an oil heater that will not smell or smoke. It is guaranteed to heat a large room in a short space of time, is safe, easily kept clean, and burns only a small quantity of oil per hour. Ask for booklet. Prices, $5 to $7.

Stove brushes are used at this season of the year more than at any other. We sell well-made, high quality brushes at prices ranging from 20c upwards. We also carry stove polish and stove pipe enamel in cases, ranging in price from 10c upwards.

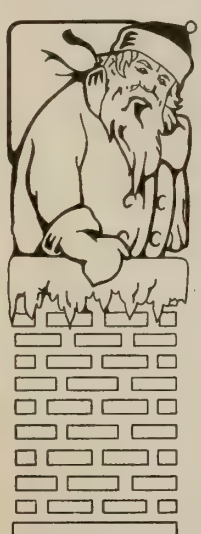
For cleaning out furnaces, sifting ashes, snow shovelling, etc., canvas gloves are ideal and the price is only 10 cents per pair. We also have a wide range of lined and unlined leather mitts ranging in price from 25c to $1.50.

A poor lantern is a menace to life and property. A good lantern is your best friend on a dark night. We sell a large size, non-leakable and non-smoking lantern, guaranteed to stand in any wind, strongly constructed, patent extinguisher and many other features, for only 85c.

Stoves and Ranges, Paints, Cutlery, Auto Accessories

Phone 100 **The Blank Hardware Co.** **75 Main St.**

Christmas Buying Has Commenced



Why have discerning buyers of Xmas gifts started making their purchases almost a month earlier than usual?—because they know that there will be a scarcity of many lines of goods formerly imported from countries now at war. The early buyers this year are the ones who are going to have first call on available stocks. Right now, we have a complete selection of many lines which we will be unable to replace later on. This is particularly true regarding our stock of cutlery. Make your selection now, pay a small deposit and we will hold the goods for later delivery. A few suggestions follow:—

Steel Table Cutlery	Cold Meat Forks	Electric Lamps	Guns and Rifles
Silver-Plated Cutlery	Fruit Spoons	Skates and Snowshoes	Tool Sets
Pocket Cutlery	Scissor Sets	Hand Sleighs	Vacuum Cleaners
Carving Sets	Sewing Sets	Toboggans	Carpet Sweepers
Fish Sets	Manicure Sets	Electric Irons	Food Choppers
Fruit Knives	Chafing Dishes	Electric Toasters	Alarm Clocks
Butter Spreaders	Bread Trays	Chafing Dishes	Guns
Pickle Forks	Butter Dishes	Electric Flashlights	Bread Mixers
Butter Knives	Candlesticks	Electric Grills	Stoves
Sugar Shells	Cut Glass	Auto Heaters	Washing Machines

Phone 100 **The Blank Hardware Co.** **75 Main St.**

Electros Used on Above Suggestions Were Taken From Hardware and Metal's Electro Service.

Making Show Cards Doubly Attractive

By Using Illustrations Taken From Advertisements in Hardware and Metal, Show Card Writers Have Overcome a Former Difficulty—Three Attractive Show Card Suggestions.

By T. O. CRAWFORD

WHY do the best window trimmers always use attractive display cards along with window displays? There are several reasons.

One reason is that an attractive show card will always cause the person viewing the display from the outside of the window, to pay particular attention to the article specially featured on the card.

Another reason is that attractive show cards always improve the appearance of a display.

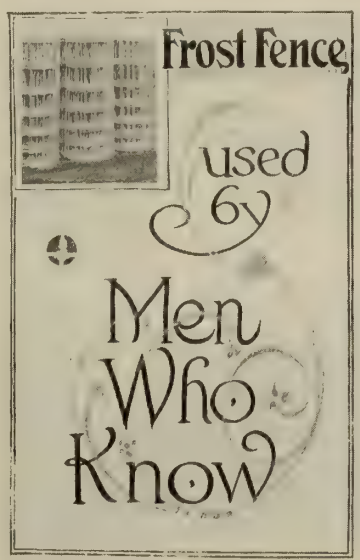
Department stores, chain stores, syndicate stores, etc., use window show cards extensively. Men are employed, whose special duty is to prepare up-to-date show cards for use with window and interior displays.

In the department stores where many of the displays are changed daily, new cards are needed almost every day.

Show Cards Pay

That show cards pay, is proven, by the fact that most of the large department stores employ expert card-writers at high salaries, and they are kept at work the year round.

The average hardwareman cannot afford to hire a special show card writer, but this does not necessarily mean that the hardwareman cannot have neat and attractive show cards for use in his window displays. In almost every hardware store you will find at least one or two clerks who are able to do a certain amount of lettering.



The illustration used in preparing the above show card suggestion was taken from an advertisement which appeared on the outside front cover of last week's issue of Hardware and Metal.

Many cardwriters have developed in the ranks of the retail hardware salesmen during recent years, as a result of the special courses on "showcard writing made easy," which have appeared in Hardware and Metal.

How to Secure Illustrations

One of the chief difficulties, always encountered by retail hardware salesmen, was that of securing suitable illustrations for use on the show cards. They could do the lettering, but many of them were stuck, when it came to making a drawing.

The experts employed by the department store could make the drawing because that was part of their business, but the hardware salesmen, except in a few cases, were up a tree when it came to drawing.

It is not to be wondered at, therefore, that when the suggestion was first made by Hardware and Metal, that the illustrations be taken from the advertising pages of Hardware and Metal, many window-trimmers "caught on" immediately. The result has been, that the show card suggestions offered in this paper have been followed closely.

Three Suggestions

The three accompanying illustrations show three show card suggestions, in the preparation of which, illustrations from the advertising pages of Hardware and Metal have been used.

A description of how these cards were made will provide details that should be of great assistance to window trimmers who wish to follow out the suggestions.

The illustration used in preparing the "Frost Fence" card was taken from an advertisement on the front cover of last week's issue of Hardware and Metal. The illustration was cut from the advertisement and pasted on a sheet of white cardboard 10 x 14 inches. A ruled black border surrounds the illustration and covers up all traces of where the illustration was pasted on.

All lettering on this card was made with a No. 5 red sable brush. It is not absolutely necessary that a brush be used

(Continued on page 41.)

The illustration used in preparing the above show card suggestion was taken from an advertisement on page 11 of the November 13 issue of Hardware and Metal.

The illustration used in preparing the above show card suggestion was taken from an advertisement on the inside front cover of the November 6 issue of Hardware and Metal.

What Other Papers Say

Items of Interest From Other Papers—In Each Instance Credit is Given to the Paper From Which the Item is Taken—In Spite of the Protested Blockade—The Rediscovery of Manners—Attracting Tourists to Canada—Steel Exports.

IN SPITE OF THE PROTESTED BLOCKADE

From American Metal Market.

DURING the first eight months of 1914 this country exported $156,000,000 merchandise to Germany. It sent $11,600,000 in the same months of 1915, a decrease of $144,400,000; but for the same period, our exports this year to Norway, Sweden and Holland (the only gateways to Germany), increased $114,800,000.

Balance of trade in favor of the United States by reason of the war for the first nine months of 1915 ending September was $1,230,390,381, our exports in that period reaching the unprecedented amount of $2,532,485,167.

That the American note will cause irritation in England is anticipated here. Reports from England have indicated that the British are now convinced not only of the legality of their sea war measures, but also that the United States ought to accept them. The British feel, according to information received here, that England is fighting in the cause of civilization and that the United States ought to be willing to suffer the loss of a little trade in the cause, especially so as we are being swamped with profits and prosperity by reason of the orders we are receiving from the Allies to carry on their fight for American ideals.

What would be the condition of business in America to-day but for the seas being kept open and free by England's naval supremacy?

THE REDISCOVERY OF MANNERS.

From the Harvester World

"COURTESY meetings," it appears, are to be organized by one of the great railroad systems of the country. It is felt that rudeness and boorishness on the part of conductors, brakemen, porters, clerks and other employes of a carrier are neither essential nor unavoidable, and that neither strenuousness nor efficiency requires the sacrifice of good manners.

If "safety first" is a good slogan, "courtesy second" is just as good. Time was in this country when busy and energetic men assumed tacitly that in trade and commerce manners were of no consequence. So long as the goods were "delivered" what did mere words matter? Why waste precious moments—which any statistican could multiply into staggering periods of time and enormous losses of money—on "please" and "thank you?" Why not leave all such empty and useless formalities to the absurdly ceremonious Latins, and show the world that business can be transacted in a downward and swift manner?

These notions have been relegated to the limbo of crude ignorance. There has been a veritable rediscovery of manners in business. Efficiency is being separated from brusque discourtesy. Statisticians to the contrary notwithstanding, a billion "Thank yous" will not "waste" a single second. Manners may take time, but they bring money instead of taking it. Politeness and affability pay.

ATTRACTING TOURISTS TO CANADA

From Printer and Publisher.

THIS thing is true: 1916 will see both Canadians and Americans spending their summer vacations on the North American continent—this, war or no war. Which fact suggests that the Federal Government, or Provincial Governments, Canadian cities and Canadian railways, individually and collectively, should plan **early**—say in December or January next—to advertise the attractions of the Dominion to the holiday-seekers of the United States, Great Britain and France—in particular, to the people of Uncle Sam's land.

It was perceived in 1914 that Americans and Canadians would have to spend their 1915 vacations on this side of the ocean; and Canada counted on getting a very heavy tourist travel from the United States. But for reasons now known, but not perceived in advance, the Americans didn't come to Canada in any large numbers.

Those concerned must advertise, and make their plans **early**, and carry through their programme faithfully. Dodging one's plain duty has a penalty attached to it. We in Canada want some of the millions our American cousins will spend in the summer of 1916, and if we want to make sure of getting the desired portion, we must pay the price—in good dollars. It is always good business to invest one dollar to get it back many times multiplied. Contrawise, there is a withholding which tendeth to poverty.

STEEL EXPORTS

From the Ironmonger (England).

SO far no confirmation has been forthcoming of the rumor that the exportation of steel from the United Kingdom may be temporarily suspended. It is believed that the authorities have the question under consideration, but that their decision will depend upon the ability of the works, under the present conditions, to meet the ever-increasing demands for Government material. The complete prohibition of steel exports would be so serious a step that it will certainly not be enforced unless it is deemed imperative. It is recognized that the equilibrium of foreign exchange is largely dependent upon the maintenance of our general export trade, and the stoppage of steel shipments could hardly fail to exercise a detrimental influence in this respect. Moreover, foreign and Colonial consumers would be driven more than ever into the American market for supplies, and it might be difficult afterwards for home producers to restore some of these connections, especially as our exports have already been restricted severely by the difficulty of securing licenses for export. Another point is the question of prices. Every additional order booked by the United States manufacturers tends to send prices further against the British purchaser, but these considerations, like everything else, must bend to military necessity. That will be the deciding factor in the situation.

Sheet Metal Workers' Course

By Chas. Sievers

THE following problem is one in which a slightly new feature is shown, there being practically three mitres.

First draw plan and elevation, as shown, making all three branches the same diameter. Lay the mitres for pieces A and B in the ordinary way, as would be necessary when developing a pattern for a two-piece 45-degree elbow.

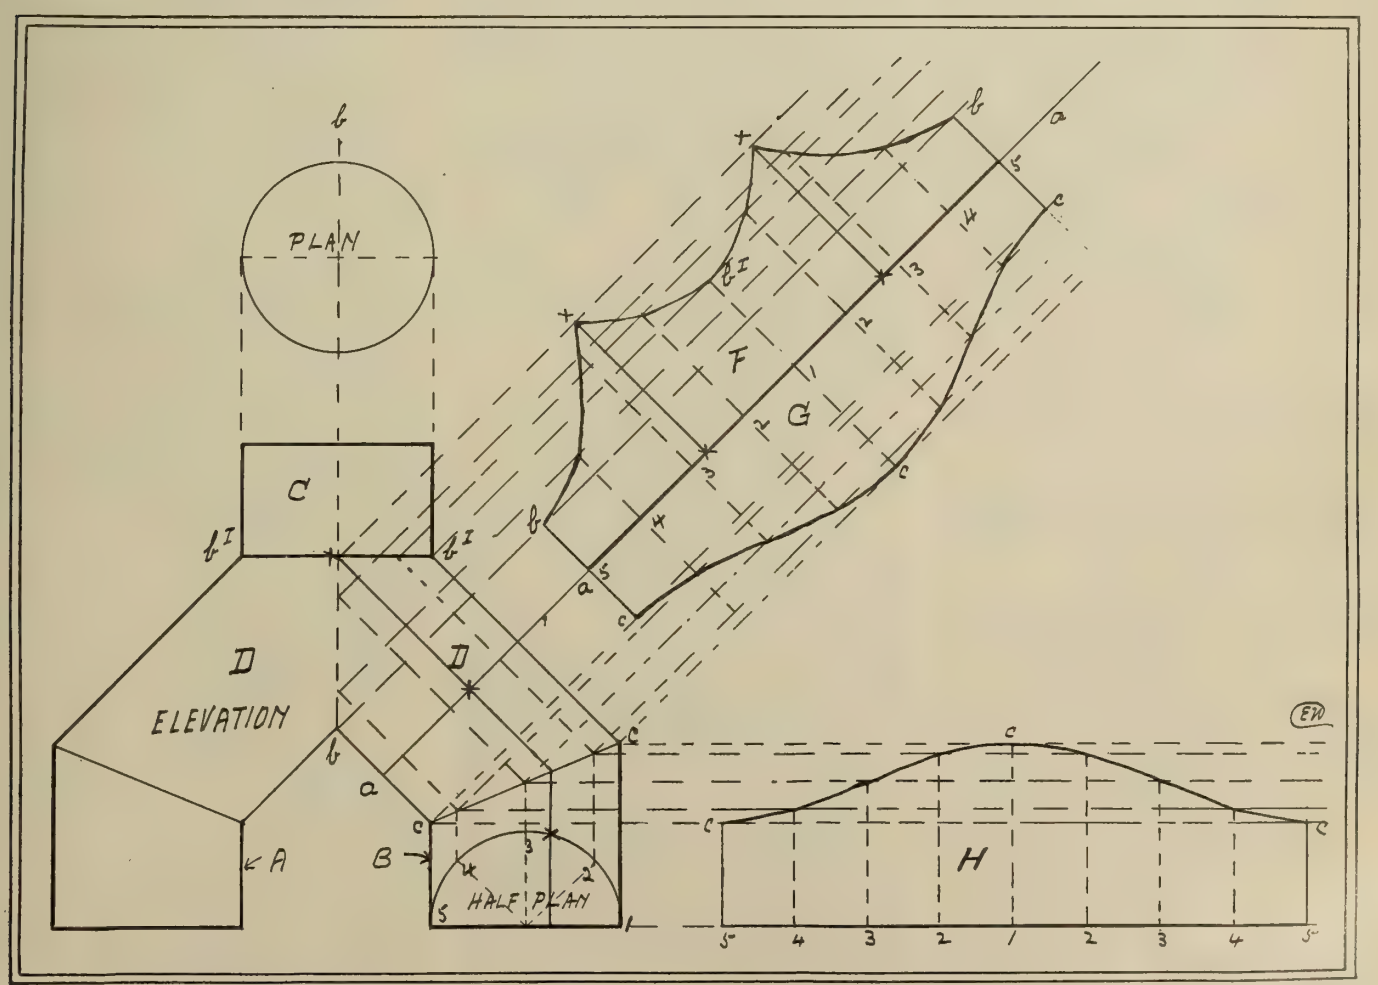
Having developed the pattern for pieces A and B, which are both alike, the next step will be to develop pattern for centre piece D. Draw a solid line through centre, as shown, at a-a, and use it as a base line. Now divide the half plan into four equal parts and extend lines as shown, cutting mitres b-b and c-c.

It will now be seen that it is necessary to depart from the regular practice followed out when plain elbow patterns are being developed, on account of there being a difference in length of the vertical mitre bx and the horizontal mitre x^1.

Now draw a line from point x on line b^1b^1 parallel with line b^1c until it intersects mitre c-c, and again down, cutting the half-plan in manner shown.

The next step will be the actual developing of pattern for centre-piece D. Divide the base line a-a into equal parts, the measurement of these parts being those shown in half-plan, 1, 2, 3, 4, 5, repeating as shown on base line the same measurements, 5, 4, 3, 2, 1. This will give the stretch-out length. Now take the compasses and lay off the measurement, as shown at x from 2, and transfer to base line of pattern. Having done this, draw a series of dotted lines from the various points until they intersect one another, as shown at the two mitres, and erect dotted lines from base line a-a until the dotted lines are all intersected. By connecting with a

(Continued on page 35.)



EVENTS IN THE TRADE

Fire Losses

Sorel, Que.—J. Berthiaume and Edouard Gauthier, tinsmiths, have been burnt out.

Ontario Incorporations

The Canadian Dove-Smith Co., capitalized at $40,000, head office Toronto, to manufacture and sell machinery, tools, etc.

Business Changes

Shelburne, Ont.—R. A. Jelly, hardware, has sold out to J. A. Yeo.

Fingal, Ont.—N. R. Pearce is putting in a stock of hardware.

Daysland, Alta.—Whyte & Orr of this town, are opening a branch hardware and furniture store at the new town of Heisler, on the C.N.R., south of here. Building operations will commence at once. The firm also has a branch store at Hardisty.

Dominion Incorporations

Cleveland Co., capitalized at $40,000, head office St. John, N.B., to purchase and use a certain secret process known as the Cleveland process for the treatment of metals.

Gunn Electric Company, capitalized at $20,000, head office Montreal, to manufacture and deal in electrical, hydraulic and other machinery.

National Toy and Novelties Co., capitalized at $40,000, head office Toronto, Ont., to manufacture, buy, sell and deal in dolls, toys, etc.

The Wizard Tire Inflator and Fire Extinguisher Company, capitalized at $50,000, head office Toronto, to make and deal in tire inflators and fire extinguishers, etc.

Annual Report of Paint Company Indicates Fair Business

Considering the depressed conditions in the building trades, which have prevailed for the past couple of years, and particularly since the outbreak of the war, the annual report of the Sherwin-Williams Company of Canada, to August 31st last, indicates that the paint industry has been holding its position fairly well.

According to statements made by Walter H. Cottingham, president of the company, there has recently been a marked improvement in paint consumption, the English company having shown an increase in sales of 36 per cent. during the months of September and October, the first months of the firm's new year, while in Canada during the same period there had been an increase of 26 per cent.

Travellers Elect Officers

At a meeting of the Dominion Commercial Travellers' Association at Montreal, officers were elected by acclamation as follows: President, R. C. Watkins; first vice-president, James Armstrong; second vice-president, Roseau Brosseau; treasurer, Maxwell Murdock. Five new members were elected directors, and they, with five from the old board, will undertake the management of the affairs of the association. These new members are Messrs. Glackmeyer, Joyce, Shea, Smith and Plante.

A meeting was also held of the Mutual Benefit Society of the association for nomination of officers, with the following result: President, M. Solomon; vice-president, W. J. Joyce; treasurer, Chas. Gurd; trustees, David Watson, Maxwell Murdock, F. S. Cote, R. Laurence and Paul Bernard.

Notwithstanding the heavy calls during the year for indemnities, amounting to $24,000, the society retains a reserve of over $14,000.

Industrial Notes

Hamilton, Ont.—The Canadian Chadwick Metal Co. are having the old Gonpf brewery building altered and machinery installed for making munitions

Gananoque, Ont.—The Ontario Steel Products Co. have received a large order for automobile springs and trench digging shovels.

Toronto, Ont.—The Canadian Hanson & Van Winkle Co. are building a brass foundry at a cost of $5,000.

Hespeler, Ont.—The Porcelain Kitchen Furniture Co. will establish a factory here shortly.

Montreal, Que.—The Standard Steel Co. has been organized in Montreal to manufacture steel products and shells. A building has been rented and will be equipped with the necessary machinery. The head office is in the Transportation Building, and the president is E. G. Jackson.

Amherstburg, Ont.—The International Safe Co., of Ft. Erie, is opening a branch here under the name of the Waugh Manufacturing Co. They intend occupying the premises lately used by the Two-in-One Auto Co., for which they have to pay $5,000 to the town if at the end of five years they are still in business and have during that five years employed at least twenty-five men. Besides manufacturing safes, they intend to manufacture counter registers, devices for accounts, etc.

Obituary

Toronto, Ont.—The death took place here after a few days' illness of Penrose J. Clemens, city salesman for the Canadian H. W. Johns-Manville Co.

DANGER OF STEEL FAMINE IN CANADA?

(Continued from page 25.)

many fluctuations in between; tin for instance going to 56c a week after the great struggle commenced.

In the price movement shown there is no stronger influence than that of spelter. Take such products as nails, galvanized wire, galvanized sheets and galvanized pipe, and it will be noted that the big advance was between August 1914 and August 1915—in other words the movement was with spelter — and there have even been some declines since. Smooth steel wire and hay wire did not advance with the movement referred to but recently they, with nails and galvanized wire, have gone to higher levels under the influence of the rising steel market.

In the metals the important advances were early and there has not been much change in the past few months although there have been fluctuations from time to time. Tin, as previously stated, had its big boom in the early weeks of the war panic but lead and the other metals reached the apex of their upward movement about the middle of June, at which time, it has later been revealed, German influences were working—with fair success—to create a panic. About the time referred to tin was 48c, spelter 30c, and lead 8c. Aluminum was then only 23c, the movement which took it to 60c and higher not having commenced.

HARDWARE LETTER BOX

McCulloch Tube Skates

M. A. Gendron, Penetang, Ont. — Please advise where McCulloch Tube Skates are made, and where we can buy them already riveted on boots.

McCulloch tube skates are made by McCulloch Skate Works, Winnipeg, Man. They can be purchased on the boots from Harold A. Wilson & Sons, Toronto.—Editor.

Flower Pots

Carleton Hardware Co., Ottawa, Ont. —Please give names of makers of clay flower pots.

Flower pots are made by R. Campbell & Sons, Hamilton, Ont.; John Cranston & Sons, Hamilton; J. W. Foley & Co., St. John, N.B.; Foster Pottery Co., Hamilton, Ont.; Medicine Hat Pottery Co., Medicine Hat, Alta.—Editor.

Wire Springs

Stove Manufacturer (name on request).—Please give names of firms in Canada making coil springs suitable for stove doors.

The Jas. Morrison Brass Mfg. Co., Toronto; St. Lawrence Steel & Wire Co., Gananoque, Ont.; Canadian Steel Foundries, Montreal, Que.; B. J. Coghlin Co., Montreal, Que.; Hutchings & Sons, St. John, N.B.—Editor.

* * *

Ridgleys Paper Hanging Tools

D. Mistele, Rodney, Ont.—Please advise who in Toronto sells Ridgleys paper hangers tools.

Ridgleys tools are sold in Toronto by H. S. Howland Sons & Co., and Sanderson Pearcy & Co.—Editor.

* * *

Thermit Welding Compound and Fuse

Wagstaff & Vestrup, B.C.—Kindly advise where we can procure Thermit welding compound and barium peroxide fuse.

Thermit welding compound, and fuse can be supplied by Goldschmidt-Thermit Co., 103 Richmond street, west, Toronto, Ont.—Editor.

Trade Inquiries

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

1175. **Bolts, nuts, etc., and also galvanised wire.**—A London trading company engaged in export trade, desires the addresses of Canadian manufacturers of bolts, nuts, screws, etc. and also of galvanized wire, of which they need supplies.

1176. **Aluminium powder.** — A large firm of paint manufacturers at Liverpool wishes to be placed in touch immediately with exporters of aluminium powder.

1178. **Wire.**—A British firm is open to receive quotations for a five-ton lot of galvanized strip. Material should be capable of being bent at right angles and opened out straight without cracking. Sample can be inspected at the Department of Trade and Commerce, Ottawa.

1179. **Wire nails.**—A British firm inquiries for quotations c.i.f. Calcutta for British on American bright dowell nails in wooden kegs on 1 cwt. net; 15 cwts. 1½-inch by 13 B.W.G.; 15 cwts. 1¾-inch by 13 B.W.G. Cheapest quality available. State earliest delivery.

1180. **Tools, woodenware, ironmongery.**—A British firm is open to purchase mechanics' hand tools; wooden handles of all kinds, dowels and washboards, and desires to hear from Canadian manufacturers of twine, nuts and bolts, screws and wire nails.

1182. **Wire Nails.**—A Belgian firm established in London for many years and formerly representing German wire nail manufacturers, wishes to take up Canadian agencies for this and similar lines. They claim also to have extensive connections in the French market.

1183. **Wood Goods.**—A London firm of importers and factors of furnishing and decorating hardwood wishes to secure agencies for Canadian manufacturers of wood goods for household use, garden novelties, etc.

1192. **Wood Goods.**—A firm in Birmingham is open to buy dowels, washboards, rolling pins and all kinds of wooden handles.

1193. **Detonators.**—A British firm is open to represent a manufacturer of detonators (fog signals).

1194.—**Belting, Thread and Cotton Waste.**—A firm of manufacturers' agents in Buenos Aires desires to purchase the following articles from Canada: Balata belting, 1½ to 12 inches in width; show and saddlery thread; white and colored cotton waste.

1195. **Brush Blocks.**—A firm in Glasgow wishes to obtain quotations for brush blocks, c.i.f. Glasgow; birch or beech, 11 inches to 13 inches by 3 inches.

1196. **Kraft Paper.**—A London firm desires the addresses of Canadian manufacturers of kraft paper similar to sample in the possession of the Department of Trade and Commerce. They would like to receive quotations for considerable supplies.

SHEET METAL WORKERS' COURSE

(Continued from page 33.)

solid line, the various points where cut, as shown at a, b, x, b, a, the pattern for the two mitres is developed.

If the person developing these patterns have a 45-degree two-piece pattern on hand, it would only be necessary to develop pattern F above the base line, because the pattern pieces G and H are the same as an ordinary 45-degree pattern.

It must be noted that no allowance has been made for seams.

Geo. A. Ingram, of Ingram & Davey, St. Thomas, Ont., has been elected to the Board of Education.

Kingston, Ont.—Fire did $2,000 damage to the hardware warehouse of Edwin Chown & Son.

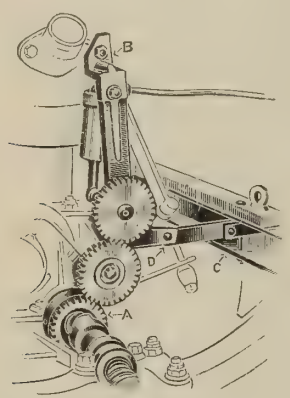
OFFERED TO CANADIAN HARDWAREMEN

JULECO F. PUMP

Judd & Leland Mfg. Co., Clifton Springs, N.Y., offer to the trade a new pump which they have adapted to the Ford car.



The Juleco power pump for Ford Cars.

The makers state that the Juleco pump is a reasonably-priced power pump for a Ford car that can be easily installed in from ten to twenty minutes. The only tools necessary are a screwdriver and wrench. The pump takes up very little room and operates behind the fan. No alterations in the car or engine are necessary, as the pump is built to fit the car. The makers state that the Juleco will pump the largest Ford tire in from two to three minutes. The whistle gauge announces when the required pressure is attained. The pump lubricates without discharging oil into tires and without heating. It can be carried in a convenient place on the engine, and weighs six pounds complete. Descriptive matter will be mailed on request.

EZEKLEEN SPARK PLUGS

The Perpetual Spark Plug Co., 330 E. Drinker Street, Dunmore, Pa., offers to the Canadian trade the "Ezekleen" spark plug, here illustrated.

The makers claim that owing to the unusual construction of the "Ezekleen" plugs, they have never been short-circuited by oil or carbon.

The insulator of the plug is drawn in the shell up against a metal ring and a metal compression tight joint is made. The insulator is held in this position while the insulator is moulded in the shell. After the assembly has been heat-treated and the insulator anchored in the shell, the pressure is removed, and there is, it is claimed, a permanent compression tight joint, without pressure on the insulator. The shell is free to expand without pressure on the insulator or disturbing the compression tight joint. The compound used to mould the insulator in the shell does not stick fast to the insulator or shell, but swells when hot and contracts when cold, causing a tight joint and no cracked insulators.

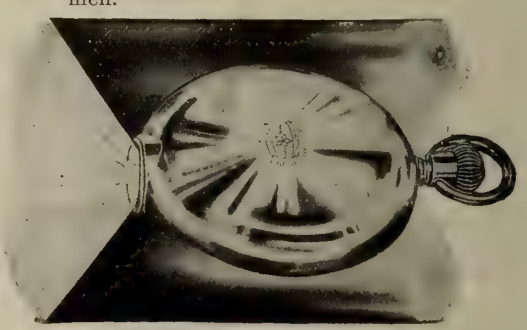
The hollow projecting insulator is in the flame at each explosion, and becomes very hot, but heat, it is said, will not crack this insulator. Oil or carbon cannot be made to stay on this hot insulater any more than it can be made to stay on a hot piece of iron. The insulator of the plug is self-cleaning.

The makers also state that there are several other important and unusual features about Ezekleen plugs. Complete descriptive matter will be mailed upon request.

Ezekleen spark plug.

KHAKI-KIT KITCHEN

A. Harry Wolfe, Government contractor, of Montreal, is placing before the trade the khaki-kit kitchen, which is expected to appeal strongly to soldiers and sportsmen. The kitchen, when closed, measures 6½ in. x 7½ in., is specially adapted for military use, having two loops which will fit the belts of all ordinary rank and file equipment. The outside container is made of sheet iron, covered with heavy waterproof khaki duck. There is also an interlining of asbestos between the duck and the metal, making the exterior absolutely fireproof. Eyelet holes are perforated around the bottom of the container, giving a direct draught to the fire, which is contained in the form of "canned heat." The burner is suspended in the container, and can be raised or lowered to adapt itself to the various utensils for boiling, frying, broiling or toasting. The frying pan, which has a folding handle, acts as a cover to the container. The outfit contains also a boiler and a mess tin, which conveniently fit into one another inside the container. The maker claims that the outstanding features of the khaki-kit kitchen, from a military standpoint, are that there is no smoke, light or reflection, and the fire cannot be extinguished by winds or other draughts, but only by smothering with the lid. There is enough "canned heat" in each tin to cook nine meals. The boiler holds one quart of water, which, it is claimed, can be brought to a boil in ten minutes. The outfit is very compact, and, the maker claims, should prove to be a boon to the men in the trenches, and should also find favor among sportsmen.



The "Watchlite."

WATCHLITE FLASHLIGHT

Bright Star Battery Co., 430 West 14th St., New York, N.Y., offers to the trade a new flashlight in the shape of a watch, called the "Watchlite." It is not a novelty, but a useful and serviceable flashlight.

The makers state that the battery used in it, No. 62-17, will give practically as good burning life as the regular 2-cell nickel-plated size and is guaranteed for the same length of time on the shelf. It is of Mars-Bright grade.

The bulb packed with the flash-

THE JUNIOR CLERK'S PAGE

From Truck Boy to President *

Walter C. Allen Has Worked for Large Manufacturing Firm for Twenty-Three Years—He Started as Truck Boy. Now He is President

WALTER C. ALLEN is thirty-seven years old. He started in with the Yale and Towne Manufacturing Company at a dollar a day. His first job was pushing a truck. Now he is the new president of the Yale and Towne Manufacturing Company. He succeeded Henry R. Towne, who recently resigned after serving for forty-six years as the active executive leader of the company he organized with Linus Yale. This company has grown steadily until it is one of the largest lock and hardware manufacturing concerns in the world.

So Walter C. Allen has succeeded in a big way. All the work he has ever done has been for the Yale and Towne Manufacturing Company. He has worked there twenty-three years. And now he is president of the company.

It is worth our while to know something about the methods of a man who sticks to one concern for twenty-three years, and ends up as the head of that concern. What is his viewpoint? How does he work? Where do his business hours go?

First of all, Mr. Allen is thorough. One of the first steps he took after they made him president was to establish a thorough-going statistical department. This department keeps him in close touch with every branch of his own industry, as well as with market conditions affecting the commodities in which his company deals. It affords him ready access to every feature of operation and maintenance in both the manufacturing and merchandising ends of the business. Trade conditions are likewise closely followed by this department. Articles by financial and trade authorities are carefully and systematically read, and each day Mr. Allen receives tabulations of the building permits issued throughout the country—these serving as a guide to the market possibilities for Yale products.

Getting through his day's work is just as much a matter of system and discipline as is the operation of the company's factories with their thousands of employees.

How Mr. Allen Watches Details and Future Work

On his desk stands a tickler file. Any matter that can be decided at once is decided at once. If it requires investigation and report it is ticketed to the person who is to handle it, with instructions as to when a reply is expected, and a tickler memorandum is put under that date.

In order to keep his memoranda distinct and separate, they are noted in purple pencil. This scheme of individual pencil colors is carried out by each department head who uses his own particular color—for instance, one blue, one red, another yellow, and still another green, and so on.

It is a rule in the Yale offices that each day every man's desk must be cleared. Nothing is allowed to accumulate, and perhaps "lose out" under a mass of papers. This rule is rigid and arbitrary—for every one from the junior clerks right up to Mr. Allen himself. Department desks must not be locked, and are always open to inspection by the department head or his deputy.

Mr. Allen is always accessible. He is not surrounded by a wall of formalism and dignity. Distinguished for definite decision, he is a good listener, and will discuss any matter thoroughly—considering other men's opinions, and giving due weight to them. But once he makes up his mind, he sticks to his own decision.

He is an easy worker; he never allows himself to become snarled up in anything that is better understood and handled by his lieutenants—and, being better understood, is better executed by them.

This shows that he puts confidence in his men and then lives up to it. He never concerns himself with the routine work of any department—keeping himself free for the bigger activities of the whole organization. Matters of department policy are clearly defined, and are carried into effect by his subordinates.

This same broad-mindedness and confidence extends to his sales force. It is his idea that by creating a sense of real responsibility and confidence in his sales force—by backing them up to the limit—he not only increases their efficiency, but increases their value in dollars and cents to the Yale organization. He puts each man on his mettle, and takes care of that man on the basis of what he accomplishes.

One little incident out of his record with the Yale organization shows that besides being thorough he looks ahead a bit.

When he was a truck-boy, he was keen enough to realize the value of special training—so he planned to get into the offices, where he could learn something about the business. He did get in through the interest of a minor official.

A Way to Plan for the Job Ahead That Won Out

He spent two years learning clerical work. But he realized that the expert mechanical workers in the plant were the ones who were making good money. And at that time, he is frank to admit, good money was his main objective. His interest centered on the toolmakers. They were specialists, so he made application for a transfer, and a chance to learn the toolmaker's trade. He got the chance; but he got a reduction in wages to seventy cents a day at the same time.

Some time after this he enlisted the co-operation of the foreman of the draughting room and got permission to use the draughting room at night. He studied mechanical drawing—thoroughly—encouraged by the foreman.

An Illustration of the Value of the Right Kind of Friends

A friendship grew up between this foreman and Allen, who was invited to his superior's boarding house evenings. Thus he got much good advice and a real grip on the designing end of the lock and hardware business. The hospitality of the foreman was warm, but the room itself was a pretty cold proposition. And the evenings during the winter that they spent together frequently were passed with their overcoats on.

The rest of his progress toward the president's chair is about as these two incidents might lead us to expect. He went on learning his own job thoroughly and planning for others ahead. He went on getting people to take an interest in him—first, F. T. Towne, son of the

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

The Markets at a Glance

THERE appears to be no limit to the advances which are still taking place on various hardware lines. Steel products are still going upward, and this week's reports indicate many advances which were predicted last week. Among the lines which have advanced this week are nuts and bolts, wire nails, galvanized wire, black sheets, pipe, hinges and butts, oakum, castor oil, dry white lead and other lines. In ingot metals advances have taken place on spelter, tin, lead, copper and other metals. These advances locally, are due largely to advances in the primary markets. In the near future, advances are predicted on boiler tubes and plates, wood screws, brass and copper products, tinned iron and other lines depending on the iron and steel situation.

Paint makers who recently reduced their prices on ready-mixed paints are now facing a serious problem, owing to the further advances which have taken place in the price of raw materials. Turpentine and linseed oil have advanced rapidly of late. Lead, after remaining stationary for some time, has recently advanced to a considerable extent and zinc remains very firm, with no signs of an immediate weakening. Retailers are now booking freely for spring delivery, and it is felt generally that paint is a good buy at present prices.

Reports from Western Canada indicate that business has improved greatly of late and jobbers report that business during the past few weeks has been much better than during the corresponding period of last year. Owing to the recent cold snap and heavy snowfalls in the West, there has been a heavy demand for winter goods, including carriage heaters, horse blankets, etc. A scarcity of some lines is reported from Winnipeg. Business generally has shown considerable improvement of late, and the recent cold snap has stimulated the demand for heating equipment and early winter hardware lines.

MONTREAL

MONTREAL, Nov. 19.—The fact of Canadian orders being turned down by American steel mills, referred to last week as a disquieting feature of the steel and iron situation, finds official confirmation in the announcement of the United States Steel Products Company, the export subsidiary of the United States Steel Corporation, that quotations have been withdrawn in this country, and this attitude will no doubt be taken by other United States producers. The result has been an upheaval in those branches of the hardware trade dependent upon steel products; the event is the most important in the history of the trade for many years. Metal merchants state that not only are their orders not accepted, but that the intimation is that their business is not wanted, and propositions made receive no consideration. Unprecedented prices may be expected on many lines and the advances already made are probably only a forerunner of others to come. There is no prospect of an immediate famine because there are substantial bookings for future delivery, but the action taken is an indication of uncertainty as to future supply, and if that uncertainty is fulfilled will be very serious; until there is assurance that future orders can be filled the prices on existing stocks must be expected to move upwards. The main point appears to be as to the ability of the steel producers to fill their war contracts and keep pace with the rapidly developing demand—at present the demand seems to be in the ascendency.

In addition to making specific mention of a number of items which were due to record advances, Hardware and Metal last week predicted that there would be an upward movement in the metals generally, as well. How well these predictions are borne out is shown in detail in the report following. The whole movement appears to be due to the placing of immense orders for munitions and to the revival of domestic demand, particularly in the United States. Canada has received heavy orders and as she is dependent upon outside sources for many of her supplies she is very much concerned.

Advances have been made in nuts and bolts, nails, galvanized wire, black sheets, galvanized sheets, black pipe, hinges and butts, heads, oakum, castor oil, linseed oil, turpentine, dry white lead, etc., while in the metals tin leads a big upward movement which includes spelter, lead, copper, antimony, aluminum, zinc, solder and nearly all old materials.

In the immediate future advances are predicted on boiler tubes, boiler plates, steel, wood screws, brass and copper products, tinned iron and other lines depending on the steel and iron situation, while solder and galvanized and black sheets are only two of the items which should be very firm on the present market. As to the metals, there are some indications that the upward movement may have reached the top and that there may be some reaction; however, no general relief can be looked for in this department while the war conditions continue.

TIN HIGHER; GOING UP.—Tin has been a leader in the upheaval of metals. Locally the price has been advanced 4c to a level of 46-46½c. Not only is the market very strong at this figure, but there are prospects for further advances in the immediate future. In outside markets there has been great excitement based on the report of the closing of the Suez Canal for military purposes. New York seems to have been chiefly influenced, and from last report to the end of last week there were advances of 8c. With the opening of the present week there has been a somewhat easier feeling on a decline on London, where the dealers do not seem inclined to be influenced by the prevailing excitement; the attitude is that the closing of the canal might cause delays in receipts, but it would not result in the actual loss of a pound of tin.

SPELTER STILL HIGHER.—Spelter continues to advance and to the increases of the past few weeks there is an addition of 2c, the present quotation being 22c to 22½c. This movement together with the rising prices for steel plates is having the effect of taking the market for galvanized sheets rapidly upward. The advance in New York since last report has been about 2½c on prompt, which makes a total rise in the market of 5c since the 18th of October, while on futures the increase in the month has been almost fifty per cent.

The cause is given in the recent increased orders for munitions, which has stimulated all metal markets and which, combined with a call for export and better domestic inquiry, has been taken advantage of by producing interests. The latter are not anything like sold up for January, but there has been such an improvement in future business lately that they seem inclined to hold on for continued high prices. However, there are indications that the rapid advance has been largely due to speculation and that the position of the market is not so strong technically as the price would indicate; in this event a break in London or profit-taking by speculators might result in a reaction.

LEAD AGAIN GOES UP.—Lead has continued its upward march, there being another ¼c advance in the local quotation; present basis being 7¼c to 7½c. There has been a like advance in the American market which is now 5¼c. There are reports that the Morgans bought 15,000 tons for military purposes and that this influenced the advance made by the Trust, while there has been a general demand by munitions makers which has sustained the market so far as the independents and the second hands are concerned.

COPPER STEADY AND STRONG.—The copper situation has been well maintained locally on the advance to 22½c recorded a week ago. Recent tendencies in the American situation have been to higher levels, a strike in one of the big refineries being a factor in the movement. However, the strike has been settled and there are indications that considerable of the recent buying has been due to manufacturers of munitions being frightened into the market.

ANTIMONY AGAIN UP.—Antimony has kept its position in the parade of metals with further advances in the week of 3c to 5c. There has been heavy buying in all markets on this side as the result of the new munitions orders. New York has not been influenced to the same extent as Canada, but still there have been material advances in that market since last report. Chinese and Japanese is there quoted at 27½c to 38½c and American 37½c to 38c; this is an increase of 1¼c to 2c.

ALUMINUM STILL HIGHER.—The aluminum market is going to heights where it cannot be recognized, for it is beyond consideration for many purposes for which it was extensively used. Locally there is another advance for the week, from 60c to 62c, but even this figure is merely nominal. New York puts the market at 58c to 60c, which is also 2c up for the week.

SOLDER VERY FIRM.—Solder is very firm on the advances recorded a week ago, and quotations are slightly stronger, the low price on half-and-half being increased 1c. The indications are, with the higher prices for tin, that quotations will be further advanced. Present prices:

Half-and-half	26c-27c
Strictly	28c-29c

PRICES SUSPENDED.—The action of the United States Steel Products Company, the export subsidiary of the United States Steel Corporation, in withdrawing all prices on steel products and upon pig iron, promises to have very serious influences in the trade and there are indications of a reorganization of the selling basis of many of these lines if the company continues its attitude. Sheets, pipe and many other lines will be directly affected while it would be difficult to estimate the influence of

such action throughout the long list of various products.

The present quotations on steel and bar iron are very firm and likely to advance: Mild steel, $2.45; sleigh-shoe steel, $2.45; Reeled machinery steel, $2.90; Tire steel, $2.55; Toe-calk steel, $3.05; spring steel, $2.90; band steel, $2.45.

Iron continues very firm on the basis of $2.20 for bar.

NEW LIST ON BOLTS.—A new list on nuts and bolts, covering advances of about 5 per cent., has been issued as follows:

Carriage bolts ($1), list, ⅜ in. dia. and smaller, 60 and 10 p.c.; carriage bolts ($1), list, 7-16 in., 50 p.c.; machine bolts, ⅜ in. dia. and smaller, 65 p.c.; machine bolts, 7-16 in. dia. and larger, 50-7½ p.c.; sleigh shoe bolts, ⅜ in. dia. and smaller, 55 p.c.; sleigh shoe bolts, 7-16 in. dia. and larger, 50 p.c.; coach and lag screws, 70-10 p.c.; skein bolts, 65-5 p.c.; square head blank bolts, 50-7½ p.c.; bolt ends, 50-7½ p.c.; plow bolts, 55-5 p.c.; elevator bolts, 55 p.c.; fancy head bolts, 45 p.c.; shaft bolts ($3 list), 45 p.c.; step bolts, large head, ($3 list), 45 p.c.; whiffletree bolts, 45 p.c.; nuts, square, 3¾ off list; nuts, hexagon, 4¼ off list.

NAILS ON THE ADVANCE.—Wire nails have been increased 10c to a basis of $2.70. This is probably traceable to the recent action of American steel producers in cancelling Canadian prices.

GALVANIZED WIRE HIGHER. — Higher prices are also in force on galvanized wide, an increase of 10c being announced. The prices on this new basis are:

No. 9, coil spring, $3.35; No. 9, plain galv., $3.30; No. 12, plain galv., $345; No. 13, plain galv., $3.55.

BLACK SHEETS ADVANCE FURTHER. — Black sheets are rising rapidly in value since the action of the United States Steel Products Company in suspending Canadian business. The following schedule covers substantial advances and provides a considerable range of prices between different firms:

10 gauge, $3-$3; 12 gauge, $3.05-$3; 14 gauge, $2.85-$2.85; 16 gauge, $2.85-$2.85; 18-20 gauge, $3-$285; 22-24 gauge, $3.10-$2.85; 26 gauge, $3.15-$2.95; 28 gauge, $3.30-$3.

GALVANIZED SHEETS HIGHER.—With the rising market for spelter and the expected shortage of steel plates, if the American supply is cut off, the outlook is that galvanized sheets may go to unheard of prices. Already the upward movement has started. Some wholesalers have advanced prices and others will do so shortly as manufacturers have raised their basis 15c. The following new schedule of prices for Gorbal's Best indicates a change as regards certain gauges, the 16 to 20 gauge and the 20 to 24 gauge having formerly been in two groups:

16 gauge, 4.50; 18-20 gauge, $4.70; 22 gauge, $4.95; 24 gauge, $5; 26 gauge, $5.80; 28 gauge, $6.10.

THE PIPE ADVANCE.—In addition to the advances on the butt-weld black wrought iron pipe referred to last week, the quotations have also been adjusted on the lapweld list. New quotations follow:

2 in., $11.84; 2½ in., $16.97; 3 in., $22.19; 3½ in., $26.68; 4 in., $31.61; 4½ in., $39.37; 5 in., $45.88; 6 in., $59.52; 7 in., $80.92; 8 in. x 25 lbs. per ft., $85; 8 in. x 28 lbs. per ft., $97.92; 9 in., $117.30; 10 in. x 32 lbs. per ft., $108.80; 10 in. x 40 lbs. per ft., $140.08.

WOOD SCREWS FIRM.—Screws have been very firm for some time, not having been advanced with the markets for raw materials, and it is confidently predicted that there will be higher prices before long. In connection with the sizes of screws called for in the manufacture of ammunition boxes, there are prospects of another shortage as a result of the new munitions orders recently placed.

ADVANCE IN HINGES AND BUTTS.—A further advance has been made on hinges, the Montreal discount having been reduced from 40 per cent. to 37½ per cent. on the heavy tee and strap, and from 67½ per cent. to 65 per cent. on the light and tee and strap. There has also been an increase on wrought butts which are now quoted as follows: No. 804 and No. 840, 65 and 10 per cent. off; No. 800 and No. 835, 67½ per cent. off; No. 802, 60 per cent. off; No. 814 and No. 810, 62½ per cent. off; No. 820 and No. 910, 60 per cent. off.

BRASS PRODUCTS TO ADVANCE.—Although the actual advances on brass products are not yet in effect, the condition of the market indicates that they cannot be much longer delayed, and the indications are that they will be important. Prices continue as follows for the present:

Springs, sheets, up to 20 gauge	$0.45
Rods, base ½ to 1 in. round	0.42
Tubing, seamless base	0.42
Tubing, iron pipe size, 1 in. base	0.45

COPPER LINES ALSO.—Copper products may be expected to follow the example of brass and also go to higher levels, and that in the very near future. Present quotations are very strong:

Bars, ½ to 2 in., $30.50; plain sheets, 14 oz., 14 x 28 in., 14 x 60 in., $31.25; copper sheet, tinned, 14 x 60, 14 oz., $34.75; copper sheet, planished, 14 x 60 base, $41.25; braziers' in sheets, 6 x 5 base, $30.50.

LEAD PRODUCTS FIRM.—With the further advance in lead all lead products are on a very firm basis and advances are to be expected if the market continues in its present attitude. Present quotations are strong:

Lead pipe, $0.09½; lead waste pipe, $0.10½; sheets, 3-lb. sq. ft., $8.25; sheets, 3½-lb. sq. ft., $8.00; sheets, 4 to 6 lbs. sq. ft., $7.75; cut sheets, ½c per lb. extra; cut sheets to size, ¾c per lb. extra.

TINNED IRON TO ADVANCE.—In the upward movement of steel and iron products in which black sheets are playing a prominent part, it may be expected that tinned iron will follow as soon as an opportunity is given for a full adjustment of prices.

BOILER TUBES GOING UP.—The prediction several times made in these columns comes to the effect that boiler tubes are to be advanced promises to be fulfilled in the next week. Present quotations are strong, as follows:

100 feet, ½ in., $10.45; 100 feet, 2 in., $9.60; 100 feet, 2½ in., $12.25; 100 feet, 3 in., $13.30; 100 feet, 3½ in., $15.55; 100 feet, 4 in., $19.80.

OLD MATERIALS RISING.—With the advancing metal markets there have been many readjustments in the prices paid for old materials Following are quotations in this market for the time being:

Tea lead, pack, 44c lb.; tea lead, chest, 44c lb.; lead (heavy) pipe, etc., 54c lb.; brass, heavy, 11c lb.; brass, light, 12½c lb.; zinc, heavy, 12½c lb.; copper, heavy, 15¼c lb.; old cast iron, $12 per ton; wrought iron, No. 1, $10 per ton; wrought iron, No. 2, $8 per ton; stove plate, $8.50 per ton; mach. compos., No. 1, 12c lb.; compos. turnings, No. 1, 10¼c lb.

NEW DISCOUNTS ON BOLTS AND NUTS

The following discounts are now in effect:

Carriage bolts ($1 list), ⅜ in. dia. and smaller	60	10 %
Carriage bolts ($1 list) 7-16 in. dia. and larger		50 %
Machine bolts, ⅜ in. dia. and smaller		65 %
Machine bolts, 7-16 in. dia. and larger	50	7½%
Sleigh shoe bolts, ⅜ in. dia. and smaller		55 %
Sleigh shoe bolts, 7-16 in. dia. and larger		50 %
Coach and lag screws		70 %
Skein bolts	65	5 %
Square head blank bolts	50	7½%
Bolt ends	50	7½%
Plow bolts		55 %
Elevator bolts		55 %
Fancy head bolts		45 %
Shaft bolts ($3 list)		45 %
Step bolts, large head ($3 list)		45 %
Whiffletree bolts		45 %
Nuts, square		3¾c off list
Nuts, hexagon		4¼c off list

Terms: 2% off 30 days from date of shipment.

BOILER PLATES ADVANCING.—There is a strong market for boiler plates in view of the rising cost of raw materials and a slight advance has already been made of 5c on heads. Higher quotations on plates are to be looked for. Present prices are:

Plates, 1¼ to ¼ inch, per 100 lbs., $2.35; heads, per 100 lbs., $2.60; tank plates, 3-16 in., $2.60.

ZINC GOES HIGHER.—There is a rising market for zinc sheet in sympathy with the general movement in the metals. Montreal prices have been advanced to a basis of 22c for casks and 22½c for part casks and the outlook is that prices may go higher if there is no change in the situation in primary markets.

OAKUM IS HIGHER.—The price of oakum continues to advance. Some of the local wholesalers have made another increase in their quotations to the extent of ¼c a pound.

DEMAND FOR SMALL SHELLS.—A feature of the ammunition business recently has been an increased demand for small metallic shells of the sizes used for target practice. There has been a falling off recently in the demand for shells for both shot guns and big-game rifles. Altogether the season has been a normal one on the shot shells, but rather slack on the large metallics.

CASTOR OIL ADVANCES.—An increase in the price of castor oil of 1c a pound has been made by some of the local wholesale houses. The price is now about 16c.

SEASONABLE LINES.—There is a fair movement of seasonable lines to country districts, but the city business is dull and it is hoped that the arrival of winter will have the effect of causing more interest in cold weather lines. In respect to spring goods it is noted that there is a good booking business being done in fencing and poultry netting and little inquiry for lawn goods or hose. This would indicate that there is still a strong favoritism being shown for staples.

A PUZZLE IN COPPER.—It was stated last week in connection with the increase of the discount on copperware that it came as a surprise and found no explanation in the market for raw materials. There has been no explanation since; in fact during the week the copper market has continued its upward trend. The suggestion has been made that an effort to encourage a demand for really useful Christmas gifts may be the reason.

GOOD FURNACE BUSINESS.—Although the demand for stoves and furnaces has slackened somewhat, reports are to the effect that business throughout the season compares very favorably with a year ago and this is particularly so with regard to the demand for furnaces in the country districts.

TORONTO

TORONTO, Ont., Nov. 18. — The general industrial situation is gradually improving which is having a corresponding beneficial effect on the hardware trade, Although cautious buying is the general rule, the volume of trade is increasing as stocks are getting low and dealers are obliged to buy. The upward tendency of prices of many hardware lines will induce dealers to cover for their requirements at current prices, especially as regards staple lines. Money is circulating more freely and there is a more optimistic spirit in the trade. A spell of cool weather will stimulate buying of seasonable goods.

MANY PRICE CHANGES.—A large number of price changes have again to be noted. Prices of many lines have a higher tendency, particularly iron and steel products which continue to advance. On this account the market is very unsettled and will, no doubt, continue in this condition until the steel market becomes more stable. The metal market is also more active and is, of course, affecting many hardware lines. Conditions are such that in some products, notably galvanized wire, makers are unable to name a firm market price and have been obliged to withdraw prices until further notice. Another advance in wire nails predicted by Hardware and Metal has been made and indications point to still higher prices. Bolts and nuts have advanced as have also hinges. Other products affected include bale ties, hay wire, smooth and fine steel wire, standard shot. In the metal market practically all metals have advanced due to conditions in the primary markets rather than locally. An advance in boiler plates is expected very shortly.

STEEL INDUSTRY BUSY.—Firms engaged in making shells are very busy and the shell industry in all its branches is exceedingly active. It is understood that some orders for 6-in. shells have already been placed and that the contracts for the 8-in. and 9.2-in. shells, although not actually signed up are practically assured to certain firms. No official announcement is likely to be made as to the names of the successful tenderers or size of order notwithstanding reports to the contrary. This is the wish of the British War Office which has notified the Shell Committee to this effect.

IRON AND STEEL.—The recent announcement issued by the United States Steel Corporation is of considerable importance to Canadian steel plants. The Corporation in addition to withdrawing prices to the Canadian trade, have decided not to solicit business in this market until conditions become more normal. This order will affect principally bars and billets, etc., for which there is such a heavy demand, and not tubes or pipe or steel for track work. This action of the Corporation does not mean that they will refuse business providing delivery is no object or that orders already booked will not be filled. It is simply a question of delivery. The demand is so far ahead of production that the output of the mills is booked up for several months in advance. Under these conditions and with unfilled tonnage increasing each month prices can't be fixed so far ahead and no promise can be made to consumers when they are likely to get delivery. The situation thus revealed is unprecedented and while not being particularly serious at present may become so, as the demand for steel for munitions continues to increase and present contracts run out. The market is naturally upset and the outlook is uncertain.

OPERATING TO CAPACITY.—Canadian steel companies, although operating on capacity, are falling behind in meeting the demand and higher prices for steel products are inevitable. The prosperity of the steel industry is assured for some time to come and plants will have to be extended to take care of the demand.

It is announced that the Nova Scotia Steel Co. will build an open hearth furnace having a capacity of 200 tons per day. The same concern will instal new presses for forging 8-in, 9.2-in. and 12-in. shells.

Prices continue in an upward direction. Canadian mills are now quoting bars at 2.50c base and reinforcing bars 2.35c base Toronto, plus extra for twisting. Steel bars are 2.50c and small shapes 2.75 f.o.b. Toronto warehouse. Pittsburgh bars, plates and shapes for Canadian consumption are quoted at 1.60c, but this figure is practically nominal as no orders are being booked. Seamless boiler tubes have advanced again but lap-welded are unchanged for the present. Higher prices on tubes are expected. Boiler plates are very firm and an advance in price may be made next month.

Inthe States prices continue to advance and this has led to no effect in curtailing the demand which is heavier than at any other stage in this present movement. The unfilled tonnage of the United States Steel Corporation for October shows an increase of over 847,000 tons over September. This record shows the development which is taking place in that market. The heavy demand for billets continues and prices are very firm. Wire rods are higher at $35 f.o.b. Pittsburg.

TOOL STEEL.—Prices of high-speed tool steel continue to advance and the situation shows no improvement. The scarcity of tungsten has assumed serious proportions and the supplies, although increasing are not sufficient to meet the demand. As this alloy to a large extent determines the price, quality and quantity of high-speed steel it is thus apparent that while even tungsten keeps at the present high level, high-speed tool steel will also be high in price. The situation is further aggravated by the exceptionally heavy demand, which is at least five times that of normal.

PIG IRON.—The heavy demand for steelmaking pig iron continues but foundry grades are quieter. Prices are firm but unchanged.

OLD MATERIAL.—The market is considerably firmer and quotations higher for some metals. Copper is very strong and prices have advanced throughout the list. No. 1 machine composition and No. 1 composition turnings have advanced about 25c per 100 pounds, while No. 1 wrought iron and heavy melting steel are also higher. Prices of scrap lead are higher and scrap zinc has also advanced. Complete prices are given in the current market quotations. Business is improving but the higher prices are due more to the general buoyancy in the market and improved tone.

MACHINE TOOLS.—The placing of the orders for the large calibre shells is resulting in increased activity in the machine tool market. Quite a number of orders for tools, principally lathes, have already been placed and others are pending. Deliveries are better on the large-size lathes than on the smaller tools. Second-hand tools suitable for shell work are getting scarce and are not so easy to get hold of. Prices on all tools have advanced considerably. A feature of the present situation has been the development of the single-purpose lathe for which there is a big demand. Special tools for making shells have also been put on the market with exceptionally satisfactory results.

METALS.—The market has revived and is more active. Prices of practically all metals have advanced, tin showing the greatest strength. The sharp advance of tin is owing to a belief that the Suez Canal is closed and also on account of submarine activity in the Mediterranean. It is likely that shipments of tin will be interfered with on this account. Copper has advanced and there is a better feeling in the market. Spelter, lead and antimony are all higher and the market is strong, while aluminum is higher and quotations nominal.

TIN.—Both London and New York markets are excited, buyers being anxious to cover their requirements due to the report that the Suez Canal had been closed. If such is the case there will be a delay in getting supplies while there is also a chance of shipments being lost in the Mediterranean on account of submarines. This scare, together with a spot scarcity, has unsettled the market. Tin has advanced 8 cents locally and is now quoted at 46 to 48 cents per pound.

COPPER.—There is a better feeling growing in the market and the London market is stronger. There is no special improvement noted in the demand from consumers but producers are confident that they must be heavy buyers soon. Copper has advanced 1c and is quoted at 21c per pound.

SPELTER.—The market is firm and higher. A corner in spot spelter has developed in London and quotations have advanced. Spelter has advanced 2c locally and is quoted at 20c per pound.

LEAD.—There is a shortage of supplies of spot and early delivery in London and the market has advanced. The market is strong in New York and the Trust price is slightly higher at 5.20c which may be advanced further. Locally lead has advanced ½c and is quoted at 7c per pound.

ANTIMONY.—The market is firm and there are indications of a scarcity in spot antimony developing if the demand for prompt metal continues as good as it has been during the week. Antimony is unchanged and is quoted at 40c per pound.

ALUMINUM. The situation does not improve and supplies are very difficult to obtain. Quotations have advanced 5c and are nominal at 65c per pound.

SOLDERS.—The strength in the tin market has affected solders, prices being now 2c to 3c higher. Acme is quoted at 23c; commercial, 24c; Easy, 24c; Star Extra, 25¾c, and strictly, 26c per pound.

BOILER TUBES AGAIN ADVANCE.—Quotations on boiler tubes, particularly seamless, are very strong due to the heavy demand for steel. Seamless tubes have advanced but lap-welded are unchanged for the present. The following are the new prices on seamless tubes:

Size	Seamless	Lapwelded
1 in.	$14.25	.....
1¼ in.	15.00	.....
1½ in.	15.00	.....
1¾ in.	15.00	.....
2 in.	15.00	9.25
2¼ in.	16.50	10.50
2½ in.	17.50	11.50
3 in.	25.00	12.25
3½ in.	28.00	14.50
4 in.	33.00	18.50

Prices per 100 feet, Montreal and Toronto.

SHEETS.—Galvanized sheets are very firm with fair demand, English brands are practically off the market. The differentials between the gauges continue upset by the abnormal spelter situation and while the consumer may secure heavy gauges at comparatively low prices, he must pay higher prices for light gauges. Acid is becoming scarce and high in price, which, together with spelter and black sheets becoming more costly, galvanized sheets will no doubt advance.

WIRE PRODUCTS.—Prices on galvanized, barb and coil spring wire have been withdrawn owing to the unsettled condition of the market erally. Quotations are now only made on application and for immediate acceptance. Other lines of wire are now being quoted at higher prices. Smooth steel wire No. 0-9 gauge is now $2.75 base with the usual extras, representing an advance of 15c. The new discount on fine steel wire is 20 per cent. against 25 per cent.

BALE TIES HIGHER.—An advance of 15c per 100 lb. is announced for wire bale ties. The new prices are as follows:

Single Loop—	Per cwt.
No. 12	$3.25
No. 13	3.45
No. 13½	3.35
No. 14	3.60
No. 15	3.80

HAY WIRE ADVANCES.—Higher prices are announced for annealed cut hay baling wire. The new prices represent an advance of 10c and are as follows:

No. 9	$4.00
No. 10	4.05
No. 11	4.15
No. 12 and 13	4.25
No. 13½	4.05
No. 14	4.50
No. 15	4.75

BOLTS AND NUTS ADVANCE.—An advance in bolts and nuts was announced in these columns a few weeks ago. Owing to the increased cost of raw material another advance has been made effective on No. 12. The new discounts are as follows, applying to the standard lists.

Carriage bolts ($1 list) ⅜ in. dia. and smaller, 60, 10 per cent.; carriage bolts ($1 list) 7-16 in. dia. and larger, 50 per cent.; machine bolts, ⅜ in. dia. and smaller, 65 per cent.; machine bolts, 7-16 in. dia. and larger, 50, 7½ per cent.; sleigh shoe bolts, ⅜ in. dia. and smaller 55 per cent.; slight shoe bolts, 7-16 in. dia. and larger, 50 per cent.; coach and lag screws, 70 per cent.; skein bolts, 65, 5 per cent.; square head blank bolts, 50, 7½ per cent.; bolt ends, 50, 7½ per cent.; Plow bolts, 55 per cent.; elevator bolts, 55 per cent.; fancy head bolts, 45 per cent.; shaft bots ($3 list), 45 per cent.; step bolts, large head ($3 list), 45 per cent.; whiffletree bolts, 45 per cent.; nuts, square, 3¾c of list; nuts, hexagon, 4¼c off list. Terms: 2 per cent. off 30 days from date of shipment.

HINGES, NEW DISCOUNT.—Tee and strap hinges have advanced again this week and the new discounts are as follows: Heavy tee and strap hinges, 37½ per cent. and light tee and strap hinges, 65 per cent.

AMMUNITION.—Prices of all grades of ammunition are very firm and in good demand. Standard shot has advanced and is now quoted at $10 per 100 lbs. The corrected discounts on Remington U. M. C. loaded paper shot-shells are as follows: New Club, 15 p.c.; Nitro Club and Remington, 20-5 p.c.; Arrow, 25-10 p.c.

HOUSEHOLD UTENSILS.—Prices are unchanged but very firm. The increasing cost of raw materials must eventually result in higher prices for all wares. Copper, tin and spelter all have an upward tendency while steel in any form is advancing. There is a good demand for wares from the country trade but only fair in the city. The possibility of higher prices should stimulate business.

ROPE.—The situation is unchanged and prices are very firm with a higher tendency. The increasing cost of raw materials particularly sisal, and high ocean freight rates can hardly help but put rope up to higher levels.

STOVES.—Ranges and cook stoves are moving out well and heaters are in rather better demand. It is expected that the cooler weather will stimulate business.

SEASONABLE LINES. — Skates, hockey sticks, cutlery and sporting and Christmas goods generally are beginning to move more freely and cooler weather will stimulate business considerably.

SHAFTING.—Higher prices for cold drawn steel shafting have been announced. The new discounts are as follows: At mill, 30 p.c.; at warehouse, 20 p.c.

WIRE NAILS ADVANCE.—Wire nails have advanced 10c and are now quoted at $2.65 per keg. This is the second advance within a few weeks and in these columns last week it was anticipated. It is believed in the trade that the price will go up still further owing to the increased cost of wire rods. Cut nails are unchanged at $2.75.

SCREWS.—Prices are very firm and an advance in the near future is anticipated. There is a brisk demand for special sizes for ammunition boxes.

LONDON

LONDON, Ont., Nov. 18.—Many important price changes have taken place during the past week and are recorded in this report. Business is fairly good and the recent cold weather has stimulated the demand for stoves, horse-blankets, snow shovels, etc.

LINSEED OIL ADVANCES.—An advance of 4 cents per gallon has taken place in the price of linseed oil, and quotations are now as follows: Raw linseed, 1 to 2 bbls., 85c per gal.; 3 to 5 bbls., 84c per gal.; 6 to 9 bbls., 82c per gal. Boiled linseed oil, 1 to 2 bbls., 88c per gal.; 3 to 5 bbls., 87c per gal.; 6 to 9 bbls., 85c per gal.

TURPENTINE.—No change has taken place this week in the price of turpentine which remains as follows: 1 bbl. lots, 85c per Imp gal.; 2 to 4 bbls., 84c per Imp. gal.; 5-gal. lots, 92c per Imp. gal.

WIRE NAILS.—At the time of writing wire nails are quoted at $2.55 base, but higher prices are expected in the near future. Cut nails remain at $2.70 base.

FENCE WIRE HIGHER.—New prices are out on fence wire. Barb wire has been reduced 5 cents per 100 lbs., and is quoted at $3.30 per 100 lbs. Other lines are up 5c per 100 lbs., and are quoted as follows: No. 9 galv., $3 per 100 lbs.; No. 12, galv., $3.15 per 100 lbs.; No. 13, $3.25 per 100 lbs.; No. 9, coil spring, $3.05 per 100 lbs. O & A wire remains unchanged at former prices.

TARRED FELT HIGHER.—Tarred felt has advanced and is now quoted at $2.45 per 100 lbs.; carpet felt is now quoted at $2.75 per 100 lbs.

STEEL JACK CHAIN.—Steel jack chain has moved upward and is now quoted at 35 per cent. discount, instead of 50 per cent. as formerly. Brass jack chain is quoted at 20 per cent. discount.

STEEL BUTTS ADVANCE. — New and higher prices are now out in steel butts, and the discounts are as follows:

No. 804, loose pin, 65-10 p.c.; No. 840, narrow, 65-10 p.c.; No. 800, nar, riveted, 67½ p.c.; No. 838, light, 67½ p.c.; No. 810, table butts, 62½ p.c.; No. 814, back flaps, 62½ p.c.

T. AND STRAP HINGES.—Heavy tee and strap hinges are now quoted at 37½ per cent. Net prices are as follows:

Heavy tee: 4 in., $1 doz. pair; 5 in., $1.16 doz. pr.; 6 in., $1.19 doz. pr.; 8 in., $1.60 doz. pr.; 10 in., $2.63 doz. pr.; 12 in., $4.32 doz. pr.; 14 in., $4.63 doz. pr.

Heavy strap: 4 in., $1.19 doz. pr.; 5 in., $1.44 doz. pr.; 6 in., $1.57 doz. pr.; 8 in., $2.13 doz. pr.; 10 in., $3.75 doz pr; 12 in., $4.66 doz. pr.; 14 in., $5.32 doz. pr.

BOLTS AND NUTS ADVANCE.—New discounts are now out on bolts and nuts and are shown in panel on second page of market reports.

OTHER ADVANCES.—Bar iron has advanced to $2.40 base; brass butts are now 25 per cent. off list; screen wire is now quoted in 100-ft. rolls at $1.70 per 100 sq. ft.; 50-ft. rolls at $1.75 per 100 sq. ft.; store boards have advanced 5 per cent.

WINNIPEG

WINNIPEG, Nov. 18, 1915.—Business during the past week has been very good and jobbers generally are enjoying a splendid increase in business over the corresponding period of last year.

Winnipeg has enjoyed quite a heavy snowfall, and the cold weather prevailing throughout the West has created a demand for all seasonable lines. Prominent among these are carriage heaters and carriage heater coal, booked orders for which are being shipped and new orders being placed. It is estimated that it will take the greater percentage of the winter for the farmers to haul their grain to the elevators, and this should mean that a big sale will be created for this particular line.

The demand for horse-blankets has also been exceptionally good, and jobbers are experiencing a little difficulty in getting deliveries from the factories.

GOODS MOVING FREELY.—Other seasonable lines which are moving freely are sleighs skates, hockey sticks, curling stones and brooms and sleigh-bells. All booked orders which have been on file are now shipped, and there have already been some repeat orders. This would seem to indicate that the farmers are spending their money quite freely, and we think it would be advisable for the merchants to take advantage of this feature.

Let us emphasize again the importance of a hardware store as a place for practical Xmas gifts. This is perhaps true in the Western Provinces more than any place else, as a great percentage of towns have no jewelry store and it is to the hardwareman that the consumer looks for his useful Xmas gifts. Orders for Xmas cutlery are being shipped, but owing to the war the source of supply has become limited in many lines, and it is to everyone's advantage to order early.

PRICE CHANGES.—The past week has seen a few changes in prices and note is made of same herewith. As mentioned last week in connection with linseed oil, further advances have taken place, and to-day's price is 8c per gallon over last week's quotation. Raw, per gal., 83c; boiled, per gal., 86c.

These prices are for barrels. Less amounts 5c per gallon extra, with additional charges for cans, etc.

TIN PLATES ADVANCE.—Tin plates have also advanced, and we include a list showing just what the ruling prices are to-day: 20 x 28 I.C., $11 per box; 20 x 28 I.X., $13.25 per box.

TURPENTINE ADVANCES.—Turpentine in sympathy with linseed oil market has also increased 5c per gallon, and to-day's price is 86c in bbl. lots with an extra 5c per gallon for a less quantity. Per gal., barrel lots, 76c.

SPRING BOOKING LINES.—Poultry netting staples prices for next year have been made, and are as follows: In 10-lb. boxes, .06¾c per lb.; in 50-lb. boxes, .05¾c per lb.; in 100-lb. kegs, .05¾c per lb.

EDMONTON

EDMONTON, Nov. 17, 1915.—The weather conditions which have prevailed here for the past week have given an impetus to business in cold weather requirements especially. Frost, followed by a fall of snow, has made an ideal bed for sleighing, with the usual demand for bells, horse-blankets, sleds, etc. Heaters with the accompanying accessories are moving freely, although there has not been such a brisk demand for them as in former years. Farmers are now enabled to move their lumber, cordwood and wheat freely, returning to their homes laden with the winter necessities.

Shipments of sleds were late in arriving in the West this year but jobbers are well prepared for the season's demands. There is a good variety of sleds of all kinds and fairly heavy stocks. Last winter it will be remembered that there was a shortage of sleds, while there was a heavy fall of snow, and retailers were sold out early in the season and no more could be supplied by the wholesale houses. This season the kiddies will be well looked after in this respect.

Toys are finding a more prominent position in the hardware and general stores and some attention is now being given to the displays. Stocks carried over from last year have been supplemented with articles made principally

Preparations are now complete at the various skating rinks for the winter sports. Additions and alterations have been made where necessary in order to make things more comfortable for curlers, skaters and onlookers. This has been followed by some demand for skates, hockey stocks, pucks and the various other articles of a like nature. The colder weather has also brought many customers for lanterns, weather strip, storm door latches, hinges and hangers. The few hands employed in the tinshops are kept busy turning out stove pipes and have been working overtime in many cases to fill orders promptly.

MAKING SHOW CARDS DOUBLY ATTRACTIVE

(Continued from page 31.)

for this work. A heavy wide pointed pen would have done the work almost as well. The scroll work, a pale shade of grey, was done with the brush used for lettering.

In preparing the "Moore House Color" card, an illustration from an advertisement on page 11 of the Nov. 13 issue of Hardware and Metal was used.

The layout of this card is somewhat similar to that of the "fence" card. The lettering on this card was made with a No. 6 brush. It is single stroke work. The shading, a pale grey shade, was put on with the same brush. Pale green, or gold could also be used with good effect for shadow work.

This card like the "fence" card measured 10 x 14 inches.

The illustration used in preparing the "garage hardware" showcard, appeared in an advertisement on the inside front cover of the November 6 issue of Hardware and Metal. The card measured 22 x 14 inches, and would help to attract attention to a display of garage hardware. The first two lines of lettering were made with a broad-pointed pen. The words "Stanley Hardware" were made with a No. 6 red sable writer brush. The form of letter used, is known as Roman, but to make it more attractive I have made some changes in a few of the letters. Note how the letter "S" is slanted, and also how the tail of the "Y" forms part of the letter "H."

These changes have been made to make the lettering more attractive. The layout of this card is simple, yet effective. The ruling in black, was made with a small brush. A pen could be used if desired. To obtain the best effect the rulings should be parallel.

The fact should not be overlooked that cards such as the ones shown here, can be used at almost any time. While they will help to attract attention when used with displays of the goods featured on the cards, it should also be remembered that they could be used along with any display, simply as reminders that the goods featured, are carried in stock.

SEND IN YOUR RAZORS.

Razors for the troops are urgently needed now. A shipment will be made in a few days. The troops need them badly. Will you kindly forward without delay all the razors you have collected to Thos. B. Lee, 30 Front St. E., Toronto. Any number from one to one thousand will be gratefully received.

FROM TRUCK BOY TO PRESIDENT

(Continued from page 37.)

president of the company, then scores of others, and finally the president himself.

Gradually the jobs ahead that he studied grew more and more important. While he acted as general superintendent of works, he was studying the sales end of the business. Quite naturally he grew up to be general manager.

The next job ahead was a vice-presidency. So he studied what a vice-president in the Yale organization needed to know. Quite naturally again he grew up to be a vice-president.

There was only one other job to study. He prepared himself for it. He and the president, Henry R. Towne, became close friends. Then Mr. Towne decided to retire. Was it not quite natural that Allen should get the presidency—after twenty-three years on the Yale payroll, always studying the job ahead, and doing his own thoroughly?

TRADE REACTION AFTER WAR

The ninth general meeting of the American Iron and Steel Institute was held at Cleveland, Ohio, recently. Between 400 and 500 of the nation's leaders in the steel business were in attendance. A number of papers were read by well-known steel men on commercial and technical subjects connected with the iron and steel industry. Elbert H. Gary, chairman of the board of directors of the United States Steel Corporation, addressed the meeting, and stated that he expected a trade reaction after the war. Discussing business conditions in the United States, Mr. Gary said that the men engaged in the iron and steel trade had reason to be thankful for the present prosperity, but added that he did not agree with the statements which have been made that at the close of the war a prolonged continuance of great prosperity may be expected. He intimated that steps must be taken for protection against the results of cheap labor and the impoverished conditions abroad which are inevitable. He stated it was his belief that with wise administration and with co-operation from the State and national governments, the industries in the United States would be able to recover from the injurious effects of the wars more rapidly than those of any other country.

"The business men of this country," said Mr. Gary, "particularly those engaged in the iron and steel trade, have reason to be thankful for the present conditions, which are very prosperous. The furnaces and mills are generally operating to full capacity, and prices received for many, if not most, of the commodities produced are larger than

WEEKLY PAINT DEPARTMENT

Selling Paint to a Difficult Customer

Paint Salesmen Floored by a Painter Who Wanted to Use Hand-Mixed Product—Some of the Arguments the Salesman Could Have Used

By HENRY LEWIS

A HARDWARE merchant at Toronto, Ont., recently, had considerable difficulty in making a sale of ready mixed paints.

A property owner, who owns a large number of houses had found it necessary to do a very considerable amount of decorating, owing to the fact that at the present time there are a great many vacant houses in Toronto, and tenants have an opportunity of forcing landlords to do a great deal more decorating than they have been accustomed to doing in recent years.

The property owner visited the hardware store, along with the painter who was to do the work. The property owner had an idea that he would like to see ready-mixed paints used for the work. The hardwareman recommended a well-known brand of ready-mixed paint, but the painter objected strongly. He said he would rather mix his own paint and he would know what he was using.

He claimed that he could mix better paint, than any paint that could be purchased in prepared form.

The hardware merchant did not come back with many of the arguments he might have used, with the result that the painter was told to go ahead and purchase what he needed. The property owner was relating his experience to a paint traveler a few days later, and the traveler passed the news on to the writer with a few hints regarding the arguments the merchant should have used.

There are still a few painters of the old school who object to the use of ready-mixed paints and it is a good plan to be ready for them when occasion demands it.

Ready-Mixed Product Popular

The ever-increasing popularity of good ready-mixed paints is gradually crowding out the old-time antagonistic attitude of many people towards the ready-mixed product. The retail salesman still meets a few of the old-timers, who say that they are afraid ready-mixed paints are made of water, benzine, etc., and other ingredients that were not used in the good old days when paint was mixed by hand.

In order to convert a non-user of prepared paint to the use of same a salesman must use many arguments and also be thoroughly convinced himself that he is doing the proper thing in advocating the use of the ready-mixed article.

Good Quality Paints

There are a large number of good quality paints on the market, in fact the life of a firm that does not put quality in the goods is usually a short one in this discriminating age. Progress in paint-making has been steady and scientific. There are still two kinds of paint being used, one mixed by hand, the other by machinery. One must be prepared and the other is ready for use.

That there are these two kinds of paint is due to the same progress that has given us two ways to make clothes, one with a hand needle and the other with a sewing machine; two ways to reap grain, one with a power reaper, cutting binding, and gathering, the other with a hand cradle such as our grandfathers used. The same rule applies to the mixing of cement or concrete, in the former days it was done by hand and to-day we have the powerful and efficient cement mixers.

It has been said paint-making was once an art, then a trick, and now a science.

The wear on paint in the days when hand-mixed paint held the upper hand was not as great as it is to-day. The wood was better in a great many cases. With conditions at that time much more favorable for the longevity of paint, the painters often had difficulty with the paint chalking when only lead and oil were used.

Products are Tested

Manufacturers' experts have studied the manufacture of paint on a scientific basis. They test their products on all kinds of lumber and other materials and in all kinds of climates. The leading paint-makers have also gone to considerable expense in securing competent chemists, well equipped laboratories, testing rooms and a great amount of testing apparatus that enable them to secure technical knowledge regarding their products whereby they can produce paint of the highest quality and efficiency.

If it were the desire of paint makers to work principally for profits rather than quality, they could readily do so by dispensing with much of their up-to-date equipment and resort to the methods and material of those who mixed their paints by hand.

Among the many points that may be urged in favor of prepared paints over the hand-mixed article is that the paint is ground finer and kneaded more thoroughly by modern machinery than can possibly be done by hand. One of the powerful grinding machines can grind more paint in one hour than a painter could do in several days, not to mention the thoroughness of the grinding done by the machine. The severe tests to which the raw materials and finished products are subjected by the manufacturers also ensure better results and better quality than can be produced by a painter who cannot base his work on these tests. It has been proven beyond a doubt that good ready-mixed, machine ground, paint will cover a much greater surface than the hand-mixed article and the covering will be much more even, thus ensuring longer wear; it will also spread more easily and is not as liable to leave brush marks as the old style paint.

Large Range of Colors

There is also a great advantage on account of one's being able to secure a large range of colors, and where a user runs short of a small amount of paint to finish a job, he is able to purchase a small can and feel reasonably sure that he is getting exactly the same color. This is impossible when using hand-mixed goods as there is great danger of the second or third mixing being a different color.

It is an easy matter for a customer to say that lead, oil and other materials will make good paint. This may be true to a certain extent, but there are very few people indeed outside of the large paint factories who know the exact proportions of these articles that should be used. Each color is studied by the experts employed by the manu-

facturer and ingredients suitable for that color are used in the making of it. The good pigment properly ground and mixed by the manufacturers up-to-date machinery gives a density to the paint that assures better covering qualities than hand-mixed paint and affords better protection to the surface.

There are a great many other points that may be brought out by the salesman such as convenience in re-ordering, re-sealing the cans if there is some of the paint left over, and also the guarantee of the paint manufacturers. Where hand-mixed paint is used, the party mixing the paint may use impure lead, oil, or other materials, not intentionally, but for the reason that they have no method of testing the quality of the goods.

DEFRAUDING CREDITORS

The Canadian Credit Men's Association has recently been very active in investigating supposed fraudulent transactions, and where the evidence warrants, bringing the offenders to justice.

The latest case comes from Calgary, and although the firm in question was not a hardware firm, the details of the case should prove interesting to all retailers.

Two members of a firm in Calgary, the insolvent debtors in question, were arrested at the instance of the Credit Men's Association, the charge being that they had removed goods from their store prior to making an assignment, with the object of defrauding their creditors to the extent, at any rate, of the goods removed. Wind of this transaction reached the manager of the association at Calgary, with the result that he engaged a private detective who almost on the first night of his vigil discovered traces of the supposed transaction. The members of the firm and one of their clerks were arrested and at the trial held in Calgary on the 2nd inst., the principals were sentenced to six months in the Lethbridge penitentiary and the clerk, having pleaded guilty on the 3rd, was sentenced to four months in the same institution. The goods removed by the defaulters in the meantime had been sold by them, but the association has recovered same—an amount of $2,900.

NEW HARDWARE GOODS

(Continued from page 36.)

light is a General Electric Co.'s Federal Mazda bulb.

The shape of the Watchlite suggests that the natural place to wear it is on one end of the watch chain. However, of course, if desired it could be carried as any other flashlight.

The idea of wearing it on one end of the watch chain suggests one of its convenient uses, that of telling the time in the dark, and in addition it can, of course, be used as any ordinary flashlight.

Intermittent contact is obtained by pressing the stem and releasing it; and permanent contact by pressing the stem and turning it either to the right or left.

Watchlites are packed one in a carton, one dozen cartons in a very attractive display box.

TRADE REACTION AFTER WAR

(Continued from page 41.)

they have been during the last few years and should result in profits.

"We are at peace with all the world, and it seems likely that the wise policy which has permitted this state of affairs will be continued. We sincerely hope and pray that the wars which are raging in Europe may soon be brought to a close and a basis reached for the prevention of prolonged wars in the future. Apparently we are to have a period of industrial peace in this country. Many of the antagonisms, which have hitherto been so hurtful and which have prevented natural business growth, have disappeared and legitimate business will, therefore, have opportunity to progress in accordance with its deserts.

"No doubt the sudden and marked improvement in conditions during the last six months is due, in a large measure, directly or indirectly, to the purchasing necessities growing out of the wars; but there are other reasons.

BICYCLES AND MOTORCYCLES

In their new 1916 catalogue, and also in a recent issue of "The Hammer," Iver Johnson's Arms and Cycle Works, Fitchburg, Mass., announce a number of changes in their bicycle proposition, and also a number of changes in their motorcycle line.

PERSONAL

E. K. Spinney, the well-known hardware and iron merchant of Yarmouth, N.S., recently called at the Montreal office of Hardware and Metal. He was accompanied by Capt. Cann, of H. Cann & Sons, of the same place. Mr. Spinney reports that conditions are very fair in the country down by the "Sounding sea," and that the effects of the war were not felt to a very great extent at any time.

Traffic Department Opened

Retail Merchants' Association Has Expert to Analyze Freight Bills Sent in by Members—Fifty Per Cent. of Any Overcharge Goes Back to Merchant.

A NEW department has been opened by the Retail Merchants' Association of Canada at their head office in Toronto, which is proving a remunerative one for the members of the association. This is termed a "Traffic Department," and is in charge of J. W. Barrette who has had some 25 years' experience in the traffic departments of various railways.

Members of the association are urged to send in their freight bills no matter how old they are. The manager of the Traffic Department will go into them carefully to determine whether there are any overcharges or not. If an overcharge on a bill is found, the department collects it, retains 50 per cent. of the overcharge, and the other 50 per cent. goes back to the merchant. As these freight bills have in the majority of cases been filed away by the retailer, it is really found money to him if, upon investigation, it is found that the railway companies have made any overcharges and 50 per cent. of these come back to him. If the freight bills are found to be correct as made out, it costs him nothing as the service is given by the association to all its members.

Here is an example of how this works out: Recently a member secured four bags of vegetables, two of potatoes and two of turnips from an outside station. The weight of the four bags was 320 lbs., which at 50c per cwt. the freight was figured out by the railway company to be $1.60. When this matter was taken up by the traffic expert of the Retail Merchants' Association, and analyzed, the freight on the four bags of vegetables was determined as follows:

Two bags turnips—120 lbs. at 50c per cwt.	$ .70
Two bags potatoes—180 lbs. at 41c per cwt.	.74
Total	$1.44

Overcharge 16c.

The freight man knew there should be a lower rate on the potatoes than on the turnips and the rebate of 16c was secured. Recently on a shipment of coal the overcharge was found to be some $15 and overcharges are being found every day on other freight bills. The duties, too, of the manager of this department include the explaining to retailers how they can purchase their goods in order to save freight. For instance some things are better purchased in bags and others in cases, etc., in order to get the lowest possible freight rate.

The SAFE Abrasive

There's no danger of burning the temper out of tools if they're keen-edged on Cleveland Grindstones. They are SAFE TO SELL, for they don't burn your customer's temper, either!

Here are good stones—**the only Berea Grit**—guaranteed free from flint or soft spots—specially selected by our expert graders for your customers. We are the biggest grindstone producers in the world.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Nov. 19.—Any feeling of dissatisfaction in the paint trade that the recent reduction in prices on ready-mixed lines on the part of manufacturers was not more substantial is being dispelled—or should be dispelled—in the soaring prices for the principal raw materials. The present situation is not only one where lower prices can not be considered, but the makers have a very serious problem to solve if they are to avoid further advances—and this they are desirous of doing in order to not further discourage the demand. Since the basis for the present campaign was decided upon—and it was a strong basis then—there have been material advances in the cost of oil and turpentine; zinc has improved but little, if any, and the trend of the lead market indicates that there will be an immediate advance on lead in oil. No one can see far into the future while the uncertain war conditions prevail, but unless there is a market reaction in some of the important raw materials, lower prices on mixed lines are not to be looked for and advances are more than a possibility.

With the further strength in the market, retailers are taking a more confident attitude towards the future and have been booking much more freely for spring business. Orders are coming in better than a year ago, but there are two factors to be considered against a normal demand; on one hand there are prospects that consumption will continue somewhat below peace times and on the other the general uncertainty displayed in all business must be expected to have its effect on the policy of many dealers. As has been explained before, many retailers stocked up before the advance last spring and, therefore, are now paying high prices for the first time and they are reluctant about increasing the re-sale figure. However, with the market in its present state, there is only one business course to take and that is to put the price to the consumer up to what it should be to allow a full margin of profit and then depend on salesmanship to overcome the difficulty; higher prices are not likely to interfere seriously with the demand if retailer takes a firm stand and explains his position to the buyer.

LINSEED OIL HIGHER.—The upward movement in linseed oil continues and with the still higher prices the quotations in the trade have been coming closer together, although there is still yet a much wider spread than is good for all concerned. A new high price has been established at 84c for raw and 87c for boiled, and the firm submitting it claims that it is based upon the present position of the flax market. This represents an advance of 4c above the high quotation of last week and 5c for the firm making it. The low figure now submitted is 79c and 82c, which represents an advance of 6c in the week for one jobber, and the indications are that these figures will go higher almost immediately if the market holds. Other quotations are heard within the range and there appears to be considerable business being done around 82c and 85c for raw and boiled, respectively.

TURPENTINE AGAIN ADVANCES.—Material advances have also been made in the turpentine market. Whereas last week the bulk of the business was being done between 75c and 78c, practically all quotations are now between 80c and 84c, with the tendency towards the latter figure. Refiners are now quoting 80c and jobbers must allow a margin on this if buying at the market. At the same time one firm is still quoting 75c, but this is evidently a case where the price is based upon the cost price of stocks on hand and the recent developments in the market have not been taken into consideration and is, therefore, liable to immediate change.

WHITE LEAD TO ADVANCE.—The statement of last week that an advance in white lead in oil was warranted by the position of the "pig" has been strengthened by another increase of ¼c in the latter market. The raw material now shows an advance of 75c in the recent movement and any margin allowed when the declines were made some weeks ago has been wiped out. An immediate advance, probably before the end of the present week, and at any event by the end of the month, is assured unless there should be a sudden change in the market and that is not to be expected from the present indications. The price of lead is usually increased about 15c at this season, to allow for the adjustment in freight rates at the close of navigation, but the indications are that the advance is more likely to be 50c or 75c.

THE ZINC SITUATION.—Although there has recently been a slight movement in the zinc situation which has had some effect in temperin gthe market against the advances in other quarters, the position of that commodity continues on a high basis and, if anything, is yet above the level taken into consideration when fixing the quotations on ready-mixed for the present campaign.

GASOLINE IS STEADY.—Gasoline and benzine are steady on the recent advances and there is still a fair movement to the country districts prior to the close of navigation. Quotations are:

Gasoline, in wood	24c
Gasoline, in drums	21½c
Gasoline, tank wagon	20½c

Benzine 1c lower.

ALUMINUM PAINT HIGHER. — The action of the aluminum market during the past few months, during which it has advanced about three hundred per cent., has had the effect of increasing the cost of production of aluminum paint. Recently the changes have amounted to about $1.50, from $4 to $4.50.

DRY WHITE LEAD HIGHER.—Dry white lead has been directly affected by the market for pig lead and advances have been made from time to time on the upward movement of the past few weeks. The present market is around 9½c for casks and 9 7-8c for kegs.

PUTTY STILL ACTIVE.—The putty market continues its activity and the demand is very satisfactory, considering the slackness in the building trades. Some manufacturers have been behind in their orders for some weeks. The prices are very firm. There is little change in the glass situation and quotations are steady.

ADVANCE IN WHITE LEAD

Just as Hardware and Metal is going on the press, word has arrived that white lead in oil has advanced 60c per 100 pounds, and is quoted at advanced price for delivery up to May 1, 1916.

TORONTO

TORONTO, Ont., Nov. 18.—Business in the paint trade in the country has been good so far this month, but the city trade has been quiet. With the approach of cooler weather, business is expected to fall off and will be comparatively quiet for the next two months. Prices for most lines, particularly white lead, are very firm and some advances may be expected in the near future. Turpentine and linseed oil are both very firm at last week's advance. The glass situation is unchanged, but a revised list is under consideration which will be based on costs of American glass. Putty is in fair demand at unchanged prices, while whiting is not too plentiful and is being affected by the high ocean freight rates now prevailing. There has been no further change made in prices of ready-mixed paints, although it is quite possible that there will be. Gasoline and benzine are very firm and active. Collections are fair.

LINSEED OIL.—The rise in the price of flaxseed from $1.40 to $1.89 per bushel in six weeks has resulted in a sharp advance in linseed oil, which last week reached a high level of 85c-88c. These prices are also in effect this week, although 87c-89½c is also quoted, the former, however, being more general. The flax acreage was smaller this year and seed is coming forward slowly to the crushers, hence the high price. Stocks of oil are light locally and there is not much demand but there appears to be little chance of cheaper oil meantime. The following prices for linseed oil are generally being quoted in Toronto.

	Raw	Boiled
1 to 2 barrels	85c	88c per gal.
3 to 5 barrels	84c	87c per gal.
6 to 9 barrels	81c	85c per gal.

10 barrels and over, open.

TURPENTINE.—Turpentine has advanced at Savannah and if maintained it is possible that it may advance here in the near future. Producers claim that they did not make much profit in the early part of the year and are inclined to take advantage of the present situation. There is very little turpentine on hand in Toronto and the demand is light. The range of prices has narrowed down and although 82c has been heard of, 85c is more generally being quoted. The following prices are being quoted locally on turpentine: 1 barrel lots, 85c; 2 to 4 barrel lots, 84c, and 5-gal. lots, 92c per Imp. gallon.

WHITE LEAD.—The pig lead market is more active and prices higher; it is therefore very probable that white lead will be advanced. The market is certainly strong and the present schedule is not in line with the pig lead situation. The present price is $9.60 with 30c added for less than ton lots.

GASOLINE AND BENZINE.—Prices are very firm at the new schedule given last week. Gasoline is moving freely but a shortage of supplies has stiffened the market. Gasoline is quoted at 23½c and benzine at 23c per gallon in barrels.

RESIN AND GLUE.—Prices of resin are advancing on good demand, a large quantity being used in shrapnel shells. There is little demand for glue and the market is dull.

GLASS.—Stocks of glass are getting low, but the demand is comparatively light. A new list based on American prices is under consideration and the adjustment will be beneficial to the trade as some sizes are selling below cost.

PUTTY.—There is a fair demand for putty and prices are very firm. The following prices are for standard putty in less than ton lots:

	Per 100 lbs.
Bulk, in casks	$2.50
Bulk, in 100-lb. drums	2.70
Bulk, in 25-lb. drums	2.80
Bladders, in barrels	3.10

Pure Putty, 60c per 100 lbs. advance.

Twenty Years Ago
In the Hardware Trade

The following items have been taken from the issue of Hardware & Metal of November 17, 1895.

C. M. Haldenby, of Sanderson, Pearcy & Co., Toronto, is on a hunting trip up north.

Editor's Note.—Mr. Haldenby is still associated with Sanderson, Pearcy & Co., Toronto.

* * *

W. H. Carrick, vice-president, Gurney Foundry Co., Toronto, has returned from Europe.

Editor's Note.—W. H. Carrick is now president and general manager of the Hamilton Stove and Heater Co, Hamilton, Ont.

Something to Sell! That Sells!

B-H
"ENGLISH" PAINT

THERE is great satisfaction in stocking a good article that not only enjoys a steady demand, but is well advertised in those mediums which your customers read regularly. Such an article is

B-H "ENGLISH" PAINT

ONE reason for the remarkably successful increase in the demand for this paint is on account of its containing such a large percentage, 70%, of BRANDRAM'S B. B. GENUINE WHITE LEAD, in all tints and white.

This important selling point is being set forth more fully and more clearly in our advertising to your customers this season.

If you want a live-wire paint proposition, let us give you full information about the B-H Agency.

Ready-to-Ship Ready-to-Ship

BT

Pumps Pumps

Popular Pumps with the Trade

In the brief period of three years the BT Pump Line has become the leading pump line sold in Canada.

Three years ago we bought out the Wortman & Ward Pump business. We have more than doubled their annual sales since then. The BT PUMP Sales for our business year which has just closed, show an increase of 35% over last year's sales. This increase has been made in spite of the war, in spite of the poor crop in the West in 1914, in spite of the wet summer.

Our pump business has grown so much that we have had to make a large two-storey addition to the BT Plant at London, Ont., and to remodel the whole factory.

This shows how thoroughly the trade appreciates the prompt shipment which we guarantee.

Much of the increase has been due to the Ready-to-ship line. The trade has found this line the easiest to handle, and the inducement of better pumps at lower prices is a big one.

The sales for BT-Ready-to-ship Pumps form but a small part of our business.

Buy BT Pumps. They are the best.

BEATTY BROS., LIMITED

Fergus, Ont. **Winnipeg, Man.**

We also make BT Well and Cistern Pumps, BT Washers and Power Washers, BT Ladders, BT Water Bowls and Tanks, BT Hay Carriers, BT Oat Bowls and Feed Racks, BT Barn Door Track, BT Grain Grinders, BT Butter Workers, and Butter Boxes.

Be sure that you have the BT General Catalog No. 23.

MARTIN-SENOUR
PAINTS AND VARNISHES

Made in Canada—Sold on Merit

Distinctive Quality and Service

Make Increased Turnover Double-Sure

You will sell to many more paint users if you procure Martin-Senour quality and exclusive agency. Martin-Senour products have a coast to coast reputation for appearance, service and value and they are backed by the **strongest kind of advertising** in newspapers, magazines, farm and religious journals, advertising that conveys our message of quality to practically every home in Canada consistently.

Martin-Senour sales help and co-operation is the strongest, consisting of the most effective features of interior and exterior displays, mailing campaigns, follow-up systems, and direct help of Salesmen.

Naturally if more people are attracted to your store to procure Martin-Senour products, increased sales in all your other lines may be also expected.

Satisfied customers are your best sales promoters.

Give the Martin-Senour exclusive agency plan a try-out and see how it increases the turnover of paints and varnishes.

May we lay our complete proposition before you?

How Many "No-Profit" Lines Do You Handle?

The secret of successful merchandising is to handle products that are known the country over and are asked for. Unknown products are "No Profit" stock. Get rid of them. Clean out of your paint shelves all the sundry lines of this brand and that.

Sell the saws, the hardware, the paint, that people know to be the best.

Whenever you sell S.W.P.—or any S.W. product, you are binding tighter and tighter the patronage of your customer to your store. Think it over. Cheap, unreliable brands never built a business yet. The one big successful agency proposition for keen, energetic paint dealers is Sherwin-Williams full line.

THE SHERWIN-WILLIAMS CO
of Canada, Limited
MONTREAL TORONTO WINNIPEG CALGARY HALIFAX

PEERLESS Ornamental Fencing

IT is easy to explain the merits of Peerless Ornamental Fencing to a prospective customer. There are so many things in its favor. First, it is really an ornamental fence; second, it is an economical, and at the same time, durable fence; third, it beautifies home surroundings and presents a splendid appearance. Gate and fence match well together. Then, too, there is money in it for you.

Peerless Ornamental Fencing

not only protects, but beautifies property as well. Every stay is made of strong, stiff wire that will not sag. Our fencing is made from galvanized wire. Peerless fence is easy to erect, and will hold its shape for years to come.

Send for Dealers' Proposition

Get our literature showing many beautiful designs for lawns, parks, cemeteries, etc; also ask about our farm fencing and gates.

The Banwell-Hoxie Wire Fence Company, Ltd.
Winnipeg, Man., Hamilton, Ontario

The Magnet Two Styles

A Hand or Power Washing Machine you can place practically in every home in your community, particularly where gasoline, steam engine, electric or windmill power is available.

The DEMAND, the MARKET and the PROFIT are al there.

The mechanism is the same on both style machines, except the fly wheel, which for the power machine has a flat rim for belt. The gearing is all on side of tub instead of cover, which can be raised without removing belt or stopping the machine. Get a full description anyway. Made only by

CUMMER-DOWSWELL, Ltd., Hamilton, Canada

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manutacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

Big Profit and Satisfaction in Selling

"AYLMER" Force Pumps

They are certain to sell easily because it has several advantages over the ordinary style.
Has longer stroke, more power, and works easier.
While designed for hand use it can be readily converted into a Windmill Pump by the addition of a flat bar, which screws into the cross head at top.
It will be to your interest to write for full particulars now.

MAKE MONEY FROM GOOD PUMPS—PROFIT

Unless a metal pump is made just right it will leak at joints or valves.

"Aremacdee" pumps do not give dealers who sell them trouble and loss from defective service in "Aremacdee" pumps sold customers.

Pumps for every use—hand or motor—force or lift — every type a dealer can sell.

All in the big catalogue. Ask for it—for dealer prices—for dealer terms.

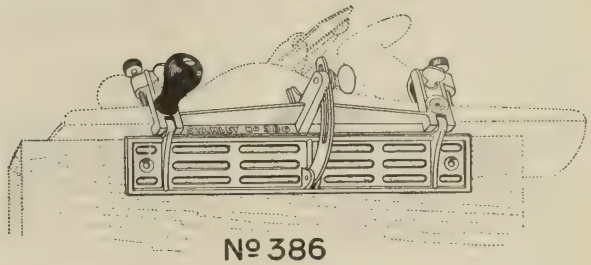
Stanley Tools



№ 386

STANLEY JOINTER GAUGE FOR IRON PLANES

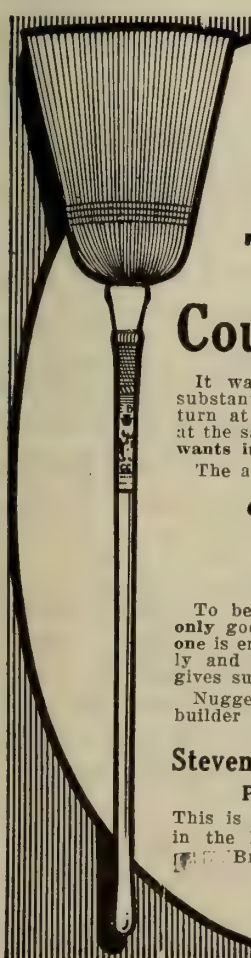
A tool that will enable the workman to plane bevels of any angle between 30 and 90 degrees, or to square up the edges of boards with extreme accuracy.

The method of attaching same to a Plane is such as to insure its being absolutely rigid when in use.

All parts except the knob are of metal and the joints and bearing surfaces are machined.

Show this new Gauge to your wood-working customers. You will find them to be greatly interested. Special circular containing complete description upon request.

Manufactured by
STANLEY RULE & LEVEL CO.
NEW BRITAIN, CONN. U.S.A.



TRADE MARK KEYSTONE BRAND REGISTERED

They Said It Couldn't Be Done

It was thought impossible to make a substantial corn broom that wouldn't turn at the tip, or the corn fall out, and at the same time make it **light, as a woman wants it.**

The answer is

"NUGGET" Brooms

To be sure the "Nugget" Broom is the **only** good light broom on the market, but **one** is enough when it is finished as strongly and appealingly as the "Nugget" and gives such long service.

Nugget Brooms are a regular trade-builder for you. Write for prices, etc.

Stevens-Hepner Co., Limited
Port Elgin, Ont.

This is only **one** of the winners in the line of Keystone Brand [illegible] Brooms and Brushes

THE PLANT BEHIND OUR PRODUCTS

Since 1835 John Chatillon & Sons have been making Scales. These scales have acquired a wide reputation because of their superiority of workmanship and construction.

The Universal Sale of CHATILLON SCALES

is constantly increasing. Our products stay sold. They have a number of imitators, but no superiors. All our scales are warranted to be accurate and perfect in workmanship. Our policy is quality products and fair prices.

Our complete line of BUTCHERS' CUTLERY

knives, cleavers, steels and cutlery for hotel, restaurant and kitchen use, has acquired a reputation for excellence. The users of our line of cutlery are universally satisfied.

For twenty-five years our skilled workmen have been producing this cutlery. The steel is especially adapted for the purpose—tempered by our own process. The high standard of quality that has made John Chatillon & Sons' products world-famous is maintained throughout this line.

Interesting illustrated catalogue upon request.

TRADE MARBLE'S MARK

Woodcraft Hunting Knife

A QUALITY KNIFE to sell at the low price of $1.50.

The biggest value ever offered in a hunting knife. Lists at only $1.50, yet has the shape, weight, quality and desirable features of $2.50 and $3.00 knives. Adapted for sticking, cleaning, skinning, slicing, chopping bone, etc. High-grade steel—4½-inch bevel blade, thick at back, tapering to a fine point. Handle of laminated leather. Absolutely guaranteed.

Order a quantity from your jobber, or direct from us, mentioning your jobber's name. We are advertising this knife extensively in the magazines. Be prepared to supply the demand. Blade 4½ in.; handle 3¾ in.; weight, 5 oz. List price, $1.50, including leather sheath.

MARBLE'S Camp Axe No. 10

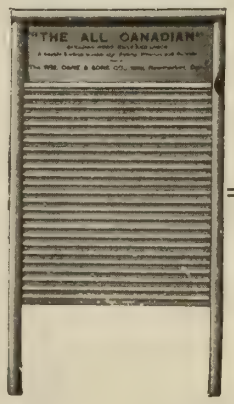
Blade forged from solid tool steel. Tempered head, designed for driving stakes, spikes, etc.; will not become battered even under continuous service. Nail puller has tempered jaws. Accurately machined eye is fitted perfectly by handle, thus eliminating all liability of the head working loose.

Blade 3¼ x 5¼ in.; Weight, 28 oz.; 16 or 20-inch handles of selected hickory. List price: Without sheath, $1.50; with sheath, $2.00.

Liberal Discount to Dealers. Ask your jobber, or write Marble.

MARBLE ARMS & MFG. COMPANY
5350 Delta Ave., Gladstone, Mich., U.S.A.

A condensed ad. in this paper will bring results from all parts of Canada : : : :



COSTS LESS

than aluminum and zinc wash boards, is just as good and is more serviceable.

The All-Canadian
All-Wooden
Wash Boards

are the result of great scarcity and high price of zinc and aluminum—a price that has greatly handicapped washboard sales

All-Canadian grown wood, Canadian-made nails, and by Canadian workmen—that's why it's all-Canadian.

The finest grained hardwood is used for rubbing surface.

Retails at 20c and leaves a **BETTER** profit.

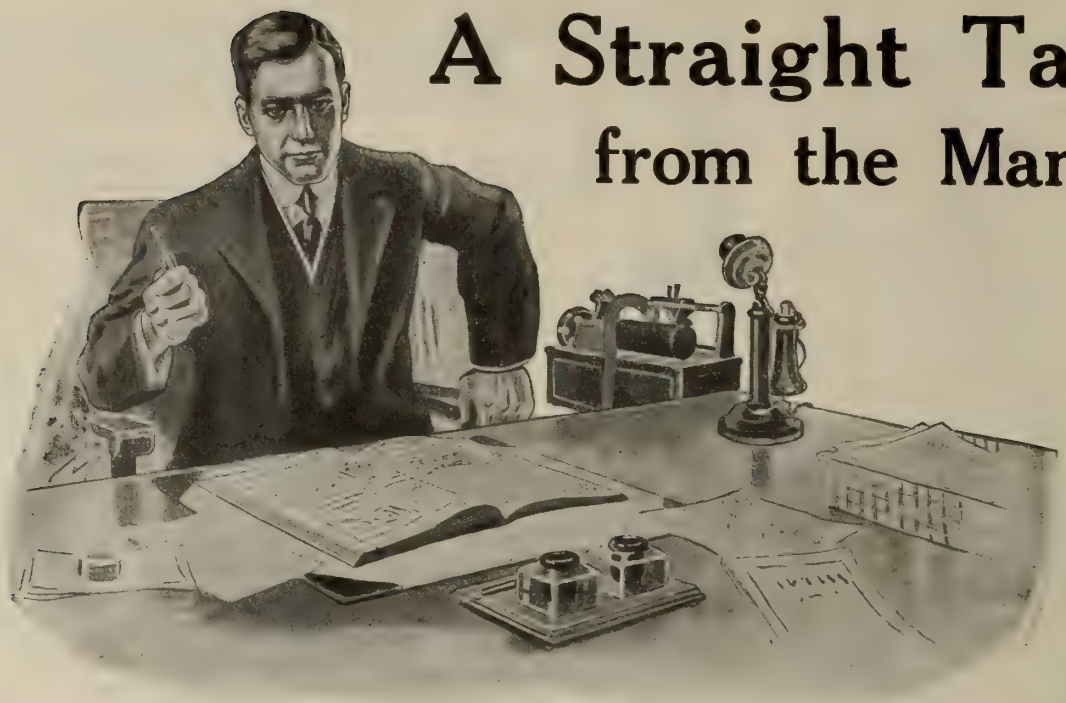
You can talk across the continent for two cents per word with a WANT AD. in this paper.



A Straight Talk from the Manager

Win This Good Prize!

ON another page of this week's issue, there is an important announcement of our Christmas Window Display Contest.

The Contest, this year, is being conducted on broader lines than ever before. A special prize has been added for windows dressed exclusively with goods advertised in Hardware and Metal's Christmas Goods Number, to be issued next week. The winner of this Special Contest will receive $15 in cash, or the best watch we can buy for that amount, suitably engraved.

Get after this fine prize! Study the advertising pages of next week's issue very carefully and then plan the best window display you know how, using goods shown in the advertisements.

J. G. L.

Condensed or "Want" Advertisements

Those who wish to sell or buy business or stocks, obtain competent help, connect with satisfactory positions, or secure aid in starting new enterprises, should not fail to use the Want Ad. Advertisement Page of HARDWARE AND METAL. It is the central market place of the hardware trade throughout Canada. There is always someone somewhere looking for just such proposition as you have to offer. RATES (payable in advance):—2c. per word first insertion, 1c. per word subsequent insertion, 5c. additional each insertion, when Box Number is required. Each figure counts as one word.

WANTED

A SOBER, INDUSTRIOUS, COMPETENT, young married man, desires position as manager and buyer of Western retail hardware store. Ten years' experience. Best references. Can guarantee results. Box 225, Hardware and Metal. (49)

WANTED. — A FIRST-CLASS HARDWARE salesman, must be good stockkeeper; one with some experience in window dressing and card-writing preferred. Apply, stating wages, to Carter Bros., Picton, Ont. (47)

SALESMAN WITH FIRST-CLASS CONNECTION in three provinces desires high-class line on commission basis for January 1st, 1916. Apply Box 226, Hardware and Metal. (tf)

AGENCIES WANTED BY A WIDE-AWAKE, aggressive and successful house of hardware and electrical sales agents covering thoroughly the Western Canadian territory. Firms requiring representation or unsatisfied with present arrangement should immediately write to Houston & Co., Ltd., 12 and 13 Cumberland Blk., Winnipeg, Man.

FOR SALE

FOR SALE—GOOD PAYING HARDWARE and stove business in best town in Ontario. Stock not too big, but well assorted. Owner retiring. Box 227, Hardware & Metal. (48)

$3,500.00 HARDWARE STOCK AND FIXtures for sale, in City of Toronto. Apply Box 228, Hardware & Metal. (48)

MISCELLANEOUS

FIRE INSURANCE. INSURE IN THE HARTford. Agencies everywhere in Canada.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

ADDING TYPEWRITERS WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314, Stair Building, Toronto.

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B." Otis-Fensom Elevator Co., Toronto.

GOOD STENOGRAPHERS ARE WHAT every employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

ESTIMATING. BY EDWARD NICHOLS, Architect. 128 pp., 22 illus. Cloth binding. Containing invaluable information for the use of Architects, Contractors, Builders, Plumbers and Heaters, Painters, Roofers, Cornice-Makers, and other workers in the building trades. This handbook tells just how to go about the task of making an estimate intelligently. Price, postage paid, $1.00. MacLean Publishing Co., Ltd., 143-153 University Ave., Toronto.

HARDWARE STORE BUSINESS METHODS—The authors of the articles in this book are for the most part practical and progressive hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infinite value to that trade. The 40 subjects discussed include: Rules and Regulations for the Hardware Store; Hardware Buyer; Good Methods in Stock Taking; Prices and Catalogues; Collecting Accounts; The Merchant and His Employees; Changing Business Conditions and How to Meet Them; Profit Figuring System; Starting in Business; Changing a Credit into a Cash Business, etc. 220 pages. Price $1.10, postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE WINDOW DRESSING—THIS IS the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. Size 8x11 inches. Price $2.60 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.

Malleable Iron Castings

for Carriage and Special Castings of all Kinds

Manufactured by

THE KYLE MALLEABLE CASTINGS CO.

MERRICKVILLE, ONT.

Atlas

10 Cent Fly Swatter

This swatter has an extra long handle — 10 inches. It is very neatly and securely bound with soft green felt — cannot mar the finest furniture. Especially adapted for parlor or drawing room use. We have made it extra strong and flexible — will outlast any now on the market.

Our 5 cent swatter is the best ever sold for a nickel. Also it has a triangular fold, permitting the insertion of your ad. if you desire.

Now is the time to place stock orders. We'll gladly quote prices and terms.

Atlas Mfg. Co.

New Haven, Conn.

The Size of Your File Turnover Depends Upon the Quality of the Line You Sell

Sell only the best and you'll ensure the very best results. By comparative tests under actual working conditions,

Delta Files

have proven that they cut faster and have a longer lasting cutting edge — you cannot offer a better value to your trade.

It's the only line of files from 3 to 24 inches made absolutely of crucible steel.

There's a shape and size to suit every demand—and a trade-mark on every tang that guarantees satisfaction to the user.

Order from your jobber.

Mr. Hardware Dealer

What Better Low-Priced Ash Sifter can you recommend than the

BANNER ASH SIFTER

No dusty back-breaking shaking or lifting. The rockers carry all the weight, and the ashes spread freely in the Large Sifting Tray. The Rocker Motion Sifts Rapidly, and the lid makes it practically DUSTLESS. All parts are galvanized, the can is strengthened with heavy wire rod and iron rockers and will stand the rough usage of the garbage man.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and a clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace—made for machine. Packed singly—packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

PURE
PAINTS

and STILL FIRST in the estimation of PAINT USERS.

If your paint department is to be a success the first essential point is the quality of your line. Sell good paint or none at all. You can expend a vast amount of energy in this branch of your business, but if your paint is not of the right standard, your efforts are wasted.

MARTIN-SENOUR 100% Pure Guarantee Protects the Dealer Agent as Well as the Customer.

Next to this it is most important that the line you carry is known to paint users.

Martin-Senour Paints and Varnishes have been brought to the attention of paint users by a more comprehensive campaign through various mediums of the press, interior and exterior displays, mailing campaigns, follow-up systems, etc., than has ever been attempted by a paint company in Canada. The result has been increased sales to the dealer agents.

This policy will be continued and extended during the coming season—connect your paint department with it.

BIG Ben is the biggest thing to-day in the American alarm clock industry. He has everything in his favor—quality, looks, and style. He runs on time, he rings on time, he stays on time.

Slender, massive, richly plated, he stands seven inches tall, with well-shaped distinct hands and a big broad dial easily visible in the dim morning light.

He rings just when you want and either way you want—*five straight minutes* or every other half minute *during ten minutes* unless you shut him off.

His keys are large, strong, easy to wind; his voice deep, jolly, pleasing to hear. The movement plates are bridged like on a Waltham watch— you can change both mainsprings *without taking the movement apart.* The pivots are of hard steel piano wire $\frac{22}{1000}$ of an inch thin. The escapement is a hardened steel pallet escapement—not a pin escapement like that of other alarm clocks.

We are carrying on hand a stock of Big Ben specially put up for *Canadian* trade, 6 in a carton together with a full set of Store Selling Helps, (posters and show cards.) On an order for 12 we give a solid mahogany display stand. On an order for 24 we print your name free on dials and with an order for 48 we send a striking, electric flashing sign, just the thing for your window or counter.

The minimum retail Canadian price is $3.00, and there's a $3.00 resale tag on everyone you buy.

Pumps that Carry Good Will

Dealers that sell McDougall's "Aremacdee" Hand or Motor Metal Force or Lift Pumps give their customers lasting satisfaction.

Every pump sold stays sold—gives the dealer no trouble.

They are metal — hand fitted valves — air-tight — strong — lasting.

THE CARBORUNDUM COMPANY, NIAGARA FALLS, N.Y.

Business is booming!

Toronto, Ont.

Merchants everywhere tell our 800 salesmen that business is booming.

Farmers have had a record crop, at big prices, with big demand at home and abroad.

Stocks of manufactured material are short, and labor is in great demand.
Exports largely exceed imports.
Factories are busy, a great many working overtime.

More freight cars are needed, and steamers are taxed to capacity.

Canada has, in proportion to population, greater exportable surplus of wheat this year than any other country in the world.

Millions of dollars are passing over the merchants' counters.

The people who spend this money want the best service.

They demand it in all kinds of stores, from the smallest to the largest.

They get it in stores which use our up-to-date Cash Registers, which quicken service, stop mistakes, satisfy customers, and increase profits.

Over a million merchants have proved our Cash Registers to be a business necessity.

Last month the N.C.R. in Canada had the largest sales of any month in the past seventeen.

How Much Grain Elevator Business Do You Get, Mr. Sheet Metal Man?

Fire insurance companies offer grain elevator owners reduced rates if they use non-inflammable materials for roofing and siding. As a result, sheet metal is rapidly replacing all other forms of roofing and siding for these buildings.

How much of this business are you getting?

No longer can a grain elevator owner object to sheet metal because of its short life. In fact, the life of a grain elevator will be increased by using

Rust-Resisting **Anti-Corrosive**

TONCAN METAL

Roofing and Siding

Toncan Metal will last longer than any other Sheet Metal made from iron ore. It is pure, uniform in structure and made by scientific methods. The cost is moderate.

Hundreds of sheet metal men are increasing their business by *recommending* Toncan Metal to grain elevator owners. *Why don't you?*

It's the Dealer Who Stocks

the best known lines that gets the business.

Your file stock should therefore consist of the following famous brands:

KEARNEY & FOOT
GREAT WESTERN
AMERICAN
ARCADE
GLOBE

(Made in Canada)

When you bear in mind that 10,000 dealers in Canada stock these famous five—

When you know that behind you is our 50-year-old experience in the making of files—

When we tell you that the Nicholson output is over 60,000,000 yearly—

The question is: Can you afford to be without these well-known brands of files on your shelves?

To help you, we're educating your customers, through advertising, to throw away their files when the "inefficient" point is reached. And that our efforts are not wasted is proven by the increased demand for files—of the "famous five" mentioned above.

"YANKEE" VISE

No. 1993

WITH SWIVEL BASE

A GREAT LITTLE VISE FOR A BIG LOT OF WORK

An entirely new feature in vises, quickly appreciated by Tool Makers, Machinists, Electricians, Amateurs and all users of high-grade labor-saving tools.

Quickly detached from swivel base by the turn of a set screw; and being accurately machined all over can be used in any position as a jig for special work on drill press, shaper, etc.

Holds work rigid at any angle with use of the special grooved block.

The swivel base is easily and firmly locked and released in any position by a short movement of lever at the side.

Jaws 2¾" wide, 1⅞" deep, opening 3⅛", Base 7½" long.

Your Jobber will supply you.

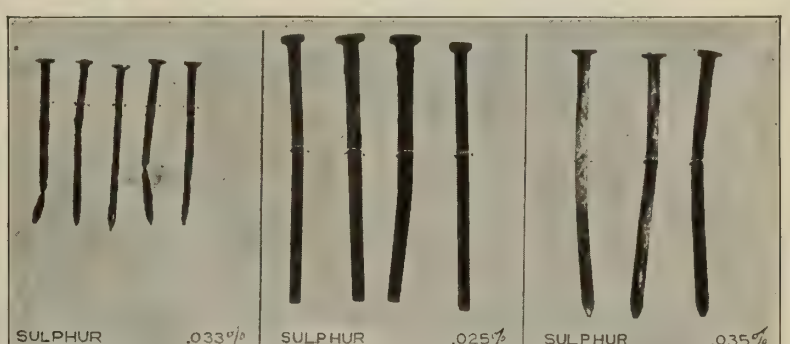
Purity–Evenness–Density

The Qualities of Lasting Iron

The iron and steel nails here pictured were taken (as shown by affidavits in our possession) from an old wooden weir which was built near Bakersfield, Calif., in 1888. The large square nails in the centre have been in service ever since, and are in practically perfect condition. Analysis shows them to be of iron very low in all impurities except silicon.



SULPHUR	.033%	SULPHUR	.025%	SULPHUR	.035%
PHOSPHORUS	.006	PHOSPHORUS	.021	PHOSPHORUS	.020
CARBON	.170	CARBON	.015	CARBON	.080
MANGANESE	.370	MANGANESE	.042	MANGANESE	.410
SILICON	TRACE	SILICON	.216	SILICON	TRACE
COPPER	.460	COPPER	.030	COPPER	TRACE

The round steel nails on the left and right were used in repairs on the weir during and since the year 1900 and have thus been in service a little more than half as long as the iron nails. The wire spikes on the right are somewhat damaged by rust. These are of typical open hearth steel,—very low in copper. The small wire nails on the left are rusted to failure. These are of steel with a high copper content.

It will be observed that the nails that have given very much better service than either of the other types are made of comparatively pure iron, with sulphur, phosphorus, carbon, manganese, and copper reduced to very low percentages. This instance, like practically all the evidence given by iron work which has seen long service, supports the statement that the nearer iron approaches the composition and characteristics of Armco Iron, the longer it will last.

AMERICAN ARMCO INGOT IRON

The trade mark ARMCO carries the assurance that iron bearing that mark is manufactured by The American Rolling Mill Company with the skill, intelligence and fidelity associated with its products, and hence can be depended upon to possess in the highest degree the merit claimed for it.

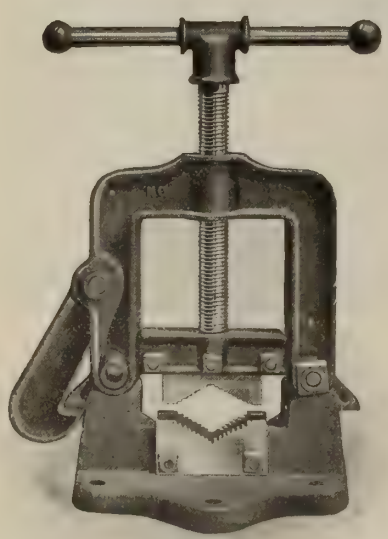
National Self-Locking Pipe Vise



A GOOD, STRONG, SUBSTANTIAL LINE OF VISES, MADE OF MALLEABLE IRON THROUGHOUT.

Made in 3 sizes: ⅛" to 2½", 3½" and 4½".

It embodies the following improvements:

We have done away with the apron in front.

The hooks and upper jaw clamps have been very materially strengthened.

The upper and the lower jaws have two bolts instead of one. The base has lug on both sides, making it possible to lock either side, and is useful in event of one lug being damaged.

The jaws are milled from solid steel bars, carefully hardened, tempered in oil to give toughness and each one tested.

Write for catalog showing our complete list of Machinists' and Woodworkers' Tools. The illustrations are actual photographs.

National Machinery & Supply Co., Limited

HAMILTON, CANADA

Why handle cheaply made inferior heaters?

Why, when you can buy heaters with no castings in their construction at all—heaters made so they won't bend or break—heaters that please your customers and help you sell more goods

Satisfied Customers are your best asset

You make that kind of customers when you sell them the celebrated

CLARK HEATERS

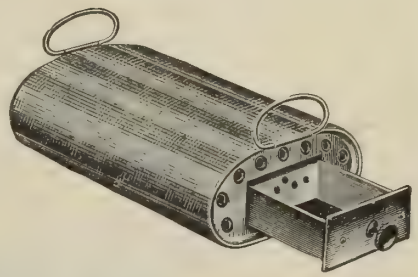
and they cost you no more than the heaters of inferior quality with cast ends.

Furthermore, Clark heaters are the only heaters that are now being advertised to your customers. They are the only heaters that have ever been advertised to users in Canada, and every advertisement asks the reader to go to his dealer for the heater.

Do not be misled. The heaters that sell best in Canada and every other country where heaters are used, are the Clark Heaters—they are made better, please better and offer as good or better profit. Almost every jobbing house of note in Canada handles the Clark Heaters—They must be best and we know you will find them so.

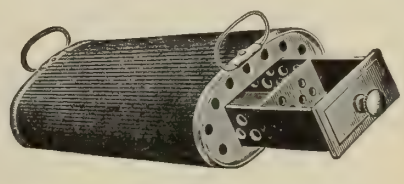
Insist on Clark Heaters. It pays.

Some Good Sellers from the Clark Line



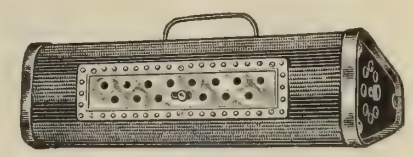
No. 5B Clark Heater

No. 5B Heater is light and handy, yet very enduring and sightly. Is 12 inches long and weighs 4 pounds. Heats quickly, furnishing a mild and comfortable temperature. This heater is used quite extensively by farmers, mail carriers and milkmen. Covered with fine Brussels carpet.



No. 3D Clark Heater

Our No. 3D Heater is one of the most popular sellers, being very strong and durable. It is 14 inches long and weighs 7 pounds. Has fine asbestos lining and is covered with Brussels carpet; has braid binding. Easily cleaned by brushing. Ends are of triple strength white metal.

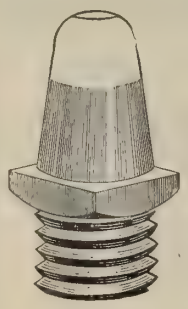


No. 7D, showing side and end ventilators.

No. 7D Clark Heater

No. 7D Heater, a well known and popular style, having flat, slanting top, and having ventilators in both ends and at the side with which it can be made to throw out as much or as little heat as may be desired. Is 14 inches long, and weighs 9 pounds. Has cold drawn steel ends, heavily nickel plated and is covered with superior Brussels carpet.

CHICAGO FLEXIBLE SHAFT CO., 250 Ontario Street, CHICAGO



You Can Always Spot a Well-Shod Horse

Draft horses hauling heavy loads slip continually unless their shoes are properly calked. They labor on the shortest hills, even in dry weather, while well-shod horses pass by on a run.

For every horse there is a Neverslip Red Tip Calk. Neverslips can be inserted in twenty minutes without removing the shoe. They save horses' lives, drivers' lives and the lives of pedestrians. What better reason for stocking them!

Always a Bull's Eye

Every time you sell a box of Dominion Shot Shells or Metallics, you score a Bull's Eye with the buyer.

And a pleased customer means a steady one.

He will come back to you for other hunter's supplies, and his satisfaction and confidence in you is reflected upon every one of his associates.

In just this way is a good, substantial, sporting goods business built up.

Dominion Ammunition contains every element that enters into the making of a perfect shell or cartridge — materials, machines, men—the very best of each.

The nation-wide interest in target shooting has resulted in a large demand for Dominion .22 Long Rifle target cartridges loaded with Smokeless, Lesmok or Black Powder. These are the Cartridges used by Canadian Cadets in matches, and the large majority of Canadian Rifle Clubs.

You can sell such ammunition.

It is repeat orders that count, and those who once shoot Dominion Ammunition always repeat. When they buy from you once, they are your customers always.

Keep your stock complete. Don't miss a single sale.

The Name "Goodyear"

¶ Are you influenced by public opinion?

¶ A manufacturer may spend thousands of dollars annually on national advertising; he may make a good product consistently, so that in time his "goodwill" is one of his most valuable assets. And "goodwill" is nothing but the public opinion of him, his goods and his business methods.

¶ Having moulded public opinion by this expenditure of money and effort, the manufacturer is ever on guard against anything being done, or left undone, to destroy that confidence.

¶ That multiplication of individuals called "the public" realize these things, too. They prefer buying the product of a manufacturer with whose name they are familiar, because they feel he has "established credit" with them. They are willing to take much for granted, which they would not do were the manufacturer's name less familiar to them.

¶ The name "Goodyear" is more than nationally known — it is well known in nearly every part of the world. To accomplish this, fortunes have been spent in advertising; years have been devoted to the improvement of every rubber product Goodyear makes; ceaseless vigilance has been exercised to make sure that everything bearing the name of the Goodyear company was the best that men could make.

¶ You will do well, next year, to tell your customers you sell **Goodyear Garden Hose**—instead of just "garden hose."

¶ They know the name "Goodyear."

Educating the Public to Shop Early

The Unfortunate Last-Minute Shopping Practice is Hard on Both Retailers and the Public—How Some Merchants Combine to Correct the Evil—Co-Operation Results in Better Business All-Round

THE disadvantage entailed on the retail merchant by the public leaving Christmas shopping until the very last moment can only be overcome by the retailer making an early start himself, and by a continuous publicity campaign.

Although Christmas buying this year has started earlier than usual, and educational work, carried on by large retail firms encouraging early Christmas shopping, has had a splendid effect, the fact remains that thousands of people will, as usual, postpone their shopping until the last minute. A great deal of Christmas shopping, which should be more or less evenly distributed over a period of a month or six weeks, is generally left until the last week. People postpone their shopping until the last moment. The result is that during the last two weeks before Christmas the stores are crowded, and are forced to handle a larger volume of business than they have the facilities for. In other words, the stores must handle more business than they can do with profit to themselves and perfect satisfaction to the customer.

Salesmen Handicapped

In order to handle the Christmas trade with the best degree of satisfaction merchants are forced to make special efforts to put on a larger staff, and in every way to exert the service facilities of their stores to the highest possible degree.

The result is that not as much business is done as would otherwise have been the case. Customers have not the time to make proper selection of gifts, generally taking the first thing they find which seems to answer their requirements. Salesmen have not the opportunity to induce customers to purchase gifts which would suit them best. Thus it is, generally speaking, a case of take the first thing which presents itself and which costs the desired amount.

There are, of course, people who carry out their Christmas shopping on a systematic basis. Many plan well in advance what they intend to purchase, and proceed to carry out these plans in the most systematic way. Frequently many of the desired articles will have been secured several weeks before the holiday. The average person leaves his or her shopping until the last week, or in a great many cases until the very last day.

The Public Suffers

In the first place, this practice, which is so unfortunately common, results in the public not getting as much satisfaction as they desire. By the time that most people get down to serious Christmas shopping the stock in the various stores has been picked over, and only a meagre selection is left. It is safe to assert that no person who leaves shopping until the last moment in this way is ever able to make up his or her list satisfactorily.

WIN THIS PRIZE

An important announcement appears on page 29 of this issue. A special cash prize of $15, or a watch of equal value is offered to the window trimmer who dresses the best window with goods which are advertised in this issue of Hardware and Metal, or the products of firms whose advertisements appear in this issue. This is not connected with the annual window display contest also announced in this issue. It is a special prize and is offered in addition to the eight cash prizes offered in the annual contest.

But More So the Merchant

But the chief brunt is borne by the merchant himself. It is, therefore, incumbent upon him to improve conditions as far as lies in his power. If he can induce more people to make their purchases at an earlier date, his own profit will be increased in accordance therewith.

There is only one way in which this can be done. The merchant must keep continually impressing upon the public the importance to themselves of doing their shopping before the real rush begins. This can be done by starting to display Christmas goods early, by advertising early and continuously, and by impressing upon people the fact that Christmas is rapidly approaching.

It should be borne in mind that the average person does not leave shopping until the last moment through malice aforethought, but rather through carelessness. "I will leave it until to-morrow," is the mental attitude of the average person to the question of shopping. In this way, they keep leaving it off day after day until the very last moment, when it is impossible to leave it off any further. It is only this fact that finally does force some people to get down to business. If proper methods were taken to keep before the minds of such people the fact that Christmas is growing closer all the time, it is certain that they could be induced to start their work of gift selection long before the time they do when left to their own resolutions.

If the merchants in a town would start in November or early in December to talk Christmas and to bring the suggestion of Christmas prominently forward in many ways, the result would be the shifting of the burden of Christmas shopping from the last few days to a period of two or three weeks previous to the holiday.

Is the Merchant to Blame?

It is perhaps the merchant who is to blame in the first place. A good many retail merchants do not begin to seriously cater to the Christmas trade until the last two weeks. About that time they begin to show Christmas goods in their store, to put in attractive window trims of articles suitable for gift-giving, and to put holly and other decorations throughout the store which suggests Christmas to customers. If this work were to be commenced a fortnight previous, the result would be an equal ac-

(Continued on page 36)

Selling Stoves to Quebec Farmers

IT was just before the big fire at Three Rivers, Que., about eight years ago, that Henri Nobert, now one of the largest dealers in the city, started to paddle his own canoe. For about eighteen years he had been in the employ of a hardware firm in Three Rivers, and the time had arrived to start out on his own hook. His shingle went up on a side street, and lucky for him it did. When the last line of hose had played, and the fire gong struck "fire out," it was discovered that Henri Nobert was about the only man in town with a stock of hardware left.

Flood of Business.

Here was his tide coming in at the flood with a vengeance. And he took it. He took it by working from 5 a.m. to 12 midnight, handing out builders' hardware, galvanized iron, nails, hammers, saws, tools of every description. His small stock was a mere flea bite to what was wanted, and it became necessary to send S. O. S. calls to Montreal jobbers

Mr. Nobert learned a lesson in that first year's business which beat square root to a frazzle. When it came to delivering the goods—that it's the man who gets the goods on the spot quickest who eventually handles the dough. His turnover for that year amounted to $45,000, which was not bad for a beginner. Moreover, it was the best ad. he ever inserted, and it set him on his feet as a hardwareman in Three Rivers.

Exterior view of the hardware store of Henri Nobert, Three Rivers, Que.

A Few Figures

Mr. Nobert states that his turnover in eight years has jumped to over $100,000, and he expects to show an increase for 1915. While sales of builders' hardware have declined, there is a healthy look about some of his lines. Of linseed oil since March, he has disposed of 50 bbls.; also 20 tons of white lead. From spring until now, sales of glass have totalled three cars. With one firm alone he has contracted for $2,500 worth of ranges for the year 1915; he expects to sell these, and more, not mentioning other makes, and furnaces and heaters. Sales of galvanized iron totalled two cars this year. His sporting goods department looks healthy. He disposed of 15,000 loaded shells during the past twelve months.

Now a sale of $2,500 worth of ranges is something to write home about. Many of them were disposed of in Three Rivers, but the majority have gone to farmers in the prosperous villages in the vicinity, such as Champlain, Batis-

Interior view in the hardware store of Henri Nobert, Three Rivers, Que.

can, St. Jite, St. Thecle, and Cap de la Madeleine. In the latter place there is a pulp mill running full time. Then the farmers have so much money, they are lending it in the city at six per cent.

They are spending it too on hardware, and while talking about stoves, it might be a good idea to explain why it is easy to sell them here. First and foremost, of course, the farmers' have money. Secondly, the stoves they have been using up to the present, in many instances, belong almost to the pre-historic age. They are of the two-storey type, i.e., they have a fire box beneath, and an oven on top, and the dimensions are such as to permit wood 24 to 30 inches long to be used as fuel.

The day when wood can be used economically as a fuel in this district has passed. It costs more, is a nuisance, and more than that the farmer wants something more fancy and practical than he has had.

Economy is a good selling argument, and cleanliness is a good clincher. The old two-storey structure is taken in part exchange, about three dollars as a general rule being allowed for it. It is sold for scrap to the local foundries, who are always in the market for it, paying 50c per 100 lbs., and sending for it. As these stoves weigh five to six hundred pounds, the dealer breaks about even.

Good Talking Points

Another feature of the modern range which appeals to the farmer is the closet. When it is pointed out to him that, no matter how late he is in coming from the fields, his dinner is kept warm, he is interested. He likes, too, the warm water reservoir; so does his wife.

While the hot air furnace is gradually coming into favor in country districts, some farmers cling rather tenaciously to their Quebec heaters. Whereas he wants to be as much like the city folk as possible, he cannot imagine a home in winter that is warmed by anything but the heater which has become so characteristic of this Province. However, he is accepting a compromise in the shape of a combination Quebec heater and oven, a comparatively recent idea, and a very handy thing for a small family. It permits with one fire, the heating of the house and the cooking of the dinner. A wood grate goes with it suitable for summer time, when heat is required only for cooking. At the same time there is a big demand still for Quebec heaters, and Henri Nobert claims to have doubled his sales within the past twelve months. He attributes many of his sales to the use he makes of booklets sent to him by manufacturers. The farmers read them, often write in for prices, and Mr. Nobert sticks right to them until he has the order.

Don't let anybody assume that he sticks around the farm. It speaks well for business, for the service he gives, and perhaps for the quality of his letters, that he is able to bring all his business in without a single traveler, or without leaving the store.

An Ardent Advertiser

Mr. Nobert is a believer in printer's ink. He uses every newspaper in town, and both moving picture shows. For the latter, he has a special plate for each season. If fishing is on, his picture shows an angler; if baseball, he shows something that brings the boys to the store for bats, balls and mitts; if it is clean-up, paint-up time, his ad. reads "Use ———— ———— to keep your house looking fresh," with a picture of a house that is good to gaze upon.

One day a man came into the store and said: "I see you are advertising varnish stain for old furniture, at the movies. Give me a can." He came back for six cans to do all his furniture.

Distribute Literature at the Fair

The annual fair provides an opportunity to reach seven or eight thousand people per day. At that time he gets all the literature he can from the manufacturers, with his name at the bottom of each sheet or booklet, and engages a man to distribute them on the fair ground. These booklets are taken into the country, and help to offset the mail order catalogue. They are much handier too, being a special treatise on each individual line.

More Repairs Than Building

There's no denying the fact that building, like in nearly every other town, took a slump this year, but while the demand for builders' hardware fell off in Three Rivers, in the country it held up fairly well. It is interesting to note that the demand from the country was more for cheaper hardware. Above it is stated that Mr. Nobert disposed of two cars of galvanized iron this year. This is accounted for by the fact that, while building has fallen off, there has been more repairing done, in fact, the repair permits granted in Three Rivers this year were double those of ordinary years.

Business in the Three Rivers district is unusually good, and in certain cases it

(Continued on page 40.)

An Unusual Opportunity

Window trimmers are offered a special cash prize of $15, or watch of equal value

IN addition to the eight cash prizes offered in Hardware and Metal's annual Christmas window display contest, announced on page 36 of this issue, a special prize of $15 cash, or a watch, of equal value, suitably engraved, will be given for the best window display dressed exclusively with goods advertised in this issue of Hardware and Metal, or with the products of manufacturers whose advertisements appear in this issue of Hardware and Metal.

This does not mean that only goods featured in the advertisements this week can be used. There is no restriction as to the goods shown in the displays, as long as they are the products of firms whose advertisements appear in this week's issue.

The contest for this special prize is open to all retail hardwaremen and clerks in Canada. All photos of displays must reach the office of Hardware and Metal by Friday, December 31. No photos received after that date will be entered unless there is proof they have been delayed in transit.

Each contestant will be expected to send in, along with photograph of the window display, a list of the articles appearing in the display, and also the names of the manufacturers of the goods shown.

All matter should be addressed to "The Editor, Hardware and Metal, 143-153 University Avenue, Toronto, Ont., and marked, 'For Special Prize Contest.'"

AN ANNOUNCEMENT REGARDING THE ANNUAL CHRISTMAS WINDOW DISPLAY CONTEST APPEARS ELSEWHERE IN THIS ISSUE

IS IT MANIPULATION?

A NOTE of warning regarding the advance in futures on spelter has been sounded by the *American Metal Market.* It is stated that there has been no satisfactory explanation for the advance in futures and it is suspected that advantage is being taken of the scarcity of supplies abroad, and the insufficient freight accommodation to manipulate the London market.

It is claimed that the American trade are inclined to regard the London quotations with a great deal of suspicion, for it is thought it is not at all unlikely that the English prices are being advanced in order to advance the American market. Every day during the last two weeks there has been more spelter offered for sale than there were buyers for, and yet nearly every day the price has advanced in accordance with London and yet the United States export trade is only taking one-fifth of their production. It is said England has not been a large buyer of late, and that it is a matter of common knowledge that domestic consumers are buying sparingly and in the majority of cases are confining their purchases to this year's deliveries. This being the case the market seems to be establishing itself on a false foundation which could be destroyed at a short notice by a loosening up in the London market. The situation at present is likened to the one that existed last June, and the same sort of a collapse is bound to follow if sellers permit artificial conditions to control prices.

The *Metal Market* states in part, as follows:

"It is said that present prices are justified because nearly all producers are sold out for two months and some are sold out until next April, but if we remember correctly nearly all the producers in June were sold out for the balance of the year and on that account some buyers were frightened into paying 24c to 25c St. Louis for extended deliveries, only to find the price 50% lower a few months later. This time buyers are not being so easily frightened and there has been no wild rush to buy as there was earlier in the year.

"The prices to-day are unchanged for prompt, November and December, but are ¼c higher for the first quarter and ¼c to ½c higher for the second quarter."

THE ACTIVITY CONTINUES

REPORTS from buying centres in Canada indicate that the buying movement is gaining in momentum and the feeling of optimism so noticeable of late, continues to develop.

The record crop which has been harvested this year has had an excellent effect on trade generally. There is a feeling that even though the demand for munitions in the coming months shows a falling off, the outlook is bright, owing to an era of industrial prosperity which is materializing.

The beginning of the new year is expected to bring about considerable activity in railroad betterment, and shipbuilding, particularly in the latter.

War orders will assist materially in keeping factories busy during the coming winter months. Many factories that were running short time prior to the war are now working overtime.

Orders for the large calibre shells are being placed, but in what quantities is not generally known. The Munitions Committee has fixed the price of steel for shells at 3½ cents per pound.

The steel industry is passing through a phenomenal period of prosperity which will benefit the trade to a degree never anticipated as recently as twelve months ago. Indications point to considerably less unemployment this winter and to improved economic conditions throughout the country.

GREAT BOON TO WESTERN BUSINESS

THE rise in the price of wheat during the past month or six weeks represents millions of dollars more to the Western Canadian farmer than he anticipated getting. Six weeks ago the price of No. 1 western wheat was around 88c in Winnipeg. The price has gradually advanced since then until to-day

it is around $1.04½. This means an advance of 16½ cents per bushel.

The estimated production of wheat in Manitoba, Saskatchewan and Alberta is somewhat over 300,000,000 bushels. At 16½ cents this would mean no less than $49,500,000 more for the Western wheat than the farmers expected six weeks ago it would be worth.

The last report of the grain situation in Winnipeg available shows that after allowing for seed, feed, etc., there was a balance of wheat in farmers' hands to market of 121,203,100 bushels. At the extra 16½ cents this would mean practically $20,000,000 in excess of what would have been received by the holders had the price of wheat remained at the 88 cent mark. At $1.04½ cents it will be seen that altogether it will mean some $126,000,000 yet to be handed over to the farmers of the three Prairie Provinces.

What this huge amount of money will mean to the business of the country can only be surmised. That the benefits will be great goes without proof. It illustrates the splendid situation of the Western farmer at the present time and reflects the splendid trade that retail merchants will secure this Fall, Christmas and Winter. "Two crops in one" is the way some of the Western farmers designate the yield this year.

SCARCITY OF HIGH-SPEED STEEL

THE situation in regard to high-speed tool steel is becoming a matter of grave concern to the engineering industry and more especially to owners of plants making munitions. The crux of the situation is largely the scarcity of tungsten. This alloy which gives to high-speed tool steel its peculiar characteristics, was formerly obtained from Germany and is also obtained from Burma, while tungsten powder is now being made in England. The supplies of tungsten now available would hardly be sufficient to meet the demand under normal conditions, but under prevailing conditions, due to the war, the demand for tool steel has increased to such an extent that the greatest difficulty is being experienced in obtaining sufficient tungsten.

The British Government owing to the enormous and urgent demand in Great Britain has practically prohibited the export of tool steel. Supplies coming to Canada from that source are therefore very limited.

The inability of the mills in the United States to meet the demand for high-speed tool steel is another factor which is also responsible for the present situation. The demand has risen so rapidly that the mills have got behind on their orders and consumers have to be contented with what they can get regardless of price, which does not cut much of a figure when the steel is required for munition plants.

Warehouse stocks are practically depleted, supplies therefore are now coming direct from the mills. The heavy demand in the States is naturally restricting the amount available for Canada and with the English supply to a large extent cut off, the scarcity of tool steel in this market is being severely felt. There are no indications of any improvement in the situation. The demand is on the increase and prices are advancing to unheard of figures. Even if the war were to stop to-morrow it is highly probable that the mills would continue active as warehouses would have to be stocked up.

INDUSTRIAL ACTIVITY

CITIES regarded as manufacturing centres are now reporting generally that orders are improving. Most of their industries, says *The Financial Post,* have on hand demands from the Government for munitions for one kind and another, but in addition, other orders of a domestic character are beginning to increase in volume.

Taking Hamilton as an instance, it will be found that its work people very generally are employed at good wages which they are now spending in a normal way in necessaries of life. That city is to some extent a wholesale centre and the houses engaged in that business state that substantial orders are now arriving from the Canadian West. We have referred to this city as being typical of manufacturing cities generally. Undoubtedly their position at present is very much better than at the corresponding period a year ago. Then the outlook was very uncertain, in fact, gloomy, but to-day, almost despite the fact of war existing, it does not appear that such cities can be again faced with a period of depression such as existed during the months following the outbreak of war.

THE MORE active we make conditions here the sooner will the ranks of khaki march down Unter den Linden.

* * *

DON'T BE satisfied because you are holding your own against your competitors. You ought to be gaining on them.

* * *

THE YOUNG man who is going to make good must possess the qualities requisite for success. If he does not possess them, he must develop them.

* * *

THE MORE knowledge there is in existence concerning the basis of granting credit and the handling of credit, the better for the business community, and the place to first commence an inculcation of credit knowledge is in our educational institutions.

WHAT BANK manager will loan money without convincing himself in the first place that the applicant is thoroughly reliable? Why should a retail merchant give out goods, which represent so much money to him, without taking equal precautions?

Announcement of Prize Winners

Window display which won $50 cash prize in Dominion Cartridge Co. window display contest. This display was arranged by Chas. Byford, for the Bond Hardware Co., Guelph, Ont.

THAT the recent window display contest conducted by the Dominion Cartridge Co., Montreal, was a success, is clearly shown by the large number of entries and the exceptionally high standard of the displays submitted. The conditions of the contest, announced in Hardware and Metal some time ago, stipulated that the display should contain only Dominion ammunition. This, of course, did apply to powder, arms and hunters' supplies. One of the conditions of the contest was that in each display the new window trim supplied free by the company was to be used in whole or in part.

The judges were S. W. Tilden, mgr. the Mortimer Co., Ltd.; R. S. Mullen, eastern mgr., Gagnier Advertising Service; H. M. Reed, eastern mgr. Hardware and Metal.

Prizes Offered

Two hundred and twenty-five dollars were offered in prizes as follows: First prize $50, second $25, third $15, fourth $10, and five prizes of $5.

Extra Prizes

As a matter of fact, when the pictures came before the judges, they were unable to choose five winners for the $5 prizes, there being so many of almost equal quality. With the consent of the Dominion Cartridge Co., the number of $5 prizes was increased to twenty, making the total amount distributed three hundred dollars.

The response was a great surprise to the Dominion Cartridge Co. Apart from the fact that the advertising matter supplied by the company was such as would assist in making an effective display, the fact that each contestant received a dollar for every picture sent in, regardless of whether the competitor secured a prize or not, made the contest particularly interesting. This money was forwarded immediately on receipt of the picture.

Considerable difficulty was experienced by the judges in coming to a decision, each of them spending a full day going over the pictures received. After each had made his own selection, the three judges met and decided upon the winners. Each judge selected twenty-five pictures in the order of his personal preference. It was found that the seventy-five choices represented thirty-

(Continued on page 40.)

The above display secured second prize ($25) in the Dominion Cartridge Co. contest, and was arranged by D. A. Smith for the Day Hardware Co., Red Deer, Alta.

EVENTS IN THE TRADE

Obituary

Toronto, Ont.—The death occurred here recently of H. M. Green, who for many years was in the hardware business at Ridgetown, Ont.

Start New Company

M. R. Griffiths has severed his connection with the Gurney Foundry Co., Toronto, and has gone into business with W. J. Young, formerly of Fess Systems, Ltd. The new firm's name is Three-O-System Co., located at 353 Yonge Street, Toronto. The new company will sell a rotary system of burning fuel oil for heating and power purposes.

Dominion Incorporations

Dominion Copper Products Co., capitalized at $400,000, head office Montreal, to manufacture and deal in copper, brass and other metals.

Canadian Lockers, Ltd., capitalized at $100,000, head office, Toronto, to manufacture and deal in lockers, safety deposit vaults, vending machines, etc.

Ontario Incorporations

The Brandon Shell Co., capitalized at $100,000, to take over the business of the Brandon Shell Syndicate of Toronto, and to manufacture and deal in munitions of war.

Ideal Foundry Hardware Co., capitalized at $50,000, head office Toronto, to take over as a going concern the business of the Imperial Foundry Company.

Italian Mosaic and Tile Company, capitalized at $40,000, head office Toronto, Ont., to carry on the business of tile manufacturers, etc.

Personal

Fred J. Mills, of the Mills Hardware Co., Hamilton, Ont., is now at Kingston, Ont., taking a course to qualify as a commissioned artillery officer.

Capt. Costyn Cutcliffe, of Turnbull & Cutcliffe, hardware merchants, Brantford, has been appointed to command the 125th Brant County Battalion, which it is proposed to form for service at the front.

Chas. A. Craig, of D. H. Howden & Co., London, Ont., was a business visitor in Toronto this week. Mr. Craig spoke optimistically regarding business conditions in Western Ontario, and stated that retailers are now buying more freely than for some time past.

An Explanation

Remington Arms — Union Metallic Cartridge Co., announce that owing to rumors which have gained circulation to the effect that the company has changed hands, they feel called upon to advise

WALTER C. ALLEN,
President Yale & Towne Mfg. Co.

An article on page 37 of last week's issue of Hardware and Metal, told how Mr. Allen worked his way up from truck-boy to President of the company.

the trade that the "Remington Arms Co. of Delaware" whose plant is located at Eddystone, Pa., and which was sold to the Midvale Steel & Ordnance Co., was merely a subsidiary company organized solely for the execution of a large order for military rifles. No sporting rifles were manufactured at that plant. The Remington Arms works at Ilion, N.Y., the Union Metallic Cartridge Works and the new Remington Arms Works at Bridgeport, Conn., and the Remington Arms-Union Metallic Cartridge Works at Windsor, Canada, have undergone no change whatever, and no change is contemplated.

Sales Managers Organizing

Winnipeg, Man.—Organization among the representatives of the various wholesale houses in the city has now spread to the sales managers, and at a meeting held recently in the board room of the Canadian Credit Men's Association, at which 24 sales managers of local wholesale houses attended, the launching of "The Sales Managers' Association of Canada" was successfully accomplished. W. L. Helliwell, of the Gurney Northwest Foundry Co., presided and those present were representative of all trades.

A committee of five, including C. H. S. Bamford, of the J. H. Ashdown Hardware Co., and W. J. Wilson, of the Winnipeg Ceiling & Roofing Co., was formed to evolve a plan to submit to a future general meeting of sales managers. A joint meeting of credit men, sales managers and travelling salesmen will be held on Dec. 29. The evening entertainment will be in the hands of a committee of credit men under the direction of G. M. McBride, credit manager of Wood-Vallance, Ltd.

HARDWARE LETTER BOX

Hand-Knitting Machines

McKinley & Northwood, Ottawa.—Please advise, if possible, where we can procure a hand-knitting machine.

Hand-knitting machines are made and sold by the Dundas Knitting Machine Co., Dundas, Ont.—Ed.

CATALOGUES AND BOOKLETS

Christmas Suggestions

George Wostenholm & Son, of Sheffield, England, through their Canadian agents, A. Macfarlane & Co., of Montreal, have issued to the trade a very useful little booklet of Christmas suggestions from Montreal stock. The lines featured are: cases of cutlery, dessert sets, fish sets, fruit sets, manicure sets, child's sets, fish carvers, bread knives in cases, teaspoon sets, miscellaneous spoons and knives and forks. This booklet should prove to be a valuable guide to the dealers at the present time.

THE JUNIOR CLERK'S PAGE

When Men Begin to Fear

Failure is Largely a Disease—Only One Way to Acquire Anything in the World—How to Win the Prizes of Life

WHAT we get in life we get by the law of attraction. Like attracts like. A poverty-stricken appearance draws you toward poverty. If you don't look prosperous, assume a prosperous appearance at once. Whatever you may have managed to get together in this world you have attracted by your mentality. You may say that you have earned these things, that you have bought them with your salary, the fruit of your endeavor. True, but your thought preceded your endeavor. Your mental plan went before your achievement. The mental plan always goes first; the vision before the reality.

The text, "He that hath a bountiful eye shall be blessed," is the expression of a fundamental truth. The pictures you make in your mind's eye, the thoughts you harbor are day by day building your outward conditions.

Increase Your Power

The more you think and visualize favorable conditions the more you increase your power to realize them. You make yourself a prosperity magnet. This is its law. But if you allow yourself to hope one day and to despair the next, you are demagnetizing yourself as fast as you magnetize. You are destroying the pulling power of your prosperity magnet. You are neutralizing its affinity. You are making it a poverty magnet. Apparently you are trying to get something, while most of the time your mind is working in the opposite direction and driving it from you.

We are so made up that about all we get in life is the reflex of what first flows out from us.

If you are sending out a perpetual poverty current, a doubt current, a discouragement current, it does not matter how hard you may be working in the opposite direction, you will never get away from the current you set in motion. The sort of thought current you generate will flow back to you. The poverty current will never bring back the supply current; it will bring back more poverty. The failure current will not bring back success; it will bring more failure. This is a law.

Make Yourself a Magnet

You must think in a positive, determined way that you are going to succeed in whatever you desire to do or to be before you can expect success. That is the first condition by which you can make yourself a magnet for the thing you are after. It doesn't matter whether it is work, or money, or a better position, or health, or anything else. Your thought about it must be positive, clean cut, decisive, persistent. No weak, wobbly, "perhaps-I-may-get-it," or "maybe-it-will-come-some-time," or "I-wonder-if-I-shall-ever-be-this,-or-if-I-can-do-that" sort of thought will ever help you to get anything in this world or the next.

When young John Wanamaker started with a push-cart to deliver his first sale of clothing, he turned on a positive current toward a merchant princeship. As he passed big clothing stores he pictured himself as a great merchant, owner of a much bigger establishment than any of those he saw, and he did not neutralize or weaken this thought current by doubts or fears as to the possibility of reaching the goal of his ambition.

Power of Thought

Most people think too much about blindly forcing themselves ahead. They do not realize they can, by the power of thought, make themselves magnets to draw to them the things that will help them to get on. Wanamaker attracted to himself the forces that make a merchant prince. Every step he took was forward, to match the vision of his advance with its reality. If the young man had been satisfied with himself at the start he would have remained in his first little store in Philadelphia, and would never have become one of the greatest merchants the world has seen.

Failure is largely a disease. When men begin to fear, begin to worry, begin to be haunted with a foreboding that they are going to fail, they invite the very condition they fear. It is a mental law that whatever is held in the mind becomes the life pattern, and the life processes build in accordance with the design held up to them.

We are what we are largely through auto-suggestion. Our fears, our anxieties, our doubts, our discouragements, our despondency, all the enemies of our success are daily woven into the pattern of our lives. Why do we allow those enemy thoughts to have any part in our plans, in our life weaving? We can think what we will. We can open or close the gates of our minds to any thought, suggestion or emotion, beauty or ugliness, love or hate, poverty or opulence. What we shall or shall not think is purely optional with us, but the result of our choice is decisive and determines our destiny.

Someone has said that no one even went to jail or to the poorhouse who did not attract the jail or the poorhouse to himself. A lifetime of observation and study of the question has convinced me that people who make miserable failures of their lives as a rule expected to do so. They had such a horror of the poorhouse, they lived in such terror of coming to want, that they shut off the very source of their supply. They had so warped their minds that they could see nothing ahead but poverty. They wasted the precious energy which might have been utilized in happiness building,

(Continued on page 40.)

A RARE OFFER

A hardwareman in a Western Ontario town recently engaged a clerk who said he was a good card writer. The firm's window trimmer had just arranged a display of vacuum cleaners in one of the show windows and the boss instructed the new clerk to prepare an appropriate show card and place it in the window. A few hours later the boss saw two ladies looking at the display and apparently laughing at something in the window. After the ladies passed on, the boss went outside and was amazed, on looking in the window, to see a large and elaborately prepared show card bearing the following, "Don't kill your wife. Let the Cleano Vacuum Cleaner do the Work."

Expects a Bigger Christmas Trade

Hardware Merchant's Opinion of Outlook for Christmas Trade—Reasons for Optimism—Manufacturers' Advertising Campaigns Assisting Retailers — Lines That Are Going to Sell This Year

A WELL known Ontario retail hardwareman, discussing trade conditions the other day said, "I have been in the hardware business for many years, and have put on a good many successful selling campaigns during the four weeks preceding Christmas, but I do not remember a year in which the prospects for business looked better than right at the present time. The factories in our city are now very busy. There is little or no unemployment. Deposits in the savings banks are the largest in the history of our country. During the past few weeks there has been a general loosening of purse strings and the general public is buying more freely. Collections from the retailers' standpoint have shown considerable improvement of late. There is evidence of a general return of prosperity, and although trade in some lines such as builders' hardware, etc., has not been as good as in former years, I feel confident that the Christmas trade during the month of December, as far as the retail hardwareman is concerned, should be considerably better than in any former year."

Some of the Reasons

There are several reasons that would justify a prediction that the Christmas trade this year will be ahead of previous years. In the first place, it is generally admitted that the giving of practical gifts will be more general this year than in previous years. Useful gifts such as many of the articles sold through the hardware trade, lose nothing in attractiveness. If you are in doubt regarding this point, visit a modern hardware store and examine the goods shown in the cutlery, electrical appliances, and household goods departments. Or, examine some of the excellent window displays which appear from time to time, and especially during the few weeks preceding Christmas.

Many of the finest window displays shown in Canada during the Christmas season, appear in hardware stores.

Scarcity of Goods

There is another phase of the business situation, that confronts the buying public this year, and it is the scarcity of many lines of gift goods which were offered in former years, by other branches of the retail trade.

Thousands of articles secured from Germany and Austria in former years, will not be shown on the Canadian market this year. They will be replaced by other lines—mostly practical articles. And not a few of the latter will be sold by the retail hardware trade.

Manufacturers Assisting

Manufacturers of electrical devices, table ware, auto accessories, clocks, and many other lines sold through the hardware trade, are at the present time conducting mammoth advertising campaigns, which are bound to send thousands of customers to retail hardware stores through the Dominion.

These campaigns are being conducted on a larger scale this year, than in any former year, and will prove doubly effective for the retailer, if the latter will link-up with the national campaigns, and make use of the many dealer helps which are offered free of charge.

Attractive display cards, window cards, cut-outs, leaflets for distribution to customers, etc., can be secured at little or no cost to the retailer, and if used in conjunction with the retailer's regular newspaper advertising and window displays will prove very effective in pulling business.

What To Sell This Year

Since last Christmas many new lines have been developed and placed on sale in hardware stores. Electrical devices are being sold now, on a larger scale than

The above display will furnish many suggestions for use by hardware window trimmers during the next few weeks, when Christmas window displays are being made. This display, arranged by C. H. Smith for the J. H. Ashdown Hardware Co., Winnipeg, was entered in Hardware and Metal's annual Christmas window display contest last year for places of 5,000 population. Window trimmers should note the wide range of gift goods on display without any signs of overcrowding. The background, featuring cutlery almost entirely, is decidedly attractive.

in any previous period. What is more useful or attractive, than an electric toaster, or grill, an electric iron, or even a reading lamp. All these devices make excellent Christmas gifts. But there are many other excellent selling electric devices. They include, electric vacuum cleaners, curling irons, disc stoves, percolators, heating pads, milk warmers, etc.

One hardware firm has already taken orders for a large number of electric sewing machine motors to be delivered the day before Christmas. These motors make an ideal gift, and can be used on almost any sewing machine.

Last, but not least, is the electric washing machine and wringer. Some merchants are obsessed with the idea that electric washing machines and wringers are slow sellers, they may be in some localities, but a surprisingly large number are being sold by hardware firms who have been going after the business.

Other lines for which there should be a heavy sale this year are cut glass, silver plated ware, table and pocket cutlery, skates and sporting goods, hand sleighs, shaving outfits, razors, strops, brushes, candle sticks, thermos-bottles, food choppers, brass jardinieres, fern dishes, coffee mills, casseroles, bread mixers, scissors and hundreds of other articles.

Tools Good Sellers

Tools should be in good demand this year. They can be sold in sets or separately. Parents whose boys are attending manual training schools should be easily interested in tools.. Automobile tool kits should also sell readily, to those who wish to present gifts to autoists.

Automobile and carriage warmers make ideal gifts, not only for auto owners, but for those who are forced to do considerable driving during cold weather. Motor luncheon sets make ideal gifts for motor owners.

Other hardware lines that should be specially featured during the Christmas buying season are stoves and heaters, washing machines, wringers, aluminumware, enamelware, mitts, guns, rifles, door mats, fancy coal boxes and coal hods, fire sets, etc.

Using Show Windows

In order to place before the public, the many lines which a hardware merchant has to offer for the Christmas trade, it is necessary to use all available display facilities.

Display space is valuable at all times but doubly so during the Christmas buying season.

At this season the show windows of retail establishments are scrutinized more closely than at any other time. Newspaper announcements are watched closely, and booklets and other advertising matter scanned carefully by the buying public.

Christmas Window Contest

FOR many years past it has been customary for Hardware and Metal to conduct a Christmas window display contest each year. The contest has become an event of wide interest for all Canadian retail hardwaremen interested in window trimming, and each succeeding competition has been keener and each year has seen a wider and more representative response culminating in the big success of last year.

In accordance with past custom, two contests will be conducted this year—one for stores in places under 5,000 population; the other for places of 5,000 and over. No restrictions will be set on the style of display or the goods used in the arrangement, except that each window must be arranged with goods for the Christmas trade.

Eight prizes will be offered as follows:—

PLACES OF 5,000 AND OVER

First Prize	$10.00
Second Prize	5.00
Third Prize	3.00
Fourth Prize	2.00

PLACES UNDER 5,000

First Prize	$10.00
Second Prize	5.00
Third Prize	3.00
Fourth Prize	2.00

Contestants will note that an equal number of prizes are offered to the small town window trimmer as to those in the larger towns and cities.

The contest closes on Friday, December 31. No photos received after that date will be entered unless there is proof that they have been delayed in transit.

All matter should be addressed to "The Editor, Hardware and Metal, 143-153 University Avenue, Toronto," and marked "For Christmas window contest."

SEE SPECIAL PRIZE ANNOUNCEMENT ELSEWHERE IN THIS ISSUE

The one big question during the next few weeks will be "What can I Give?" The hardwareman should this year be able to answer all inquiries, and meet all demands, and as a result of his readiness be able to reap a rich harvest of profits from the Christmas trade of 1915.

EDUCATING THE PUBLIC TO SHOP EARLY

(Continued from page 27.)

celeration in the shopping gait of the public.

Merchants Combine

In some places the rule has been followed for merchants to get together and plan out a systematic early shopping campaign. The result is that all the stores in town begin early to show Christmas goods, the advertising columns of the newspapers are full of suggestions to customers, on every hand there is the suggestion that Christmas is growing closer; and the result is that the public begins early to lay in a supply of Christmas gifts. Where merchants combine in this commendable endeavor, the result inevitably is a better and earlier Christmas shopping season.

Where it is impossible to get all merchants in town working along the same line, each individual merchant should do his best to bring about this much-to-be-desired culmination. The progressive merchant, who starts out to do the best he can along this line, can rest assured that the result will be a larger share of trade for his store and a better distribution of it over the period preceding Christmas.

How to Prepare a Christmas Booklet

Leaflets and Booklets, if Properly Prepared and Judiciously Distributed, Will Produce Good Results for the Retailer in Securing Christmas Trade — Suggestions for Contents

By L. E. CURTIS

THERE are many ways by which hardwaremen in towns and cities throughout Canada can advertise and feature Christmas gift suggestions.

Newspapers, programs, movie shows, window displays, circulars, booklets and many other mediums are used.

All the above, if properly used, can be made to pull a very considerable amount of business.

The Use of Leaflets or Booklets

A comparatively few hardware firms use leaflets or booklets which give lists of gift suggestions. In some cases illustrations are shown.

The cost of preparing a 4 or 8-page booklet featuring gift suggestions would not be very great, and if the booklets were distributed judiciously they would certainly pay for themselves many times over.

The idea of this article is to give retail hardwaremen some ideas, which they can put into practical use, if they so desire, in preparing advertising leaflets or booklets.

Christmas is rapidly approaching. Considerable buying has already taken place, but the bulk of the Christmas gift buying is done between December 1 and Christmas Eve.

Every hardware retailer, who has kept abreast of the times and has a modern hardware stock, has in stock many articles suitable as Christmas gifts. A good idea is for the retailer to have prepared—printed—his Christmas gift list.

This can be made into a four or eight-page leaflet, or a booklet of large or small dimensions as desired.

Suppose that Mr. Blank, of the Blank Hardware Co., wants to get out a Christmas gift booklet of eight pages, but hardly knows how to go about it. In his stock are dozens of things that make ideal Christmas gifts. Mr. Blank could get out a modest eight-page leaflet, 3¼ in. x 6 in.—just the right size to go in a No. 8 envelope—say, in two colors. A suggested treatment for the first page of the proposed leaflet is shown in the accompanying suggestion on this page.

The Contents of Blank's Leaflet or Booklet

Mr. Blank can arrange his suggestions variously. For example, he can group his suggestions under such headings as:

Gifts for Grandfather.
Gifts for Grandmother.
Gifts for Father.
Gifts for Mother.
Gifts for the Big Sister.
Gifts for the Big Brother.
Gifts for the Girl.
Gifts for the Boy.

By going about the matter in this way, and by going over his stocks very carefully, dozens of things will suggest themselves. Suppose that it is "Gifts for Father." Here are some suitable things: Safety razor, pocket knife, tools of various kinds, reading lamp, napkin ring, smoking outfit, ash tray, and dozens of other articles.

Prices ought to be given and descriptions, if possible.

Suggested first page Christmas treatment for a leaflet which retailers can have prepared for distribution during the Christmas season. See accompanying article for elaboration of idea.

Or the gifts can be suggested otherwise—classified as to price. For example:

Gifts for 25c and less.
Gifts for 50c and less.
Gifts for $1.00 and less, and so on.

Or gifts can be listed in still another way:

Gifts of utility (a vacuum cleaner, for example).
Gifts of ornaments (brass candlesticks).
Gifts of silver (a silver teapot).
Gifts of a personal nature (skates).
Gifts which all may enjoy (an oil stove).

A leaflet or booklet of this kind will be greatly valued by gift-makers, and should prove a good investment. The booklets could be mailed out to a selected list of prospects, or could be handed out by salesmen to customers who visit the store.

In every district there is potential business for the retailer who will dig it up. Hardwaremen must be more than order-takers; must do more than wait for business to drift their way. The creation of business is enriching in many ways.

Gifts for Soldiers

There are several important and unusual features in connection with the Christmas trade of this year. Thousands of soldiers are now in training in various towns and cities in Canada. Friends will shower them with Christmas gifts. Already there are retail hardwaremen, with keen foresight, who are pushing the sale of razors, pocket cutlery, electric flashlights, shaving mirrors, razor strops and other articles used by the soldiers. It would therefore be a good plan when making up a booklet of gift suggestions to have a good number of articles listed under the heading "Gifts for Soldiers."

Gifts for the Autoist

Auto owners can now be numbered in thousands, in fact there are in the neighborhood of 200,000 automobiles in use in Canada. Why not run a list of gift suggestions under the heading, "Gifts for the Autoist."

There is an almost endless list of articles suitable for gifts for auto owners. A few of the articles are:—Carriage heaters, rugs, mats, electric flashlights, thermos bottles and lunch kits. tool kits,

(Continued on page 40.)

METHODS *in* CHRISTMAS MERCHANDISING

In this department are offered suggestions which are intended to help the retail hardwareman in pushing his Christmas sales campaign. Christmas buying has started earlier than usual this year, and the merchants who go after the trade early in the season are the ones who are most likely to show increases on the Christmas trade of previous years.

Price Tickets That Talk

NEAT price tickets shown on Xmas goods are great sales producers. At this season of the year, people are looking around for goods suitable for Christmas gifts. Many customers appear to be too timid to ask questions regarding the price of goods. They fear that they will bother the clerks too much. It often happens the customer who does not ask questions gets the idea that the unticketed article is high in price, when as a matter of fact it is just about the price the customer would want to pay for a gift article.

Last December a retail hardwareman secured a snap on several dozen pearl handled butter knives, pickle forks, etc. They could be sold at 75c each and yield a good margin of profit.

They were placed in the show window, unticketed, along with other goods, but the merchant received very few inquiries. People would look in at the display of goods and then pass on. A salesman suggested that price tickets should be placed on the goods, to let the public know the prices.

Within half an hour after the 75c price tickets had been placed on the butter knives, pickle forks, etc., they began to sell, and by the end of the day the stock was sold out. The merchant had a snap to offer to the public, but he neglected to let the public know about it. Had it not been for his alert salesman who suggested price tickets, the chances are the bulk of stock would have remained unsold and been carried over for another season.

What style of price card is best? The retailer can use plain cards if he so desires, but at Christmas time it is advisable to use something appropriate.

Almost every stationery store sells cards of various sizes, the most popular size measures about 1½ inches x 3 inches, bearing the inscription, "A Merry Xmas" or "Xmas Greetings," surrounded by a colored holly border. These cards may be purchased at a cost of 5 or 10 cents per package. The blank spaces on the cards, generally used for individual's names can be used for showing,—either by stamping or marking—the prices of the goods on sale.

The neat appearance of the cards add greatly to the value of the display, and at the same time tell the prospective customers the price of the goods offered for sale. A great merchandiser once said, "a piece of merchandise without a price ticket is a dead meaningless thing—but with one it becomes an answer to an unasked question."

* * *

Ideas That Sell Goods

A HARDWARE merchant who pushes the sale of electric irons, ice and roller skates, tools, etc., during the Christmas season tells customers that all parcels of articles sold as Christmas gift goods, are wrapped in holly decorated paper. This idea makes a hit with customers. The paper used is a white crepe paper, decorated in colors with holly patterns. It can be purchased at almost any stationery store, in rolls about 18 inches wide, and at a cost of about eight or ten cents per roll.

* * *

THE CHRISTMAS bazaar idea which originated in the large department stores has been followed in a smaller scale by retailers in various places. Some hardware firms use a section of the store for making a special display of all Christmas goods, and have it appropriately decorated for the occasion with holly, greeting cards, etc. Other firms hold bazaars on the second floor of the store, and show toys, sleighs, and other lines of goods in which the children are interested. In order to make a success of an undertaking of this kind it is necessary to advertise and let the public know that you are holding a bazaar. Otherwise the proposition will not pay, and the results will be very disappointing.

* * *

THE USE of show case lamps in silent salesmen or wall cases, makes a great difference in the display effect. One merchant, had a very neat display of coffee percolators, nickel-plated, and brass goods, case cutlery, etc., in a silent salesman and although the goods were beautifully finished they did not show up to advantage. The merchant installed two show case lamps in the silent salesman and when illuminated they improved the appearance of the display several hundred per cent. The cost of installing the lamps was very small, and the results obtained were astonishing. Another merchant improved the effectiveness of his Christmas window display many times over by discarding the old incandescent lamps which he had used for two or three years, until they had grown very dim, and replacing them, at a moderate cost, with new lamps, which not only brightened up the display of goods but improved the appearance of the entire store front.

Telling the Public About It

If You Want to Sell Christmas Gift Goods You Must Let the Public Know What You Have for Sale—How Advertising and Display Methods Have Developed

NOT many years ago a faker visited a city where the annual fall fair was in full swing. He visited a hardware store and bought two dozen knife sharpeners, which retailed at ten cents each. He went out on the market square, stood behind a shipping case, and sold the sharpeners at 25 cents each, disposing of the lot in an hour's time, and cleaned up a clear profit of $3.60. How did he do it? He advertised. Had he placed the sharpeners under a bushel they would have remained there. and no sales would have been made.

The retail hardwareman is in much the same position. If he wishes to secure the portion of Christmas trade he ought to have, he will find that it is necessary to advertise.

There are many ways by which the hardwareman can advertise the fact that he is in a position to supply the needs of the gift-buying public.

Christmas buying this year has started earlier than usual. The department stores in the large cities are pushing Christmas goods. They advertise them. They do so in many ways.

Christmas goods can be advertised in the newspapers, by letter or circular, booklets, window displays, interior displays and in many other ways.

Hardwaremen, no matter where they are located, are bound to secure a certain amount of Christmas trade whether they go after it or not. But, what is the use of doing only fifty dollars' worth of business in a day, if by using modern methods you can do double that amount.

A writer in a contemporary not long ago, referred to the laxity of hardwaremen in going after business. The writer was evidently unacquainted with the actual conditions. for it is doubtful if there is any class of retail tradesmen who use more intelligent methods in going after business, than the retail hardwaremen of Canada. But there is always room for improvement, and the sensible merchant is always on the look-out for new ideas, and new helps that will help him to do a bigger and more profitable business.

Back Numbers

Of course, in any line of trade there are a few back number who never have and never will become big merchants.

An incident was related in this paper some time ago, telling of the methods of one of the small merchants who will probably always remain small.

This merchant said: "I don't think it is necessary to go to any extra trouble to arrange a window display. I have certain lines of goods and I will simply put them in the window without trimmings or price cards. I believe that if anyone is interested in the goods they will come in and ask what the price is. Price cards, show cards and other nonsensical decorations do not make the goods any better."

The merchant is certainly entitled to his opinion. Nearly everyone will admit that price cards, show cards, dealer helps supplied by manufacturers, etc., do not make the goods any better, but they certainly help to sell the goods. Axle grease does not make a wagon any better but grease helps to make the wagon run smoothly just as price cards, show cards and modern display methods help sales to run smoothly.

Creating a Desire for Goods

Opportunities for merchandising have multiplied many times over, in recent years.

The retailer of to-day has at his command facilities for placing his goods before the public in a manner undreamed of twenty or thirty years ago.

The manufacturers are to-day assisting the retailer more than they have at any time in the past.

The leading trade papers are to-day giving better service than in the past, and have in recent years provided dealer helps and services which were unthought of a few years ago.

There has been in recent years a huge all-round development in display and sales methods, and the public spends money more freely now than in olden days.

A trim from Eastern Canada. The above display of Christmas goods appeared in the show window of the Sumner Co., Moncton, N.B., and was entered in Hardware and Metal's annual Christmas window display contest last year. This display was arranged at very little cost and proved very effective. Among the various articles on display are silver plated cutlery, thermos bottles, safety razors, spoons, forks, knives, electric table lamps, scissor sets, carving sets, razor strops, manicure sets, cutlery in cases. Pocket knives are shown on the star hanging in the background. The window was brilliantly illuminated at night by electric lights shown in the background.

The store window has played a big part in this development. After all is said and done, there is no way to create a desire for goods like showing them. Put the goods out where people can see them and sales are bound to follow.

Tell the People

Telling people about goods—through the newspapers—is an effective means of bringing trade but advertising is more effective if backed up by window trims which show people the goods.

In the olden days, merchants had not learned this truth and they kept their stock hidden from sight.

People went without things which they would otherwise have bought and the commercial horizon was bounded by the actual needs of the people. Then merchants began to find that it paid to display goods and little by little, display methods developed until to-day the store window has become one of the most important parts of the establishment. And the growth of demand has kept pace with the development of the display idea. The store window to-day has a great deal to do with the readiness the public displays to buy what pleases it.

Prizes Offered

Realizing the importance of the show window as a medium for creating business Hardware and Metal has for some years past conducted an annual Christmas window display contest. Cash prizes are offered each year, and the contest is Dominion wide. Remarkable results have been attained as a result of this annual contest, not only for Hardware and Metal, and the window trimmers who take part in the contest, but for the merchants who through the excellent displays secure additional business.

This year's annual Christmas window display contest will be conducted as usual by Hardware and Metal.

Special Prize Offered

In addition to offering eight cash prizes in the annual Christmas window display contest, Hardware and Metal has decided to offer a special prize of $15 cash, or a watch of equal value, suitably engraved, to the Canadian hardware window trimmer who sends in the best window displays of goods made by manufacturers whose advertisements appear in this issue of Hardware and Metal.

No restrictions will be placed on the goods to be shown in the window displays as long as they are the products of firms whose advertisements appear in this issue.

Each contestant will be expected to send in, along with photograph of the window display, a list of the articles appearing in the display, and also the names of the manufacturers of the goods shown. Announcements regarding the contests appear elsewhere in this issue.

HOW TO PREPARE A CHRISTMAS BOOKLET

(Continued from page 37.)

auto trouble lamps, auto searchlight, electric horns, auto foot warmers, pocket testing meters, and dozens of other articles used every day by autoists.

Elsewhere in this issue is shown a page of gift suggestions listed under various headings. Almost any local printer can prepare a leaflet or small booklet at a very reasonable cost.

ANNOUNCEMENT OF PRIZE-WINNERS

(Continued from page 32.)

five different pictures, seventeen of which were chosen by all three judges. From the seventeen the winners were decided. Chas. Byford of the Bond Hardware Company, Ltd., Guelph, Ont., was the winner of the first prize of $50. In the judges' opinion, Mr. Byford's window combined to a remarkable degree, advertising value for the ammunition, attention value, the desire to hunt and, withal, was particularly well balanced. The judges advise that they were helped in judging this window by the description accompanying the photograph.

The second prize was awarded to D. A. Smith of the Day Hardware Co., Red Deer, Alta. Mr. Smith had taken excellent advantage of his fine window, and for symmetry, his display could not be excelled.

A. A. Letellier of the Kingan Hardware Co., Ltd., Peterborough, Ont., was awarded the third prize, since he had by the use of wild ducks created interest in the display. The ducks do not show in the photograph.

The fourth prize was given to C. H. Smith of the Ashdown Hardware Co. (retail department), Winnipeg, Man.

The judges refused to select five from the remaining pictures to receive $5, since they felt that there were 20 pictures which deserved substantial recognition. The company agreed to this. Those receiving the $5 prizes follow:

Acme Hardware Co., North Toronto, Ont.
Dressed by N. Smith.

Barton & Fisher, Port Arthur, Ont.
Dressed by Chas. Harvey.

Binn's Hardware, Newmarket, Ont.
Dressed by John F. Bingham.

Dressed by C. F. Slater.

Rutherford & Kayser, Simcoe, Ont.
Dressed by J. C. Kayser.

Herman Young Co., Quebec, Que.
Dressed by Jas. W. Grant.

The first and second prize winning displays appear in this issue. The third and fourth prize displays will appear in succeeding issues of Hardware and Metal.

SELLING STOVES TO QUEBEC FARMERS

(Continued from page 29.)

is abnormally good, e.g., the case of cooking ranges. Farmers are paying anywhere from $35 to $55 for their stoves. In other lines there is a distinct tendency towards higher priced lines. Mr. Nobert informed the writer that his business in fishing tackle had improved considerably in 1915, and that people around Three Rivers are demanding more expensive rods. He is selling rods as high as $20. The same conditions apply to guns.

WHEN MEN BEGIN TO FEAR

(Continued from page 34.)

in expecting, dreading and preparing for the dire things that might come upon them, and according to the law they got what they dreaded and feared.

Competing for Prize

How often we hear people who have entered for a prize contest remark: "I am going to compete for the prize, but I know I shan't get it. Of course it would be foolish to think that I would be the only one out of thousands to succeed in winning the prize, but I am going to make a try for it."

Now, if you are going to win any of the prizes of life you have got to fling yourself into the contest for all you are worth. No half-hearted decision, no divided effort will do. You have got to be "all there," and you have got to believe you are going to win the prize. Every time you express a doubt of your ability to win you make your success so much less likely; you really rob yourself of so much efficiency.

There is only one way to acquire anything in this world, and that is to visualize that thing, to struggle toward it, think it, live it, until it is yours.

Here and there people are beginning to master the law of opulence. They are beginning to find that they can conquer poverty by making themselves prosperity magnets. That is, by thinking and working in conformity with it.

The trouble with most of us is that by our doubts, our fears, our unbeliefs, we dam up the channel of infinite supply flowing all around us. We cannot believe in the inexhaustibility of our resources and hence we ourselves pinch our supply.

Thousands of men who have succeeded had no better chance, perhaps a chance not half so good as thousands of others who have failed. This fact is gradually becoming clearly and definitely fixed in the average modern mind.

UNIVERSAL Christmas Gifts

Branch Salesrooms, WINNIPEG

Though retired in comfort, "the Old Man" can hardly resist the lure of "the Store," now run successfully by his son. So he sends some sound advice—with a broad hint at the finish.

Picton, Ont.
Nov. 27th/15.

My Dear Jack.

When I was in business some of my best sales came from suggestions I made while serving customers. I found people like sensible suggestions, about goods they never thought of as well as those they came in to buy. So keep your wits working when you are handling customers—and see that your clerks do the same—for that's where the cream of the business comes in.

Take, for example, your sales of the Gillette Safety Razor. You ought to consider every man who comes into your store a possible purchaser of this article. The hustling young chap wants a quick, clean shave—the middle-aged man is sick of spending the price of a Gillette every two months at the barber shop, or of worrying along with an old-fashioned open blade—the elderly man, with hand less sure, couldn't cut himself with a Gillette if he tried!

Remember, too, that every woman who comes in has a father, husband, brother, sweetheart or son for whom the Gillette would make a practical and most acceptable Christmas gift.

I always found it paid me well to give a good deal of window space to the Gillette, especially during this Christmas season. This morning Carter showed me a new & corking good Christmas Poster he had just received from the Gillette people - it's in his window by this time. You ought to have it up right away, and all around it in your window a good assortment of the different Razor Sets shown on the poster. Use one of your hardware show cases for a Gillette display just inside the entrance, too.

If you need any extra help for the next few weeks just let me know and the "old man" will come right down and see you through.

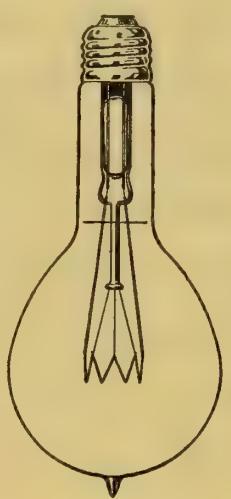
Yours, Dad.

P.S. If I don't see you before Christmas mother wants you all to come down for dinner, sure, and spend the day if you can.

MAZDA

"Not the name of a thing but the mark of a Service"

"Yes, Sir! That's the Right Lamp!"



THE NEW 100 WATT LAMP

"A man came along the other day and told me that my windows were badly lighted. I laughed at the idea. Why, I had installed a new lighting system as late as last summer!

"Well, sir, he just took the lamp he had in his hand and replaced one of my lamps with it, and blessed if it didn't give more light than all the rest of the lamps put together; at least it looked that way to me! And it was whiter, better light, too.

"You bet I bought some! I told him to replace all the old lamps with them. I want my window displays to exert their maximum drawing power—and they do with these new **Sunbeam and C.G.E. 100 Watt Mazda C Lamps."**

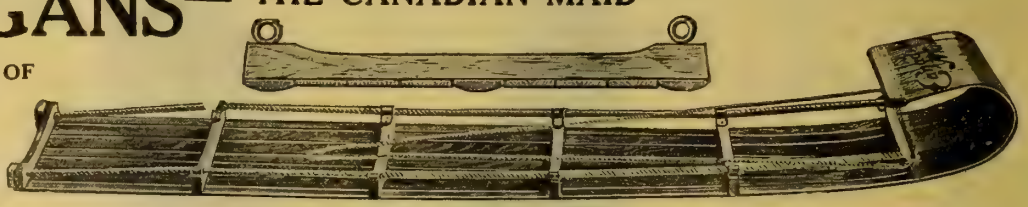
THE BEACH FOUNDRY CO., LIMITED, - OTTAWA

TOBOGGANS—"THE CANADIAN MAID"

TWO GREAT FEATURES OF "THE CANADIAN MAID"



First—The Raised Front. For about eighteen inches the front of the toboggan has a gradual slant. Result—the toboggan does not PUSH the snow in front of it, and thus you have GREATER SPEED, AN EVEN AND COMFORTABLE MOTION and a LONGER RIDE. Note this sketch—which shows how other toboggans without this feature shove the snow along.

Second—The Three Runners—which give emphasis to the above-mentioned feature and which guarantee safety, as it aids in controlling the toboggan. The runners hold the toboggan to the track. With two, six or eight passengers, the "Canadian Maid" No. 4 toboggan is equally easy to control, the runners helping materially. Accidents have occurred which can be explained by the fact that the usual flat-bottom toboggan was used. Iron and steel Runners fitted at slight additional cost.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

The Markets at a Glance

The price changes which have taken place during the past week have been so numerous and of such far-reaching importance that it would be impossible to review them all in the space devoted to "markets at a glance." The reports which follow, from Montreal, Toronto, Winnipeg and London are so cram full of up-to-the minute market information that no retailer can afford to overlook any part of them. Among the many lines which have been affected by price changes during the week, nearly all in an upward direction, are wire nails, tire bolts, iron rivets, stove bolts, shoe finder's lists, spades and shovels, copper wire, smooth steel wire, O and A wire, fence staples, cold rolled shafting, pig iron, steel bars, benzine, gasoline, chain, wheelbarrows, road scrapers, machinery and spring steel, pressed spikes and many other lines. There has been a general all-round improvement in business of late.

MONTREAL

MONTREAL, Nov. 26.—There has been nothing in the history of the Canadian metal trades to compare with the situation which has been created by the action of the big American steel mills in withdrawing from the Canadian market. When it is stated that the steel turnover by a big Montreal house has been greater in the past week than in the previous six months, some idea of the upheaval may be obtained. And not only are there continued adjustments in the metals and in the products, such as plates, steel and wire, but in the higher manufacture the effect is already noticeable. The outlook is for adjustments to higher levels from time to time, as the influence spreads further and further in the different branches of manufacturing dependent upon steel and iron. At the same time, the strength in the other metals has been continued, with the exception of tin, where there was a reaction on news that the report of the closing of the Suez Canal was a canard.

The forecasts of Hardware and Metal as to market developments have been generally borne out, as will be found from a study of this week's report. However, there are so many unexplained changes on short notice that there are many other important lines affected.

Advances this week have been made in machinery and spring steel, sheet brass, tinned iron, boiler tubes, bright and galvanized staples, smooth and hay wire, copper and brass wire, stove and tire bolts, proof coil and electric weld chain, pressed spikes, wheelbarrows, road scrapers, black sheets, shoe tacks, etc., while all prices on spades and shovels have been withdrawn pending general advances. In the metals, tin has declined slightly; copper, lead and spelter are very strong; antimony has advanced, and aluminum is steady. Future indications are for general readjustments throughout the manufacture of metals, particularly of steel and iron. Bar iron and the different brands of steel seem due for higher levels; brass and copper products are on the upgrade; further increases are not to be unexpected on wire and wire products, plain and galvanized sheets, wood screws, pipe and other lines.

Business shows continued improvement, and the country trade is said to be at least 25 per cent. above a year ago. In the city there has been some increased activity in seasonable lines occasioned by the cold snap, but conditions are still quiet in this department.

Tin Suffers Reaction.—The feature of the American tin situation since last report has been a reaction almost violent in its effect upon the market. Canada has been affected by contrary influences, and the net change has not been great—a decline of ½c to 1c, with a present basis 45c to 46c. Locally the upward tendency referred to last week continued, the market taking the usual course of following New York a lap behind, until the advance met the general decline in the States, and then a slight reaction set in.

Spelter is Very Strong.—Although the local quotation remains at 22-22½c for the time being, the market is very strong, and there are prospects of a further advance. New York has gained 1½c during the past week, and London is acting aggressively. There is an evident scarcity of spot spelter, and only a small supply of December. Futures look cheap in comparison with present quotations, but there is a reluctance on the part of consumers to buy very far ahead.

Lead Steady and Firm.—The local quotation for lead remains steady at 7¼c to 7½c, with a strong tendency in sympathy with the American situation. New York reports that the market there is quiet but strong, although there is not any great demand. The Trust price of 5¼c is well held, and the independents are said to be well sold up; things appear to be very much in the hands of the "big interest," with the possibility of advances being made practically at will. As compared with the manipulated movement last summer, authorities in the trade take the stand that the recent upward movement has been a legitimate one, backed by heavy consumption and an altogether sound situation.

Copper in Line to go Higher.—The local quotation of copper at 22½c is the same as a week ago, but it is liable to further advance. The American market has recently been very strong, and New York has shown another advance of more than 1c during the week. The strength of the market is said to be due to a continued flood of inquiries, accompanied by large purchases by domestic consumers and evidence that European buyers are about to enter the market on a large scale. The heavier buying movement is believed to have been largely brought about by the startling developments in the steel trade and the fear of a similar demand for copper. It is pointed out that the present upward movement has almost reached the high of the summer advance, but with the difference that the latter was due to mental demoralization, while now the business position and outlook is being taken into consideration.

Antimony Again Advances.—There is another advance recorded in the quotation on antimony, the basis now being 45c. In the United States there has been a further increase in prices noted, Chinese and Japanese being quoted 39c to 40c, and American 39½c to 39¾c.

Aluminum Steady.—The position of aluminum has remained steady, with a small volume of business being done at a nominal quotation of 62c. The American market is practically the same, although there has been a slightly easier tendency in prices.

Solder Continues Firm.—The reaction in tin has not been sufficient to affect solder; in fact, the quotations of last week were not as high as warranted by the cost of materials. The basis of last week is, therefore, continued with a very firm tone. The solder demand is one which adjusts itself to a large extent to the price, and the falling demand on a

rising market has the effect of keeping the changes within a comparatively narrow range in relation to tin and other materials entering into its manufacture.

Steel Situation Upset.—The attitude of discouraging further new business in Canada is not only being continued by the United States Steel Products Company, but this course is being followed by the independents also, while the conditions in the trade thus indicated apply to a more or less extent to Canada's own production and consumption. One of the leading firms dealing in steel products in this country, makes the report that they have handled more steel tonnage in the past week than in the previous six months. Prices are being subject to constant readjustment in view of the prospects of a possible famine in steel plates, pipe, wire, etc., and the developments of twenty-four hours cannot be forecast with any degree of certainty.

Machinery and Spring Steel Advance.—All varieties of steel and iron are very firm and subject to sudden changes. Recently reeled machinery steel has been advanced 10c to $3 and spring steel 10c to $3. Common bar iron maintains its basis of $2.20, but higher prices are to be looked for.

Sheet Brass Advancing.—As intimated in the last couple of reports, there is logical development in the market for increases in the prices of brass products, and that advances are to be made is evidenced in the fact that for some time quotations in the American markets have been merely nominal. It is announced that an advance in sheet brass is going into effect before the end of the week, but at writing adjustments had not been made. Following quotations are, therefore, subject to immediate change:

Springs, sheets, up to 20 gauge, 45c; Rods, base ½ to 1 in. round, 42c; Tubing, seamless base, 42c; Tubing, iron pipe size, 1 in. base, 45c.

Sheet Copper Also.—Copper products are in practically the same position as those of brass, and new quotations on sheet copper are to be looked for next week, with the probability that other lines will be similarly affected. Following quotations continue for time being:

Bars, ½ to 2 in., $30.50; plain shets, 14 oz., 14 x 28 in., 14 x 60 in., $31.25; copper sheet, tinned, 14 x 60, 14 oz., $34.75; copper sheet, planished, 14 x 60 base, $41.25; braziers' in sheets, 6 x 5 base, $30.50.

Lead Products Steady.—The lead market having ceased to advance for the time being at least, the market for products of the metal is steady and very firm, the quotations allowing a comparatively small margin of profit. The indications are for firm if not higher prices, and an advance would undoubtedly follow further increases in lead prices. Present quotations follow:

Lead pipe, 9½c; lead waste pipe, 10½c; sheets, 3-lb. sq. ft., $8.25; sheets, 3½ lb. sq. ft., $8; sheets, 4 to 6 lbs. sq. ft., $7.75; cut sheets, ½c per lb. extra; cut sheets to size, ¾c per lb. extra.

Tinned Iron Stronger.—Although there is no change in the nominal quotations to the trade, there have been advances made on tinned iron in large quantities, and the following prices are being much more closely adhered to than formerly:

72 x 30 up to 24 gauge, case lots, $10.25; 72 x 30, 26 gauge, case lots, $10.75. Less than case, 25c per 100 lbs. extra.

Boiler Tubes are Higher.—The predicted advance has taken place on boiler tubes, but for the time being the old prices are still being quoted, pending an adjustment to the new levels. The following quotations are, therefore, for the time being only:

100 feet, ½ in., $10.45; 100 feet, 2 in., $9.60; 100 feet, 2½ in., $12.25; 100 feet, 3 in., $13.30; 100 feet, 3½ in., $15.55; 100 feet, 4 in., $19.80.

Another Advance in Zinc.—There has been another important advance in the quotations on zinc sheets, and the market is reported to be still rising. Quotations are now: Casks, 25c; part casks, 25½c.

Nails are very Firm.—On the advance in nails, announced last week, the market is very firm. The situation in steel is such that further developments are to be expected in this market, and several wholesalers have issued a warning to look for still higher prices in the near future. The base for wire is now $2.70.

Staples Going Up.—Following the advance on nails, there has been an increase of 10c all round on the quotations for both galvanized and bright staples. The influences of the spelter and steel markets are both obvious here. New prices are:

Galvanized, in kegs, $3.95; Galvanized, in boxes, $4.25; Bright, in kegs, $3.10; Bright, in kegs, $3.35.

Smooth Wire Advances.—The influence of the steel market on wire is again in evidence in a further advance on the base quotation for smooth steel wire. The increase in price is 10c, the new base being $2.85, with the usual extras, as shown in current quotations.

Hay Wire Higher.—A further increase in the prices quoted for hay wire has also been made, and this, too, can be traced to the situation in steel. The Montreal quotations now are: No. 13, $2.90; No. 14, $2.95; No. 15, $3.05.

There has also been a readjustment of the quotations on annealed cut hay, baling wire, and on wire bale ties, with increased prices going into effect.

Copper Wire Higher.—Advices have been received from the manufacturers of copper wire to the effect that there will be advances to the wholesale trade. However, at writing, the wholesalers had not reached a decision as to their course. There has been a very small demand for copper wire in the hardware trade recently. There have also been some changes in the prices of brass wire recently, but these have not materially affected the discounts to the retail trade.

Stove Bolts Higher.—Following the readjustment of the general list of bolts and nuts announced last week, there has been an advance on stove bolts, the new discount being 82½ per cent., as compared with 80 and 7½ per cent.

Tire Bolts Also.—An advance this week on tire bolts is regarded as one of the most significant developments in the hardware situation in relation to the increasing cost of iron and steel products and manufactures. For years the discount on tire bolts has been 75 per cent., but this has been reduced to 72½ per cent.

Chain Advances.—There have been advances made in the Montreal quotations for proof coil and electric weld coil chain, the new quotations being as follows: Proof coil, per 100 lbs., ¼ in., $6.55-9.00; 5-16 in., $5.65-5.90; ⅜ in., $4.85-4.95; 7-16 in., $4.55; ½ in., $4.20; 9-16 in., $4.20; ⅝ in., $4.10; ¾ in., $3.95; ⅞ in., $3.80; 1 in., $3.70. Electric weld coil chain, 3-16 in., $8.85; ¼ in., $6.15; 5-16 in., $4.90; ⅜ in., $4.05; 7-16 in., $3.85; ½ in., $3.75.

Hinges.—On the basis of the new discount of heavy and light tee and strap hinges—37½ per cent. on heavy and 65 per cent. on light—the following are the net prices:

Heavy.	Strap.	Tee.
4 in., doz. pairs	$1.20	$1.00
5 in., doz. pairs	1.45	1.15
6 in., doz. pairs	1.25	1.20
8 in., doz. pairs	2.10	1.60
10 in., doz. pairs	3.75	2.65
12 in., doz. pairs	4.65	4.50
14 in., doz. pairs	5.30	4.65
Light.	**Strap.**	**Tee.**
3 in., doz. pairs	$0.35	$0.35
4 in., doz. pairs	0.42	0.39
5 in., doz. pairs	0.50	0.45
6 in., doz. pairs	0.60	0.53
10 in., doz. pairs	0.88	0.63
10 in., doz. pairs	1.23	0.84
12 in., doz. pairs	2.10	1.58
14 in., doz. pairs	....	1.93

Pressed Spikes Advance.—Following the advance on wire nails, there has been an important increase in the price quoted for pressed spikes. Spikes ⅝ diameter, per 100 pounds, are now on a Montreal base of $3.20, as compared with $2.95.

General Advance in Shovels.—The effect of the rising market for steel is to be emphatically seen in the action of the manufacturers of steel shovels and spades, who have withdrawn prices and followed with a new price list. Adjustments have not yet been made in the local trade, but advances of about 10 per cent. may be counted on the quotations shown in current market quotation.

Wheelbarrows. — Manufacturers of wheelbarrows have announced new prices on wheelbarrows, covering an all-round increase of about 10 per cent. Following are new quotations:

Navy, steel wheel, doz., $26.25; Garden, steel wheel, doz., 39.60; Light garden, per doz., $30.00; Heavy Garden, L-side, $36.30; Heavy farm, solid side, $39.60.

Scrapers up 10 per cent.—There are also new prices out on road and drag scrapers, the entire list being affected to the extent of about 10 per cent.

Black Sheets Still Stronger.—Following the general advance in black sheets, announced last week, there has been a further adjustment in the local situation, with the result that the spread between different houses has been eliminated and the market is now steady as follows:

10 gauge, $3.00; 12 gauge, $3.05; 14 gauge, $2.95; 16 gauge, $2.85; 18-20 gauge, $3.00; 22-24 gauge, $3.10; 26 gauge, $3.15; 28 gauge, $3.30.

Galvanized Sheets Rising.—Difficulty in making adjustments as they develop is about the only reason that there are not new quotations this week on the various brands of galvanized sheets. As announced last week, there has been a

general readjustment on Gorbal's Best covering an increase of 15c on the 28-gauge. Other manufacturers have made the same advance, and new prices will be established shortly on this basis.

Pipe to go Higher.—Despite the recent advances in pipe, there is a report in the trade that still higher quotations are to be looked forward following the unprecedented developments in the steel market, the demand for available stocks and lack of assurance as to future supplies.

Wood Screws Strong.—As the result of the advances on wire, etc., the situation in screws is very firm, and it is expected that an announcement of advances will be made before long.

Old Materials.—In addition to the advances in prices for raw materials quoted last week, and to be found in the current market figures in this issue, there has been a considerable increase in the quotations for rubber and 7c to 8c a pound is now being offered for old rubber boots, etc.

Steel Shafting.—There has been an advancing market for steel shafting, and the discount has been reduced from 40 per cent. to 30 per cent. at the mill. The discount at warehouse is given at 20 per cent.

Shoe Tacks.—A readjustment has been made in the quotations on shoe finders' list. The change in actual price to the retailer is not material '

Ammunition.—A recent advance on shot places the Montreal base at $9.75 net. There has recently been a somewhat improved demand for big game metallics, which came with the colder weather, but the call for this class of ammunition has hardly been satisfactory this autumn.

The Stove Business.—The cold snap has had the effect of improving the city demand for heaters, and dealers report a fair business. The demand is not up to normal, but it is a very satisfactory improvement over a year ago.

Utensils.—Reports in the trade are to the effect that the Government is placing substantial orders for different kinds of utensils, and that the manufacturers have business in prospect which will keep them comfortably busy for the next two or three months.

TORONTO

TORONTO, Ont., Nov. 25.—The continued advance in prices is the principal feature in the hardware market this week. The increase in cost of raw materials, particularly of iron and steel, is responsible for many price changes, and there is little doubt but that prices on many lines will continue to advance for some time, as there are no indications of any reaction in the steel trade.

It will be observed that the various lines affected are practically all iron or steel products. The ingot metal situation is also a factor to be considered, but is having less effect on the market than prices of iron and steel are. The advances at Toronto this week include spades and shovels, copper wire, smooth wire, wire nails, O & A fence wire, fence staples, iron rivets, stove bolts, tire bolts, steel bars, pig iron, cold rolled shafting, steel jack chain. A new shoe finders' list has been issued and adopted by the shoe finders and hardware trade. The ingot metal market is quieter, spelter being the only metal to show any marked strength, although copper has a higher tendency and is very firm.

Improved Feeling.—The feeling in the trade is much improved and buying is more active. Business is no doubt being stimulated by the possibility of higher prices, but there is also a better demand for staple lines. Seasonable goods are beginning to move more freely but colder weather is needed to produce any decided activity. Very good business is reported in stoves and furnaces especially from the country trade. Collections are improving and money seems to be circulating more freely. Kitchen utensils are in good demand, prices are very firm and will probably advance. Prices of all kinds of sheets are very firm and will no doubt advance.

The situation with regard to the munitions industry is practically unchanged. Orders for the large calibre shells are being placed, but in what quantities is not generally known. The Munitions Committee has fixed the price of steel for shells at 3½ cents per pound. A shortage of copper bands has developed and is causing considerable inconvenience to some firms working on shells.

Steel Market.—Canadian mills have advanced prices on steel bars 25 cents and are quoting steel bars at $2.75 per 100 pounds, Toronto. Quotations on iron bars are unchanged at $2.50 per 100 lbs., but are expected to advance any time. Prices on steel bars are subject to change without notice and quotations made only for immediate acceptance. The market is very strong and every indication points to still higher levels. The demand for steel for shells continues to increase and the capacity of the mills will be taxed to the limit to take care of the tonnage that will be required for the new orders for munitions.

In the United States the market is very strong and prices on steel products continue to advance. Steel companies are extending their plants and are operating at capacity. Many mills have their output sold for four and five months ahead, and some for the first half of next year.

Pig Iron.—The market is strong with prices of domestic and American pig iron higher. Hamilton and Victoria brands advanced early in the week which was followed by another advance of $1.25 They are now quoted at $23 per ton, Toronto. The pig iron market is becoming more active in sympathy with the steel markets. There is a heavy demand for steel making grades. Canadian consumers are buying heavily in the States, but cannot get all the tonnage they require.

Machine Tools.—The situation in the machine tool market is much the same as last week. Dealers are very busy figuring on tools for the large shells and have sold a number of lathes for machining the 6-in. to 30-in. swing will be required for the large shells and it is understood that a large amount of business is ready to be placed by the various firms who are preparing to work on the large calibre shells.

Metals.—The market is steady and there are no price changes to note with the single exception of spelter, which has advanced again. The tin market, which advanced sharply last week on a report that the Suez Canal was closed, is now weak as a result of this rumor having been proved incorrect. Copper is higher in London, but unchanged here.

Tin.—The strong market which developed last week has not been maintained, and the market is now dull and weak. The Suez Canal scare had apparently no foundation in fact, consequently the market fell off but recovered later. There is a scarcity of spot tin and should business improve the price might advance. Local quotations are unchanged at 48c per pound

Copper.—The market is strong and higher in London. There has been some heavy buying recently and it is thought that the market will go higher before the movement stops. Local quotations are firm and unchanged at 21c per lb.

Spelter.—The market is unsettled and quotations nominal. A scarcity of spelter in London has resulted in a further advance in price for prompt spelter; futures, however, are selling at a discount. Spelter has advanced 1c, and quotations are nominal at 21c per pound.

Lead.—The market is quiet but firm. The "Trust" price is being well held at $5.25 New York, and it is probable that it may advance. Local quotations are unchanged at 7c per pound.

Antimony.—The market is very strong with an upward tendency. There is a scarcity of spot antimony and a large business is being done in futures. In the London market the price of antimony is controlled by the British Government, which helps to steady the market. Local quotations are firm and unchanged at 40c per pound.

Aluminum.—The situation is unchanged and supplies are still very difficult to obtain. Quotations are unchanged at 65c per pound.

Spades and Shovels Advance.—The high cost of raw materials is reflected in the advance in spades and shovels which is now in effect. Last spring reports of an advance were heard, but the revised lists then contemplated were withdrawn. The new discounts are given in the current market quotations, and show an advance of about 10 per cent.

Shoe Finders' List.—A new shoe finders' list has been issued and has been adopted by the hardware and shoe finders' trades.

Iron Rivets Higher.—Prices of iron rivets and burrs have advanced, the new discount for 7-16-in. rivets and under being 67½ per cent.

Copper Wire Advances.—Copper wire has advanced as a result of the increase in cost of copper. The new discount is 30 per cent.

(Continued on page 64.)

WEEKLY PAINT DEPARTMENT

The Duty of an Employer

Making the Clerk Efficient in Paint-Selling is the Duty of an Employer—How to Train Clerks and Help to Make Them 100% Efficient

By H. E. ROBERTSON

ONE of the greatest difficulties the hardware dealer, employing a large staff, encounters, is securing clerks who are sufficiently interested to make a study of paints and are able to handle the line intelligently. There are opportunities without number for retail salesmen who will make a study of paint and paint salesmanship.

Take a real interest in paint, its uses and its selling points. Gather all the details possible. Use your knowledge to preach the gospel of paintmanship and you are on a sure road to securing a better and a bigger job.

A merchant who employs a large retail selling staff recently said that one of the greatest troubles he had experienced was getting good men who knew how to sell paint, and especially a good man who he could put in charge of the paint department. A man who could tell from day to day what was required.

"People may be coming into this store day after day," said the merchant, "and asking for painting materials, and the clerks know so little about the business they are not even able to tell me what has been asked for. Some of those fellows don't know the difference between distemper colors and shingle stain, so I can hardly expect to get the best results from my paint department."

Nine out of ten employers seem to be up against the problem of first of all getting good clerks to work for them, and secondly, keeping them. You may go into most any store and find a clerk and ask the price of an article. He will tell you. Then you ask the price of another brand of the same article. He will tell you that. But if you ask him why there is a difference in price—he won't tell you, and the reason in the main is that he cannot.

Employer and Employee

Ever since the world was divided into two classes of employer and employed, the relation between the two has been a question of perpetual anxiety. The employer looks about him and gets a clerk. The clerk works well for the first two or three weeks, then he begins to slack off. He has no enthusiasm. He is luke-warm. All he is concerned about is quitting punctually, and getting the right time allowed him for lunch. During the store hours he works, but he works listlessly.

Employer after employer will complain about the same thing. There is a sort of half-heartedness, a determination to do only as much as is absolutely necessary, on the part of the clerk in the store.

What's the Reason?

Well, why? Why does the clerk watch the clock? Why does he slide in at one minute after eight o'clock but never one minute on the other side? Why does he do as little as he dare, instead of as much as he can. There's a reason. The man is not vitally interested in what he is doing. The desire to see the business grow as he works in it and with it has not gripped him.

If there's a reason, there's a remedy. He does not have the encouragement to think for and about the place where he spends his working hours. One way for him to have that encouragement is by getting hold of the trade journal which concerns itself with the business in which he is engaged. It is a singular thing, but the reading of trade journals by clerks in many cases is unknown. If the clerk read his trade journal he would be able to tell his customer why one brand of goods costs more or less than another brand of the same goods. He would know why a shipment of a certain line had not arrived.

He would be able to talk intelligently on the reason for the advances in the price of ready mixed paints, linseed oil, turpentine and other products.

He would be able to tell customers why high quality ready-mixed paints are better than the hand mixed product. He would be fully informed regarding dozens of important phases in paint buying and selling. Why? Because an up-to-the-minute trade paper deals with all these subjects and many others.

Making the Clerk Efficient

What the average sale clerk lacks today is the power to reason and the inclination to reason. It is all a matter of lack of training. Trade journals are for the trade, and that includes alike employee and employer. Weekly perusal of the paper which concerns itself with the news and views of the trade with which the clerk is connected will help to make the clerk one hundred per cent efficient.

Duty of the Employer

And, making the clerk supremely worth while is primarily a task which is up to the employer. It would pay the average employer to subscribe for a year for each of his clerks to the trade paper which is the organ of the business both he and they are interested in, and have it sent to their home address. It is safe to say that at the end of the first year well over fifty per cent. of the clerks would renew the subscription off their own bat, and keep up a regular and systematic and studious reading of the paper.

Fundamentally, to be as effective in a clerical capacity as the employer is in his capacity, the sales clerk must have the facts. A little knowledge may be a dangerous thing, looked at from one point of view, but half a loaf is better than none. Knowledge is power. And power in an employee reflects to the credit side of the employer's ledger.

Get the Clerk Interested

Once you have interested the clerk in his business, you have solved the problem of keeping a good man when you have him, and of getting from that man the worth of the pay cheque you hand him. And since business is a partnership of master and man for the time being, the man will find from his side that he daily adds to his worth and effectiveness both to himself and to the man who employs him.

Purchased Orillia Block

Orillia, Ont.—Harry Parsons of Parson's Fair, has purchased the block now occupied by the Orillia Hardware Co. and will take possession on Feb. 1, 1916. The area measures 35 x 100 feet. Mr. Parsons intends to carry a complete stock of hardware.

Boeckh's Household Brushes

Are easy sellers the year round.

Boeckh's Brushes have the appearance that appeals instantly to the housewife—they sell at a price that pleases the pocket-book and they give a service extraordinary.

EVERY ONE IS BACKED BY OUR GUARANTEE

Banister Brushes, Hair Brooms, Scrub, Shoe and Stove, Window and Waxing Brushes, etc.

WEEKLY MARKET REPORTS

(Continued from page 61.)

Bolts Advance.—Prices of stove and tire bolts have advanced, the new discounts being as follows: Stove bolts, 82½ per cent. and tire bolts, 72½ per cent.

Staples Advance.—Higher prices for all lines of fence and poultry netting staples are announced and are as follows:

Fence staples, galv., kegs, $3.95 per cwt.; Fence staples, galv., 25 and 50-lb. boxes, $4.20; Fence staples, bright, kegs, $3.10; Fence staples, bright, 25 and 50-lb. boxes, $3.35; Netting staples, 10-lb. boxes, $5.65; Netting staples, 25-lb. boxes, $5.35; Netting staples, 100-lb. boxes, $5.10.

Wire Advances.—The new price for No. 0-9 smooth steel wire is $2.85 base, being an advance of 10c. Oiled and annealed wire has also advanced, the new prices being as follows: O & A, No. 10, $3.01 per cwt.; O & A, No. 11, $3.07 per cwt.; O & A, No. 12, $3.10 per cwt.

Cut Hay Wire.—There has been no change in prices but the list has been rearranged. The following list is for cut hay wire without a loop: No. 9, $3.75; No. 10, $3.80; No. 11, $3.90; Nos. 12 and 13, $4; No. 14, $4.10; No. 15, $4.25; No. 16, $4.50. Less 10 p.c. f.o.b. Hamilton and Montreal with freight equalized.

Shafting.—The new discount on cold rolled steel shafting is now 25 per cent., as against 35 per cent. formerly.

Wire Nails Advance Again.—The advance in wire nails predicted in Hardware and Metal has gone into effect. Wire nails have advanced 10c, and are now quoted at $2.75 per keg, but nails are unchanged at $2.70.

Pipe.—Prices of wrought iron pipe are being firmly held at the recent advance. Lead pipe is unchanged but very firm at 9½ cents with waste pipe at 10½ cents per pound.

Sheets.—Prices of galvanized sheets are very firm and are expected to advance. The market is unsettled and it is understood that some makers have practically withdrawn from the market. The scarcity of steel is affecting sheet makers, acid is scarce and expensive, while the abnormal price of spelter is also a very important factor in the situation. Block and Bessemer sheets are very firm and may advance any time.

Stoves.—There is quite a brisk demand for stoves and furnaces, business this month being reported very good. The cooler weather has improved prospects for trade.

LONDON

LONDON, Nov. 25.—Many important price changes continue to take place each week. Among the changes noted this week is a further advance of 10c per keg in the price of nails. Spades and shovels have also advanced 10 per cent. White lead has advanced 60 cents per 100 lbs. as intimated in a telegraphic notice in last week's issue of Hardware and Metal.

Other lines which have advanced are stove bolts. tire bolts, rivets, O & A wire, fence staples, fence hooks and some lines of builders' hardware.

Business continues good and orders from both city and country are numerous and fairly large.

There is a good demand for cutlery and other lines on which a scarcity is expected. Spring bookings continue good and retailers are booking freely in anticipation of still higher prices on many lines.

Nails and Wire Advance.—A further advance of 10 cents per 100 lbs. has taken place on wire nails, fence hooks and wire. Wire nails are now quoted at $2.75 base; cut nails at $2.70 base. O & A wire is now quoted as follows: No. 10, $3.01 per 100 lbs.; No. 11, $3.07 per 100 lbs.; No. 12, $3.07 per 100 lbs.; No. 13, $3.15 per 100 lbs.; No. 14, hay-baling wire, is quoted at $3.10 per 100 lbs.

Fence staples have advanced 10c per keg, and are now quoted as follows: Galvanized, 100-lb. kegs, $3.95; 25-lb. boxes, $4.20 per 100 lbs.; bright in 100-lb. kegs. $3.10 per 100 lbs.; 25-lb. boxes, $3.35 per 100 lbs.

Fence hooks, galvanized, are now quoted in 100-lb. kegs at $3.95 per 100 lbs.; 25-lb. boxes, $4.20 per 100 lbs.

Other lines are quoted as follows: Barb wire, $3.30 per 100 lbs.: No. 9 galvanized, $3 per 100 lbs.; No. 12, galv., $3.15 per 100 lbs.; No. 13, $3.25 per 100 lbs.; No. 9. coil spring, $3.05 per 100 lbs.

New Price on Bolts.—As predicted by Hardware and Metal some time ago, further changes have taken place in the bolt list. Stove bolts are now quoted at 80 per cent. discount; tire bolts at 72½ per cent. Tinners' rivets, etc., are quoted 65 per cent. off list.

Other Lines.—Shot is now being quoted at 35 per cent. discount. There is a fair demand for rope, which is quoted as follows: Pure Manila. 16c lb. base; British Manila, 13½c lb. base; African hemp, 13½c lb. base; sisal, 11½c lb. base; cotton, 3-16. 24c lb. base; cotton, ¼-in. and up, 23c lb. base; deep-sea line, 27c lb. base; tarred marlin, 27c lb. base.

Linseed oil and turpentine remain at the prices shown in last week's report. White lead is being sold at the recent advanced prices. Glass is unchanged and firm. There is a good demand for alarm clocks and Christmas goods.

WINNIPEG

WINNIPEG, Nov. 25, 1915.—Business during the past week has shown steady improvement and it is expected by the jobbers of Winnipeg that November will show a very good increase over last year.

In speaking to a credit manager of one of the largest jobbing houses, the writer was informed that collections were also improving and could now be termed as very good. No doubt the cold weather, coming as it has, is more or less responsible for this state of affairs, as farmers are unable to get on the land and will consequently draw their grain to town and at the same time make arrangements to settle their store accounts.

Wire Advances

The markets during the past week have shown some interesting changes and perhaps the one which will be looked forward to with great interest is the new price on barbed and plain wire and staples which has been made for Spring shipment. We give you herewith a memorandum of what these prices are, and all orders which have already been booked will take the prices as listed below:

WIRE, BARB.

Lyman, 4-pt., Fort William, $3; Winnipeg, $3.25; Glidden cattle, Fort William, $2.75; Winnipeg, $3.48; Glidden hog, Fort William, $2.85; Winnipeg, $3.10; Baker, Fort William, $2.80; Winnipeg, $3.05; Alberta Special, Winnipeg, $2.85; plain twist, per cwt., Fort William, $3.25; Winnipeg, $4.55; coil spring, No. 9, Fort William, $3.30; Winnipeg, $3.60; coil spring, No. 12, Fort William, $3.50; Winnipeg, $3.80; plain galvanized, No. 9, Fort William, $3.25; Winnipeg, $3.55.

Patented screen, in 100-ft. rolls, $1.60 per hundred sq. feet; in 50-ft. rolls, $1.70 per 100 sq. ft.

WIRE, PLAIN.

$3.10.

STAPLES.

Bright wire, per cwt., $3.05 at Fort William; $3.45 Winnipeg; galvanized staples, $3.50, Fort William; $3.90 Winnipeg.

Nails Advance

Wire nails have also taken a further advance of ten cents and the ruling prices to-day are as follows:

NAILS.

Wire, f.o.b. Fort William, $2.85 base; Winnipeg, $3.25 base. Cut, f.o.b. Winnipeg, $3.35.

Solder has advanced 1c per lb., making prices read to-day:

SOLDER.

Per pound, 30 to 31c.

Black Pipe Advances

Black wrought pipe is also advancing in price and below is given a memorandum of the new prices prevailing at the time of going to press:

IRON PIPE.

Black, ¼ inch, $2.80; ⅜ inch, $2.90; ½ inch, $3.62; ¾ inch, $4.19; 1 inch, $6.17; 1¼ inch, $8.38; 1½ inch, $9.97; 2 inch, $13.40; 2½ inch, $21.42; 3 inch, $27.94; 3½ inch, $33.56; 4 inch, $40.05; 4½ inch, $49.37; 5 inch, $57.65; 6 inch, $74.52.

Bale ties have advanced 15c per 100 lbs., making prices read as follows:

Bale ties, 14 gauge, single loop, $4.20 Winnipeg; $3.80 Fort William.

White lead is another line on which an advance in price is reported and prices below are for immediate acceptance only:

Decorator's pure, $11.10 per ton; ton lots, $10.80. Elephant, $11.40 per ton; ton lots, $11.10. Decorator's special, $10.10 per ton; ton lots, $9.80.

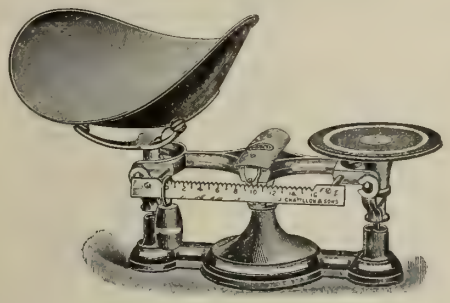
From the changes noted above it will be easily seen that the merchant who buys to-day for a specified price is almost sure to be ahead of the game financially. There is also another feature with regard to placing orders now, which should not be overlooked, and if anything is more important than the question of price. The greatest problem which the jobbers will have to face this coming year is that of getting delivery of their goods. Every article into which steel and wire go will come under a list of doubtful shipments. For this reason it is advisable for all dealers to anticipate their wants as far in advance of the actual demand as possible.

The exceptional demand for steel and wire products would seem to indicate that present prices will be maintained and perhaps further advances recorded within the next three months.

Preserving Time Scale Time

Every housewife needs an accurate scale when she starts her preserving. Success in preserving is not so much a question of recipes as it is of the proper quantity of different ingredients. Your customers will be sure to have what they want if you sell them

CHATILLON SCALES



Their enviable reputation has been earned by their accuracy, reliability, durability and high-grade construction.

Chatillon Scales have a number of imitators but no superiors. All our scales are warranted to be accurate and perfect in workmanship.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Nov. 26.—The tension in the paint situation, which has been growing more noticeable from week to week with the rising cost of raw materials, and which has had the result of counteracting the feeling of disappointment in the trade that there were not more substantial reductions in the recent readjustment of manufacturers' quotations, has been increased by the material increase in the figure on white lead in oil at the close of last week. From reliable sources Hardware and Metal learns that the present position of the market is precarious. Not only is there almost certain to be an advance in mixed with any further strength in the markets for ingredients, but the indications are that the present costs will force reluctant action on the part of the manufacturers—and there is a strong probability that such action may not long be deferred. Any marked reaction in oil, turpentine, lead or zinc would bring relief, but all these markets are at present very firm, with the outlook uncertain owing to the conditions prevailing.

With the advancing strength of the market there has been a freer disposition to book for spring business displayed on the part of the retailer. The trade closely follows the actions of such markets as oil, turpentine and lead, and the developments here in the past few weeks have been convincing evidence of the strength of the situation in mixed. Zinc, colors and chemicals find little interest with the average paint buyer, but even a brief reflection on the general situation regarding the war influence on all materials of this kind will convince that costs have risen materially. Therefore, the present market is undoubtedly a good buy; whether prices will be higher or lower by spring is a matter of pure conjecture, but the outlook for the immediate future is certainly in favor of present quotations.

Linseed Oil Steady.—Oil has been steady and firm throughout the week. Quotations have remained in about the same position, with a continuance of the wide spread between different jobbers, to which reference has been made from time to time. Thus, on raw oil there is a low of 79c and a high of 84c, with several prices in between—boiled oil is 3c higher in each case. A factor in favor of the big range in prices appears to be a comparatively small demand, and large orders might have the effect of raising the bottom and lowering the top. The more settled conditions and the continuance of the range prices warrant the following quotations:

	Raw.	Boiled.
1 to 2 barrels	79c-84c	82c-87c
3 to 5 barrels	78c-83c	81c-86c
6 to 9 barrels	77c-82c	80c-85c

Turpentine Firm.—The week has been without material change in the turpentine situation, as regards quotations, by either refiners or jobbers. The recent advances are well maintained and the prices are firm, but there has been no narrowing of the range as between the different houses quoting to the trade. The favored quotations are around 83c, which appears to allow a fair margin above refiners' prices, but 80c is heard, and one firm still maintains a figure of 75c, which was set before recent advances.

Advance in White Lead.—At writing last week an immediate advance in the price of white lead in oil was predicted. This came the next day and the information was given to the trade in a late announcement by wire. On the increase, which amounts to 60c, the new basis is $10.05, with 30c added for less than ton lots; and the market is firm at these figures. The general situation indicates that there may be further advances in "pig," and this has a tendency to continue the strength of the market on the advance. The developments in the position of lead have been carefully followed in these reports, and tendencies have been described which forecast the price changes. The two declines of 50c each which were made from the high a couple of months ago did not have the effect of covering the whole falling off in cost of raw materials. The result was that the first advances in pig lead merely added strength to a comparatively weak situation, but as the upward tendency continued, this strength developed until an increase was necessitated.

TORONTO

TORONTO, Ont., Nov. 25. — Although the season is getting late, business has been very satisfactory in the country, but quiet in the city.

Conditions in the country districts are such that heavy spring bookings are expected. Dealers have considerably more confidence in the outlook than was the case twelve months ago, and consequently are prepared to buy in larger quantities. The farmers are more prosperous and are in a position to buy the goods they want.

The paint market is very firm and advances are expected in some lines, ready-mixed paints being one of them. White lead is very firm at the advance reported last week. Linseed oil is very firm as is also turpentine. The scarcity of gasoline and active demand is tending toward higher prices. The glass situation is unchanged and dealers are inclined to get away from the list.

Linseed Oil.—A weakness has developed in the flaxseed market, but not sufficient to affect the price of linseed oil. There is rather more seed coming forward to the grinders. There is quite a range of prices for oil from 83c-86c to 87c-89½c, the demand, however, is light, and some dealers are no doubt prepared to shade prices. The following quotations represent a fair average in Toronto:

	Raw	Boiled
1 to 2 barrels	85c	88c per gal.
3 to 5 barrels	84c	87c per gal.
6 to 9 barrels	82c	81c per gal.

10 barrels and over, open.

Turpentine.—Turpentine is unchanged at price quoted last week, but the market is very firm and may possibly go higher. There is a scarcity of turpentine in the city, but the demand is light. The strength of the local market is due to conditions prevailing at Savannah, where high prices are being maintained. The following prices are being quoted in Toronto: 1-barrel lots, 85c; 2 to 4-barrel lots, 84c, and 5-gal. lots, 92c per Imperial gallon.

White Lead.—The market is very firm at last week's advance which brings lead in oil up to $10.20 with the usual 30 cents extra for less than ton lots. The revised list will be found in the current paint market quotations.

Mixed Paints.—Prices of ready-mixed paints are very firm with a possibility of an advance. The reduction in price made recently can hardly be maintained as raw materials have all advanced since the lower schedule went into effect. Zinc, white lead and oil are all higher, with little possibility of weakening; the natural result would be an increase in the price of paints.

Gasoline and Benzine.—The heavy demand and scarcity of gasoline has caused another advance in prices. The conditions prevailing in the market are a direct result of the war. The majority of the European oil fields are either nonproductive or else under control of the German forces which has resulted in a big demand from producers in the United States. A large quantity of the higher grades of gasoline is being shipped to the Allies, resulting in a scarcity on this side. Gasoline and benzine have both advanced 2c and are now quoted at 25½c and 25c per gallon respectively.

The G.G.G. Hame Fastener

Made in Canada

Designed for Safety, Strength and Durability

Will not open of itself when in use and will not break under the heaviest strain. Outwears a dozen straps.

WE GUARANTEE EVERY FASTENER AND PROTECT DEALERS AGAINST UNFAIR COMPETITION BY NOT SELLING TO CUT-RATE MAIL ORDER HOUSES.

It means sure-satisfaction to customers and a good profit for dealers.

Drop a line for price.

Manufactured by

The Imperial Mfg. Company

Welland, Ontario

"COMFY"

Weather-Strip

is a line that sells on sight.

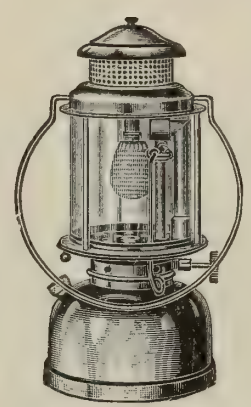
Sells at a very low figure in comparison with ordinary weatherstrips, is easily put on, very durable and is in every way as effective in keeping out the cold.

Put up in cartons of one pound each, or 35 feet in carton.

Burlington-Windsor Blanket Co., Limited

TORONTO, CANADA

THE STORM KING LANTERN



Wind and Rain Proof — 200 Candle Power, ¼ cent per hour. Operates 15 hours on one filling of gasoline or kerosene. The highest powered, most economical, and safest lantern ever made, for farmers, dairymen, contractors, sportsmen, watchmen, and for shows, boats, railroad yards, military encampments, and way stations. Automatically cleaned, cannot clog. No wicks to trim, no chimneys to wash, no smoke, no smell, no dirt. A quick and profitable seller for dealers and agents. If you want one for your own use, ask your nearest hardware dealer to send for one on trial.

If you want the agency write for our Special Lantern Proposition.

National Stamping & Electric Works

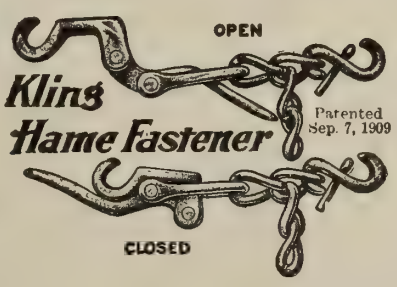
470 S. Clinton Street, Chicago

BIG

RESULTS

from small investments. Read Hardware & Metal's Want Ad. Page.

MADE IN CANADA



Like the British Navy, there is no getting away from it. Always ready for instant use. On or off in a jiffy. Holds like grim death. So simple a child can fasten it. Keeps the hames always uniformly tight. Safe and Strong. A fast seller, with a big profit for the dealer.

All Jobbers should or do sell it. $2.25 per dozen.

Your Profits Depend on Yourself!

There's money in taking orders for us. You don't have to handle the goods, simply take the orders, we will ship direct. Tell your local elevator man, blacksmith, machinist and contractor that you want to place his next order for standard or miscellaneous steel or iron, machinery, or repairs, etc., we will quote a price that will get you the order, besides allowing you a liberal profit.

You Get the Order—We Will Do the Rest

Our big shops, expert engineers, and machinists are ready to fill your orders correctly and with promptness. If you require any mechanical information, or help in any way to secure business, we will be glad to hear from you.

IF YOU ARE NOT RECEIVING OUR MONTHLY

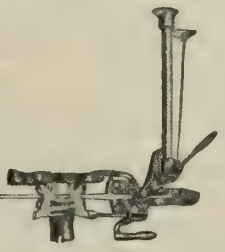
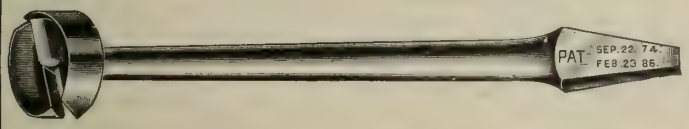
FACTS



GIPE-HAZARD STORE SERVICE CO., LTD.
97 Ontario St., Toronto, Canada

INSTALL Gipe-Hazard Carriers — use them ten days—put them to every test — and if they do not give quicker, better and more satisfactory store service than any other system, they may be returned at our expense. Fair enough, is it not? Investigate our modern Electric Cable Cash Carrier and Pneumatic Dispatch Tubes.

Send for our new Catalogue F.



THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and a clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace—made for machine. Packed singly—packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

A condensed ad. in this paper will bring results from all parts of Canada : : : :

ICE HARVESTING

When in need of any tools or machinery for ice harvesting, remember that we have a most complete line of plows, saws, tongs, bars, etc.

We also specialize in sidewalk snow plows and scrapers for municipal work.

GOOD STENOGRAPHERS ARE WHAT every employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

ESTIMATING. BY EDWARD NICHOLS, Architect. 128 pp., 22 illus. Cloth binding. Containing invaluable information for the use of Architects, Contractors, Builders, Plumbers and Heaters, Painters, Roofers, Cornice-Makers, and other workers in the building trades. This handbook tells just how to go about the task of making an estimate intelligently. Price, postage paid, $1.00. MacLean Publishing Co., Ltd., 143-153 University Ave., Toronto.

HARDWARE WINDOW DRESSING—THIS IS the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. Size 8x11 inches. Price $2.60 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.

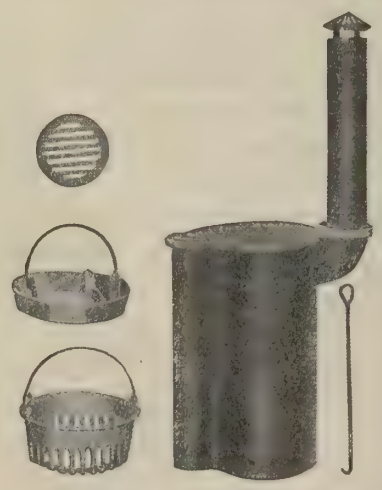
HELLER-ALLER TANK HEATER

the only thing on earth that will keep a stock tank from freezing

Heater is Made of High-Grade Charcoal Iron, and Will Remain on Bottom of Tank Without Being Fastened Down.



The entire heater is cast in one piece, including the draft flue, takes on a uniform temperature and will not crack. Is 24 inches high (exclusive of pipe), and 12 inches in diameter. Has ash pan and grate, and basket, firepot and grate; ALL heavy cast iron.

Will burn any kind of fuel and with proper care will last a lifetime.

One farmer customer will lead to many others. Drop a line for full details.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

HARDWARE AND METAL

Vol. XXVII PUBLISHED EVERY SATURDAY SINCE 1888 December 4
No. 49 THE MACLEAN PUBLISHING COMPANY, LIMITED 1915
PUBLICATION OFFICE: TORONTO, CANADA

A Christmas Present For Your Clerks

EVERY hardwareman wishes, in some way, to remember his clerks at Christmas. As a business man he naturally prefers his gift to be of a practical nature.

What could be more practical or more acceptable than a year's subscription to Hardware and Metal? It not only serves as a constant weekly reminder of an employer's thoughtfulness, but it also helps to develop the clerk into a more valuable assistant.

Will you give your clerks Hardware and Metal this Christmas? Send us a list of their names and addresses, enclosing $2 for each subscription, and we will see that their subscription commences with the Christmas Number—December 25. At the same time, we will write them, advising them that Hardware and Metal is being sent to them, on your instructions.

Act now!

HARDWARE AND METAL
143-153 University Ave., Toronto, Canada

The Strings of Your Piano

are made from the same kind of wire that is used for the springs of Stanley Foot and Chain Bolts.

You are familiar with the service rendered by your piano strings under continual strain.

The springs of these Stanley Bolts give the same service—plus—being Stanley Sherardized to prevent rust and breaking. This is as good a protection against rust as it is possible to obtain, and we guarantee that the Stanley Sherardized finish will stand a more severe test than the U.S. Government requires for its galvanizing.

No. 1055 Wrot Steel Chain Bolt in 3, 6 and 10 inch sizes in Japanned and Plated finishes is packed with strap and angle staples. Box or utility staple will be included when ordered. The box staple can be located at any point on upper jamb, and is mainly for use with batten doors. All sizes are reversible by removing set screw from bolt proper, turning bolt and replacing screw in opposite side. Chain 24 inches long. Also furnished with 5 foot chain and numbered 1055½.

No. 1056 Wrot Steel Foot Bolt is furnished in the same styles, sizes and finishes as the Chain Bolt, and the two make a very neat appearance when used in combination. Packed with rectangular floor plate—having oval-shaped hole to take care of shrinkage in door without resetting plate. Floor plate is cupped to guide bolt and the cap and release are solid bronze. Stanley Products have received Highest Award—Medal of Honor—at the Panama-Pacific Exposition. Our first Medal of Honor was received in 1855.

The Demand Exists For The "Famous Five"

It doesn't have to be created. It merely rests with you to give your customers the goods they ask for.

90% of the files used in Canada each year are of the following brands:

KEARNEY & FOOT, GREAT WESTERN AMERICAN, ARCADE, GLOBE

(***Made in Canada***)

And we are educating your customers for you on the saving in time and labor by discarding a file when it is half worn, and replacing it with a new one.

It only remains for you when selling a file to remind your customers of this fact. You'll sell two files where you now sell only one.

The line, therefore, for you to push is the one for which there is a big demand—the "Famous Five."

NICHOLSON FILE COMPANY **Port Hope, Ont.**

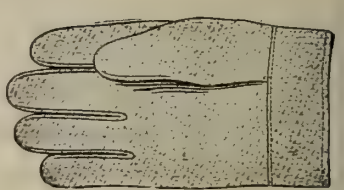
REGISTERED BRAND TRADE MARK

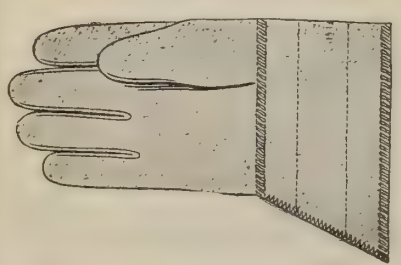
When you've looked them over

you will fully understand why "Tapatco" Cotton Gloves are creating bigger business for dealers everywhere.



Made entirely of Canadian materials by expert Canadian workmen, "Tapatco" Gloves give that satisfaction which creates profitable customer confidence.

This popular selling line embraces Gauntlet, Knit Wrist or Band Top Styles in Heavy, Medium or Light Weights. Also Leather Tip and Leather Face Gloves, and Jersey Gloves and Mitts, in Tan, Brown or Oxford.

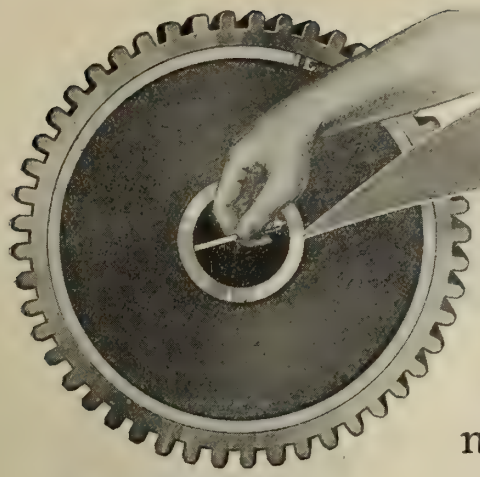


"Tapatco" Cotton Gloves are probably the one thing necessary to put your Glove Department on a better profit-producing basis.

Why not try them out? Get a sample order, to-day.

American Pad & Textile Co.

CHATHAM **ONTARIO**

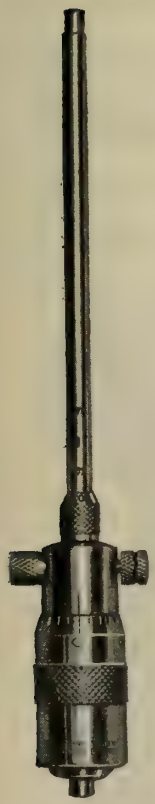


Fits

The best machinist is the one who can caliper his fits so accurately the jobs never come back for refitting.

The limits of tolerance are so small that the greatest accuracy is required.

In forced fits 1-1000 of an inch is the limit allowed. This means the machinist must place great dependence upon his instruments.



Starrett Tools

and Instruments of Precision

are absolutely true and are designed for quick, easy adjustment.

For example—the Starrett quick adjusting micrometer can be instantly opened or closed to any point within its capacity. This saves time and combines speed with accuracy. Starrett Tools are well known as standard by all expert machinists and engineers.

2100 styles and sizes—including micrometers, vernier calipers, dividers, combination squares, steel tapes, hack saws. We deal direct with hardware stores. Write for free catalog No. 20-MA terms and prices.

Do All "Safety Devices" Really Safeguard?

The mere mention of the word "safety" ofttimes gives the impression of absolute infallibility. But, does *safety* always mean just that?

As you know, a pistol is cocked when the *hammer* is held back by the *sear*. To fire a pistol, the sear must be moved to release the hammer and allow it to fall. In some pistols this may be unintentionally caused by a jar.

Unless the "safety" positively blocks the sear, it is not a real "safety," but a dangerous substitute.

A COLT is POSITIVELY SAFE in the fullest sense of the word.

It means that the COLT GRIP SAFETY blocks the sear and locks the trigger, thus positively preventing the hammer from falling unless this grip safety is pressed in and the trigger pulled.

The Colt, therefore, is *positively locked against* accidental discharge.

Sell Coit's and Safeguard Your Customers!

Send for a supply of folders more fully explaining this important point.

Jenkins Bros.' Extra Heavy Gate Valves

TRADE JENKINS MARK

Jenkins Bros.

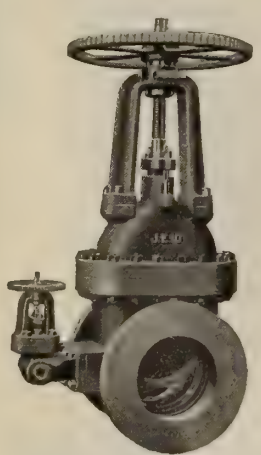

Fig. 204-B

All are guaranteed to stay tight under a working steam pressure of 250 lbs. or a hydraulic pressure of 400 lbs.

The globe-shaped bodies are made of high-grade cast iron and are tapped for renewable bronze seat rings. The wedges are also cast iron, heavily faced with bronze rings which cannot become loose in service. Wedge guides are provided and carefully finished on the inside to insure smooth opening and closing without chattering in a partially opened position.

The glands are of special construction with brass body and sleeve. The corrugated rim of the large hand wheel is a distinguishing mark and is used only on genuine Jenkins Bros.' extra heavy valves.

They are furnished Inside Screw, Stationary Spindle or Outside Screw and Yoke Rising Spindle. Inside Screw Valves have bronze spindles and Outside Screw Valves have steel spindles. Extension Stems, Gearing, Chains and Floor Stands in accordance with particular requirements supplied.

We can build these valves for electric, hydraulic or pneumatic operation to order. Also made in Cast Steel for high pressure superheated steam and hydraulic pressures.

Every engineer should have a copy of the new Jenkins Bros.' No. 8 Catalogue. Write us to-day.

What Will You Say to the Customer When He (or She) Steps in and Asks For Me?—*Mr. Punch*

GOODELL-PRATT
1500 GOOD TOOLS

Mr. Punch has had a tremendous amount of publicity and he has been the medium by which householders all over the country have been educated to buy good tools.

Mr. Punch will appear in a number of the leading magazines in December, such as The Saturday Evening Post, Popular Mechanics, etc., suggesting the gifts of tools at Christmas time.

(Window Sign)

(Booklets)

The question now is, Mr. Dealer, are you going to take advantage of this wide-spread publicity and obtain some of the results which it has already brought to hardware dealers everywhere?

We are pushing our tools for your benefit. Attractive booklets are now ready for distribution—the counter demonstrator and window signs of Mr. Punch go forward with your order.

When a Customer steps into your store the demand for good tools has already been created in his mind, by the advertisements of Mr. Punch which he has read. Let him know you have the goods in stock and the sale is more than half made.

Mr. Punch sells for $1.50 with a good profit for you.

Get our big catalogue of 1500 nationally advertised tools. There are profits for you in our line.

JOHNS-MANVILLE SERVICE
COVERS THE CONTINENT

THE Johns-Manville policy of unquestionable Responsibility for the performance of its products in service is a policy without a reservation. It's a bona fide, straightforward "square deal." This policy is applied to J-M Roofings by our new "Roofing Registration" plan. *You* ought to know about this plan. It's a trade winner for you and a money saver for your customers.

J-M Regal Roofing J-M Vise-Grip Cleats —A Winning Combination

The one weak point of ready-to-lay roofing has always been the difficulty of making tight joints at the laps.

With the invention of J-M Vise-Grip Cleats this difficulty has been overcome, and the field for this product has been opened to unlimited possibilities.

Laps and Joints are now made watertight and the roofing is held against the boards with a continuous vise-like pressure. Warping and shrinkage of roof boards does not cause the roofing to pull away and leak as when the laps are fastened with nails and cement.

And the roofing! J-M Regal has proven itself the longest-lived and most satisfactory all-around "rubber type" roofing that can be produced. It is made of wool felt and genuine Trinidad Lake Asphalt in conjunction with other natural asphalts — a combination that assures the maximum of durability.

Inquire about J-M Roof Registration. Let us show you how to meet the demand for a durable ready roofing—and how to make money doing it.

Hardware and Metal

Established 1888. TORONTO, DECEMBER 4, 1915 Vol. 27. No. 49

Sales Are Climbing in New Store

Modern display methods have increased the sales of some lines 30 per cent., in the new hardware store of La Compagnie Codere et Fils, Inc., Sherbrooke, Que. The above is a general interior view of the store. Views of various departments are shown on the following pages.

IF there is one thing more than another that La Compagnie Codere et Fils., Inc., of Sherbrooke, Que., have learned since they rebuilt their store, it is that the sale of almost any line can be greatly increased in a very short time, if it is only displayed right.

Since occupying the new store, the company has, in a very short time, increased the sale of mechanics' tools 30 per cent. Sales of agricultural tools, shovels, etc., have increased 20 per cent. Other lines have also sold much more rapidly in the new store than they did in the old store, which was destroyed by fire early in the year.

Modern equipment and display methods are largely responsible for increases, in sales of many lines, which are being experienced by the above firm.

A Devastating Fire

On January 15 of this year a fire broke out in the Codere store at 4.30 p.m. It started in the basement, and quickly spread throughout the building. It burned until eleven at night, the store and stock being almost a complete loss. While attempting to save the books, J. L. Codere was overcome by smoke, and narrowly escaped losing his life.

New Building

Arrangements were at once made to rebuild. Plans were prepared for a fireproof building, 45 by 105 feet, five storeys high, of mill construction, with a very handsome stone front. Business was resumed the day following the fire in a temporary structure, but it was not until May that the new store was ready for occupation.

The whole of the ground floor is devoted to the retail end of the business. The offices are at the rear, and are constructed mainly of glass, making them light and airy. These occupy an area of 20 x 45 feet, and contain the general office and offices of president and manager. As few pillars as possible have been used in the store, what few there are being located to the left. This gives the store a wide uninterrupted sweep, adding much to its attractiveness.

The ceiling is white metallic. Light is diffused throughout the store by powerful nitrogen lamps, suspended by chains from the ceiling. The cash carrier system is in use, eight or nine stations connecting with the cashier's office, located on a balcony at the rear. An electric elevator is available for freight, and for conveying passengers to the second floor, where there are elaborate displays of electrical and plumbing goods, blacksmiths' supplies and stoves. The buyer's office is also located on this floor.

The two upper floors as well as the basement are used as warehouses, besides which heavy goods, such as bar iron, piping, galvanized sheets, etc., are carried in various other buildings.

There are two large show windows, the entrance, which is fairly wide, being located in the centre. The business side of the store is on the right, where are located the sales staff, most of the show cases, and the stock boxes. For a considerable distance the wall space is taken up with tool cases. Then come the stock boxes, which are faced with green paper, which shows up the hardware fairly well. The idea in using paper was that

it could be renewed when dirty, and thus always give the department a clean appearance.

Difficulty After the Fire

In passing, it might be well to observe that some difficulty was experienced after the fire in getting the hardware back into approximately the same position occupied before. Fortunately the firm possessed a photograph of the stock boxes near the entrance, which assisted them very materially. Mr. Eugene Codere told the writer that it took three months to get the rear stock boxes arranged right, which work could have been done in three weeks had they possessed pictures of the interior.

Island Counters

The centre of the store is occupied by two island counters—one at the front and the other at the rear, the space in between the two being used for display. These counters are formed by a series of silent salesmen, and really form two departments. The one nearest the entrance is the electrical specialty cutlery and silverware section, while that at the rear of the store takes care of enamelware, aluminum and tinware. In the centre of the island at the rear is a series of floor shelving rising to a considerable height around the pillars, eliminating their unsightliness. The corresponding space inside the counter opposite the entrance is much lower. The top is used for displaying electrical specialties, such as toasters, irons, and heaters. The drawers beneath carry electric lamps, spoons and knives.

Left Side of Store

So much for the right-hand side and the centre of the store. On the left there are, first, several wall cases, containing guns, revolvers, and ammunition, in front of which, in the corner, and, therefore, out of the way, is a table on which guns are displayed. There are several silent salesmen here, forming a counter. The remainder of the wall carries shelving, on which are kept the large stock of paints and varnishes. There is a wall panel between the paint shelves and gun cases, in which brushes are shown.

Opposite the paint department, the floor space is occupied by a series of display tables, carrying household goods and seasonable articles likely to be picked up by farmers passing through the store.

View showing a portion of the store front of the new store of La Cie Codere & Fils, Sherbrooke, Que.

As far as possible, an effort has been made to make show case trims as individual as possible. Several illustrations, reproduced herewith, bear out this statement, those of electrical specialties and lamp shades being especially worthy of attention.

Showing Agricultural Tools

Having made a general survey of the store, a few words about the systems adopted in one or two departments should prove interesting. It was hinted in the first paragraph of this article that goods were now being shown in this store with a view to disposing of them at the earliest possible moment. With this end in view, the rack for agricultural tools was designed. These tools used to be carried upstairs in the store room. Now they are located in the right-hand corner at the rear.

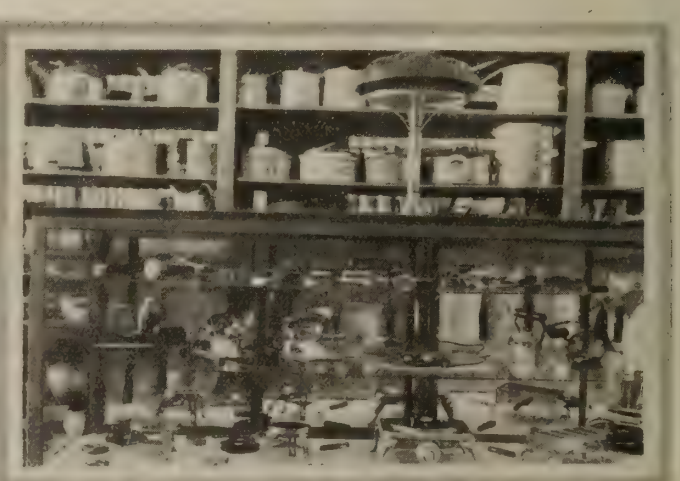
Sales Jumped 20 Per Cent.

This is what Eugene Codere says about the rack: "We find it ten times easier to sell a spade or a fork now. It saves the time of the clerks, and it carries shovels, forks, rakes, handles, brooms, and anything of that nature that is in season. Without exaggeration, I can safely say that since we introduced that rack our sales have jumped 20 per cent. It used to be that you never saw a shovel in this store. People had to ask for them. Now they are shown in season. For example, grain shovels and forks have been removed, and their places taken by snow shovels."

Axe and Hammer Heads

Near the rack will be noticed a piece of shelving, cut up into pigeon holes. There are twenty of these holes—ten for axe heads and ten for hammer heads. Here are sledge hammers, there drilling hammers, port hole hammers in the next, and so on. These used to be stocked in the cellar, and samples lay around on the store floor. Now, each has its place, and the rack carries about 400 axes and hammers, which give no trouble. They

Space between the island counters is used for displays of various lines of goods. A glimpse of the paint department is shown in this view. Note silent salesman showing samples of builders' hardware.



Individual trims are a feature in the Codere store. Above is a silent salesman trimmed with electrical devices. The upper shelf is loaded with electric flashlights.

Sectional view of the sporting goods department, showing guns, rifles, revolver, police goods, ammunition, etc. Note the wall display cases, and also table for showing shot guns.

Rack for carrying agricultural tools, shovels, etc., and also a rack for holding axes, sledge hammers, wedges, heavy hammers, etc.

make good neighbors, for the shovels and forks, because when a farmer is buying a shovel he often wants an axe and hammer at the same time.

Gun Display

Mention has already been made of a table on which guns are displayed. This stands in front of wall show case, and is out of the way. Mr. Codere believes this is an effective way of displaying guns. He says "We have sold more this year than ever before, and I believe that table is one of the reasons. When you spread goods out so that they can be handled with facility they are half sold."

Sold 30 Per Cent. More Tools

In the old Codere store there were no wall cases for tools. "You'd be surprised," said the proprietor, speaking to the writer, "what a difference this has made. Our sales have jumped at least 30 per cent. I often hear men leaving the store say, when their eyes have rested on that case: 'Oh, I want a hammer.' In the case of table cutlery, the same thing happened. We never showed them in cases before. Since we have had a silent salesman at the door our increase in sales has been as big as that in tools."

Two lines of paint have been carried for years—a cheap grade and a high-grade one. The energies of the staff have been centered on pushing the better line. By co-operating with the manufacturers in advertising throughout the district, their sales have jumped 25 per cent. each year. Five years ago they were selling 400 gallons of the good paint annually, and 400 gallons of a cheaper make. Now they sell 1,800 gallons of good paint and 500 gallons of the cheaper paint. Codere's find that it pays to sell good paint; profits are bigger and complaints are fewer.

Showing Cutlery, etc.

Reference has been made to a show case of cutlery and silverware near the entrance. Behind the case is a series of stock boxes. Half of these—the left half—are devoted entirely to spoons, and the other half to knives. Thus, if a customer mentions spoons, the clerk concerns himself only with the drawers on the left.

Stocking Electric Lamps

Similar drawers on the other side are used for carrying electric lamps. The top row carry tungstens, of 10, 25, 40, 60, 100 and 150 watts. The next row is for ordinary incandescent lamps, which are graded according to candle power. The bottom row is devoted to nitrogen lamps, of 100, 150, 250 and 500 watts.

A stock of electric motors is also carried, samples of which are shown on the top of these drawers, ranging in size from ⅛ to 5 h.p. Larger sizes are supplied on demand. The firm being in a position to handle large building contracts, is also able to handle electrical contracts as well, and a full stock of supplies is carried in stock.

Another new line Coderre's expect to branch into next year is automobile accessories.

Showing partial view of island counter on which household lines are displayed. Note also the individual display of electric and gas lamp shades, shown in the silent salesman.

Display tables showing various lines of household goods. Wall shelving carrying household goods and dairy supplies, is also shown. The cashier's office may be seen in the background.

The Firm's History

A little early history will not be out of the way, and it is interesting history. The full name of this company is La Compagnie Codere et Fils, Inc., from which the reader will gather that the personnel is French-Canadian, although they cater to a trade almost as much English as French. The business was founded by Francois Codere in March, 1875.

As a young man, Mr. Codere served his time to the blacksmith trade at St. Hyacinthe, Que. After marrying, having the desire to make money, he embarked for Chili, whither he had been drawn with colored stories of big salaries, sunny skies, and plenty to do. The journey occupied four months. His wages were to be eight dollars a day, albeit Chilian dollars, which were only equivalent in those days to 50 cents Canadian money. Another painful discovery he made on arrival was that he must pay for his board and passage, something he thought was being given free. Chili did not prove an Eldorado, and Mr. Codere returned to his native St. Hyacinthe.

There he worked at his trade for a year, and in 1863 went to Sherbrooke, where he established himself in the blacksmith business, occupying what is now one of the principal corners on the main thoroughfare. The elder Codere must have had the business instinct born in him, for he bought his coal by the car, and supplied his fellow smiths. Later he carried blacksmith supplies, and did a small wholesale business with other shops in the vicinity.

Went Into Hardware

This, we might say, was the seed from which grew the present large hardware business. The blacksmith shop thrived for twelve years, after which, the smoke of the shop aggravating a case of bronchitis from which he suffered, Mr. Codere was compelled to abandon his trade, and opened a hardware store in partnership with a man named Boucher, who was a practical tinsmith.

Their stock consisted of $3,000 worth of hardware, and $700 worth of tinware.

In the meantime two sons had come on the scene, the elder of whom, J. L., went into the store, later going on to the road as a traveller. Eugene learned the plumbing and steamfitting trades, and in a short time was given charge of that end of the business. Later he was brought into the store and appointed buyer, the business having by this time begun to grow apace.

In 1891, the two sons were taken into the business, and the style changed to Codere Sons & Co. The elder Codere died in 1899, and the business was continued by the sons until 1908 when, the business having assumed such large proportions, a company was in corporated under the present name. The following officers were elected:—Eugene Codere, president; J. L. Codere, manager; Edward Codere, treasurer, and R. Langis, secretary.

Two Million Dollars in Six Weeks

Volume of War Supplies for British Forces in Field Secured Through Canadian Purchasing Agent Continues on a Fairly Satisfactory Basis — Amount to Date is Seven Million Dollars—Some of the Lines Needed

An authorized interview by Hardware and Metal representative with E. Fitzgerald, Canadian purchasing agent of the British War Office.

THE volume of war supplies for the British forces in the field being secured through the Canadian purchasing agent of the War Office, E. Fitzgerald—working with the aid of the supply system of the Canadian Pacific Railway—has recently continued on a very satisfactory basis, although the scope of the business has not included many new lines. The amount involved to date is, in round figures, $7,000,000; six weeks ago it was $5,000,000. The fact that $2,000,000 has been spent on general merchandise in the past month and a half through this purchasing office, means considerable to Canadian industry, especially when it is taken into consideration that a comparatively wide field is being covered and that many of the industries benefited have been finding conditions comparatively quiet in normal domestic trade.

The figures given indicate that there has recently been an increase in the volume of orders, but there have been no very important developments as to new lines. This is a matter for regret, but the explanation would appear a comparatively simple one. For a time after the War Office undertook its new and important duties of provisioning a big army in the field there was undoubtedly considerable uncertainty as to the best sources of supply, and much experimenting to be done. The system developed was to send samples into the various markets and ask for propositions on the basis of these samples, or something sufficiently near to the standard to pass for most intents and purposes. Then quality and price were considered and the business placed accordingly. The conflict is now well on in its second year and the purchasing officials have by this time secured a fair knowledge of where they can get the best service as to quality, style, price and delivery. Also it must be expected that British manufacturers have organized to meet the requirements and that when they can take care of the orders they are not likely to go out of the United Kingdom. The result appears to be that the business coming to Canada is now in more set channels and that in the lines which can be successfully supplied the orders are in good volume.

The bulk of the business embraced in the total of $2,000,000, recently placed was in barbed wire, woolen underwear, rubber boots, sweater coats, box shooks and cheese. There was also some business done in snowshoes.

Wire to Specification

In barbed wire there appears to be a strong continued demand and the prospects are that Canada will do a very good business in this line for some time —provided price and quality are satisfactory. In the latter connection the indications are that much may depend upon the specifications followed. The War Department wants a wire with extra long barbs placed close together, and made in spools to weigh about 28 pounds. Manufacturers are taking steps to meet these special requirements.

Underwear and Coats

In underwear there have been some orders placed for woolen goods for shipment from stock. Canada has been able to give satisfaction on these lines, and the business will probably continue with the needs of the forces.

Rubber boots have found a continued demand with several extensions of orders. Reports from the front of wet conditions in the trenches indicate the popu-

Continued on Page 36.)

What Other Hardwaremen Do

AN AD. THAT PULLED

An Ad. That Sold Among Other Things 85 Rolls of Roofing and Over 500 Electric Lamps in One Day

On this page is shown a reproduction of an advertisement by the Mills Hardware Co., Hamilton, Ont. The ad. appeared in a Hamilton paper on Friday evening. On the following Saturday 85 rolls of roofing at $1.19 per roll, and over 500 electric lamps at 30 cents each, or five for $1.25, were sold, in addition to a large number of each of the other articles featured in the advertisement.

The ad. was three columns wide and the full depth of the newspaper page.

The Mills ad. appears on Friday evening of each week. In this ad. the prices were quoted especially for Saturday selling, but Mr. Mills informed Hardware and Metal that many orders came in the following week. These of course were not filled at the price advertised for Saturday only.

This is simply another instance showing the pulling power of a good newspaper advertisement that places a proposition squarely before the buying public.

Mill's advertisements show illustrations of the goods, give complete descriptions, and quotes prices.

The Mills ads. are prepared by Nelson Mills, vice-president and general manager of the company. The ads. are not hurriedly prepared. A considerable amount of time is devoted to the preparation of copy. And more, the Mills ads. are usually prepared several weeks in advance of the time they will be needed.

USING "LOCAL COLOR" TO SELL A CAR

Orangeville, Ont.—The most conspicuous landmark for miles, in this part of the country, is Caledon Mountain. The C. P. R. negotiates this difficult grade by a spiral bit of track, which is known all over Ontario as "The Horeshoe."

The Adamson Hardware Co., of this town have cleverely seized upon this fact, in developing a selling argument for the motor car of which they have been appointed agents. They have posters tacked up all around the district, announcing their appointment as agents, with this significant sentence at the bottom of the poster: "The Chevrolet will Climb Caledon Mountain on High Gear. Will yours?"

MILLS HARDWARE CO. LIMITED

Test This Roofing

No Culls—No Mill Ends

Special for Saturday

$1.19 Per Roll

The above ad. pulled an exceptionally large amount of business. See details given on this page.

DO YOU BELIEVE IN SIGNS?

"Bob" Walkem, of Tottenham, evidently believes in signs. At any rate he has a number of nicely printed signs hanging from different vantage points in the store. Here is the text matter of some of them:

"If we do not carry in stock the article you wish, we will get it for you, regardless of expense to us. What we want is not only customers, but pleased customers."

"We do not substitute—The policy of this store is: 'We give you what you ask for.'"

"Since man to man is so unjust
I hardly know which one to trust;
I've trusted many to my sorrow
So pay to-day, I'll trust to-morrow."

"Positively no Credit."

Asked by Hardware and Metal how his customers were affected by this latter sign, Mr. Walkem smiled sadly and said: "They never see it."

At the same time Mr. Walkem declares that the credit end of the business is much less in proportion to the whole, than it was a few years ago, and he is of the opinion that these signs have helped him to educate his customers along the right lines.

TO CONDUCT CASH BUSINESS

Alberta Hardware Firm Announces Introduction of Casy System

The Day Hardware Co., Red Deer, Alta., has announced that it will do a strictly cash business after Jan. 1, 1916. An announcement made by the company to its patrons reads as follows:

"On January 1st, 1916, we are going to make an important change in our business policy.

"It is important to you as well as to us, for it means dollars in your pocket and better store service all around.

"As a business institution of Red Deer, we feel it our duty to serve the people of this community in the best possible manner, to look to their interests always, to make any change in policy which may directly or indirectly benefit those whose valued patronage we seek.

(Continued on page 36.)

How Galvanized Sheets Are Made

Many Important Operations Are Necessary in Making Galvanized Sheets — How the Bright, Spangled Effect is Produced—Compressed Air Played on Sheets

IN normal times approximately 70,000 tons of galvanized sheets are used in Canada. The bulk of these are distributed through the hardware trade, in its various branches.

Inquiry reveals the fact that comparatively few hardwaremen know how galvanized sheets are made, or what pains have to be taken by manufacturers in order to produce high grade sheets.

This article, the seventh of a series on "How Hardware Goods Are Made," explains in detail the process of galvanizing sheets, and how manufacturers produce the bright spangled appearance which distinguishes the galvanized sheet.

Through the courtesy of the Dominion Sheet Metal Co., makers of "Premier" sheets, at Hamilton, Ont., Hardware and Metal was privileged to visit their plant. and witness the various processes through which the sheet passes before it is ready for the market.

The visitor when going through the plant, is impressed with the evidence of expert knowledge, and modern processes.

In a strictly modern plant the proportion of imperfect sheets is surprisingly small, expert workmen and modern methods having reduced this loss to a minimum.

In passing it might be stated that the galvanizing of sheets is a new industry for Canada. Prior to the establishment of the Dominion Sheet Metal Co. plant, which commenced operations on Sept. 1, of this year, the bulk of the supply of sheets for the Canadian trade was imported from England and the United States.

The new plant occupies a site covering five acres, is well served by railway facilities, and is in close proximity to Lake Ontario, from which can be obtained, an unlimited supply of soft, clean water particularly suitable for use in the process of galvanizing.

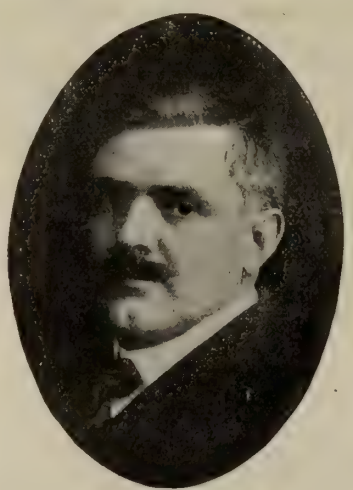
Electric power is used throughout the plant, and as each different gauge of metal must be coated at a speed definitely determined in advance, electric speed controllers have been installed, which regulate the speed to perfection.

Natural gas is used for fuel, and the temperature is absolutely controlled by electric pyrometers, ensuring the application of the coating at the proper temperature.

Requirements of Good Sheet

The essential requirements of a good galvanized sheet are, first, a basic sheet of proper composition and texture, and second, a pure coating properly applied.

The "black" sheets from which the galvanized sheets are made are specified from certain mills, and must conform to physical and chemical analysis. This plant, like all the modern plants has its own chemist and metallurgist, who frequently test all materials in the various processes. Open hearth or Bessemer



A. T. ENLOW,
President and General Manager Dominion Sheet Metal Co.

black sheets, spelter, lead, tin, sal-ammoniac, acids, all must conform to approved chemical analyses.

All loading and unloading of material is done under cover. In handling the sheets a five-ton electric crane is installed.

Galvanizing Process Interesting

The galvanizing process is intensely interesting, and is the one in which the hardwareman will be most interested.

The black sheets are first placed on trucks and weighed. They are then placed on stock piles by the electrical crane.

From the stock piles the sheets are removed, one by one, and carefully inspected before being placed in the pickling crates.

Each crate as soon as filled with perfect black sheets, is picked up bodily by the electric crane, and placed in the pickling tank where the sheets are treated with sulphuric acid to remove the scale and clean the surface, so that when being galvanized the spelter will adhere perfectly to the sheet.

The pickling machine consists of two plunger tanks, each tank being 12 ft. 6 in x 3 ft. x 5 ft. deep, and having a capacity of from 100 to 300 sheets, according to gauge, at one operation.

The tanks are constructed of solid 8 x 10 in. Georgian pine, and have a bottom of lead. At one side of each tank is a plunger, also made of Georgia pine. The plungers are mechanically operated, and are used to agitate the liquid in the tanks, by which means the sheets are kept separated so that the acid may work more effectually.

An interesting feature about the pickling crates is that they are made of "Monel" metal, each crate representing an outlay of $1,000. This metal, it is

Pickling department where the sheets are prepared for galvanizing

View of galvanizing machine with feed tank.

said, possesses the characteristics of being able to withstand the corrosive action of the hot acid in the pickling tank and lasts indefinitely, whereas crates made of bronze, it is claimed, would soon corrode.

After all scale and surface matter has been removed from the sheets, the crane removes the loaded crate from the acid. and transfers it to a wash tank, through which clear water is flowing profusely. The sheets are effectively washed and all traces of acid are removed. The sheets remain in the rinsing tank for about thirty minutes.

If the sheets are not to be galvanized immediately, they are carried by the electric crane to storage tanks containing water, where they remain until required for further treatment. If required at the galvanizing machine, they are carried to the feed tank direct by the crane, after having first been inspected and placed in skips laid flat. In either case they are carefully inspected before any further treatment.

There are five storage tanks, each being 4 ft. 6 in. x 12 ft. 6 in. x 3 ft. deep. They are also made of wood and contain clean water. After inspection, the sheets are laid flat in a skip, which has a capacity of about 5 tons and placed in the tank.

Applying the Spelter

Great care and expert knowledge is required in this operation, which consists of coating the sheets with a thin layer of zinc spelter. There are two galvanizing plants installed which are operated independently of each other. Each plant consists of a "pot" constructed of brick, and having a natural gas-fired furnace underneath. The "pot" contains the spelter, one charge weighing about 80,000 pounds, and also the machine for doing the galvanizing.

Before being galvanized, the sheets are carefully inspected and dipped in a tank containing muriatic acid; this acid cleans the sheets, and also acts as a flux or binding medium for the spelter. The sheets are fed from the tank through a pair of 6 in. rubber rolls through a bath of sal-ammoniac, which is a flux and floats at one end of the pot only, on top of the spelter. The sheets travel down on guides immersed in spelter through the bottom rolls which carry the sheets along. The sheets then pass through another set of finishing rolls, which assist in the process, and also draw the sheets out of the pot. The speeds of the various sets of rollers vary, a feature which is carefully worked out in the construction of the drive gear. The temperature of the spelter in the pot is recorder on a pyrometer.

Cooling the Sheets

As the sheets leave the finishing rolls on a chain conveyor, they are carried between a series of rolls or levellers, which, as the name indicates, flattens out the sheets while hot. The sheets are then carried a short distance on another set of rollers to a table in front of the revolving cooling racks. On this table is a trip gear automatically operated, which places each sheet in position on each rack as the latter comes round. The cooling machine revolves very slowly, and while doing so, compressed air is played on the sheets, giving to the smooth silvery surface that spangled appearance which distinguishes all galvanized sheets. The accompanying illustration will give the reader an idea as to the type of machine used for the cooling process. The cooling machines are operated by the motors that drive the galvanizing machines.

By the time the sheets have travelled over to the other side of the cooler they are cool. They are then taken from the racks, placed on trucks and carefully inspected on both sides for any imperfection. Any sheets that are imperfect are placed on one side, while the perfect sheets are branded. The sheets are now finished and are loaded into cars, which are inside the shop, or are bundled, weighed, and taken to the warehouse to await shipment when required.

A. T. Enlow, President and General Manager of the Dominion Sheet Metal Company, has for many years been engaged in the sheet metal business in both Canada and the United States.

TRADE INQUIRIES

1218. **South African Agency.**—A Cape Town agency firm is prepared to take up Canadian agencies for Western Cape Province in lumber, building material, hardware, tools, shovels, handles, asbestos, wire and nails.

HARDWARE & METAL

CANADA'S ONLY WEEKLY HARDWARE PAPER

Vol. XXVII. TORONTO, DECEMBER 4, 1915 No. 49

ONLOOKERS OR BUYERS?

IT is all right to run freak windows occasionally, but window display space at Christmas time is too valuable to be used for exhibitions which simply amuse and do not have selling force. Place a couple of turkeys, rabbits, or some other freak display in your show window, during the next week or two, and the chances are you will attract the attention of tremendous crowds, but in all probability, your sales as a result of the display, will be practically nil.

During the first week of December last year, a retailer had a live bear on exhibition in his show window, and it attracted the attention of hundreds of people. This freak attraction, although a splendid crowd puller, did not sell goods. The chances are that if the merchant had arranged his window with a good display of Christmas goods, neatly arranged and price ticketed, he would have sold several hundred dollars' worth of goods as a result of the display. There is a big difference between a window display that attracts a crowd of on-lookers, and a display that attracts buyers.

STEEL SHORTAGE SERIOUS IN U.S.

RECENT reports from the United States indicate that the high prices for finished steel have failed to check buying, and many makers are experiencing trouble in meeting the excessive demand. Some of the large buyers of billets and other grades of semi-finished steel, are going so far as to predict shutdowns of their plants if the present shortage of steel continues.

The statement was recently made that France would limit steel buying in the United States, owing to high prices, and a London cable announced that the Allies had reached such a rate in the manufacture of munitions that further orders need not be placed in the United States. An American authority claims that it is true that at present there is no new shell business in the hands of the Allies agents, but that options have been taken on quantities beyond those named in existing contracts. It is further claimed that the Allies have found no way of increasing their output of steel, and that a large buyer for a French steel company that has already taken 400,000 tons of large rounds, will continue to be a buyer in the United States for another year at least. Reminders that the war demand will not go on indefinitely, are not unwelcome in many quarters, owing to the fact that there has been considerable uneasiness over the prospect that home consumption would suffer, while mills were busy with the attractive war contracts placed by the Allies.

NOVEMBER BUSINESS GOOD

REPORTS from wholesalers and retailers of hardware, indicate that November business was exceptionally good—much better than the corresponding month of last year. Despite the high prices of many lines of hardware, the retailers are buying freely. The class of orders received clearly indicate that retailers' stocks are very low. Spring booking orders are being placed in large numbers.

Owing to further price advances which will undoubtedly take place on many hardware lines during the next few months, retailers are being urged to book early for their spring requirements.

If the demand for steel continues at the present rate, there is bound to be a scarcity of many lines of semi-finished steel goods during the spring.

Retailers report that country business is brisk and farmers are buying freely. Crop money is beginning to circulate. A great deal of repair work of various kinds is being done in the country districts and there is a heavy demand for heavy lines of builders' hardware, such as are used around farm buildings. There is a scarcity of help in many manufacturing centres. Skilled mechanics are being advertised for in large numbers. During the past week a number of large plants which have been running short time, have started to run full time. On every hand there is evidence of returning prosperity, and all branches of the hardware trade are more optimistic now than at any time since the outbreak of the war. The domestic demand for metals of various kinds has improved considerably during the past week. Metal merchants, who for many months past have complained about the slow demand for metals,

outside of those needed for making munitions, state that the past week has shown a considerable improvement in demand. Many small foundries in all parts of Canada are making inquiries for pig iron in larger quantities than at any time since the outbreak of the war.

With the opening of the big game shooting season in the West, there has been a big improvement in the demand for rifles and ammunition, and other hunter's supplies.

Christmas trade started earlier than usual this year, and there is a big demand for practical Christmas gifts. The hardware trade this year will probably secure more Christmas gift business than in any past year.

The business outlook at the present time is brighter than it has been at any time in many months past. There is plenty of money in the country and it looks as though purse-strings which have been held tight for a long time are now being loosened up considerably.

SCARCITY OF CELLULOID

THERE is a scarcity of a great many lines of table and pocket cutlery which were formerly imported from England. Many orders of goods which were expected to arrive in this country in time for the Christmas trade have not arrived, and in all probability will not reach Canada until after the new year.

Carvers, heavy pocket cutlery, and various lines of table cutlery, particularly celluloid handled table cutlery, are among the lines chiefly affected. The *Ironmonger,* an English trade paper, in referring to the scarcity of celluloid handles for cutlery, states that the future of the celluloid supply is causing much anxiety to makers of table cutlery, who use large quantities of the material for handles. British works have now ceased to supply celluloid because the Government has requisitioned their whole output of acids for making explosives, and for the same reason French celluloid is longer available. Some supplies of excellent quality have lately come from Japan, but the makers there have no more to sell, because their acids are being used for the Russian Government.

The only celluloid now obtainable in the markets is the American material, of which the supplies, although well kept up, will probably be insufficient for current needs when once the stocks in this country have become exhausted.

Comparatively little celluloid cutlery is now served out to the British Navy and Army, yet the demand for celluloid knife handles on the part of the public at home and overseas is far greater than it has ever been. Many orders for cutlery intended for the Christmas sales have not yet been touched by the manufacturers for lack of men and materials, and it is certain that a large proportion of them will not be completed this year.

MANY PRICE CHANGES

A GREAT many price changes in hardware lines have taken place and have been recorded in Hardware and Metal's weekly market reports during the past few weeks. It is quite evident that there is still a great deal to be done in the way of price adjustments, as a result of the unparalleled conditions which exist in the steel market, and also, as a result of many other unusual conditions which have developed as a result of the war.

Manufacturers of many hardware and paint lines have had considerable difficulty in securing supplies of raw materials. In many cases the costs of raw materials have increased several hundred per cent. since the outbreak of the war, and manufacturers have been forced to increase their selling prices, in order to take care of increasing costs of production.

There will be many price advances between now and spring. Certain lines, now offered for spring delivery, are being booked at prices which are much lower than the market prices will be at the time the goods are delivered next spring.

GET THE FARMER TALKING

THERE is a great future for the town whose merchants are banded together to interest the farmers in the town and community. Get them talking and thinking about the home town; show them through the advertising pages of the local newspapers and through bright, up-to-date window displays what you have for sale and you will get their thoughts away from the distant mail order houses. If they spend their money in the home town they cannot spend it away from home. Go after their trade and go after it first, with every modern, aggressive and legitimate method, and you are pretty nearly sure to get it.

EDITORIAL BRIEFS

THE HARDWARE buyers' position was never more important than it is to-day. With prices of many hardware lines soaring skywards, and important changes taking place every day, the buyer is called upon to exert the best that is in him, in order to protect his house, and prepare for future business.

* * *

A LIVE WIRE is a man always looking ahead, and doing things that count. Of course, it is needless to say that someone has to do the routine work; of course they have, but the idea is for you to study out an easier and better way for that routine work to be done, and put that idea into practice, and ere long you will rise from the mediocre class, and attain things worth while.

Display which won third prize ($15) *in the contest conducted by the Dominion Cartridge Co. The display was arranged by C. H. Smith for the J. H. Ashdown Hardware Co., Winnipeg, Man. A list of all prize winners appeared in the November 27 issue of Hardware and Metal.*

TWO MILLION DOLLARS IN SIX WEEKS

(Continued from page 30)

larity of a waterproof covering for the feet and legs.

Sweater coats have played a prominent part in the recent purchases made. Many of these serviceable garments were secured from Canada last season, but for a time it appeared that supplies were being secured from other sources. Canadian manufacturers have no doubt been pleased that further orders have appeared. However, there has been some difficulty in getting orders filled to specifications and some stock lots have had to be picked up.

The varied nature of the campaign may be judged from orders which have been placed for snowshoes; in fact practically everything suitable and available for delivery within the period set has been picked up.

Box shooks are another item in which considerable business has recently developed. These shooks are, in the lay language, boxes knocked down; they are parts shipped flat to conserve space. Their special uses are not indicated and they are made to specification.

In food supplies cheese appears to be about the only commodity that has recently received much attention. Canada is a large producer of cheese and if prices are satisfactory orders in fair volume may be expected in season.

Efforts are being made to make satisfactory arrangements regarding canned meats and other Canadian canned products but so far nothing definite has been done and the negotiations are being continued.

TO CONDUCT CASH BUSINESS

(Continued from page 31.)

"With this purpose in mind we will, on the above date, change from a credit to a cash business. Now, what does this mean to you?

"It means that no longer will you be obliged to pay a percentage of the loss sustained from bad accounts — a burden which every credit store must necessarily impose on its customers.

"It means that the time and labor consumed in properly taking care of charge accounts, which is far greater than you imagine, will be used in bettering our service to you.

"It means better prices to you. Our money, instead of being tied up in book accounts, will be available, thus enabling us to pay for all goods promptly. This means better prices for us—and you, in turn, profit by our saving.

"We firmly believe that extensive credit business is one of the chief causes of the high cost of living; that's the reason we're making the change.

"The amount we save you will be measured by the amount of patronage you give us."

TOYLAND ATTRACTS KIDDIES

Ingram & Davey, St. Thomas, Ont., held the opening of Toyland on Monday last. It is estimated that during the first two days about one thousand children inspected the arrangement of toys on display.

The opening of Toyland has been an annual event with Ingram & Davey for the past few years. In former years a great many toys imported from Germany and Austria were shown. This year the toys are largely Canadian and American made.

The balloon table and the section devoted to electric and mechanical trains and other moving devices appear to attract the most attention.

All the electric trains are connected up with electricity, and demonstrations are frequently given. The firm intends, next year to use the entire second floor of the building for showing toys and other Christmas goods.

A great many hardware firms in various parts of Canada, have added toy departments during the past few years, and have met with exceptional success in pushing the sale of toys.

The toy line works in splendidly along with skates, sleighs, hockey supplies, sporting goods, etc.

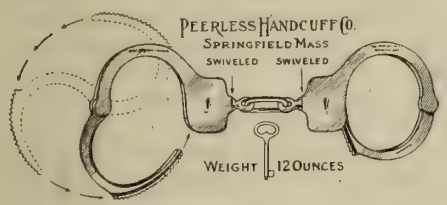
Display which won fourth prize ($10) *in the contest conducted by the Dominion Cartridge Co. The display was arranged by A. A. Letellier, of the Kingan Hardware Co., Peterboro, Ont. A list of all prize winners appeared in the November 27 issue of Hardware and Metal.*

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

PEERLESS HANDCUFFS

Peerless Handcuff Company, 47 Dwight Street, Springfield, Mass., offers to the trade the Peerless handcuff, here illustrated. The makers state that the Peerless handcuff positively cannot become locked in the pocket, and that it is light enough to be carried in the vest pocket, and sufficiently strong to meet all requirements. The Peerless handcuff is so made that the locking jaw can be continuously revolved unless stopped by



Peerless Handcuff.

a person's wrist. If it is closed by a person resisting arrest, it can be opened by the officer with one hand by pushing the jaw once around without the use of a key. (See dotted line on cut.)

The "Peerless" is self-locking when placed on a person's wrist; and can then be locked in a fixed position, if desired, by one complete turn of the key. The makers also state it is light in weight—12 ounces—and no burden to carry. It is simple, has no projecting shoulders and nothing to tear or rip the pocket.

NEW "RED DEVIL" GLASS CUTTER

Smith & Hemenway Co., Inc., of No. 191 Chambers St., New York City, have added a new glass cutter to their line of 40 styles of cutters, known as No. 3. This new cutter is of the magazine type, having three extra steel cutting wheels

Red Devil Glass Cutter No. 3.

in an airtight chamber in the removable handle behind the head, in addition to a wheel in the head. In all it has four wheels. A new wheel can be instantly put into place by removing a piece of wire in the head.

This cutter is fitted with genuine hand-honed cutting wheels, used for stripping plate, sheet or cathedral and rough glass. The makers state that it has a scientifically shaped handle with a small end a large finger rest which will not tire the hand. It has a polished head and a red enameled handle.

AUTOMOBILE SPECIALTIES

Van Cleef Brothers, Chicago, Ill., offer to the Canadian hardware trade a number of new products used by the automobile and cycle trades. The lines include radiator compound, auto puncture cement and rim coat.

The automobile rubber cement is said to be an exceptionally powerful cement for repair work, and is made to stand the severe strain to which automobile tires are subjected

Dutch brand radiator compound is claimed to be a sure seal for damaged or leaky radiators.

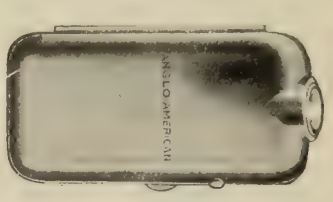
Dutch Brand rim coat is a preparation for coating auto and motorcycle rims. The makers state that it prevents the tire from sticking to the rim and permits of the easy removal of the tire.

SHOOTER'S CHRISTMAS BOX

E. I. Dupont de Memours & Company, Wilmington, Del., have recently produced a new Christmas gift line, in the form of a Dupont hand trap and 100 clay targets packed in a holiday box. In referring to the new line, the company states as follows:—"This makes a very pleasing present to a shooter or a novice. All that is necessary for a shoot after such a box is received is a friend and a shotgun, he to throw the targets while you shoot or vice versa.

FLAT FLASHLIGHT

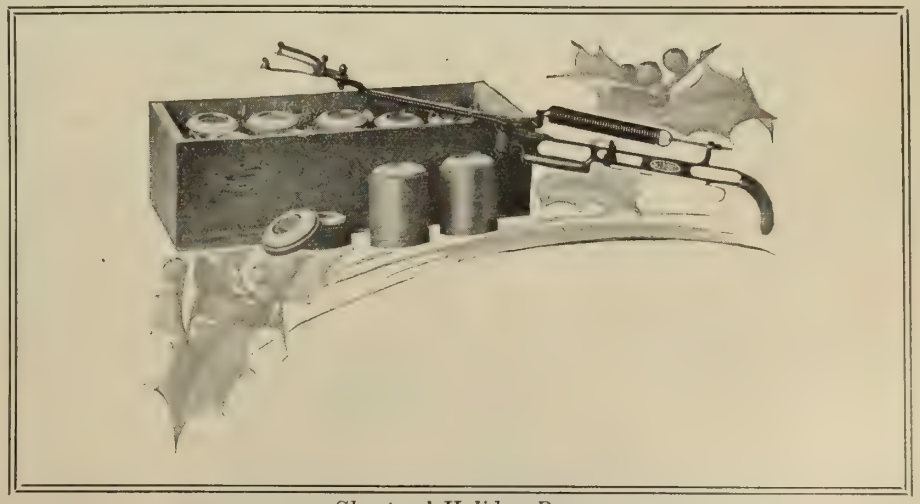
A new flat opening or cigarette case style of vest pocket flashlight is being introduced by Anglo-American Company of Pittsburgh, Pa. The makers state that these cases embody some distinctly new features in design of contact.



Anglo-American Flat Flashlight

They have a hinged case opening flat like a cigarette case, they are neat in design and highly finished and on account of having rounded corners without projections, they do not wear out the pockets. The flat opening feature, it is said, makes them a very convenient case on account of the ease in removing or replacing the batteries.

The Anglo-American Company states that one of the difficulties experienced with the old style flat nickel vest pocket flashlights was the difficulty which the user had in properly adjusting the contacts when the battery was placed in the case. All this trouble is eliminated with the flat opening case on account of the contact being open to plain view.



Shooters' Holiday Boxes

EVENTS IN THE TRADE

Business Changes

Bredenbury, Sask. — The hardware stock of the estate of P. S. Hall, has been sold to Cook Bros.

Personal

T. Sherman Rogers, K.C., Halifax, N. S., was recently elected a director of Brandram, Henderson.

Joins the Colors

N. M. Massey, who has travelled in Western Canada for some time past in the interests of Beatty Bros., Fergus, Ont., has enlisted for active service.

Fire Losses

Mitchell, Ont.—The hardware store and stock of McLean & Hawes was destroyed by fire, caused by an explosion in the basement of the store.

Hardware Burglarized

Chatham, Ont.—Burglars forced an entrance to the Willard Hardware. After an unsuccessful attempt to force the safe, they departed with some articles of silverware.

Wounded in Action

Edmonton, Alta.—Word has been received that Lieut. Frank Sommerville has been wounded in action in France. With his father he was identified for many years with the Sommerville Hardware Co., of this city.

Optimistic Regarding West

M. J. Beatty, of Beatty Bros., Fergus, Ont., recently returned from an extensive trip through Western Canada as far as Vancouver. Mr. Beatty is most optimistic about Western conditions, and states that the double crop is rapidly making itself felt.

Obituary

London, Ont.—The death occurred here, suddenly, of J. R. Clunis, traveller for James Cowan & Co., wholesale hardware merchants. Mr. Clunis was fifty years of age.

Saskatoon, Sask.—The death occurred here of John C. Gilpin, aged 87 years. Mr. Gilpin was formerly a hardware merchant at St. Mary's, Ont., having been in business in the latter place for forty-three years.

Toronto, Ont.—Death from an acute attack of blood poisoning came suddenly to William McFarlane, of the McFarlane Ladder Works, at the private patients' pavilion, Toronto General Hospital. The deceased was born in Toronto 39 years ago, and had spent practically his whole life here. With his two brothers, Vincent and Percy McFarlane, he controlled the McFarlane Ladder Works of this city.

Shell Committee Replaced by Imperial Munitions Board

The Dominion Shell Committee has been replaced by the Imperial Munitions Board. The head of the reconstructed board is J. W. Flavelle, Toronto, who will act as chairman, with executive and administrative powers. General Alex. Bertram, formerly head of the committee, will in future hold the position of deputy chairman. The other composing the board are: Hon. David Carnegie, a member of the former committee, and G. H. Dawson, Victoria, B.C.; C. B. Gordon, of the Dominion Textile Co.; J. A. Vaillancourt, president, Bank of Hochelaga; E. R. Wood, Toronto. The Imperial Munitions Board will be directly responsible to the British Ministry of Munitions.

In addition to the forming of the above new board, a commission has been established to make inquiry into the supply and sufficiency of raw materials in Canada required for the production of munitions of war, and as to the best methods of conserving the same. The following are the members of this new commission: Col. Thomas Cantley, head of the Nova Scotia Steel Co., of New Glasgow; E. Carnegie, of Welland, Geo. W. Watts of Toronto, Robert Hobson, of the Steel Co. of Canada, Hamilton, Senator William C. Edwards of Ottawa, and Geo. G. Mackenzie, B.Sc., Superintendent of Mines, Ottawa. Messrs. Cantley, Carnegie and Watts, were members of the former shell committee.

As a Result of the War New Industries Have Been Opened Up in Canada

The letter made public this week, from W. L. Hitchens, representing the British Ministry of Munitions, to the Prime Minister of Canada, gives some interesting data regarding the munition industry in Canada, and its effect in opening up a number of new industries.

Refining of Copper

Referring to the Shell Committee, Mr. Hitchens states as follows:—

"The committee has been instrumental in establishing subsidiary industries. Arrangements have been made for the refining of copper, which formerly went to the United States in the form of "matte" for refining purposes. A new plant for the refining of the metal in Canada will shortly be established.

Zinc, Brass, Explosives

"Similarly Canadian zinc ores, which contain about equal quantities of lead and zinc, have hitherto been shipped from Canada in the raw state. Owing to the demand created by the war orders and the encouragement of the Shell Committee the electric refining of zinc is now developed in Canada on a commercial scale, and this, together with the derivative industries connected therewith, will, there is good reason to believe, now be established on a permanent basis in Canada.

"Brass will also shortly be made in the country on a considerable scale.

"A great impetus has likewise been given to the manufacture of explosives; nitrocellulose powder, trinitrotoluol and sabulite are now being produced on a large scale and at moderate prices."

POSTAGE ON PARCELS GOING TO THE TROOPS IN FRANCE.

The Post Office Department is in receipt of applications to have parcels addressed to our soldiers in France sent free or at reduced rates of postage, there evidently being an impression that the Department has control of these rates and could do as it wished, but this is not so, as the question of postage is fixed by international agreement, so that it is not within the power of the Canadian Post Office Department to undertake to carry the parcels free or at a reduced rate of postage. Under International law, provision is made for the free transmission of parcels for prisoners of war, but this privilege does not extend to parcels for troops engaged in active service, nor is it within the power of the Department to so extend it.

The rate of postage required on parcels addressed to the troops depends upon the location of the addresses. If the address is in England, the rate on parcels for England applies, which is twelve cents per pound; whilst, if he is in France, the parcels are subject to the rates applicable to parcels for France, which are as follows:

1 lb.....32c	4 lbs.....64c	8 lbs.....$1.02
2 lbs.....40c	5 lbs.....72c	9 lbs..... 1.10
3 lbs.....48c	6 lbs.....80c	10 lbs..... 1.18
	7 lbs.....88c	11 lbs..... 1.26

These are exactly the same charges which existed for years between Canada, England and France, before the war, and are the result of an agreement or convention made between these countries and Canada, and as these countries have not agreed to lower their rates between England and France, Canada has to pay to them the same rates as before the war and must charge the same postage.

In all cases parcels for the troops must be addressed care of Army Post Office, London, England, but this does not in any way affect the rate of postage which depends entirely upon the location of the addressee.

HARDWARE LETTER BOX

Slate Roofing

A. L. Shiells, Kincardine, Ont.—Please let me know through Hardware and Metal where I can buy slate roofing.

Slate roofing is sold by the Roofers' Supply Co., Toronto, and the Canadian Roofing Mfg. Co., Windsor, Ont.—Ed.

Hose Reels

Subscriber (name on request).—Please give names of makers of wood and metal hose reels.

Wood reels are made by John Watson & Co., Ayr, Ont.; Millet & Freres, Lawrenceville, Que.; Atin Lumber & Mfg. Co., Monroeville, Ohio; Clearfield Woodware Co., Clearfield, Pa. Metal hose reels are made by McKinnon Dash Co., St. Catharine.—Ed.

Rubber Door Mats

R. A. Wells, Dresden, Ont.—Kindly give names of makers of rubber door mats.

Rubber door mats are made by Canadian Consolidated Rubber Co., Montreal and Toronto, and also by Gutta Percha & Rubber Mfg. Co., Toronto.—Editor.

Mail Boxes

A. E. Campbell, St. Thomas, Ont.—Please give names of firms making mail boxes for household use.

Mail boxes are made by the Standard Stamping Co., Marysville, O.; M-Vu Mfg. Co., Rochester, N.Y.; Chas. Weiland, 147 Chambers Street, New York, N.Y.; J. E. Beauchamp & Co., Montreal, Que.—Ed.

Casters

Manufacturer (name on request).—Please advise where we can obtain casters such as are used on chairs, etc.

Casters are made by Faultless Caster Co., Evansville, Ind.; M. B. Schenck & Co., Menden, Conn.; Universal Caster & Foundry Co., Newark, N.Y.; Schatz Mfg. Co., Poughkeepsie, N.Y.; Geo. P. Clark & Co., Windsor Locks, Conn.—Ed.

Trade Inquiries

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

1204. **Wire Netting.**—A hardware firm in Barbadoes desires to receive quotations for poultry netting, 1½-inch and 2-inch mesh; also catalogues of wire netting generally.

1205. **Electrical Supplies.**—A Russian company desires to enter into communication with first-class Canadian factories producing electrical machines and apparatus, insulating materials, steam and naphtha engines and water-turbines, with a view to becoming their agents in Russia.

1206. **Wire Rods, Nails, Bolts, Nuts, etc.**—A London company wishes to get into touch with Canadian manufacturers of wire rods, nails, bolts and nuts, and hob nails, who can fill orders for shipments to France.

1207. **Machinery for Making Lead Discs.**—A request has been received for the name of a Canadian manufacturer able to supply machinery for making lead discs such as are used for sealing bags of tobacco; also for sealing meat.

New Dealer Helps

Landers, Frary & Clark, New Britain, Conn., are distributing through their Canadian representatives, A. McFarlane & Co., Montreal, Que., a number of new and exceptionally attractive dealer helps in the form of booklets, window cut-outs, and catalogues. One exceptionally attractive booklet shows universal Christmas gifts. One hundred illustrations are shown of articles suitable for Christmas gifts. These booklets are for distribution by retailers and their customers.

Christmas Window Contest

FOR many years past it has been customary for Hardware and Metal to conduct a Christmas window display contest each year. The contest has become an event of wide interest for all Canadian retail hardwaremen interested in window trimming, and each succeeding competition has been keener and each year has seen a wider and more representative response culminating in the big success of last year.

In accordance with past custom, two contests will be conducted this year—one for stores in places under 5,000 population; the other for places of 5,000 and over. No restrictions will be set on the style of display or the goods used in the arrangement, except that each window must be arranged with goods for the Christmas trade.

Eight prizes will be offered as follows:—

PLACES OF 5,000 AND OVER

First Prize	$10.00
Second Prize	5.00
Third Prize	3.00
Fourth Prize	2.00

PLACES UNDER 5,000

First Prize	$10.00
Second Prize	5.00
Third Prize	3.00
Fourth Prize	2.00

Contestants will note that an equal number of prizes are offered to the small town window trimmer as to those in the larger towns and cities.

The contest closes on Friday, December 31. No photos received after that date will be entered unless there is proof that they have been delayed in transit.

All matter should be addressed to "The Editor, Hardware and Metal, 143-153 University Avenue, Toronto," and marked "For Christmas window contest."

ARE YOU GOING TO ENTER?

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

The Markets at a Glance

Many price changes of an important nature are given in detail in this week's market reports from buying centres. Among the many lines which have advanced since last week are bar iron, steel, sheet brass, tubing, lead sheets, boiler plates, cut nails, wire nails, hemp rope, galvanized sheets, candle wick, brooms and other lines. Further advances on many hardware lines will take place in the near future. November business made a splendid showing as compared with a year ago, and many retail and wholesale firms have shown splendid increases. During the past few weeks country business has been increasing in volume, in a very satisfactory manner. The demand for metals has improved to a considerable extent during the past two weeks.

Heating equipment is moving in a very satisfactory manner, but a real, cold snap would be greatly welcomed by the stove trade. Spring booking continues on a very satisfactory basis, and retailers, by their willingness to book early, are showing their confidence in the future, and also that they expect higher prices on many hardware lines next spring. Collections have shown considerable improvement of late.

MONTREAL

MONTREAL, Dec. 2.—There is no improvement in the outlook in the steel situation or in the conditions which have been created in the metals and hardware trades by the action of the big American mills in dropping out of the Canadian market. In fact the continued disinterestedness of the manufacturers and failures to consider propositions for supplies renders the situation more acute. At first it was believed that the withdrawal might only be a temporary one for the purpose of making readjustments, but the idea is growing that there is a grave possibility of a steel famine in Canada. The result is that advances on many lines are being made from time to time and such advances may be expected to continue in the event of relief being indefinitely deferred; as time passes the effect will become more and more broad throughout the manufacturing trades and upon the prices of manufactured goods. The crisis will not come for a few months owing to the fact that big consumers protect themselves for about six months, but it is taken as a bad sign that many buyers are placing their specifications with future orders indicating that they do not expect any change for the better in the meantime.

This week's advances include higher prices for bar iron; and mild, sleighshoe, reeled machinery, tire, toe calk, spring and hoop steel; sheet brass, brass tubing, lead sheets, boiler plates, boiler tubes, nails—wire and cut; shovels, galvanized sheets, hemp rope, tinned cutlery, candlewick, brooms, etc. The metals have been comparatively steady with the exception of a further advance in sheet zinc; tin, copper and antimony are very strong.

Higher prices are to be looked for on sheets, plates, pipe, wire, and similar products. Copper sheets may be expected to follow brass despite the fact that they are already high. Copper rivets are expected to be put on a higher list shortly. Some manufacturers have withdrawn prices on mechanical rubber supplies pending price readjustments.

Country business has been increasing in volume in a very satisfactory manner. November made a splendid showing as compared with a year ago and in the country things were better than normal. The demand is for general supplies, indicating that stocks are short and that dealers are buying with more confidence. The city continues dull and open weather has interfered with business in seasonable lines.

Tin Remains Steady.—Following the decline of ½c to 1c recorded last week, the Canadian tin market has withstood the violent reaction experienced in the United States as the result of the report of the closing of the Suez Canal and its subsequent denial. Thus, while New York suffered a decline of 5c, Montreal was little affected. The explanation for this is that, although both markets are on practically the same basis, Montreal is not so much influenced by market manipulation and sharp reactions usually check rising prices before they have reached the top, with the result that movements here are more sound in relation to the actual basic conditions. The present local situation is described as very firm with prospects of an advance; New York reports a dull market with a decline in London but a fractional net gain since last report. Interest in spot supplies is small but prices are firm, indications are that the manipulation has worked itself out, and that the market is now on a sound foundation. Montreal quotation: 45c-46c.

Spelter Slightly Easier.—Although the local quotation on spelter remains unchanged, there is slightly easier tendency in the situation, with New York showing a net fractional decline since last report. In the States there is only a small consuming demand at the present time. Sellers, more particularly the second hands, are becoming restless at the lack of buying which has been in evidence for the past week. The offerings of futures are particularly free and at the price recessions from the recent high levels. Montreal quotation: 22c-22½c.

Lead in Strong Position.—Lead is maintaining a strong position and there are certain indications that there may be an advance in the local market. New York reports that the foreign situation shows continued strength, but that the metal is being rather more freely offered by outside interests at the Trust equivalent; however, few new orders are being placed and the American market is generally quiet. Montreal quotation: 7¼c-7½c.

Copper Expected to Advance. — Although the local quotation for copper is unchanged since last writing, strength continues to develop with the prospect of higher prices in the near future. New York has recently developed a report to the effect that German interests are in the market for 150,000,000 to 200,000,000 pounds of copper for shipment at the close of the war, but this lacks confirmation. The American situation is generally quiet but very strong, supplies being booked further in advance than at any previous time in the history of the trade. Montreal quotation: 22½c.

Antimony is Strong.—Antimony appears to be in a strong position with possibilities of further advances in the near future. New York reports the position of the market as unchanged and quiet, with fractional advances since last report. Montreal quotation: 45c.

Aluminum Steady.—There is little change in the aluminum situation, although the fact that New York shows a fractional advance since last report indicates strength. The market is very narrow with a small domestic consumption owing to the abnormally high prices. Montreal quotation: 62c.

Solder Unchanged. — There is no

change in the solder situation, the market remaining comparatively steady owing to the high price of tin. Montreal quotations:

Half-and-half	26c-27c
Strictly	28c-29c

Steel Situation Acute.—There is no improvement in the steel situation. In fact, the continued attitude of the American mills in refusing orders for sheets, plates and other products renders the position of the market more acute daily. If this condition of affairs continues (and dealers have no prospects of replenishing present stocks) naturally the supplies now on hand will advance from time to time. The same state of affairs applies to the different varieties of iron and steel and, indirectly, to the great number of products of these metals. As will be noted from the price changes the effects are becoming steadily more widespread and this may be expected to continue. Further improvement in the domestic demand coupled with war orders, which have tied up many manufacturers, would be likely to result in a famine in many lines. So far as the main situation is concerned, much will depend upon the developments six months hence. Large consumers of steel are not yet actually affected by the advances, as they are protected on supplies for about half a year by forward bookings. Much will depend upon the position the mills find themselves in at that time. Manufacturers are protecting themselves by booking so far as possible, but the general system is not to fill specifications until supplies are actually required. However, evidence of the strength of the market is indicated that specifications are being fyled with many bookings, which would indicate that these buyers are looking for further advances rather than a decline.

Iron and Steel Advance.—Direct evidence of the advances in the steel market are to be found in the further increases made in bar iron and several varieties of steel. New prices are as follows:

	New price	Advance
Common bar iron	$2 35	15c
Mild steel	2 55	10c
Sleighshoe steel	2 55	10c
Reeled machinery steel	3 10	10c
Tire steel	2 65	10c
Toe calk steel	3 20	15c
Spring steel	3 10	10c

Sheet Brass Advances.—The advances in sheet brass which have been predicted for some time have finally gone into effect. There is a shortage of these products and deliveries are secured with difficulty. The new quotations are as follows:

	New price	Advance
Spring sheets, 8" wide up to 24 gauge	46c	1 c
Rods, base ½ to 1" round	44c	2 c
Tubing, seamless, base	44½c	2½c

The quotations on copper products are very firm with no concessions being offered; higher prices will be a natural development of the present situation.

Brass Tubing Higher.—There have also been advances on brass tubing. The brazed is now net list and the close joint 25 per cent. off. The solid quarter-inch rod is quoted at 4c per foot, net.

Lead Products Higher.—Following the recent advances in the lead market, lead products have been affected and advances on sheets have been made. The new quotations follow:

	New price	Advance
Sheets, 3 lb. square foot	$9 00	75c
Sheets, 3½ lb. square foot	8 75	75c
Sheets, 4 to 6 lbs. sq. ft.	8 75	1 00

Boiler Plates Advance.—The predicted advance in the prices on boiler plates has been made. This is the direct effect of the developments in the steel market; the quotations are firm on the advance. New prices follow:

	New price	Advance
Plates, ¼ to ½ inch	$2 75	40c
Heads, per 100 lbs.	3 00	40c
Tank plates	2 85	25c

Boiler Tubes Also.—As previously reported, there is also a readjustment on boiler tubes to higher levels. However, the new figures are delayed and have not yet been generally made public.

Zinc Still Advancing.—The advance in the market for sheet zinc continues and the increase of 3c last week is followed by another of 2½c this week. The quotations now are: 5-cwt. casks, 27½c; part cask, 28c.

Nails Take Another Jump.—An important development of the week is another advance in wire nails which follows the recent developments in the wire market. The increase is 10c and raises the quotation to $2.80.

Cut Nails Also.—There has also been an important advance in the price on cut nails, the change being the first which has occurred with regard to this variety of nails for many months. The price has been increased from $2.50 to $2.70.

Wire Products All Firm.—Fence and hay wire, staples, and other wire products are all firm on the advances made during the past few weeks and the indications are that there will rather be further increases than declines if the steel market remains in its present position. The future for wire products is very uncertain. The base for smooth wire is $2.85; hay wire, No. 13, is $2.90.

The Advance on Shovels.—The advance on all lines of shovels referred to last week has gone into effect and the discounts have all been readjusted. The increase is about 10 per cent. all round and the new allowances will be found in the current market quotations.

Black Sheets Going Up.—Despite the recent advances which have been made in black sheets, the prediction is made in the trade that there will be still higher prices if there is no relief from the present situation, which is that it is practically impossible to get future supplies. The present quotations follow: 10 gauge, $3; 12 gauge, $3.05; 14 gauge, $2.95; 16 gauge, $2.85; 18-20 gauge, $3; 22-24 gauge, $3.10; 26 gauge, $3.15; 28 gauge, $3.30.

Galvanized Sheets Strong.—The indications are that still higher prices will be put into effect on galvanized sheets in the near future if there is not some easing off in spelter or some relief from the shortage of steel plates. A number of readjustments are made in the quotations. The new prices follow, case basis:

Queen's Head.—16-20 gauge, $5.40; 22-24 gauge, $5.50; 26 gauge, $5.75; 28 gauge, $6.

Colborne Crown.—16-20 gauge, $4.80; 22-24 gauge, $5; 26 gauge, $5.25; 28 gauge, $5.50.

Apollo.—14 gauge, $4.40; 16 gauge, $4.40; 18-20 gauge, $4.60; 22-24 gauge, $4.70; 26 gauge, $4.80; 28 gauge, $5.30; 10¾ oz., $5.50.

Pipe is Strong.—Pipe continues very strong, despite the recent advances, and there are indications that prices will go still higher if there is not more definite assurance given as to future supplies.

Shoefinders' List.—The new list on shoe tacks and other findings is still being considered by the wholesalers. The dealers do not think the change to list prices is going to work smoothly and it is stated that the matter will be taken up with the mills. In the event of the new arrangement being sustained, it is possible that the wholesalers will pay the increased prices and maintain the old discounts for the trade. In the meantime the situation is very unsettled.

Copper Rivets May Go Up.—There is a report in the trade that an advance is to be made almost immediately in copper rivets following the increases in copper wire. No official confirmation of this report is to be had but it appears to be based upon logical market tendencies.

Hemp Rope Advances.—Some of the local houses are quoting higher prices on hemp rope products. The advance is 1c on the following lines: Hemp tarred rope, 25c; untarred rope, 29c; marlin, 27c; yacht marline, 34c; Indian halyards, 18c; deep-sea line halyards, 29c.

Mason's Cord Higher.—The advances on mason's cord have been advanced. Number 27 and number 45 are quoted at 37c, which is an advance from 33c.

Mechanical Rubber.—There have recently been important developments in the raw rubber market with the result that there will be material advances on practically all lines of mechanical rubber supplies. Some of the big manufacturers have withdrawn their prices for the time being.

Set and Cap Screws.—As the result of some of the manufacturers being tied up on war contracts, there has recently been a shortage of some sizes of set and cap screws. This is only one example of what may be expected to develop in many lines in the event of there being a marked improvement in normal demand when makers are working on Government orders.

Tinned Cutlery Higher.—There is a general advance on tinned cutlery, Number 900, which is generaly known to the trade. New prices, per gross, are as follows: teaspoons, $1.75; dessert spoons, $3.35; table spoons, $3.50; dessert forks, $3.95; table forks, $4.30.

Old Materials.—There have been further advances on the prices offered for old materials, this market stiffening in sympathy with the situation in virgin metals. The present prices are:

Tea lead, pack, 4¼c lb.; tea lead, chest, 4¼c lb.; lead (heavy) pipe, etc., 5¼c lb.; brass, heavy, 11½c lb.; brass, light, 9½c lb.; zinc, heavy, 13½c lb.; copper, heavy, 16¼c lb.; old cast iron, $12 per ton; wrought iron, No. 1, $10 per ton; wrought iron, No. 2, $8 per

ton; stove plate, $8.50 per ton; mach. compos., No. 1, 12c lb.; compos. turnings, No. 1, 11c lb.

Candle Wick; Brooms.—Some of the wholesale houses have advanced their prices on candle wick and brooms. The former is now quoted at 26c, being an increase of 3c, and the latter are up 15c.

Cutlery Shortage.—The shortage in cutlery is growing steadily more acute and on some lines the shortage is getting serious. Dealers are beginning to appreciate that it is going to be extremely difficult to supply continued demands if there is not some relief in the immediate future. Deliveries from England are being constantly delayed through the makers being busy on supplying munitions.

Electrical Utilities.—Domestic electrical appliances are coming in for a strong demand and the indications are that they are going to be very popular in the Christmas trade this season.

Ammunition.—So far as the hunting season is concerned, the orders for ammunition now being received are just the fag ends and are largely for high-power metallics. It is noted that there is a continued good demand for small shells for gallery practice.

Mechanics' Tools.—The demand for tools for use in the mechanical lines continues to improve, indicating that the field of operations on munition orders is being steadily broadened. The wholesalers report that they have been doing a very satisfactory business in this department.

Seasonable Goods.—The recent cold snap has caused a much brisker demand for skates and hockey sticks and pucks. In the city seasonable lines are moving slowly. People seem to be buying only what they need and there is small interest in snow shovels and kindred lines when the weather is unseasonably warm.

Hoop Steel.—Some wholesalers announce a further advance of 25c all round on the different varieties of hoop steel. This is the second 25c advance which has been made in a short time.

TORONTO

TORONTO, Ont., Dec. 2.—Conditions in the hardware market continue to steadily improve, and a more optimistic feeling prevails in the trade with regard to the future outlook. Money is circulating more freely, railway earnings are increasing and the volume of business is growing, notwithstanding a steady advance in prices of many lines.

Indications point to a shortage in many lines of hardware when spring opens up, and for this reason retail merchants will be well advised to keep stocks well assorted. There is also a probability of higher prices on many lines in the near future, which should help to stimulate business.

Seasonable lines are moving more freely, now that the weather is colder, and the demand is improving for those lines required for the Christmas trade. There is a good demand for stoves and heaters, which would be further stimulated by a spell of colder weather. Shelf lines are moving out nicely, especially in the country districts.

Important Changes.—A number of important price changes have been made this week, and the tendency continues in an upward direction for many lines. The strength in the market is due almost entirely to conditions in the iron and steel trade, where prices are very firm and higher for some products. The ingot metal market is also very firm, and is consequently affecting certain hardware lines. Canadian manufacturers of poultry netting have withdrawn their prices, which indicates an advance in the near future. Black sheets, galvanized sheets, "Apollo" and "Premier" brands have advanced. Snow shovels, "Stewart" horse clippers, curry combs, cut nails, hemp rope and zinc sheets have also advanced.

Munitions.—An interesting development affecting the shell industry is the announcement that plans are being worked out for extending the scope of the Munitions Committee to include the distribution of orders for shells from all the Allies. Another interesting feature is a proposal for Canadian banks to assist factories in financing orders for shells. An arrangement such as this will permit of larger orders being handled and greatly simplify the financial aspect of the business. Hitherto all payments have been made in British funds. No very definite information is available with regard to the 8-in. and 9.2-in. shells, but it is understood that orders for 60-pdr. and 6-in. shells are being placed first.

WIN THIS PRIZE

An important announcement appeared on page 29 of last week's issue of Hardware and Metal. A special cash prize of $15, or a watch of equal value is offered to the window trimmer who dresses the best window with goods which were advertised in last week's issue of Hardware and Metal, or the products of firms whose advertisements appeared in that issue. This is not connected with the annual window display contest announced in this issue. It is a special prize, and is offered in addition to the eight cash prizes offered in the annual contest. Any window dressed with goods advertised in last week's issue can be entered in both contests if desired.

Iron and Steel.—The market continues very active, and prices are holding very firm, with a decided upward tendency. The demand for steel, principalv for shells, is on the increase, and mills are getting behind on deliveries, notwithstanding plant extensions which have been made to cope with the business. Steel bars are firm at 2.75c, and iron bars are unchanged at 2.50c, but an advance is looked for in the near future.

In the States there is no cessation in the demand, which on nearly all lines of steel products is beyond the capacity of the mills to supply. The majority of steel companies have sold their output for the first quarter of 1916, and have inquiries extending into the second quarter.

Pig Iron.—The market is very active, and prices of domestic brands of pig iron have again been advanced; Hamilton and Victoria brands are $1.25 higher than last week, and are now quoted at $23 per ton. Grey forge, Pittsburgh, has advanced, and is quoted at $16.45. There is a heavy demand for steel-making grades of iron, but foundry iron is less active.

Old Materials.—Conditions in the market for old materials are much the same as last week, and prices are practically unchanged, although firmer for some scraps. Copper and zinc scrap are both very firm, and have a higher tendency. Heavy melting steel is strong, but No. 1 wrought iron is weaker, and is now quoted at $9. Copper and heavy melting steel are in good demand, but other lines are quiet.

Machine Tools.—Business has been fairly good in machine tools this week, but it is expected that there will be heavier demand later when the large orders contemplated are placed. A number of orders for machinery for the 6-in. and 60-pdr. shells have been booked, but nothing has been done as yet with regard to equipment for the large shells. There is a good demand for second-hand tools, but these are getting somewhat scarce. Prices are still high and deliveries do not show much improvement.

Metals.—The situation in the metal market shows no appreciable change from last week, and the demand has improved. Copper continues strong, and has advanced slightly. The tin market has reacted, and is lower, following a decline in London. The spelter market is quiet and unchanged. Zinc ore is very high, being quoted $100 to $115 at Joplin, Mo. The lead market is very strong both in London and New York. The antimony market is strong and scarcity of supplies is being felt. Aluminum is also scarce and quotations are nominal.

Tin.—The market is dull and featureless, with prices lower. There continues to be little interest shown by buyers for any deliveries; at the same time, sellers are inclined to be indifferent. Tin has declined 2c, and is being quoted at 46c per pound.

Copper.—The market is strong and higher, and the position of copper is a decidedly strong one. Consumption is increasing, and is, if anything, in excess of the current output. Lake copper is now quoted at 20¾c, and electrolytic at 20½c per pound.

Spelter.—The market advanced in London, but this did not stimulate the New York market. The situation is practically unchanged, and indications point to higher prices rather than otherwise. Spelter is unchanged at 21c per pound.

Lead.—Both London and New York markets are very strong. The "Trust" price of 5.25c New York is being firmly held, with a possibility of an advance.

Lead is unchanged locally at 7c per pound.

Antimony.—The market is in a stronger position than it has been, and is feeling the full effects of the scarcity of supplies. Quotations locally are firm, but unchanged at 40c per pound.

Aluminum.—There is no improvement in the situation with regard to supplies, which are very difficult to obtain. Quotations are nominal at 65c per pound.

Solders.—No change has been made in solders, although prices continue firm, notwithstanding the decline in the tin market recently.

Poultry Netting Quotations Withdrawn.—The increase in cost of raw materials is affecting netting. On this account Canadian manufacturers of netting have withdrawn prices, which indicates an advance in the near future. English netting is practically unobtainable on account of the war, as English makers are unable to get sufficient labor to operate their plants.

Galvanized Sheets Higher.—Higher prices for galvanized sheets were predicted in these columns last week as being the only logical result of conditions in the trade. Black sheets are higher and becoming difficult to obtain on account of the scarcity of steel. Spelter is being maintained at a level too high to be attractive to the makers of sheets, while in addition there is a shortage of sulphuric acid, which has also risen in price. Apollo galvanized sheets have advanced 50c per 100 lbs., 10¾ ozs. being now quoted at $5.50 per 100 lbs. Premier sheets have also advanced, No. 28 being quoted at $5.50 per 100 lbs.

Black Sheets Advance.—Prices of black sheets have advanced as a result of the scarcity and increase in cost of raw materials. An advance of 50c per 100 lbs. has been made, No. 28 gauge being now quoted at $3.25 per 100 lbs.

Hemp Rope Advances.—Conditions in the raw material market have for some time been such that Hardware and Metal has been predicting higher prices for rope. The increase in cost of hemp has forced the manufacturers to raise their prices of hemp rope, which are given on page 46, and are about 1c per lb. higher than previous list. Sisal and Manila are unchanged for the present, although in this case there is no improvement in the situation as regards raw material, and higher prices for sisal and Manila rope are a possible outcome.

Snow Shovels Advance.—Snow shovels manufactured by the D. F. Jones Mfg. Co., the Canadian Shovel and Tool Co., and George Wolf & Sons, have advanced, and are now being quoted at a discount of 30 per cent.

Horse Clippers.—The "Stewart" horse clippers and parts thereof have advanced, and are now being quoted at discount of 25 per cent. from the revised list. Curry combs have advanced 10 per cent.

Wire Nails.—Cut nails have advanced 20c, and are now being quoted at $2.90 per keg. Wire nails are very firm, but unchanged at $2.75 per keg.

Wire.—Prices of wire products are all very firm, but unchanged. Prices of galvanized wire are still withdrawn. Smooth steel wire is unchanged at $2.85 base.

Kitchen Utensils.—Prices of all lines of ware are very firm and higher prices are quite possible in the near future. Raw materials continue to advance, and makers of copper, tin, and galvanized ware may be obliged to revise their lists. Business continues good in the country districts.

Stoves. — The cooler weather has stimulated business, and stoves and heaters are moving more freely.

Wrought Iron and Lead Pipe.—Prices on both lines are very firm, and in either case an advance is probable. Lead pipe is quoted at 9½c and waste pipe at 10½c per pound.

LONDON

LONDON, Ont., Dec. 2.—The steady improvement in business continues, and nearly all branches of the trade report that business during November was ahead of the corresponding month of last year. Christmas goods are moving splendidly, and other seasonable lines are in good demand.

Prices on most hardware lines are very firm. There has been an advance of 1c per pound on certain lines of hemp goods.

The many price changes announced in Hardware and Metal last week are now in effect. Cut nails are slated for an advance in the near future. It is expected that poultry netting will go higher in the near future.

Many other lines are very firm. A scarcity of many lines of steel goods will be felt next spring.

WEEKLY PAINT DEPARTMENT

"No Women Allowed in This Store"

Successful Dealer Who Has Always Run a Man's Store, and Says He Can't be Bothered With Women, is Unconsciously Setting Traps to Catch Them at Every Turn

By ROBERT O. LAWSON

WE were standing in his store, an immense place which he had just completed—one of the largest hardware stores in Ontario. I had been admiring the elaborate show cases, the displays, the wonderful sweep of the building which had hardly a single pillar to obscure the vision, and now we had retired to a far corner, where were located one or two display tables, on which were shown, rather perfunctorily, I thought, a number of household goods. Now, I am a bit dippy on the question of display tables. In my opinion they are among the most important innovations of the past half century. I have seen so many hardware stores rejuvenate themselves by installing racks, they receive my blessing whenever we meet. So that in this particular store I was disappointed to find them hidden in a corner where the light was bad, and to find the utensils displayed upon them as though they did not matter. And I said so.

What the hardware merchant said to me in reply is one of the most astounding things I have heard from the mouth of a successful business man in a long, long, time.

Don't Want Women

"We don't want women in this store," is what he said.

Something in the way he said it caused me to laugh. "Why don't you put a ticket up at the entrance like they do in grocery stores for dogs?" I asked. "'No women allowed in here.'" Just then, the latch of the door clicked. "Hist," I said, bending low, and peeping behind some fixtures. "Look what's blown in!" The merchant took a peep as well. It was a woman, who had wandered over to a display of electrical specialties.

"Oh, they will come in," he remarked. There was another click of the latch. "Look," he said, "there's a whole carload of them now."

There is something pathetic, I think, about a group of women at a machinery exhibition. They always seem so interested, yet are longing to get outside into the fresh air. They are as much out of place as a bunch of men at a suffragette meeting. These women looked something like that. The strange thing was that the store was laid out to receive them. The show cases were trimmed to tempt the women. The very silent salesman at the door was enough to bring them in. Yet, this was a man's store; it had catered to men for decades. There was no effeminacy about their salesmen; they were trained to sell a screw jack rather than a frying pan.

Setting the Bait

But it was a new store, and the proprietor in his effort to make it up-to-date had introduced methods that attract women. It was one of the strangest anomalies ever known in the hardware business—a man trying to make his store look modern, and unconsciously setting his bait to catch women, whom he did not want.

I button-holed him. "Sir," I said, "this is the strangest thing I have heard in a long time. Will you kindly tell me why you don't want women in your store?"

"No," he said, holding up his hands in a prayerful attitude, "this is not for publication."

I assured him that his confidence would be respected. Then he said:

The Man's Man's Creed

"It takes ten minutes to serve a woman, whereas three minutes will do for a man. I have found that out by actual observation. If we did the same trade with women as we do with men, it would be necessary to engage three more clerks. It takes us all our time to handle our men's trade. Of course, we get a few women in the store but, candidly, we'd rather not have them.

"The lines we carry have always had a masculine atmosphere. We've made a specialty of the man's trade. Take electrical, plumbing and blacksmiths' supplies—our big lines—there's nothing suggestive of the woman about these. I tell you it takes a woman ten minutes to buy a fifty-cent pot, whereas a man will spend ten dollars in the same time."

All this grieved me deeply, and I could not help but glance across the store at the women, wandering like lost sheep from show case to show case, just aching to buy some of the nice things contained therein.

Changing the Topic

The subject was irksome to him, I could see, so we discussed horse blankets, fencing, automobile accessories, and paint. And it was paint that gave him away.

"You know," said he, "when I talk paint, I talk kalsomine, and that leads me to suggest the new flat tones which are being used so extensively. That leads to a discussion of wall paper, and we've heard so much about wall paper in the past two or three months, and so many people have asked us why we don't stock it, we have decided to give it a trial. The opening order has been placed for $2,000 worth, and we expect this new department to be in full swing inside of a couple of weeks.

How Stock Will be Carried

"I'll tell you how we are going to handle it. The stock will be carried upstairs, and everything will be sold from samples. No customer will be allowed to touch the rolls, or in fact to enter the the department. When you go into the wall paper department of the big Toronto department stores, you never buy from the roll. You never see the rolls. You buy from sample. That's how we're going to do it—have a neat stand on the ground floor, with a nice sample book."

Back to the Woman

"Who is it that selects the wall paper in the final analysis?" I asked.

"In the what?" he asked, balking at my fancy expression. There was an uncomfortable look on his face, for he knew we were coming back to the eternal question, "What about the woman?"

He had to 'fess up, but he didn't do it at all gallantly.

"Well," he said, "I guess we'll have to put up with them if we are going to sell any wall paper."

Falling-Out Bristles Mean Dropping Off of Trade

BOECKH TRADE MARK EST'D 1856 TORONTO

TORONTO PAINT MARKET

(Continued from page 48.)

the market, so dealers are obliged to advance prices.

Putty.—The market is firm and fair business is reported. Whiting is scarce and oil high; prices of putty, therefore, are very firm. The following prices for standard putty in less than ton lots are quoted in Toronto:

	Per 100 lbs.
Bulk, in casks	$2.50
Bulk, in 100-lb. drums	2.70
Bulk, in 25-lb drums	2.80
Bladders, in barrels	3.10

Pure putty, 60c per 100 lbs. advance.

LONDON MARKETS

(Continued from page 43.)

The new shoe finding list is shown in a panel this issue.

Advance in Hemp.—An advance of 1c per pound has taken place on certain lines of hemp, and the prices are now on the following basis, with the usual advances on account of size: Tarred rope, 5/8 in. diameter and larger (ratlwine spunyarn), 25c; tarred bolt rope, 5/8 in. dia. and larger; hawsers and lanyards, 27c; tarred marline, houseline and Hambroline, 27c; tarred yacht marline, 34c; untarred rope, 5/8 in. dia. and larger, 29c; halyards, deep sea line, 5/8 in. dia. and larger, 29c; Indian halyards, 5/8 in. dia. and larger, 18c; beaver halyards (white polished), 5/8 in dia. and larger, 21c.

Other lines of rope remain unchanged, and are shown in current market quotations.

Spades and Shovels.—The discounts now being quoted on shovels and spades are as follows:—1sts, 50-10 per cent.; 2nds, 50 per cent.; 4ths, 40 per cent.. Draining tools—1sts, 50-10 per cent.; 2nds, 50-10 per cent.; Jones scoops, socket, 40-12½ per cent.; hollow-back scoops (black cat), 40-5 per cent.

Nails, Wire, etc.—Wire nails are very firm at the recent advanced price of $2.75 base. Cut nails are still quoted at $2.70 base, but an advance is expected almost immediately.

O and A wire is quoted as follows:—No. 10, $3.01 per 100 lbs.; No. 11, $3.07 per 100 lbs.; No. 12, $3.07 per 100 lbs.; No. 13, $3.15 per 100 lbs.; No. 14, hay-baling wire, is quoted at $3.10 per 100 lbs.

Fence staples are quoted as follows:—Galvanized, 100-lb. kegs, $3.95; 25-lb. boxes, $4.20 per 100 lbs.; bright in 100-lb. kegs, $3.10 per 100 lbs.; 25-lb. boxes, $3.35 per 100 lbs.

Fence hooks, galvanized, are quoted in 100-lb. kegs at $3.95 per 100 lbs.; 25-lb. boxes, $4.20 per 100 lbs.

Other lines are quoted as follows:—Barb wire, $3.30 per 100 lbs.; No. 9 galvanized, $3.00 per 100 lbs.; No. 12 galvanized, $3.15 per 100 lbs.; No. 13, $3.25 per 100 lbs.; No. 9, coil spring, $3.05 per 100 lbs.

Lead Oils, Paints, etc.—Pure white lead is in fair demand at $10.20 per 100 lbs. in ton lots, and $10.50 per 100 lbs. in less than ton lots.

Linseed oil is firm and unchanged, and quoted as follows:—Boiled, 1 to 2 barrels, 88c per gal.; 3 to 5 barrels, 87c per gal.; 6 to 9 barrels, 85c per gal.

Raw linseed oil is quoted in 1 to 2-barrel lots at 85c per gal.; 2 to 4-barrels, 84c per gal.; 6 to 9 barrels, 82c per gal.

Turpentine remains at 85c per Imp. gal. in single barrel lots; 84c per gal. in 2 to 4 barrel lots; 92c per gal. in 5-gal. lots.

Cut Nails Advance.—Since the above report was written word has been received that the expected advance in cut nails has taken place, and the London price is now $2.95 base.

WINNIPEG

WINNIPEG, Dec. 2.—Business continues to be very good, and it would now appear that the result of the year's activity will result in a splendid total from the jobbers' point of view. Added to this is the fact that collections are coming in very freely, and there seems to be an abundance of money throughout the country. The writer read an article in one of the local papers, which stated that one mail order concern in Winnipeg had taken in over $100,000 in one day. This seems to indicate that the local merchant is not pushing the sales of his lines as energetically as he might. There is, of course, one thing all merchants should do, and that is see that all customers owing accounts make payment of same before sending their money to the mail order houses. An aggressive collecting campaign has been urged, and from recent reports it would seem that some merchants are taking care of their accounts carefully.

Other reports indicate that the merchant is sitting back and waiting for his accounts to be paid instead of taking steps to insure such measures. When times are bright, it is always easy to sell merchandise, and sufficient collections are usually made to tide the merchant along. When, however, conditions are the reverse, it is essential that each merchant have security in some form or other so that he can continue in business.

Booking Orders Placed.—The prices noted last week seem to have given the merchants a little more confidence, and booking orders for barbed wire and nails for specified prices are already being placed quite freely. There are several additional changes to note this week. A note of same is made herewith, and it will be seen that some lines of wire are again affected.

Bolts Advance.—Following the advances in bolts and nuts in the East, recently recorded in Hardware and Metal, Western jobbers have revised their prices to the scale shown in Winnipeg current quotations.

Annealed Wire Advances.—Annealed wire has taken another advance of 10c per 100 lbs.

Seasonable Lines.—Seasonable lines continue to move freely, and orders for skates, snow shoes, skis, toboggans and hockey supplies are being shipped. There is also a splendid demand for Christmas cutlery and novelties, and jobbers are having some difficulty in filling orders complete. Unusual conditions have made this a problem for the jobbers this year, but from impartial sources we learn that they have handled the situation extremely well, and very few delays or cancellations have been made.

EDMONTON

EDMONTON, Alta., Dec. 1.—Business in the city has been stimulated to some extent by the return of harvest hands and threshers' help who have just completed a busy season in the surrounding district. A good number of soldiers, too, who have returned here for the winter with the various battalions have found it necessary to set up homes necessitating the buying of stoves, furniture and other household effects. Homesteaders are also outfitting and taking advantage of the easy transportation over the frozen snow to their different locations, in most cases, many miles from a railroad.

The big game shooting season is now open and will continue until the middle of December. This includes deer, moose and caribou.

The citizens of Edmonton have approved of the agreement presented by the Hydro-Electric Co., in which the company proposes supplying power at a cheaper rate than that at which the city can generate electricity at its own plant. The agreement provides for an expenditure of over seven million dollars including power house and other buildings, dam across the North Saskatchewan river, seventy miles of electric railway, transmission line and a sub-station in the city. The proposed railway will open up new territory to the south-west where there are at present no transportation facilities. The cheaper power, it is calculated, will attract manufacturing concerns to this district, besides helping to develop local industries in coal, cement, lumber, etc.

The Edmonton, Dunvegan & British Columbia Railway Co. have announced that steel has been laid on the new road as far as the Smoky River, a distance of three hundred miles north-west of Edmonton. Freight will be accepted to that point while construction work is being pushed further west. On the Central Railway the steel head is at Reno, and shipments will be handled that far.

A schedule of stations on the Alberta & Great Waterways Railway has also been issued for the guidance of shippers. Construction work has been completed for a distance of one hundred and fifty miles north of Edmonton. The new portion of the Canadian Northern railway between here and Vancouver was opened for passenger traffic this week.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Dec. 2.—The continued upward movement of linseed oil on a very unsettled market and the narrowing of quotations on turpentine towards the top of the price range, are factors of the week which add strength to an already strong situation in regard to ready-mixed lines. As has been previously explained, the rising cost of the raw materials referred to, together with last week's increase in lead and the continued high position of zinc, is having the effect of creating a serious problem as to the maintenance of the present prices to the trade. There have been serious discussions of the subject in manufacturing circles. Some of the makers are for an immediate advance to a level in keeping with the cost of production, but so far the majority ruling has been in favor of maintaining the present basis rather than to disturb the market by making another increase. However, it is doubtful as to how long the present attitude can be maintained if there is not some relief—and there are no indications of any easiness in the immediate future.

Considering the prevailing conditions of uncertainty, November has made a satisfactory showing so far as business is concerned, and the booking for spring orders is a marked improvement over a year ago. The indications are that the trade is realizing that the present situation is a strong one and are booking conservatively. However, it is natural that there should be some hesitancy, backed by the hope of a break in the situation in the next few months. Such a development is of course possible as the present prices are abnormal, but the continued advances would rather indicate that the changes will be in the opposite direction.

Linseed Oil Rising.—During the week linseed oil has again advanced a couple of points in the cost of production. The development so far as the trade is concerned has resulted not so much in a general increase as the development of a more than usually wide spread as between the quotations of different jobbers. The movement of oil is not heavy and in the competition for business there is much price-cutting as between firms taking the actual market as a price basis and those with stocks of cheap oil on hand which they are willing to let go at a small profit. A week ago the high quotation on a single barrel basis was 84c and 87c for raw and boiled, respectively. This has been advanced 3c to 87c and 90c. At the same time some jobbers have not changed their prices and one quotation as low as 79c and 82c is still heard. However, such figures as the latter must be considered as subject to early change. Between the outside points in this wide range there are several intermediary quotations.

Turpentine Firmer.—The situation in turpentine is firmer and steadier. A week ago it was pointed out that one jobber was maintaining an old quotation of 75c, although the market was normally above 80c. At present the latter is the lowest quotation heard and the several other figures given are between 80c and 83c. The improvement warrants the following base quotations:

1 barrel lots	80c	83c
2 to 4 barrels	79c	82c

White Lead Steady.—White lead is firm and steady on the last advance. Primary markets have recently been quiet so far as the metal is concerned, but prices have been very firm and additional strength is to be found in the linseed oil situation. Present basis $10.05. with 30c added for less than ton lots.

Gasoline and Benzine.—With the close of navigation this week there will be less activity in gasoline and benzine for the time being. Dealers report a normal autumn movement to the outside districts. Prices are without change, as follows:

Gasoline, in wood	24c
Gasoline, in drums	21½c
Gasoline, tank wagon	20½c

Benzine, 1c lower.

TORONTO

TORONTO, Ont., Dec. 2.—The general situation in the paint trade is unchanged. The cooler weather has restricted painting operations but, on the whole, conditions are about normal. Prices continue very firm, but there are no changes of any importance to note. White lead is firm at the recent advance. There is no change in mixed paints, but higher prices are looked for. The linseed oil situation is uncertain owing to recent developments as regards shipping facilities. The oil market is very firm as is also turpentine. Gasoline and benzine are firm but unchanged. The oil situation is unchanged, and supplies of gasoline are scarce. Collections are improving and money moving rather more freely.

Linseed Oil.—Prices are unchanged but firm. The flaxseed market in Winnipeg is erratic and a considerable quantity of seed has still to come from the farmers, a small percentage having up to date left the farmers' hands. The market is somewhat disturbed over the recent commandeering of shipping on the Great Lakes owing to the possibility of flaxseed shipments being held back until all the wheat required by the Government has been moved down east. This means that all the flaxseed will have to be shipped by rail, but even then may be held up owing to wheat being given the preference. It is too early to say refinitely how this new development will affect the market, but as the larger crushers will no doubt have sufficient seed to carry them over, the results may not be very serious. All indications, however, point to a very firm market and possible higher prices. Stocks of oil in the hands of the jobbers are light, but the demand is also light. Oil is being quoted at practically the same range as last week and the following is a fair average locally:

	Raw	Boiled
1 to 2 barrels	85c	88c per gal.
3 to 5 barrels	84c	87c per gal.
6 to 9 barrels	82c	81c per gal.

10 barrels and over, open.

Turpentine.—The local market is stationary, but is very firm. The market at Savannah is firm with a higher tendency. There is not much turpentine left in the woods in the South, and as no gum is now running to produce from until March, stocks will get low and prices may as a result advance. The market is bare locally and demand light. The following prices are being quoted in Toronto: 1-barrel lots, 85c; 2 to 4 barrel lots, 84c, and 5-gal. lots, 92c per Imperial gallon.

White Lead.—There is a fair demand for white lead and prices are very firm. It is difficult to say what may develop in this market but the continued strength of pig lead and probability of higher prices may eventually affect white lead.

Mixed Paints.—Prices are unchanged, but as an advance is expected in the near future, all raw materials have advanced since the paint schedule was last changed, and higher prices for mixed paints would be the logical result of conditions at present prevailing.

Whiting.—This material is getting scarce and the high ocean freight rates have added considerably to the cost of importing whiting. Prices are very firm but unchanged.

Gasoline and Benzine.—The market is very firm and the situation shows no improvement. Gasoline is quoted at 25½c and benzine at 25c per gallon.

Glass.—There is no change in the situation and the proposed price list now under consideration has not been adopted yet. The margin of profit is so very fine that dealers are disposed to get away from the list, especially for some sizes. The cheap glass is practically off

(Continued on page 46.)

The Paint of NO REGRETS

Dealers find that the quality of Ramsay's Paints brings the repeat business that spells **profits.**

Buyers find the quality of Ramsay's Paints justifies their use where the maximum of economy, durability and beauty are required.

Write us regarding your sorting needs.

MADE IN CANADA

A. Ramsay & Son Company

Established 1842 MONTREAL

Branches at 48 Colborne Street, Toronto, Ont.
167 Pender Street, Vancouver, B.C.

STANDARD GRINDERS after FIFTY YEARS

Fifty years make half a century, and it takes a mighty good article to hold supremacy in its class all that time. Cleveland Grindstones have done it! That's because they are made of genuine Berea Grit, the finest all-round abrasive known, which has a fine, even texture all through. Furthermore, every Cleveland Grindstone is specially selected by our expert graders, and we ship to a dealer only the grit best suited to his customers. You'll be "playing safe" and will make sales without a come-back if you handle

CLEVELAND Grindstones

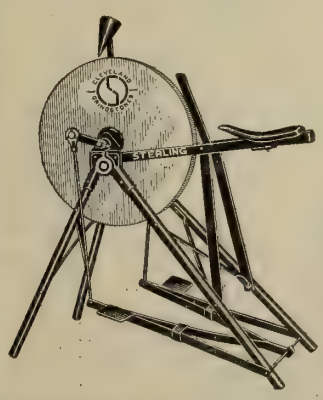
Sold only to Hardware and Implement Dealers

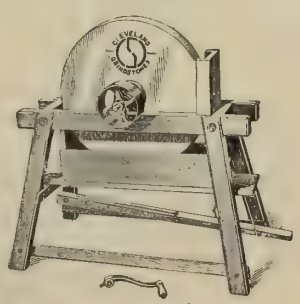
If you handle grindstones stamped with the quality mark shown above, you will be sure you're getting the **only** Berea Grit. You'll be backed by an unlimited supply, best factory equipment, expert workmen and a FAIR DEAL. Cleveland Grindstones will help you get the business that now goes out of town.

To start the ball rolling, write for illustrated Trade Price List. Tell us your jobber's name. Ask also for our famous book, "How to Keep Mail Orders at Home."

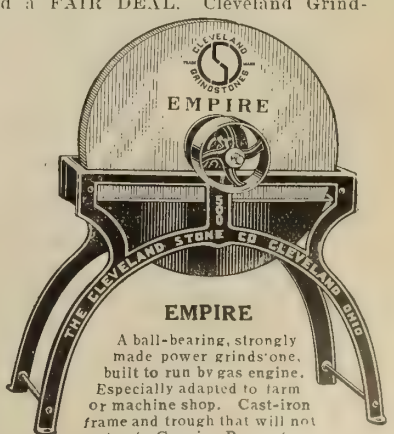
The Cleveland Stone Co.

Leader-News Bldg., CLEVELAND, O.





Farmer's Special Model (Hand or Engine Power)



EMPIRE

MARTIN-SENOUR
PAINTS AND VARNISHES

(Made in Canada—Sold on Merit)

The mark on the can is a guarantee of quality and satisfaction

The Merchant who profits by the best patronage and commands the greatest prestige in the selling of Paints and Varnishes in every community has concluded that it is the best policy to centre his efforts in the selling of one exclusive line.

First consideration in the choice of this line should be QUALITY.

Every successful Merchant realizes that the distribution of Quality goods is what makes his patrons permanent friends and steady customers.

Next to quality comes the Sales Help and Co-operation supplied by the Manufacturer of the Product, to make the selling of same both easy and profitable for the Dealer.

THE WISE CHOICE

The Exclusive Agency for Martin-Senour Paints and Varnishes will give to your Store the reputation of being the place to procure goods which are unsurpassed for Quality.

The Martin-Senour Line is backed by the strongest kind of Advertising Sales Help and Co-operation.

The individual experience of a Martin-Senour Dealer Agent is increasing satisfaction and growth in volume of business, and added profit year by year.

An increase in your Paint sales for 1916 will be doubly assured if you secure the Exclusive Agency for this line of Goods in your community.

No better time than now to get details of our profitable Proposition.

Drop us a line to-day.

Your Brush Trade

Is it a profitable end of your business? Does it bring strong repeat demand? Is it building up desirable trade for you? **Good** brushes will do all this.

"KEYSTONE" BRAND BRUSHES

are made in a Canadian factory by skilled workers, using only such material as will result in hard-wearing brushes that give all-round satisfaction to you and your customers.

Floor brushes, clothes brushes, shoe brushes, dust brushes, crumb brushes, shaving brushes, every kind of brush used in the home. Write for prices, etc.

Stevens-Hepner Co., Limited
Port Elgin, Ont.

Get prices and information about the "Nugget" Brooms, and the rest of the famous Keystone line.

Using the Handtrap For Field Practice

Trapshooting
Puts Idle Guns Into Action

THIS fascinating, popular, all-season sport is a trade-maker for dealers. The introduction into the sport of the DU PONT HANDTRAP opens a wider field and creates a larger demand for shells and other sportsmen's supplies.

Trapshooting with the Hand Trap for target throwing is a country-wide, year-round sport and puts action into idle guns.

THE HANDTRAP IS A YEAR-ROUND IMPLEMENT

Canadian Trade Supplied by **The Dominion Cartridge Company, Montreal.**

When making up your stock order

Don't overlook the fact that prosperity has overtaken Canada. This is partly due to the exceptional crops, and partly on account of the millions of dollars in war orders.

Take advantage of present prices and prepare for more business this spring; people who have been putting off painting for two or three years are going to paint in 1916.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

"AYLMER" Force Pumps

They are certain to sell easily because it has several advantages over the ordinary style.

Has longer stroke, more power, and works easier.

While designed for hand use it can be readily converted into a Windmill Pump by the addition of a flat bar, which screws into the cross head at top. It will be to your interest to write for full particulars now.

We also have a complete line of Snow Plows, Ice Levellers, etc., for municipal work.

ROBERT DONALDSON & SONS, Montreal

Advertising is an insurance policy against forgetfulness Stopping an advertisement to save money is like stopping a clock to save time. —it compels people to think of you—Galveston News.

INCREASE YOUR BUSINESS

CHRISTMAS IS COMING. Give your customers something that they will appreciate and at the same time be an ad. for your store.

How would one of our **long-handled "Daisy" Dust Pans** look hanging in your customer's kitchen with an ad. of your firm stamped in gold letters right on its face where everyone can see it, such as **With the Compliments of J. G. MILLER & CO., Winnipeg, Man.**

Our pan is large, strong, well made and nicely japanned in black; the handle is number 9 coppered wire twisted and looks very attractive. An ad. 2 x 5 with 3 or 4 lines looks nice and shows up well in gold over the baked black enamel.

We can supply you with 50 stamped to order at 13c. each. We can supply you with 100 stamped to order at 11½c. each. We can supply you with 200 stamped to order at 10c. each, F.O.B. Toronto.

MISCELLANEOUS

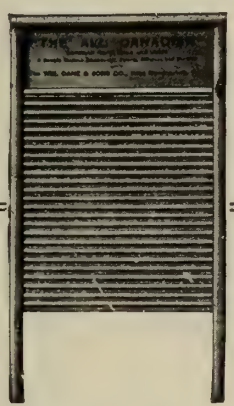
FIRE INSURANCE. INSURE IN THE HARTford. Agencies everywhere in Canada.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

GOOD STENOGRAPHERS ARE WHAT every employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

ADDING TYPEWRITERS WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314, Stair Building, Toronto.

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B." Otis-Fensom Elevator Co., Toronto.



COSTS LESS

than aluminum and zinc wash boards, is just as good and is more serviceable.

The All-Canadian
All-Wooden
Wash Boards

are the result of great scarcity and high price of zinc and aluminum—a price that has greatly handicapped washboard sales.

All-Canadian grown wood, Canadian-made nails, and by Canadian workmen—that's why it's all-Canadian.

The finest grained hardwood is used for rubbing surface.

Retails at 20c and leaves a BETTER profit.

The Wm. Cane & Sons Co., Limited

Makers of the New Wooden Wash Board

NEWMARKET, ONT.

A Good File Trade will build up the sale of other mill supplies

By coming regularly to your store for a supply of files, customers will see and buy other lines from you.

DELTA FILES

Make repeat orders doub e-sure

because they cut faster and retain their cutting edge longer than any other make and they are reasonable in price.

This is the only line of files from 3 to 24 inches that's made absolutely of crucible steel.

There is a shape and size for every purpose.

We supply dealers with effective advertising in the way of display signs and circularize their vicinity, mentioning them as our local distributors, etc., etc.

A Delta Agency is a very profitable one. You cannot afford to delay in getting it for your district.

The trade-mark **on the tang** is the Delta guarantee of satisfaction or money back.

All first-class jobbers sell Delta Files.

A Straight Talk from the Manager

Do You Dress Good Windows?

IF you are a good window dresser, the Christmas Window Display Contest conducted by Hardware and Metal, this year, affords you a fine chance to make money out of your ability.

There is a special prize of $15 for the best window dressed exclusively with goods made by firms advertising in Hardware and Metal's Christmas Goods Number, issued last week. Any window complying with this condition may be entered in the regular contest as well.

Look back over the advertising pages of last week's issue, and you will find a splendid variety of Christmas goods shown there—from rocking horses to silverware. There will be no lack of material for a good window, and any of the products of firms advertising in that issue, will be eligible for display in windows entered in our special contest.

Get Busy!

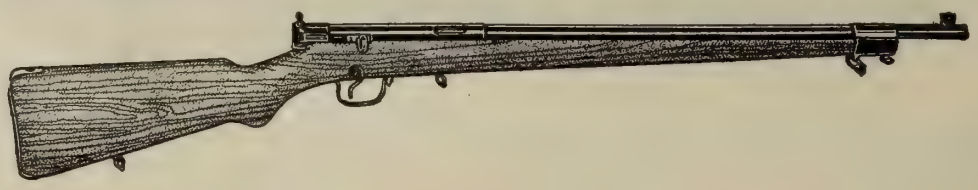
J. G. L.

The profit the OTHER MAN makes this season on Ross Rifles won't pay for YOUR Christmas Dinner

Some of your customers will buy Ross Rifles for Xmas Gifts. Make sure that they will buy them in your store.

Ross Sporting Models and Cadet Rifles should be displayed by every Sporting Goods Department looking for maximum returns from the Christmas Trade.

If you lack any information concerning prices, we solicit correspondence.



Ross Rifle Company - Quebec

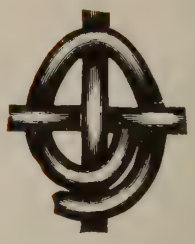
REGAL FENCE

MADE IN CANADA

QUALITY HIGHEST PRICES LOWEST

THE FENCE THAT GIVES SATISFACTION



Get our proposition before you contract for your next season's requirements in fence. And be insured of a profit for your next year's fence business.

Our prices will interest you. They not only compete successfully with other manufacturers' prices, but permit you to make a fair profit, and compete with the several concerns who are selling direct to the consumer. In the past few years the mail order houses have made serious inroads on the Hardware Dealer's business, especially in fencing materials. Figures show that the mail order fence business is increasing in Canada every year. The cause is that no fence manufacturer has given the Dealers sufficiently close prices that he can meet the mail order competition, and make a profit, so he has either sold a smaller quantity than in former years, or else he has decided that the fence business was no good, and discontinued carrying a stock.

Our fence is manufactured in one of the most up-to-date fence factories in Canada, and all fence sold by us is rigidly inspected before it leaves the factory, thus insuring you of a perfect article, which means to you a satisfied customer.

If you will advise us how many cars you will require, and the dates you will want them shipped, we will give you full particulars of our gilt-edged proposition, which will put you in a position to do a big fence business this coming year, and show a profit on every rod you sell.

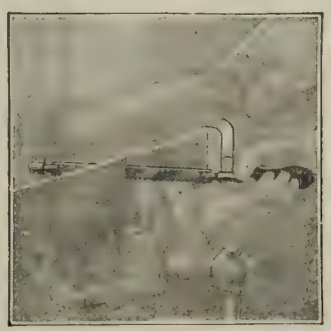
Hack Saws for Clean-Cut Work



YOU cannot expect a hack saw that is intended for work on cast-iron pipe to make a clean cut in sheet steel. For this reason the good workman who wants blades that are right for every job buys

Starrett Hack Saws

There is a Starrett blade of just the proper steel composition, number and set of teeth, shape, size and thickness for every kind and shape of metal. Starrett Hack Saws properly selected will do better work and last longer than any general-purpose hack saw. For most satisfactory results with hand frames order by this table:

No. 103 Saws in hand frames, to cut cast steel, cast iron, tool steel and all solid metals.

No. 103B Saws in hand frames, to cut cold-rolled stock and soft metals.

No. 102 Saws in hand frames, to cut sheet metal and tubing 16 to 18 gage.

No. 253 Saws in hand frames, to cut sheets and tubing thinner than 18 gage.

No. 112 Saws for heavy hand frame work and light power machines, on tool steels.

No. 115 Saws for cutting electrical conduit pipe, brass stock, light angle iron and channel iron.

No. 262 Saws for cutting angle iron, brass stock and general line of ornamental iron work.

No. 259 Saws for cutting iron pipe, light structural iron, channels, eyebeams, auto frames, etc.

If flexible back saws are preferred, use Nos. 250, 252 and 258 instead of Nos. 103, 102 and 253 respectively. Many other styles for machine cutting. We sell direct to dealers. Write for free catalog No. 20-MA prices and discounts

How Much Grain Elevator Business Do You Get, Mr. Sheet Metal Man?

Fire insurance companies offer grain elevator owners reduced rates if they use non-inflammable materials for roofing and siding. As a result, sheet metal is rapidly replacing all other forms of roofing and siding for these buildings.

How much of this business are you getting?

No longer can a grain elevator owner object to sheet metal because of its short life. In fact, the life of a grain elevator will be increased by using

Rust-Resisting **Anti-Corrosive**

TONCAN METAL

Roofing and Siding

Toncan Metal will last longer than any other Sheet Metal made from iron ore. It is pure, uniform in structure and made by scientific methods. The cost is moderate.

Hundreds of sheet metal men are increasing their business by *recommending* Toncan Metal to grain elevator owners. *Why don't you?*

No. 4821
Hand Lanterns

FRANCO HAND LANTERNS

OF late a few so-called hand lanterns, equipped with 1½ volt lamps, have appeared and the public was led to believe that any ordinary No. 6 cell would give a strong, steady light, and that it would give forty to fifty hours' steady service. Some claimed even as much as seventy-five hours. Our extensive tests proved only 10% of these claims. We have refrained from bringing out a similar lantern to burn on one No. 6 cell, knowing how useless it is for a practical purpose.

After extensive experimenting we have succeeded and have produced our new RADIO NITROGEN BATTERY, which will serve the purpose and give the desired results. The illustrated article used with our 1009 battery and our FRANCO lamps opens a new field in miniature lighting.

New Catalogue illustrating our complete line mailed on request.

BANK OF MONTREAL

Annual General Meeting Held 6th December, 1915

The 98th Annual General Meeting of the Shareholders of the Bank of Montreal was held in the Board Room at the Bank's Headquarters.

On motion of Mr. R. B. Angus, Mr. H. V. Meredith was requested to take the chair.

Mr. C. J. Fleet, K.C., moved, and Mr. A. Piddington seconded, that the following gentlemen be appointed to act as Scrutineers:—Messrs. George R. Hooper and G. L. Ogilvie, and that Mr. O. R. Sharp be the Secretary of this meeting. This was carried unanimously.

The Chairman then called upon the Genera Manager, Sir Frederick Williams-Taylor, to read the annual report of the Directors to the Shareholders at their 98th Annual General Meeting, held Monday, December 6th, 1915.

THE ANNUAL REPORT

The Directors have pleasure in presenting the Report, showing the result of the Bank's business for the year ended 30th October, 1915:—

Balance of Profit and Loss Account, 31st October, 1914		$1,232,669.42
Profits for the year ended 30th October, 1915, after deducting charges of management, and making full provision for all bad and doubtful debts		2,108,631.06
		$3,341,300.48
Quarterly Dividend 2½%, paid 1st March, 1915	$ 400,000.00	
Quarterly Dividend 2½%, paid 1st June, 1915	400,000.00	
Bonus 1%, paid 1st June, 1915	160,000.00	
Quarterly Dividend 2½%, paid 1st Sept., 1915	400,000.00	
Quarterly Dividend 2½%, payable 1st Dec., 1915	400,000.00	
Bonus 1%, payable 1st Dec., 1915	160,000.00	
	$1,920,000.00	
War Tax on Bank Note Circulation to 30th October, 1915	127,347.53	
		2,047,347.53
Balance of Profit and Loss carried forward		$1,293,952.95

Since the last Annual Meeting a temporary Branch was opened at Valcartier Camp, P.Q., for the convenience of the troops during their stay in camp.

The following Branches have been closed:—

In Quebec—Valcartier Camp.

In British Columbia—West Summerland, Invermere, Alberni, Lumby.

The Directors have to record, with deep regret, the death of Mr. David Morrice, who had been a member of the Board since 1907.

All the offices of the Bank, including the Head Office, have been inspected during the year.

(Sgd.) H. V. MEREDITH,
President.

Bank of Montreal,
6th December, 1915.

THE PRESIDENT'S ADDRESS:

Mr. H. V. Meredith, in moving the adoption of the annual report, said:

The unprecedented conditions under which trade and commerce have been conducted during the past year remain unchanged, and are the cause of constant anxiety to those concerned with financial affairs.

It will be gratifying to you to learn that, after making liberal and, it is believed, adequate appropriation for known losses and doubtful debts and war taxes, the profits of the year have enabled the usual distribution to be made to shareholders and a surplus to be carried to credit of Profit and Loss Account. In view of the trying circumstances prevailing, the need of maintaining large reserves and the low rates of interest obtainable in the United States and until quite recently in England, I think you will agree with me that this result of our banking year is quite satisfactory.

Our widespread operations make us concerned with conditions in other countries. In Great Britain, normal conditions no longer prevail. Large numbers of men have been withdrawn from their customary occupation to enter the army, factories have been diverted to the production of war supplies, and a considerable shortage of labor exists. The result is that trade passes from British firms into the hands of neutrals, thus disturbing the balance of trade, but it is believed that in the early future this condition will right itself and the obligations abroad of Great Britain will be correspondingly reduced.

The financial situation has, of course, been affected by the disturbance of trade and large domestic borrowings by the Government, but it is gratifying to know that the strain arising from the war has been readily and easily borne.

Business in the United States has greatly improved during the year. War orders account for much of this improvement, while large grain crops, following a period of liquidation, have stimulated trade. Deposits in the banks of that country are enormous, and the United States, for the time being, has become the great creditor nation.

TRADE WELL MAINTAINED

All things considered, the trade of Canada has been well maintained, both as to volume and character. For some time before the outbreak of war, a restraining hand was placed on speculative ventures, which, in an era of prosperity, had run to dangerous excess, and we were, as a consequence, fairly well prepared to face the closing of the London money markets to flotations of all kinds. A temporary dislocation in many branches of trade followed. Reorganizations in some cases were, and may yet be found necessary to adjust capitalization to earning power, the only logical course to be pursued when such conditions have to be dealt with. As the year progressed, the effect of the war on the trade of Canada proved less injurious than was expected. In fact, business conditions distinctly improved.

Natural resources continue to be developed and their product to find a ready and profitable sale, while many branches of manufacture have been employed to capacity in turning out munitions of war, the money value of which runs into scores of millions. The resulting employment of labor has been of almost incalculable advantage.

HARVEST AN ENCOURAGING FEATURE

The most encouraging feature of the year, however, from a trade and finance standpoint, has been the bountiful harvest of the Northwest, where a greatly increased area under cultivation has given the highest average yield in the history of the country. It is estimated that the grain crop of Manitoba, Saskatchewan and Alberta has a market value to the producers of approximately four hundred million dollars, in the use of which we may anticipate not only the liquidation of much indebtedness, but the stimulation of current trade.

These truly remarkable results will, I think, have the effect of attracting the tide of emigration to our shores when the world is again at peace.

In the older Provinces, the harvest has been rather better than the average.

Farming, the backbone of the country, is prosperous.

There is a greater demand for the products of the mines, at higher prices.

From the Atlantic to the Pacific, good fisheries are reported, also at enhanced prices.

The lumber business generally throughout Canada, though suffering from inability to obtain tonnage to market the cut, shows some improvement.

The Textile and allied industries are at the moment well employed, while the Steel Companies and those engaged in the manufacture of war are fully occupied.

In the wholesale trade, stocks of merchandise had become depleted, and necessary replenishing and better demand have stimulated business.

The financial position of the Dominion Government has been recently so clearly defined by the Minister of Finance that I refer to it now only to state that the country has been fortunate to have come through a period of general financial upheaval with its needs fully provided for and with the strength and soundness of its credit unimpaired.

FAVORABLE TRADE BALANCE

The restoration of a favorable balance in our foreign trade is a factor of supreme importance at the present time, as it enables us to conserve our gold supplies and to curtail our borrowings abroad to some extent. As you are aware, the balance of foreign trade against Canada had been quite large for several years past, due principally to the ease with which we were able to borrow in the London market. Now that this avenue is closed, we have been compelled to curtail imports and increase exports in order to meet interest obligations and maintain our credit. How successfully we are meeting the situation a few figures will show: In the seven months ending October 31st, 1913, the value of exports of Canadian products was $245,550,000, and in the same period of 1914 was $226,757,000; while this year in these seven months we have exported Canadian products of the value of $326,430,000, or $100,000,000 more than last year, and the great crop surplus has still to go forward.

Comparing the foreign trade of Canada for the seven-months period ending with October, imports have declined from $390,544,000 in 1913 to $253,107,000 in 1915, while exports of domestic products, as I have said, have risen from $245,550,000 to $326,430,000; an adverse balance of $145,000,000 being converted into a favorable balance of $73,323,000, or a betterment in respect of foreign trade of no less than $218,000,000 within the short space of two years.

War contracts, of course, have contributed substantially to this expansion, the value of manufactures exported having risen from $39,000,000 in the first seven months of the last fiscal year to $84,000,000 in the same period of the present year, and, as in the case of cereals, this export trade is on an ascending scale.

CANADA'S POSITION FAVORABLE

The position of Canada is a highly favored one, with an assured future of growth, development and general prosperity. At present, however, we live in the shadow of the great war, to which all else must be subservient. What its duration will be, and the position in which its termination will find us, can be matter of the merest conjecture. The vast armies now engaged in the struggle cannot be kept in the field indefinitely. The financial factor is daily assuming increased importance, and in this respect the advantage is unquestionably with Great Britain and her Allies.

After the war, a readjustment of trade conditions is to be expected. The flood of wealth which has attended the export of munitions and war supplies must of necessity be largely curtailed, and a new set of problems will have to be faced. As I have said on former occasions when I have had the pleasure of addressing you, if economy be exercised to meet the increased burden of taxation, of which we must bear our share, and the production of exportable articles increased to the utmost extent, to protect our gold supply and minimize our borrowings, and if we keep strong in working capital, then no matter what difficulties the future may have in store for us, we can look forward to them with a degree of complacency. Our agricultural resources and undeveloped wealth will enable us to bear the strain which may be imposed upon us, and we shall, in the end, come safely

through the period of economic upheaval and world-wide conflict—with a larger debt, it is true, but with our ability to meet it unquestioned and our economic position not seriously impaired.

In the meantime, our duty as Canadians, is to watch closely the current of events, to be prepared for emergencies and to take advantage of propitious circumstances as they arise.

I cannot properly close these remarks without some reference to 400 odd gallant young men of the staff of the Bank who have joined the Colors and gone to the front to fight the Empire's battles. Of these, the names of 16 have been added to the Roll of Honor, having been killed in action.

Their courage and patriotism, their deeds of valor and their glorious end will be inscribed in the Bank's archives, and to the families and relations we give expression of our profound admiration of their devotion to country and Empire and tender our sincere sympathy in their loss.

Mr. R. B. Angus seconded the motion for the adoption of the report, which was carried unanimously.

GENERAL MANAGER'S ADDRESS

Sir Frederick Williams-Taylor, the General Manager of the Bank, in reviewing the Bank's statement, said:

Gentlemen, the balance sheet, which it is my privilege and duty to present to you to-day, reflects the result of twelve months of business conducted under conditions such as this country and its banks have never before been called upon to face.

In previous years we have experienced the effects of outside panics and crises, many of them of an injurious and even alarming nature, but as a rule the danger was brief, and the damage quickly repaired.

The year under review differs, in that there have been no such financial crises, but what has been more difficult to surmount, a continuous period of anxiety with problems not only varying in character, but differing from any in our former experience.

You will undoubtedly feel gratified that your Bank has come through the unsettled conditions referred to without loss of strength, and is enjoying increased prestige.

As for the future, the daily difficulties will be grappled with as they arise, and we gauge, to the best of our ability, the somewhat obscured trend of coming events.

As the President has reviewed in general the trade and financial conditions in Canada and at the chief financial centres abroad, my duties are confined to a short account of the working of the Bank, an explanation of the more important features of the accounts submitted to you to-day, with some detailed references to the points arising therefrom, and to local conditions in our Provinces.

As you are well aware, this Bank long ago ceased to be merely a domestic financial institution, and therefore it is necessary, in presenting to you the annals of the business, to touch upon conditions affecting us in London and in New York, where we carry such a material portion of our primary and secondary reserves.

GENERAL MANAGER'S SUPPLEMENTAL REPORT ON PROVINCIAL CONDITIONS

ONTARIO

A year ago conditions in Ontario were the reverse of satisfactory. With business already severely restricted and further dislocated as a result of the war, with many factories closed and others running with reduced pay rolls and shortened hours, and with collections slow, manufacturers, wholesalers and retailers looked for hard times. The lumber trade was dull, building at a standstill, and lower prices for real estate were deemed inevitable. The problem of the unemployed was an added concern for the approaching winter.

Presently, however, Government orders for the manufacture of war munitions increased rapidly and many woollen mills, tanneries and machine shops were soon working to capacity. With prospects of a large crop and with increasing Government expenditure for war munitions, misgivings began to disappear. The farmers, the least affected, had placed under cultivation a larger acreage than ever before, and, as a result, a splendid crop, perhaps the best in the history of the province, has been harvested. Prices have been good. Economy is still being practised in keeping with new conditions. Wholesalers and retailers report smaller turnovers, with collections slow.

The lumber trade has been quiet. Stocks are heavy for this time of year, and the local demand light. The American trade has been moderate, but a marked revival is promised. It is expected that the cut this season will be much reduced.

The mines are now active, though the total production is less than last year. The output of silver will doubtless increase in consequence of the rapid rise in price. The value of gold mined has increased by 50 per cent. The nickel and copper mines have been greatly stimulated by the demand created by the war.

Municipal expenditure has been in keeping with the general spirit of economy. No new railway construction of importance has been attempted, nor any large power scheme undertaken.

The value of first-class city property and good farm lands is maintained, holders being unwilling to make sacrifices. Building in Toronto is reported to show progress, and the labor situation has greatly improved.

Confidence, which was lacking a year ago, now seems to be restored.

PROVINCE OF QUEBEC

With improved agricultural markets, and crops above the average, the rural sections of the Province are in a satisfactory condition.

The high freight rates and scarcity of tonnage for shipments to Great Britain, together with a limited demand, until recently, from the United States, have resulted in a somewhat unsatisfactory year for the lumber trade. Large stocks of lumber are being wintered, and forest operations for the coming season will, as a rule, be curtailed. Scarcity of tonnage for shipment of paper to England has increased the export of that important commodity to the United States, although the price of news print there has not maintained the level to which it rose during the early days of the war.

Wholesale and retail business is reasonably good, but the commercial agencies report failures above the average.

General manufacturing conditions, especially in Montreal, have steadily improved throughout the year. The Textile Companies report business as being quite good and the manufacture of munitions of war has brought activity and profit to certain important industries.

There has been little movement in real estate. The high prices at which properties are still held in the chief centres are not an accurate guide to realizable values.

MARITIME PROVINCES

General conditions are reasonably satisfactory through our Maritime Provinces. The crops, excepting apples, have been bountiful, with good prices.

Fishermen have had a successful season with a larger catch than last year and high prices.

Lumbermen on the whole have not had a good year. Last season's cut was above the average, but a dull American market, combined with scarcity of tonnage and high freight rates to England, caused a falling off in sales. Large stocks of lumber are being carried into the winter and in consequence the coming season's operations probably will be curtailed. Within the last few weeks, however, there has been a marked revival in the American demand.

The output of the coal mines will be greater than last year, due in large measure to the requirements of the steel plants, the business of which has been largely increased by war orders.

Wholesale and retail trade is reported as in a healthy condition.

NORTHWEST PROVINCES

The Northwest has recovered to a marked extent from the economic dislocation of a year ago.

The season's wheat and other cereal crops have exceeded all previous records in quantity and quality, and despite the enormous yield, prices have been uncommonly well maintained.

It would be difficult to exaggerate the importance of these results to the Prairie Provinces—and the Dominion at large.

Live stock, which was decreased somewhat last year when feed was scarce, is again being increased, and the prosperity of those engaged in mixed farming and in ranching is most encouraging.

Packing plants are finding business satisfactory. The combined capacity of the plants in the Northwest is about 15,000 hogs daily.

The flour mills in Manitoba, Saskatchewan and Alberta are busy and are doing well. Their combined daily capacity is about 27,000 barrels.

With important exceptions, coal mining, which is largely confined to the Province of Alberta, has not been profitable during the past year.

Oil prospects have been disappointing.

Real estate is quiet—speculation has ceased.

Public and private expenditures in the Northwest have been comparatively small in the year.

The expenditures of the Provinces and the Municipalities were reduced to a minimum. There has been some expenditure by Railways on new construction, principally in Southern and Northern Alberta, in both cases serving good, arable lands. Work on the Hudson's Bay Railway has been continued.

A considerable amount has been spent by the Dominion Government in the erection of large interior storage elevators.

The large advances of the Dominion Government to farmers in certain districts, principally in the form of seed, were made very opportunely and have been amply justified by the very large crop yield in those districts.

Business in many important lines is good and should continue to improve as returns from grain yet to be marketed are received.

The general business outlook has been transformed by the large crop.

BRITISH COLUMBIA

Following the outbreak of war, British Columbia was seriously affected by the stoppage of expenditure on railway construction and extension, and in the outlay upon public works, also by the cessation of inflow of capital to develop the lumber, mining and other resources of the Province. Speculation in real estate had risen to a height where prices were quite beyond reasonable productive values. Business has now been forced by adversity to a sounder basis and shows signs of recovery. There has been a very general tendency toward economy and retrenchment with beneficial result.

During the past year mining of all classes has revived, bringing increased employment and a growth of orders for equipment and supplies. The establishment of a refinery would be of great benefit to the country. In agriculture good crops are reported, and, although prices are disappointing, it is satisfactory that the Province is gradually getting into the position of feeding itself. The fruit crop is excellent and is being marketed under better conditions than formerly and at better prices.

The salmon catch exceeded expectations for an off year, and demand and prices have been satisfactory. The halibut catch has been satisfactory also and marketed under favorable conditions. The lumber trade is in a better position than when under review a year ago, largely in consequence of improved demand from the Prairie Provinces, but still suffers through lack of shipping for the export trade, which trade could be greatly increased with adequate facilities.

The population has temporarily fallen off through enlistment and lack of employment in building trades and railway construction.

With return to more settled conditions, there is bound to be an influx of new people and some resumption of the flow of capital to develop the great natural resources of this Province.

NEWFOUNDLAND

This year's catch of cod, the great staple product of Newfoundland, will be equal to that of last season, while the prices being realized are exceptionally high. In consequence trade, wholesale and retail, is good, and general business conditions throughout the country may be considered satisfactory.

The sealing voyages of last spring were the most unprofitable on record. On account of the very high freight rates offering, it is probable some of the best iron ships will be withdrawn from seal fishing for service elsewhere; therefore the prospects for next spring's sealing are poor.

The pulp and paper business has been disappointing. Markets for ground wood pulp were poor, freights high, and tonnage scarce. Large quantities will be carried over this winter by the mills. The adverse sterling exchange has largely militated against profits, as exports of this product are mainly to Great Britain.

General conditions, however, are largely governed by the cod fisheries, and the excellent returns from them are enabling the Colony to weather the universal storm with a fair measure of comfort and confidence.

MEXICO

The business of our office is practically at a standstill, and our very limited operations are being performed under extraordinarily trying conditions.

ELECTION OF DIRECTORS

The ballot for the appointment of auditors and the election of directors for the ensuing year was then proceeded with, and the scrutineers appointed for the purpose reported that Messrs. George Hyde, C.A.; J. Maxtone Graham, C.A., and James Hutchison, C.A., were duly appointed auditors, and the following gentlemen duly elected directors: D. Forbes Angus, R. B. Angus, A. Baumgarten, H. R. Drummond, C. B. Gordon, E. B. Greenshields, C. R. Hosmer, Sir William Macdonald, Hon. Robt. Mackay, Wm. McMaster, H. V. Meredith, Sir Thomas Shaughnessy, K.C.V.O.

The meeting then terminated.

At a subsequent meeting of the directors Mr. H. V. Meredith was re-elected president.

If You SHOW This Drill You'll SELL It

The passer-by, whether layman or mechanic, is attracted by the compactness and neatness of this tool. He comes in to inquire. Your salesman tells its many good features. A sale is made. This same customer may buy other tools, so your magnet has doubly earned its cost. Every user is satisfied and satisfied customers are permanent customers.

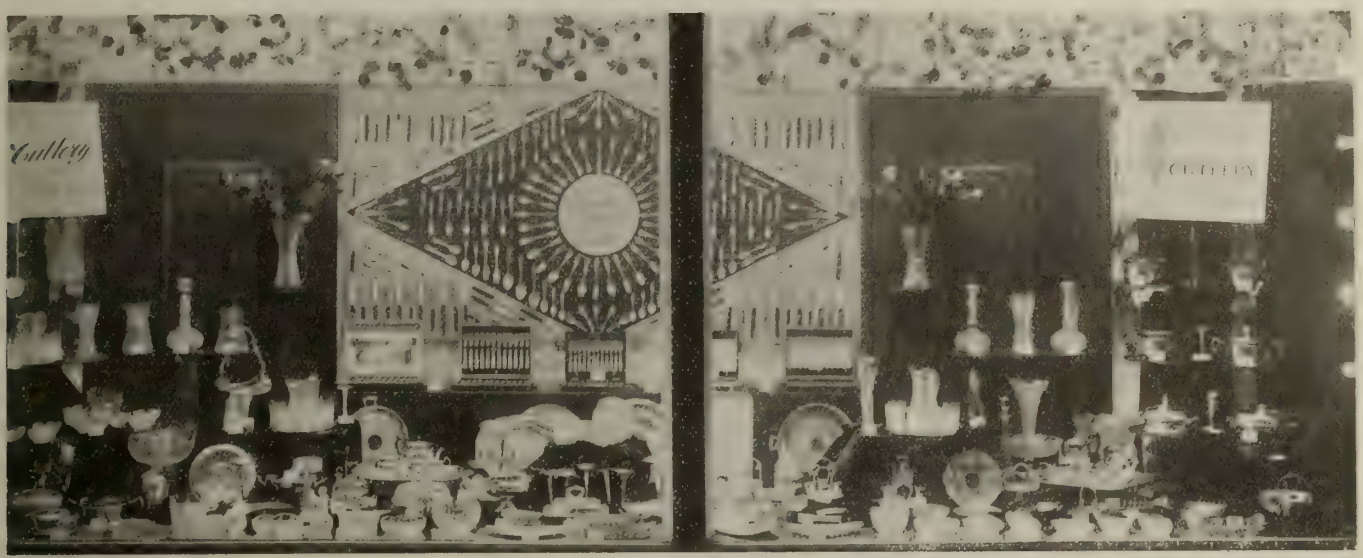
Hardware and Metal

Established 1888. TORONTO, DECEMBER 11, 1915 Vol. 27. No. 50



Ideas for Christmas displays are furnished in the above reproduction of a display arranged by C. H. Smith for the J. H. Ashdown Hardware Co., Winnipeg. The details are given in the accompanying article.

Ideas for Christmas Window Trims

Christmas Window Trims Should Attract the Christmas Shoppers and Hold Their Attention—Two Displays That Furnish Ideas for Attractive and Practical Trims of Christmas Goods

WINDOW displays and newspapers play a prominent part in the Christmas sales campaign of the J. H. Ashdown Hardware Co., Winnipeg, Man., and Calgary, Alta. The same applies to the two retail hardware stores of the Mills Hardware Co., Hamilton, Ont.

These firms, like many others in the hardware business in Canada, secure an exceedingly large portion of the Christmas trade. Both firms use show windows and printers' ink to a very considerable extent in letting the public know of the many practical and attractive articles found in modern hardware stores.

Accompanying this article are two exceptionally attractive and well-balanced window trims which appeared in the Mills and Ashdown stores. By closely examining these displays the window trimmer will be able to grasp a number of excellent ideas that could be worked into the Christmas window displays which will be prepared during the next two weeks.

The Ashdown Window

The display of cut glass, cutlery, etc., shown in the Ashdown window display will give the reader an idea of how a very simple, yet attractive and dignified display can be made. Only a portion of the background has been used for displaying goods. The lines chiefly featured are tea and dessert spoons, dessert and table knives and forks, etc.

A number of neat pedestals have been used to display articles of cut glass, casseroles, bake dishes, etc.

The floor of the window has been used for displaying cut glass dishes, tea services, bread trays, toast racks, sandwich trays, and many other gift suggestions.

The Mill's Window

The illustration of the Mills Hardware Co. display shows a window that was entered in Hardware and Metal's annual Christmas window display contest last year. This display secured fourth prize for places over five thousand. There are many commendable features worthy of note in this display.

There is a great variety of goods shown, and yet there is no evidence of overcrowding. The front section of the floor of the window was used to show various lines of pocket cutlery, shaving sets, safety and plain razors, razor strops, shaving brushes, soap, etc. Each article is accompanied by a neat price ticket, showing the price in plain figures.

Other articles such as casseroles, bake dishes, butter dishes, etc., are shown on small display stands arranged in step formation.

On the pyramid in the centre of the window there is a very attractive arrangement of good selling Christmas lines, including fruit spoons, tea and dessert spoons, etc., in lined cases. Among other articles on this stand are butter dishes, sandwich trays, fern dishes, cold meat forks, butter knives, crumb trays, and other lines.

The background of the display is very attractive and effective. Table cutlery,

mostly silver plated ware, has been arranged in attractive designs surrounding the three exceptionally neat greeting cards, shown on the window background.

Holly leaves, tinsel bordering, and other decorative effects have been used to give the display a seasonable appearance.

The wall background has been used to show a neatly arranged display of skates, pucks, straps, etc. The figure of the skater, on a poster in the centre of the display, is very appropriate for a skate display.

An attractive window card bearing the following, "Skates make a fine Christmas present," occupies a conspicuous position in the display.

The display is one that attracted hundreds of people and held their attention. This can be accounted for, to some extent, by the fact that every article in the window bore a price ticket. The range of goods shown, provided presents for all classes of people—from a ten-cent hockey puck for the small boy, to the $19 case of cutlery for the person who wished to give an elaborate, yet practical gift.

The gifts for men included shaving brushes, razors, hones, strops, pocket knives, skates, boots, etc.

There are two excellent show windows in the King street store of the Mills Hardware Co. At the time the display reproduced here was in one window, a very handsome display of tools, etc., appeared in the other window.

The Christmas selling season calls for attractive window displays with sales-creating power. Every good window trimmer is at this season of the year looking for ideas that will help him in making Christmas displays that will be better in every way than those made in past years.

In the average hardware store the show window is one of the best sales-creating mediums at the command of the retailer, and worthy at all times of particular care and attention.

Extra Attention at Christmas

It must be admitted, however, that extra care, and time, is devoted to the show window during the two weeks preceding Christmas.

During the past few weeks Hardware and Metal has reproduced a number of exceptionally attractive window displays.

The present, is the best gift selling season of the year, and the window should be made to work overtime. Of course, it is not possible for some of the smaller firms located in small towns to prepare displays as elaborate as those shown in the accompanying illustrations, but nevertheless many of the ideas can be followed out on a smaller scale.

There is another feature of Christmas retailing that should not be overlooked,

There are many exceptionally interesting display methods to be found in the above window display. Window trimmers, by studying the illustration and referring to the details given in the accompanying article, can secure many ideas which could be worked into a Christmas window. The display was arranged by Fred J. Mills, for the Mills Hardware Co., Hamilton, Ont.

and that is that hundreds of persons are looking for gifts such as carpet sweepers, food choppers, electric irons, sets of kitchenware, and many other household articles found in hardware stores. There is a surprisingly large number of such lines in a hardware store and they can be sold in large numbers if only properly displayed, and pushed.

Sales Through Window Displays

A display manager in a large store, when discussing the development of window trimming some time ago, told of the wonderful opportunities which exist for making sales through the show window.

He also referred to the fact that there is a big demand for competent window trimmers.

"None of us," said the display manager, "should cry about the lack of opportunities; there is a chance for all of us, as the field of window trimming is unlimited and grows greater every day. New ideas are springing up all the time for us to take advantage of and work out in the show window. It is this condition which makes the window trimming profession so interesting, as every day's work is different, and we are continually working along lines to bring out something new to make our windows the most attractive in the city.

"Lest we should forget, the show window should not only fulfil its mission, which is to attract attention and arouse admiration, but should, from the taste of the display man in his selection, handling, grouping and harmony of selling, be thus made to act as a magnet to cause the desire to purchase and be the great silent salesman of the store, the one who is always on the job twenty-four hours a day.

"Merchandise may be well bought, rightly priced and well advertised, but the real "punch" and that which puts "pep" to the business and causes a credit on the right side of the ledger is the display. The display, if properly planned and executed, strikes home and causes the exchange of merchandise for real money."

"Many times we hear the question asked, "Where can I get new ideas for proper settings in my windows?" Ideas are everywhere, and right now there is a wealth of ideas to be found in magazines, trade papers, post cards, moving picture shows, bill boards, etc."

Leading trade papers show in almost every issue one or more up-to-date window displays.

Successful window trimmers watch the trade papers closely and make a thorough study of all the window displays shown.

The writer knows of one very successful window trimmer who keeps a scrap book of window displays which he has clipped from reproductions shown in his favorite trade paper. This man has won a great many prizes in window display contests.

Whenever he wants ideas for new trims, and he is always looking out for them, he looks through the scrap book. It is a regular reference library on window displays.

Some window trimmers have greater opportunities than others for displaying

(Continued on page 37.)

Cardwriting Made Easy

by R.T.D. Edwards

TWELFTH OF A SERIES

TWO show card suggestions shown in this article, are particularly suitable for many of the Christmas window displays that will appear during the next two weeks.

Last minute shoppers will be quite numerous this year, as in past years. In order to secure their trade every effort should be put forth to trim attractive windows, and interior displays that will draw the customer who is shopping in haste.

A description telling how each card is made, is given in the underline below the card.

The accompanying chart and description, explains the style of lettering used in preparing the show card suggestions. The new feature in this lesson is the heavy brush width spurs. They require a great deal more care than did the spur making in the brush stroke Roman lettering.

THE CHART

THE chart shows an alphabet and numerals of bold-faced Egyptian. This sort of type is exceptionally adapted for use on sale cards where a quick-reading type is desired. This class of letter is somewhat the same as that illustrated in lesson No. 5, with the exception that it has the heavy brush width spurs. These letters and numerals are entirely of brush stroke formation, which means that each line was made with one stroke of the brush. The size of the brush to use is determined by the size of card employed and the size of letter required. For instance, if you desire about a two- or three-inch letter on a half-sheet card, a No. 8 red sable will be required. On smaller work use a No. 6 brush.

As in previous work, it is absolutely necessary to keep the brush flat and chisel pointed. All the ends of the hair must be even.

A is a six-stroke letter. This letter should be evenly balanced on both sides of the dotted line shown to represent the centre.

B.—A continuation of the two strokes, 2 and 4, form B's spurs. Note that the upper loop is smaller than the lower.

C is a three-stroke letter and needs a great deal of practice. Care must be taken to get the spur at the right angle.

D.—The spurs on the "D" are made in the same manner as explained on the "B".

E.—This letter is of straight line formation. The main thing is not to allow the spur (stroke 5) to extend to the right quite as far as that of stroke 6.

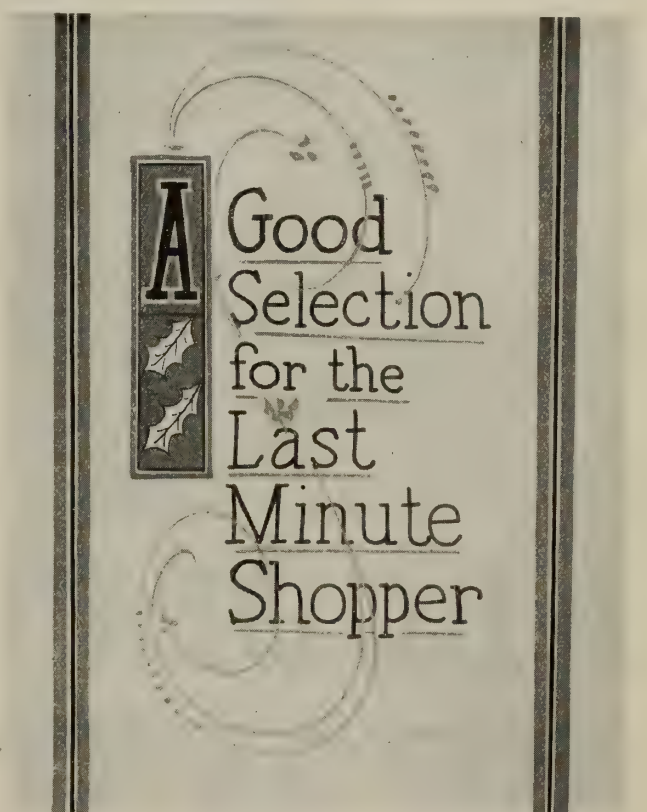
F is similar to E, with the exception of the lower line.

G.—Stroke 3 of G, as you will notice, does not extend out as far as stroke 4. This letter takes a great deal of faithful practice to get it balanced properly.

H.—The cross-bar of this letter is nearer the top than the bottom of the letter. Little points like this make hand work look different from type.

I.—Care must be taken to have all upright letters at right angles with the guide lines.

J.—The curved part and lower spur of this letter are strokes with which you must take particular care. This part of the letter is difficult for the beginner to make gracefully and needs much practice.



The above is a suggestion for a card to be used in a show window during the week preceding Christmas. The lettering is of black with the exception of the initial letter "A," which is red with a green background and a white outline. The side rules are black and pale green. The scroll work, and underlining are pale green. Many other color combinations could be used in preparing a card similar to the above. The style of lettering used in making this card is described in the accompanying article.

K.—Note, stroke 5 of the K does not project out to the right of the letter as far as stroke 7. Stroke 2 of this letter should join stroke 1 a little above the centre.

L.—Note the angle of stroke 4 on this letter.

M is another letter of which one side must balance up the other side. The lower ends of strokes 3 and 4 must be an equal distance between strokes 7 and 8.

N.—This letter is composed of 6 separate strokes. The one that beginners find most difficult is stroke 3. The point in making this stroke is to start the upper side of

the brush at the upper right-hand corner of stroke 1 and finish with the lower side of the brush touching the lower guide line where stroke 4 will finish.

O.—The O is the same as in previous alphabets. You cannot give this letter too much practice.

P.—This letter differs from B because stroke 3 joins stroke 1 midway between the two guide lines.

Q.—This letter is the same as the O with the tail added.

R.—This letter is of similar formation to the P with the two strokes added. Stroke 7 projects more to the right than does the curved stroke above it.

S.—Much practice is needed in order to get this letter balanced up gracefully.

T.—Strokes 3 and 4 of this letter must be at the same angle and are an equal distance from stroke 2.

U.—Strokes 1 and 2 of this letter do not come to the lower guide line. They join stroke 3 a little above it.

V and W are of similar formation and need a lot of practice. You will have some trouble in balancing this letter up as in the case of the M.

X.—Strokes 1 and 2 of X cross each other a little above the centre.

Y.—Strokes 1 and 2 meet stroke 3 nearer the upper guide line than the lower.

Z.—Take care to get strokes 4 and 5 of Z the proper angles.

I will not enter into a detailed description of the lower case alphabet. The strokes are all numbered and the arrows show you the direction in which to make the strokes. If you watch carefully you should experience very little difficulty.

Of course you must remember the new thing this month is the heavy brush width spurs. They require a great deal more care than did the spur making in the brush stroke Roman lettering.

After Stock-Taking Sale.

A great many retail firms conduct January, or after stock-taking sales each year. This is particularly noticeable in the dry goods trade. Many hardware firms conduct sales during January and February. In large and small stores alike sales are carried on in an effort to stimulate business.

The above show card suggestion shows a card that could be used either in Christmas window displays, or in gift windows at other seasons of the year. This card is not hard to make. The poinsettia was first sketched on a thin piece of paper and then transferred by means of carbon paper as explained in lesson No. 11. The outline of the flower was made with black waterproof ink. After the ink was dry, the flower was filled in with bright red or scarlet. The leaf and stem was made with a medium shade of green. A pale green shadow placed behind the drawing makes it stand out in relief. The scroll work and rulings are of pale green. The style of lettering used in making these cards is described in the accompanying article.

Keep Sale Name Prominent

These sales are run under various names, but the most popular are: "January Sale," "Mid-Winter Sale," "Annual Clearing Sale," "January Sale of White Goods," etc. The main thing which should be emphasized

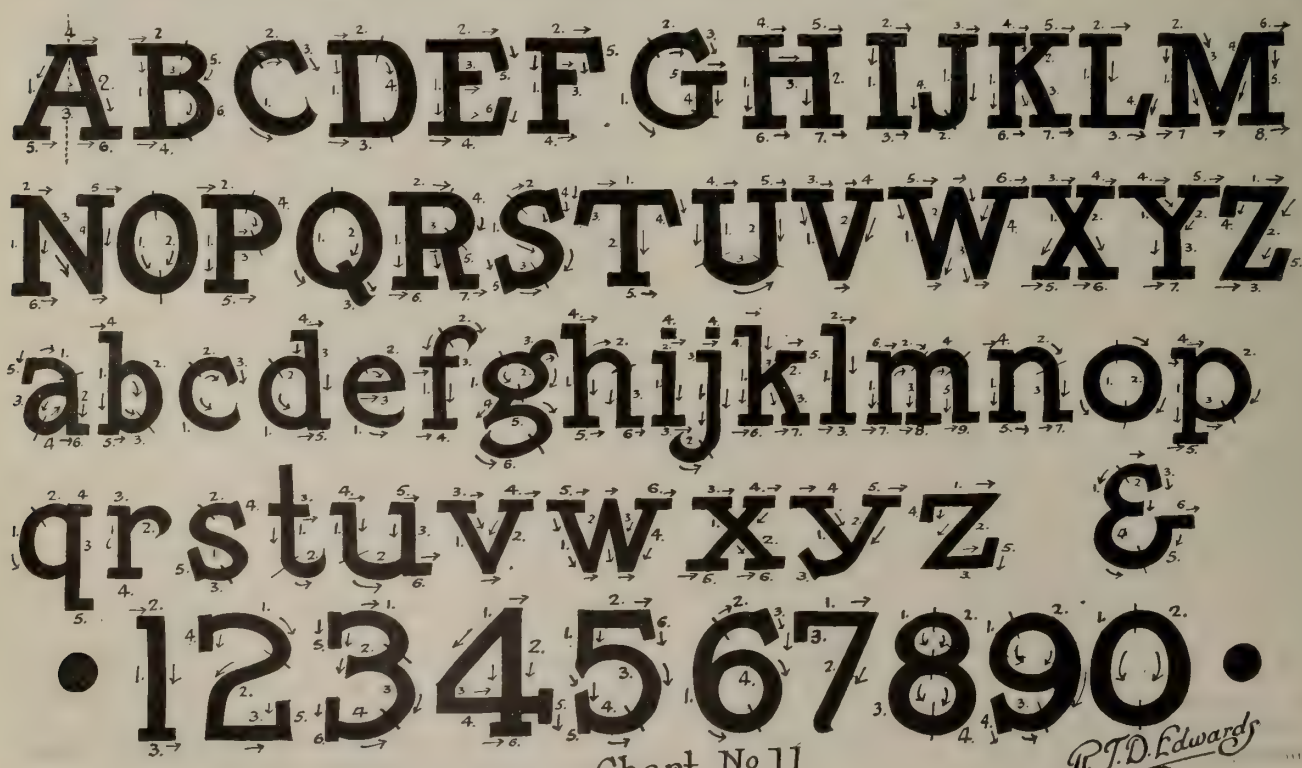


Chart No. 11.

R. T. D. Edwards

is to keep the name of the sale continuously before the public. It should be worked in on all price cards, both large or small. It also should be used on show-cards and paper posters throughout the store and in the windows.

It can be put on in dozens of different layouts or designs, either by printers' type, plates made from hand work, or the actual hand itself. If a great quantity is wanted,

The above "after-stock-taking sale" card has been prepared on the poster plan. The heavy band is of light green. The lettering is black with a white outlining, and dark green shading. The edging on the band, and the outer border line are of the same shade of green as the shading. The color used on the inner border is of light green. The style of lettering used in preparing this card is described in the accompanying article.

it is advisable to have them printed, but when the store is small and the quantity of cards used does not run up into the hundreds, they can be written by hand. Many designs that are of an exclusive nature can be made up easily and quickly.

Many stores have a striking design made up and use it year after year and the public becomes so familiar with this that as the season of the year approaches they look for these tickets.

Different From Any Other Cards

The coloring of these cards is a thing which must receive careful attention. Care should be taken to have them entirely different to any other cards used at other seasons of the year. A bright, striking card is necessary, but the colors used must harmonize with one another and also with the surroundings.

Color Combinations

Here are a few suggestions for the price ticket color combinations:

White card with green headline and price.
White card with red headline and price.
Green card with black headline and price.
Blue card with black headline and price.
Yellow card with black headline and price.

Never use red color on blue cardboard or blue ink on red cardboard, or yellow color on green card, or green color on yellow card. Red color on pink card is also not permissible.

Posters or Big General Cards

Posters or large show-cards are a necessity in connection with a big sale. These should be used to stick on windows and to put in prominent places throughout the store. If posters are desired, make them on good tough strips of paper. They should be made as attractive as possible, as these are the means by which you announce to the public that something out of the ordinary is going on inside. Half-sheet cards displayed throughout the store in prominent places announcing the sale also keep the customers' interest up. These can be made with the same design as that which is used on the posters.

What Other Papers Say

BINDER TWINE AND ROPE SITUATION

From the American Artisan.

IF THE organization which has been formed in Mexico among the growers of hemp proves to be a lasting one—and the signs indicate that it will be—prices for manufactured rope will go up considerably.

The name of this organization which has been formed under Government supervision and with its approval is "Comision Reguladura del Mercado de Henequen," or translated into our language, "the Regulating Commission for the Sale of Hemp," and it certainly is doing some "regulating," for it has sent the price of sisal fibre up from 5¼ cents to 6½ cents, which was possible because the "Commission" had contracts with the powers for 600,000 bales, or more than half a year's output.

It is only fair to the manufacturers of rope in this country to say that in spite of the advance in the raw product they have not raised prices, preferring to await developments and helping their distributors to adjust themselves to the conditions. But in view of the control which this Mexican organization of growers seems to have over the supply of the sisal which is used for binder twine and other similar products it would seem good policy for dealers to protect themselves against an advance.

* * *

FLAXSEED OUTLOOK

From Paint, Oil and Drug Review, U.S.

IN the last issue it was shown that the imports of Argentine flaxseed alone were for ten and one-half months since January 1, 12,886,000 bushels, to which must be added the imports from all other countries. The available figures from all countries are only obtainable up to the end of September.

A good basis of reckoning for the linseed oil consumer is to take the last crop year and its imports which amounted to something like 29,000,000 bushels which establishes this figure as the total consumption in this country, and of which United States contributed about 13,000,000 bushels.

Presuming the industry will be in as good condition another year, what are the chances of supplying the demand? Our own crop is estimated to be between 12,000,000 and 14,000,000 bushels, so over 15,000,000 bushels must be imported. The Canadian crop is now less than last year and it may be like cereals, reserved for British consumption. At any rate, it can hardly be expected that Canada can supply the United States any more than during the past year and for nine months ending with September they furnished only 2,562,282 bushels out of the total imports of 10,410,959 bushels of which India supplied 39,990 bushels and Argentina 7,707,783 bushels.

With our present high value for seed, Argentine flax can be delivered at our Western mills below the domestic cost. Europe has taken its average for ten months and there is no indication of any abatement, so it is fair to assume that during 1916 Europe will require its full quota.

Up to this point we have actual facts as a guide to our judgment, but beyond this it's a matter of speculation. If the paint and varnish manufacturers care to gamble they can do so on the prospect of a lower Argentine market and the chance of securing any volume of Indian seed.

It would seem that the linseed market on the Atlantic seaboard should rule at lower prices than in the West, if the prices are based on the cost of foreign seed. There is an element of grave danger in taking chances on foreign flaxseed to give a lower market.

HARDWARE & METAL

CANADA'S ONLY WEEKLY HARDWARE PAPER

Vol. XXVII. TORONTO, DECEMBER 11, 1915 No. 50

EDITORIAL BRIEFS

ARE YOU going to enter a Christmas trim in Hardware and Metal's contest?

* * *

BECAUSE YOUR debtor has successfully avoided you at the end of one month is no reason why he should be given to the end of the following month to pay up.

* * *

WHAT BANK manager will loan money without convincing himself in the first place that the applicant is thoroughly reliable? Why should a retail merchant give out goods, which represent so much money to him, without taking equal precautions?

* * *

UNLESS THE merchant desires to let the accounts on his books run for several months longer, he should get busy and collect them now, before the holiday expenditures have had any effect on purses. Collect while money is still plentiful. It will be much easier to collect now than at the first of the year, not to mention the inconvenience resulting when one has to wait that long.

* * *

FEW OF US escape falling into rutty ways during a year of routine. Many of us have yet to realize the depth of the ruts we have traveled in if, indeed, we have become conscious of their existence. A rut impedes freedom of action and is a barrier to the exercise of initiative. Most lack of success credited to bad luck can be ascribed to mental slothfulness or "rutting."

PREDICTS TIDE OF IMMIGRATION

THE Ninety-Eighth Annual Meeting of the Bank of Montreal, held at the Head Office, in Montreal, on Monday, was marked by some very important announcements as regards the manner in which the Dominion of Canada had come through a year when unprecedented conditions had to be met, and by references as to the precautions that would have to be taken in order to properly adjust the situations that had still to be faced.

The addresses made at the annual meeting are looked forward to with unusual interest, owing to the insight they afford into the actual conditions in the country and, on this account, the addresses made by H. V. Meredith, president, and Sir Frederick Williams-Taylor, general manager, will, this year, perhaps more than ever, attract unusual attention.

Mr. Meredith points out that all things considered, the trade of Canada is well maintained, both as to volume and character. For some time before the outbreak of war, a restraining hand was placed on speculative ventures which, in an era of prosperity, had run to dangerous excess and we were, as a consequence, fairly well prepared to face the closing of the London money market to failures of many kinds. A temporary dislocation in many branches of trade followed. Reorganizations in some cases were and may yet be found necessary to adjust capitalization to earning power, the only logical course to be pursued when such conditions had to be dealt with. As the year progressed, the effect of the war on the trade of Canada proved less injurious than was expected, in fact, business conditions distinctly improved. It is estimated that the grain crop of Manitoba, Saskatchewan and Alberta has a market value to the producers of approximately $400,000,000, in the use of which we may anticipate not only the liquidation of much indebtedness, but the stimulation of current trade. These truly remarkable results, he considered, will have the effect of attracting the tide of immigration to our shores when the world is again at peace.

Sir Frederick Williams-Taylor, general manager, in referring to the fact that Canada was standing the strain caused by the war, without collapse, stated that the strain is less than could have reasonably been expected, and we are encouraged to calmly face the troubles still ahead of us because of the confidence that comes from having successfully surmounted the ordeals of the past twelve months, ordeals that came upon this country without warning and found us inadequately prepared.

There is now a decidedly more hopeful feeling throughout the Dominion, and there is excellent ground for that reassurance in the material advantages that have resulted from a bountiful harvest. When we consider that the Northwest alone has pro-

duced several hundreds of millions of dollars worth of agricultural products in the past year in an area where in the boyhood of the middle-aged not a sod was turned, we feel that this is a form of genuine prosperity to inspire confidence and in which our pride is pardonable.

IDEAS FROM THE STAFF

THE word co-operation has a deep significance for the retailer. Co-operation is one of the most necessary forces in the retail hardware store to-day. Without the loyal co-operation of his staff, no merchant will achieve the best results.

The need for co-operation is felt greatly during the Christmas season. The last two weeks before Christmas are busy times for the hardwareman who caters to the needs of Christmas shoppers. During the last week preceding Christmas, there is a mad rush for gifts.

During these rush periods the clerks have to plunge in and work on their own initiative largely, for supervision and direction are not always possible during the wind-up of the Christmas rush. If the clerk does not co-operate with his employer, and vice versa, there are great possibilities for loss of sales.

The idea of co-operation should be carried out to the fullest extent during the Christmas season. The clerk should be kept informed of the plans going forward so that, when the times come to execute them, he will be in a position to do so intelligently. Some merchants consult their clerks and solicit ideas from them for the conduct of the holiday campaign. There is wisdom in a multitude of counsel. Sift out the suggestions and ideas received from the staff and grains of real value will be left.

Make the holiday campaign one of complete co-operation between all members of the staff.

THE DULLNESS IN METALS

THE weakness which has overtaken the ingot metal market seems to be due to consumers having contracted for their requirements for the meantime. Buyers do not appear to be taking much interest in the market which thus lacks support.

With regard to tin, there is no doubt whatever that the sharp advance recorded recently was unwarranted and based on a report that had no foundation in fact. The market will recede to its former level, assisted in that direction by the accumulation of supplies in stock or afloat. There is, however, always a possibility that shipments may be interfered with in the Mediterranean, which would affect the market.

In the copper market indications point to dullness for the remainder of the year. The situation is unchanged, but consumers will probably stay out of the market, having covered for their requirements for the year. There is very little possibility of any marked recession in the copper market, as the position of this metal is a strong one and will probably remain so even while the war continues, owing to the enormous consumption for munitions. It must not be forgotten, however, that production has increased rapidly and is practically equal to the consumption.

The spelter market was, until quite recently, fairly quiet, but the situation has been for some time unsatisfactory and the speculative element has always been within range. At the present time weakness in the London market, due to lack of interest on the part of buyers, has caused the reaction.

The lead market at the present moment is dull, but this is probably only temporary, as the position of this metal is a good one and the weakness is no doubt a result of the general dullness in other markets.

The antimony market is dull, but the demand has not fallen off, nor are supplies any more plentiful. While the war is in progress there is little possibility of antimony becoming much, if any, cheaper. There is a big demand for this metal, which will keep the market up.

With regard to aluminum, the demand will, if anything, increase, and production is still away behind requirements. There is, therefore, little possibility of cheaper metal meantime.

WATCHING CHRISTMAS ADS.

NEWSPAPER advertisements are probably watched more closely by the general public during the Christmas shopping season than at any other time of the year.

People have a direct interest in the advertisements; a certain number of gifts must be bought within a specified time and the selection of Christmas gifts is not the easiest thing in the world. The task of the recipient and the funds at the disposal of the donor must be taken into consideration.

People turn therefore to the newspapers for suggestions. They also watch the show windows in the various stores.

The newspaper advertisement, or window display, which is the most suggestive and practical, is the one which will draw business at this time of the year.

The paramount consideration with the ad. writer during the Christmas season, therefore, is to make his ads. full of suggestive and practical matter for the reader. The main consideration is to quote a wide variety of lines and to give some interesting information about each one. Lengthy introductions and expressions of good-will are, in a sense, so much waste of space. The space thus taken up could be better used by quoting prices and giving descriptions of lines which would be of practical assistance to readers.

Of course, it should be remembered that expressions of goodwill appear in the newspaper advertisements of nearly all successful retail firms on the day preceding Christmas or on the latter if the paper is published on the festive day.

A Cent's Worth of Electricity

What the Retailer Should Know—What Electricity Means in Service and Comfort in the Home—Showing Economy in Operating Electric Appliances is Great Factor in Making Sales

NINE out of every ten prospective customers for electrical household utilities will ask one leading question—what is the cost of operation. This remark is not merely a generality; it is based on statistics. At a public exhibit held in New York actual record showed that ninety-four per cent. of the women attending asked that question in one form or other. Therefore, the advice may be offered to the hardware retailer to satisfactorily meet this question—it is the one great factor in the sale. And it can easily be met by a little study of the situation; the housewife can be convinced that these utilities are not expensive novelties but economic servants.

An Energetic Force

This is an electric age. Electricity in one form or another is the great energetic force in the world to-day. Its sphere is being widened because its efficiency is overcoming the opposition of older methods in every direction. Since the invention of household utilities it has been invading the home. Its use in this connection is still very limited. There seems to be a certain prejudice which may be based on the general attitude of the average housewife who is slow to adopt suggestions having to do with the conduct of her special domain.

Without reason there has been a certain feeling that these utilities were novelties for the wealthy. Recently there has been a tendency towards a more practical view. The popularity of the appliances is spreading rapidly. Electricity is successfully invading the domestic realm. But there is still a certain prejudice to overcome and that prejudice in most cases finds expression in the idea that the cost of operation is too great. This is where salesmanship and a knowledge of the appliances and what they will do means business. The truth is that a properly equipped household can save money through these utilities and at the same time secure a maximum of convenience and service.

The holiday season is at hand. If electrical utilities are shown to the people in their true light they offer an appealing practical gift suggestion. What could be more appropriate or more useful than a toaster, a flat iron, a coffee percolator, a curling iron or an egg boiler? What would be more appreciated—especially if it is known that the cost of operation is a saving and not an extravagance? The hardware trade is the natural retail outlet for these goods. The indications in the wholesale business already point to a greatly increased demand for gift purposes. That demand can be increased by a little education and the dealer who devotes a little time to that education will find his reward in the cash register.

The Serviceable Iron

Of all these efficient little household servants, the electric iron is undoubtedly the most popular and widely used. It has made a direct appeal because it has disposed of the necessity of heating irons and then having to change them. Besides which the old iron could never be maintained at an even temperature and thus could not be trusted—it was always either too hot or too cold. Now the average prospect can understand the operation of the iron. To the demonstration the wise merchant will add that on a basis of 10c per kilowatt hour, it can be operated for an hour for 5 cents. The argument of convenience and service driven home with the hammer of economy can be readily clinched.

WHAT ELECTRICITY DOES FOR ONE CENT

Makes 12 *slices of toast.*
Operates flatiron 12 *minutes.*
Runs washing machines ½ *hour.*
Brews 12 *cupfuls of tea.*
Warms 3 *bottles of baby's milk.*
Makes coffee for 7 *persons.*
Burns 40 *watt Mazda lamp for* 2 *hours.*
Keeps curling iron warm 1 *hour.*
Operates vacuum cleaner ¾ *hour.*
Boils 15 *eggs.*
Sews 30,000 *stitches on machine.*
Based on rate of 10 *cents per kilowatt-hour.*

Toasters Also Favorites

The toaster also has done great service as a pioneer in establishing electrical appliances in the home. The toaster appeals because it gives a fresh crisp product right on the table as it is wanted—toast that is not fresh toast is not worthy of the name. Besides there is an even controllable current and small danger of burning either the bread or the fingers. There are few housewives who will not look at a toaster and listen to such observations with appreciation. Add to this the real selling factor—it can be operated for 5 cents per hour—and in the majority of cases there will be a sale if the prospect is worthy of the name.

One Sells Another

It will usually be found that one electrical appliance sells another. A convert to the new method of domestic service becomes a good customer in many cases. Once the queen of the home can be won to the new idea through the serviceable iron or toaster and can thereby be convinced of the small operating cost there is a field opened for such articles as the chafing dish, the coffee percolator, the table grill, the curling iron, etc.

In each case where the interest of the customer taken in the different articles referred to, the cost of operation becomes the important factor in salesmanship. Interest can be created by the comparative novelty of the article and this will permit of a talk on the advantages of clean convenient service; but it remains for a statement of cost of operation to convince most prospective buyers. When it is explained that with electric current at an average cost an ordinary chafing dish can be amply heated for one hour for five cents, an egg boiler will work for an hour for three and a half cents, a toaster will prepare twelve slices of toast for a cent, a coffee percolator can be employed at the rate of seven cups for a penny, a dinner can be kept warm for two cents an hour, the baby's bottle brought to proper temperature with a heater operated at two cents an hour, and milady's curling iron kept hot for half a cent an hour—then there is the opportunity for securing more converts to the modern idea.

Continuing the Campaign

Conducted along these lines there is an opportunity for bringing the user of electric appliances to see the advantages of electricity in a larger household way. The electrically operated washing machine can be regarded as a humane invention when compared with the old wash board. A machine can be operated with a quarter horse-power motor at a cost of about one cent per hour. The vacuum

METHODS *in* CHRISTMAS MERCHANDISING

In this department are offered suggestions which are intended to help the retail hardwareman in pushing his Christmas sales campaign. Christmas buying has started earlier than usual this year, and the merchants who go after the trade early in the season are the ones who are most likely to show increases on the Christmas trade of previous years.

PRACTICAL DEMONSTRATIONS

Showing Customers How to Use Electric Toasters and Irons

AN Ontario hardware merchant who has made many sales of electric irons and toasters by giving demonstrations, especially during the Christmas gift giving season. Last December the merchant followed out a plan which he had introduced the previous year.

Practical demonstrations were given of an electric toaster carried by the firm. The toast and toaster were displayed on a nickel tray in the centre of the window. A neat show card held by a card rest read as follows: "The crisp, brown toast here displayed was made on this electric toaster. Come in and see a demonstration. The price of this real, practical Christmas gift is only $5.00." In addition to displaying the toast the merchant kept some bread on hand during the two weeks before Christmas and when a customer made enquiries or appeared to be interested in toasters a demonstration was given. The method adopted helped to close a large number of sales.

Demonstrating Electric Irons

Electric irons were also demonstrated to prospective customers. A folding ironing board was placed near the store entrance. The board was used when demonstrations of electric irons were given. By using an electric attachment near at hand it only took the salesman a few minutes to make the connection.

Many customers were very much surprised when shown how quickly an electric iron could be heated and made ready for use. The merchant found that despite the fact that much has been said, favorably, regarding electric appliances, there are still many people who are still in doubt. Fear of shocks, fires, etc., appears to cause apprehension on the part of some prospective purchasers. A good salesman who knows his goods thoroughly can soon convince a customer of the superiority and practicability of modern appliances over old methods.

Department stores, electric appliance companies, and power companies are nearly all in favor of giving practical demonstrations in order to sell electrical appliances.

A lady customer is always interested in seeing a neat model electric iron, but she will be doubly interested if the iron is being shown by a demonstrator who can explain its advantages, its capacity for heating all portions of the ironing surface, etc. Likewise a customer is interested in seeing a practical demonstration of a vacuum cleaner, toaster, percolator, sewing machine, motor or any other electrical device.

SELLING IN HALF-DOZENS

Expert Retail Salesman Saves Time By Quoting Half-Dozen Price

THE best salesman, in the cutlery department of one of the largest retail firms in Canada, makes it a rule to quote, in nearly all cases, when selling such lines as table and dessert knives and forks, spoons, etc., prices on both dozen and half-dozen lots.

For instance if a customer asks to see celluloid handled table knives. The salesman shows a line at $6 per dozen. He quotes the price as follows:—The price is $6 for a dozen or $3 for a half-dozen. Seventy-five per cent. of the customers he sells to, want only half a dozen at a time, and he has found that when the dozen price only, is quoted, the customers nearly always have to ask the question, "Well, what is the price of a half-dozen?"

This salesman has also found that it pays to display various cutlery lines.

In stead of keeping celluloid handled knives out of sight, which is the rule in many hardware stores, he always has one-half dozen of each kind on display. Small mats made of green baize measuring about 8 x 10 inches are used on which to display each lot of knives. Prices are always quoted per half-dozen.

For instance, a half-dozen dessert knives are placed on a mat, a neat price card is printed as follows:—Dessert knives $1.95 per half-dozen. There is a price card on each mat and knives ranging in value from $1.00 per half-dozen to $3.50 per half-dozen are displayed.

Each price card is supported on a neat wooden block in which a groove sufficiently large to hold the card has been sawed.

In showing silver-plated knives and forks in their original boxes the quantity and price are shown on neat price cards in such a manner that the customer can easily understand what he is going to get in return for his money.

IDEAS FOR CHRISTMAS WINDOW TRIMS

(Continued from page 30.)

their ability, owing to the fact that they have large stocks to choose from and large display windows to display the goods.

However, the fact should be always borne in mind that even though a display window may be small, it is the most valuable display space which the store possesses and it should be made use of to the fullest possible degree. The show window always makes the first impression on a customer. Whether it will be good or bad depends largely on the appearance of the window display.

A neglected window is a poor advertisement and will drive customers away instead of attracting them.

Sheet Metal Workers' Course

By Chas. Sievers

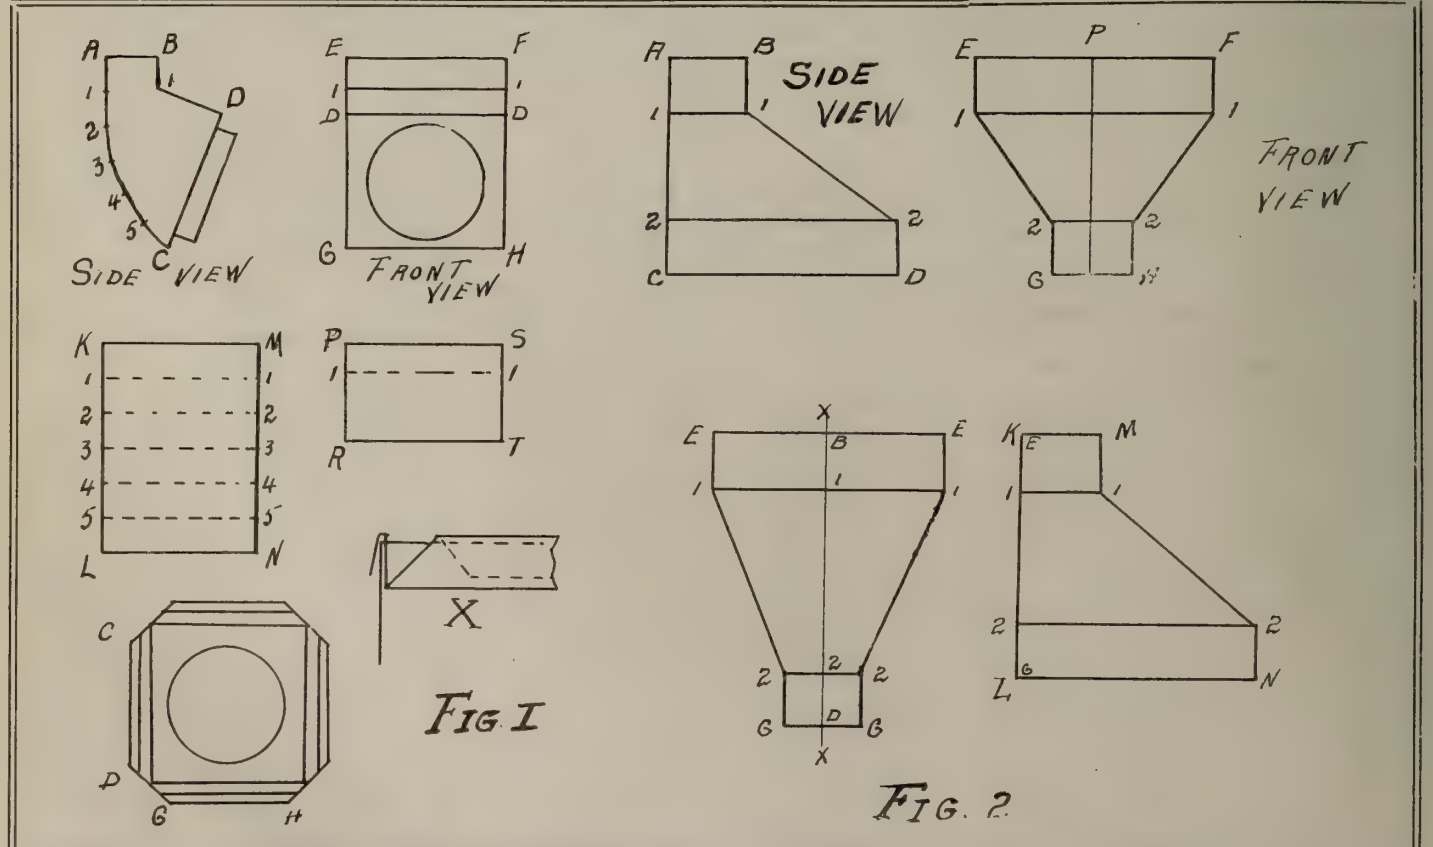
Editor Hardware and Metal.—I am very much interested in the sheet metal course you are publishing in Hardware and Metal, and, being a comparatively new subscriber, would like to know if you would show how a simple bullhead fitting can be made without the use of the triangulation method. I would also like to know how to make a fitting which will enable me to change the direction of a stack pipe where one stack has to run at right angles with the other in the same vertical direction—that is, where one partition of a room crosses the other. N. R. T.

THE fitting shown in Fig. 1, while not an intricate problem, is a very handy one. As in most all bullheads the round pipe is kept on the same plane as the square pipe, it always requires an elbow to carry the pipe to furnace, thus reducing the slope or elevation of the pipe. In using such a fitting, the pipe can be kept up closer to the ceiling, and at most will require but an angle elbow between it and the furnace, thus increasing the elevation of the pipe and incidentally the head-room. This is of special advantage where the cellar ceiling is low. The fitting shown in Fig. 2, while not very often used, will in some instances prove of great value, as it is sometimes required in running up a stack to change the centre line or face the pipe at right angles, the upper partition or position of the register in some few instances requiring this.

To develop the patterns of bullhead shown in Fig. 1, it is necessary to have a side elevation of the required article. In drawing this, the angle can be drawn as will be thought best for general use. In Fig. 1, let A B C D be the side elevation and E F G H a front view. As the piece is the same width at top and bottom—viz., E F and G H—the side view as outlined by A B C D is the pattern of the two sides or ends. The next step will be to obtain the patterns of back and front pieces as on lines A C and B D. To obtain pattern on line A C, first divide distance from A to C with a number of equal parts, as shown by A 1 2 3 4 5 C. Draw two lines as KL and M N a distance apart equal to E F or G H—that is the width of the pipe. Square with K L, draw a line, connecting K L and M N, as K M. From K and M mark off on K L and M N the length of line A to C on side view, as shown by A 1 2 3 4 5 C, draw a line connecting the two points, as shown by L N, completing patterns on line A C.

To obtain pattern on line B D draw two lines as P R and S T a distance

(Continued on page 48.)



NEW HARDWARE GOODS

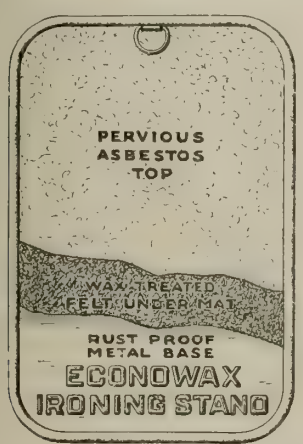
OFFERED TO CANADIAN HARDWAREMEN

IRONING STAND AND WAXING MAT

Andrews Wire Works of Canada, Watford, Ont., offers to the trade, the Econowax ironing stand and waxing mat, here illustrated. The makers state that the mat is a plated steel holder with a pervious asbestos top, under which is a felt mat, filled with a scientific mixture of non-carbon waxes.

When the iron is placed on the stand, its heat attracts just sufficient wax to keep the iron in perfect working condition.

Self-heating, such as electric or gas irons, when placed face down on the asbestos top of stand, will heat more quickly, it is claimed, because of decreased radiation; thus reducing heating cost.



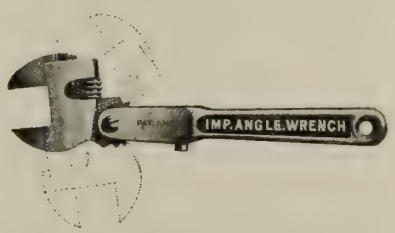
The Econowax ironing stand and waxing mat.

The makers also claim that extra hot irons may be used without danger of scorching because the even waxing causes the iron to slide more easily. The mat is guaranteed to have sufficient wax for one year's family use.

ADJUSTABLE ANGLE WRENCH

The Imperial Tool Company, of Bloomington, Illinois, have recently brought out an adjustable handle angle wrench. The makers state that the wrench incorporates a number of advantageous features. The adjustable jaw will take any tap up to 1¼ in. at eight different angles, or the tap can be turned in very close quarters by ratcheting the handle one or more notches at a time in either direction, by simply pressing the ratchet button. When the button is released, the handle is locked rigidly.

This wrench will take the place of many different sizes, styles and types of wrenches. It is easily operated in positions and angles where no other wrench can be used. The makers also state that



The adjustable angle wrench.

it is not a novelty wrench. It is a practical tool—made of the best material and will stand the hard usage.

It is particularly adaptable for auto kits, garages, machine shops and innumerable places where a high grade and all-purpose wrench is desired.

BAKER'S HOG CATCHER AND HOLDER

B. C. Baker & Co., 26 Farmers' Bank Bldg., Prairie Depot, Ohio, are manufacturing Baker's Hog Catcher and Holder, which is used for catching and holding hogs while ringing them, immunizing them against cholera, cutting off their tusks, etc. This holder, the makers state, is simple in construction, and is easy to use. There is nothing about it to get out of order, and it is less than three feet in length, and weighs three pounds.

There is a sleeve on a flat steel rod that carries a thumb release which is

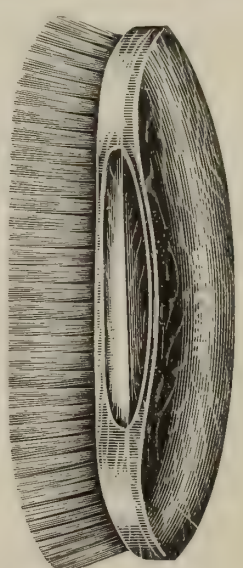
Baker's Hog Catcher and Holder.

held against the rod by a spring and this release engages rachets on the rod thus holding it wherever stopped. By pressing down on this release with the thumb the hog is released. The casting on the end of the holder has a hole in either end through which passes a loop of No. 15 annealed wire each end of which is fastened above to the sleeve which slides on the rod, and this sleeve is pushed downward to the size of the loop desired. As this sleeve is pushed downward the size of the loop is increased.

The loop is then passed around the hog's snout or upper jaw, and the sleeve is drawn upward with sufficient force to hold the hog securely.

STEEL WIRE DANDY BRUSHES

A new line of steel wire dandy brushes has been put on the market by the



Boeckh Bros. Co. new wire dandy brush.

Boeckh Bros. Company, Toronto, in two sizes, viz., large and small.

They are specially adapted not only for use on horses but also on Holstein, Jersey and other cattle and, it is claimed, they also make a good tail and mane brush.

Personal

G. Reginald Marshall, who is associated with his father, G. A. Marshall, manufacturers' agent, Lombard Bldg., Toronto, sailed for England on the Scandinavian on business in connection with orders for high speed steel.

EVENTS IN THE TRADE

Industrial

Brighton, Ont.—The D. J. Barker Foundry Co. expect to be running full blast in the new factory by the New Year.

Move to New Office

The Toronto branch office of Brandram-Henderson, has been removed to the firm's new office and warehouse at 377 Carlaw avenue.

Hardware Firm Wants Catalogues

Whyte & Orr, hardware merchants of Daysland, Alta., and Hardisty, Alta., have opened a third store at Heisler, Alta., on the new C. N. R. line from Camrose to Alsask. Manufacturers and wholesalers are invited to forward catalogues to the new branch.

Orillia Firms Change Locations

Orillia, Ont.—The Orillia Hardware Co. have purchased the Cramp Block and will move about Jan. 1. The block now occupied by the Orillia Hardware Co., has been purchased by Harry Parsons of Parson's Fair. Mr. Parsons takes possession Feb. 1, and will carry a complete stock of hardware.

New Incorporations

The Eclipse Iron Works, Ltd., of Vancouver, B.C., has been incorporated with a capital of $20,000.

The Eastern Machinery Co., of Montreal, has been incorporated with a capital of $45,000.

The Dominion Sheel Mfg. Co., of Montreal has been incorporated with a capital of $99,000.

The Dominion Magnesite Co., of Calumet, Que., has been incorporated with a capital of $100,000.

The Lachance Nut Lock Co. has been incorporated with a capital of $300,000 to carry on business at Montreal.

The Canadian Vincent Valve Co. has been incorporated at Ottawa with a capital of $25,000 to manufacture the Vincent drain valve and similar appliances at Victoria. B.C.

The Imperial Cordage Co. has been incorporated at Ottawa with a capital of $150,000 to manufacture rope, binder twine, and all products and by-products of manila, hemp and sisal, at Walkerton, Ont.

The Canadian Electro Products Co. has been incorporated at Ottawa with a capital of $500,000 to manufacture all kinds of metals, metallic substances, metallic products, chemicals, etc., at Montreal.

The Federal Brass Co. has been incorporated at Ottawa with a capital of $50,000 to acquire the business now carried on by the Federal Electric & Mfg. Co. at Montreal.

The Canadian Brass Bedsteads, Ltd., has been incorporated at Ottawa with a capital of $45,000 to manufacture household furniture of all kinds and in particular brass and iron bedsteads, at Montreal.

The Pilcher Mfg. Co. has been incorporated at Ottawa with a capital of $50,000 to manufacture metal buttons and other goods, at Windsor, Ont.

Industrial Notes

St. Mary's Ont.—C. Richardson & Co., are equipping a plant for making shells.

Hamilton, Ont.—The Tallman Brass Co. are making an extension to their plant.

Toronto, Ont.—The Multipress Co. is in the market for drop hammer and screw presses.

Lachine, Que.—The Dominion Bridge Co. are building a brass foundry at a cost of $20,000.

Hamilton, Ont.—The Acme Stamping Tool Works will make an extension to their plant to cost $3,000.

Toronto, Ont.—The Chapman Double Ball Bearing Co., have started work on a further addition to their plant.

Welland, Ont.—The Canada Forge Co. will build an extension to their plant. The new building will have an area of 180 x 80 feet, and will be of structural steel. The cost is estimated at $20,000, and the equipment to be installed will cost $100,000. T. J. Dillon is manager.

Peterborough, Ont.—The Peterborough Metal Products Co. will take over the premises formerly occupied by the Canadian Cordage Co., and will install machinery for manufacturing metal products.

St. Catharines, Ont.—The Marathon Rubber & Tire Co. have begun the erection of a factory, and expect to have the plant in operation by the first week in March.

Big Fire at Picton

Just as Hardware and Metal is going on the press a telegram has arrived from W. J. Carter of Carter Bros., Picton, Ont., 1st vice-president Ontario Retail Hardware and Stove Dealers' Association, as follows: "Big fire raging in store, due to defective wiring. Good-by Christmas trade."

Personal

J. M. Young, of the Ottawa Paint Works Co., Ottawa, Ont., spent a few days visiting the Toronto branch of the company last week.

L. A. Blackwood of the Merrick-Anderson Co., Winnipeg, returned to the city Wednesday from a trip through the three prairie provinces.

O. B. Brown, of the sales staff, and H. A. Robertson, district sales manager of Beatty Bros., Fergus, Ont., have enlisted for active service with the 30th Wellington Rifles.

C. C. Ballantyne, vice-president and managing director of the Sherwin-Williams Co., of Canada, was a business visitor at the Toronto office of the company this week.

HARDWARE LETTER BOX

Chloride of Lime

S. J. Shaw & Co., Quebec, Que.—Kindly give names of manufacturers of chloride of lime in Canada.

Alpha Chemical Co., Berlin, Ont.; Canadian Alkali Co., Windsor, Ont.; J. B. Paine & Co., Toronto.—Editor.

Toilet Paper

Howard Hardware Co., Toronto. — Kindly give names of toilet paper manufacturers in St. Catharines.

The Interlake Paper Co.; Garden City Toilet Paper Co.—Editor.

Hamilton Manufacturer Appointed to the Senate

Brief Sketch of John Milne, President Burrow, Stewart & Milne Co., Hamilton, Who Has Been Appointed to the Dominion Senate

John Milne, president and general manager the Burrow, Stewart & Milne Co., Hamilton, was last week appointed to the Dominion Senate.

Mr. Milne has spent the greater part of his 78 years of life in Hamilton. He was born in Aberdeen, Scotland, on Jan. 23, 1838, and after receiving his education in his native parish, began to learn the trade of a moulder. Before he had finished the trade he came with his father, the late John Milne, to Canada, and the family settled in Hamilton. Here he continued to work at the moulding trade, in the foundries of the Gurney Company, and shortly after he had completed his apprenticeship he and his friend, the late Charles Stewart, went to the United States, where they both worked for a time. In 1864, they returned to Hamilton and in company with the late William Burrow, the firm of Burrow, Stewart & Milne was formed and business was begun in a small frame building on Caroline street north.

The business grew under the management of the three men, who were all experienced mechanics, and it was but a short time until an enlargement was found necessary, and land at the corner of Hughson and Cannon streets was purchased and work begun on the construction of new buildings which were in readiness for occupation in November of 1871.

The business continued to expand and extensions were made from time to time. In 1898 the company was reorganized, and Mr. Milne was made president of it.

In addition to his connection with the firm which he established, and with which he has been so intimately associated for many years, Mr. Milne is interested in a large number of other commercial enterprises, a number of which he was instrumental in starting.

Mr. Milne was one of the founders, and a hard worker in the interests of the old Hamilton Steel & Iron Co., which has since developed into the Steel Company of Canada.

Mr. Milne was also interested in the shipping interests of the country and for a time served as president of the old Hamilton and Fort William Steamship Company. This was later merged into the Inland Lines, and later into the Canadian Steamship Lines, in which Mr. Milne still has large interests.

Mr. Milne has taken an active interest in the welfare of the city at large, and more especially in educational matters. He has been for many years a member of the board of library governors. At present Mr. Milne is president of the board. He has also served as president of the Hamilton Conservative Association for nearly 25 years.

Mr. Milne is a member of the Masonic fraternity. He is a Presbyterian by faith and one of the oldest adherents of Knox church in Hamilton.

CATALOGUES AND BOOKLETS

Starting and Lighting Systems

Henricks Magneto and Electric Co., Indianapolis, Ind., have issued an attractive 8-page booklet, announcing their new starting and lighting systems for Ford and other automobiles. The booklet is well illustrated, and gives complete details regarding the company's products. Copies of the booklet will be mailed on request.

RECRUITS WANTED FOR FIFTH COMPANY.

The Universities' Companies are now well known throughout Canada. A fresh company is raised, equipped and partially trained about every two months, and it is unnecessary to advertise for recruits, inasmuch as each company is made up of brothers or relatives or friends of those who have joined previous companies.

The First Company, under the command of Captain Gregor Barclay, has joined the Princess Patricia's Canadian Light Infantry, and has been for some time in the trenches.

The Second Company, under the command of Captain George McDonald and Captain Percy Molson, is also on the Continent.

The Third Company went overseas about 330 strong, and has gained a golden reputation at Shorncliffe.

The Fourth Company is at full strength and has now embarked. In quality it is in no respect inferior to its predecessors.

A Fifth Company has been authorized. A large number of applicants were on the waiting list, and more recruits are now wanted.

Those who wish to join must receive a rigorous medical examination locally by an Army Medical Officer. Those who are not medically and physically fit are not wanted, so there is a subsequent examination on reaching Montreal. The recruit should also be attested before the nearest Justice of the Peace, and transportation to Montreal can be speedily obtained by sending a night lettergram to Captain A. S. Eve, 382 Sherbrooke St. West, Montreal. On arrival the recruit is issued without delay, his blankets, palliasse and uniform, and his training commences on the campus of McGill University and on the slopes of Mount Royal. As to barracks, the Canadian Northern Land Company loans the headquarters building, McGill University lends the Molson Hall, and the students not only lend the top floor of the Union, but also give the soldiers the privileges of the building as though they were students. Moreover, the Y.M.C.A. opens its quarters and places the swimming pool at their disposal. The training is varied, and includes shooting at the C.P.R. Gallery, drill, tactics, bayonet fighting and physical training.

Nearly 1,200 men have already been raised by this organization, which is efficient, and also economical, inasmuch as there are no officers above the rank of captain.

A considerable number of young men who cannot get commissions in Canada are joining the Universities Companies with a view to commission in England. About fifty men who joined as privates, have already been appointed as officers. Information has been received from London that there is room for 40 to 50 a month, if suitable men are forthcoming.

Particulars may be obtained from Captain A. S. Eve, 382 Sherbrooke St. West, Montreal, who is in charge of the depot.

Trade Inquiries

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

1223. **Staples.**—A Birmingham firm inquires for bright galvanized staples slice cut, in iron or wooden kegs of 1 cwt. (112 pounds) net, sizes to be marked on kegs 1½ inches by 8 B.W.G. Samples to be sent and prices to include delivery London or Birkenhead.

1228. **Sheet brass.**—A London firm wishes to get into communication with Canadian manufacturers who can supply large quantities (about 2,500 tons) of sheet brass of the analysis: 60 per cent. copper, 38 per cent. zinc spelter, 2 per cent. lead; thickness 40 mm., 35 mm., 28 mm., 12 mm., etc., cut in strips of various width, for shipment to France.

1229. **Calcium carbide.**—A firm in London wishes to obtain quotations from Canadian manufacturers of calcium carbide for shipment to South Africa.

1230. **Talc, soapstone, French chalk.** — A Glasgow firm desires the addresses of Canadian producers and exporters of the above.

1231. **Rails.**—A Lancashire firm who are open to place an order for 1,000 tons 14/16 pounds flange rails, invites quotations from Canadian rolling mills who can fill orders.

1232. **South African agencies.** — A South African commission agent, covering all South Africa and with permanent sample rooms in Cape Town and Johannesburg, is prepared to take up selling agency for Canadian shippers of butter, cheese, flour, wheat and cereal foods, also to hear from Canadian manufacturers prepared for export in hardware, shovels, handles and stoves.

1234. **South African agent.**—A South African manufacturers' agent is prepared to take up the representation of Canadian manufacturers seeking export in any line of dry goods, boots and shoes, general hardware, locks, trunks and organs.

1235. **South African agencies.**—A London, England, commission house who specialize for South African trade with head office for South Africa in Cape Town, is prepared to take up Canadian agencies for South Africa in the following lines: Enamelware, aluminumware, locks, wire nails, bolts, nuts, hinges, handles, horseshoes, and hardware sundries.

1238. **Brass wire, tubing and bars.**—A London firm wishes to get into communication with Canadian manufacturers who can supply, for shipment to France, brass wire, brass tubing, and brass round bars. Particulars of analysis, specification and quantities can be obtained from the Department of Trade and Commerce, Ottawa.

1239. **Kitchen utensils and hardware.** — A London firm of manufacturers' agents specializing in domestic appliances and labor-saving devices, desires to get into touch with manufacturers of kitchen utensils and hardware.

1240. **French chalk (talc.)** — A chemical manufacturing company in the English Midland counties asks to be placed in touch with Canadian shippers of French chalk (talc.)

1241. **Ingot brass.**—An engineering company in London who handle ingot brass, are prepared to receive offers from Canadian manufacturers looking for export trade.

1242. **Canvas, enameled ware, tools, etc.** — A Paris firm seeks supplies of canvas, also of enamelled ware, engineering tools, twist drills, and boring machinery, and invites offers from Canadian manufacturers.

1243. **Bronze powder, toys, games, etc.** — A London firm seeks agencies from Canadian manufacturers of interior telephone systems, bronze powders, gold leaf toys, games, polished copper, brass, zinc, and aluminium sheets for engravers and lithographers.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

The Markets at a Glance

The holiday trade is now in full swing and there is a steady demand for Christmas goods. There is a scarcity of many lines of cutlery. There is also scarcity of many other lines, but no serious shortage has yet developed. As usual there have been quite a number of important price changes again this week, nearly all in an upward direction. Among the lines affected are wire nails, which have advanced 10 cents per keg; O & A wire, Norway iron, band iron, black sheets, toe calk, cast and hoop steel, boiler tubes, staples, fence, barb and hay wire, tank plates, lead pipe, screws, shovels, valves, benzine, castor oil. There will undoubtedly be a number of other advances within the next week or two.

The metal markets are all weaker. The domestic demand is quiet, but is showing some improvement.

There is still a heavy demand for steel for shell making. The stove trade is improving with the commencement of winter. There is a good demand for stoves from the country districts, but city trade is only fair.

The close of navigation and the setting in of actual winter has had its effect on the paint trade. Present demands are not heavy, but booking for spring delivery is progressing favorably and there is a marked improvement over a year ago. The outlook is for a better spring season. Linseed oil and turpentine are firm. Glass has advanced at Toronto.

Winnipeg reports that Christmas trade this year will surpass in volume the Christmas trade of 1913 or 1914. December business to date has been very satisfactory and orders are coming in freely. A number of very important price changes have taken place. Linseed oil has passed the dollar mark for single barrels at Winnipeg.

MONTREAL

MONTREAL, Dec. 9.—The situation in the iron and steel markets and the many branches of the hardware trade affected thereby continues serious as time passes, and there is no improvement in the outlook as regards supplies from the producers. Not only is there a disposition not to accept further business, but in contracts deliveries are being deferred three and four months. Even if the makers come back into the markets the outlook is that there will be a shortage for some time, as they will not be prepared to deliver supplies for a considerable period to come. Under these circumstances, opinions in the trade are that there will be continued advances in plates, tubes, pipe, sheets, etc., until there is some assurance of new supplies to replace those being exhausted, while the higher manufacturers will be affected as the market influence spreads.

The price changes throughout the week are general in the metal products, and are all in an upward direction. Norway iron and band toe calk, cast and hoop steel, are materially higher, while there is a big advance on black sheets. The new quotations on boiler tubes are now in effect. Other lines affected by the rising markets include the wire products—nails and staples and smooth steel, fence, barb and hay wire; also tank plates, lead pipe, screws, snow shovels, valves, benzine, etc. The indications are for further advances along many of these lines. Galvanized sheets are strong, and copper rivets are said to be in line to go higher.

In the metals there have been few changes during the week, but the general situation appears to be somewhat weaker, with tin and spelter off in the American market. The indications are that there will be quiet conditions until the end of the year, there being little new buying at this season.

Business has been going with a rush. The holiday trade is now on, and wholesalers report a general demand for all lines suitable for gifts. This demand is chiefly noticeable in the country, but the city has also been aroused to holiday and winter buying by colder weather and a light fall of snow. The trade reports that November was equal to that month of a normal year, and a marked contrast to the corresponding period of 1914, when there was a slack demand.

Tin is Weaker.—Although the Canadian tin market has maintained its price level in the face of the reaction in American markets, largely for the reason that on this side of the line advances come more slowly, the tone this week is considerably weaker, and the outlook is that there will be lower quotations in the near future if New York continues to go down. Since last report the decline in New York has been almost 2c, making a total of about 6c since the top of the up-movement, which came with the report of the closing of the Suez Canal, and broke when the report was officially denied. The American decline has been accompanied by a dull market in London, and the outlook is for easy conditions all round until the end of the year, with the premium on spot becoming smaller with the large arrivals due in the latter part of the month. Montreal quotation: 45c-46c—weak.

Spelter on the Decline.—There has been a heavy movement in spelter recently, and prices in American markets have reacted sharply. Locally the influence has not yet been widely felt and quotations are maintained, although subject to reduction at any time. New York is quoting between 3c and 4c under last report, but it is noted recently that there has been a better consuming demand than at any time since the commencement of this recent collapse. Unless there is a change of sentiment on the part of consumers sufficiently strong to warrant some reaction, a decline in the Canadian quotations is to be expected. Montreal quotation: 22c-22½c—weak.

Lead Steady.—The local lead situation is steady, with a firm tone, despite the fact that there has recently been an easier feeling in American and London markets. New York reports a dull market, with several lots being offered by second-hands at a fraction under the Trust price—and buyers apparently difficult to find. Montreal quotation: 7¼c-7½c—firm.

Copper Continues Firm.—The local advance in copper, anticipated in sympathy with the recent upward movement of the American markets, did not materialize. The present situation is very firm on the old basis. A slight reaction in New York has been the chief influence, the quotations being off about ½c. New York reports the outlook for a dull market until the end of the year, as consumers are well bought and producers well sold. The general quietness in the situation concerning non-ferrous metals is attributed largely to the lim-

ited buying for new operations at this season of the year. Montreal quotation: 22½c—firm.

Antimony Easier.—In sympathy with a dull situation in the American market there is an easier tone to the antimony situation. New York reports conditions very quiet for spot, with more disposition shown to sell future and very little inquiry in evidence; prices are quoted fractionally off. Montreal quotation: 43c-45c.

Aluminum Stronger.—There is a firmer tone in evidence in the local market for aluminum. This is in contrast with the New York situation, there having been a fractional easing off in that quarter, but is quite logical in view of the narrow margin which has prevailed between the two markets for some time. Montreal quotation: 65c.

Solder Unchanged.—The solder situation is unchanged, although there is a slightly easier feeling in sympathy with tin. Quotations in this market are difficult to give on account of the fact that with the high prices and the tendency of buyers to keep there has been a tendency to shade ingredients, and thus offer a cheaper product. The following figures indicate the ruling prices for a product of standard quality:

Half-and-half	26c-27c
Strictly	28c-29c

Steel Situation Unrelieved.—There is no relief in evidence in the steel situation. The conditions represent a continuance of the state of affairs brought about by the attitude of the mills in refusing further business, and is only accentuated as time passes, and there is no change in this attitude. Orders for sheets, pipe, plates, etc., are evidently not wanted, and even where there are contracts, there are delays of three to four months on some of the deliveries. The outlook is that even when the manufacturers do come back into the market there will be deferred deliveries on many of the lines. In the meantime, the outlook is for continued advances on sheets, tubes, plates, and practically all the first products of iron and steel, with the prospect of these advances spreading further and further throughout the higher manufactures of these metals as time passes and stocks are exhausted. Wire seems to be more directly affected than any other item, and for the past couple of months nails have gone up almost regularly 10c per week.

Iron and Steel Advances.—Advances in the different items in the iron and steel list are made from time to time. This week Norway iron, band steel, toe calk steel, cast steel, and hoop steel are affected, while bar iron and steel and the other lines are all very firm and likely to go higher. Items affected with new prices and last advances are:

	New Price.	Advance.
Norway iron	$5 25	40c
Band steel	3 50	5c
Toe calk steel	3 20	10c
Cast steel	9½c	1½c
Hoop steel		25c

This advance in hoop steel is the second of 25c in the recent movement.

Black Sheets Again Up.—A still further advance on black sheets has been put into effect. This market has been firm on the recent increases, and these higher prices have been predicted. Unless there is some indication of relief as regards further supplies from the mills, still higher quotations may be expected. The new figures and the last advances are:

	New Price.	Advance.
10 gauge	$3 20	20c
12 gauge	3 25	20c
14 gauge	3 05	10c
16 gauge	3 10	25c
18-20 gauge	3 25	25c
22-24 gauge	3 35	25c
26 gauge	3 40	25c
28 gauge	3 50	20c

Boiler Tubes Advance.—The advance in boiler tubes, referred to for some weeks past, has finally gone into effect. Practically all sizes are affected, with the exception of the 3-inch. This advance is one of the direct effects of the situation in the steel and iron market. New quotations with advances are:

	New Price.	Advance.
100 feet, 1¼"	$14 00	$8 65
100 feet, 2"	10 00	0 40
100 feet, 2¼"	11 00	* ....
100 feet, 2½"	12 [illegible]	0 60
100 feet, 3"	13 30	....
100 feet, 3½"	16 25	0 70
100 feet, 4"	20 75	0 95

*Former price not given.

Tank Plates Again.—In addition to the advance of 25c on tank plates, referred to last week, there has been another increase of 15c, making the present quotation $3. The following is the present list for boiler tubes, with the increases of past two weeks indicated:

	New Price.	Advance.
Plates, ¼ to ½ inch.....	$2 75	40c
Heads, per 100 lbs.	3 00	40c
Tank plates	3 00	40c

Lead Pipe Advances.—The advance in the price of lead pipe this week came as no surprise. Although the lead market has recently been steady, it has been recognized that the increases a couple of weeks ago in the cost of raw materials had not been covered on pipe. The new prices are 50c higher, as follows:

Lead pipe	$10 00
Lead waste pipe	11 00

Brass and Copper Products.—The quotations on brass sheets ,tubing, etc., are firm on the higher prices recorded last week. Copper products are also very firm, with prospects of higher prices if there is a continuance of the present price of the metal.

Nails Still Higher.—Still another advance on wire nails is recorded this week. The price is now $2.90, as compared with $2.20 a few weeks ago. With this rapid advance, which is, of course, the result of the developments in the steel market, there has been a heavy buying movement. As is usual with a rising market, there have been warnings go out to the trade, with the result that stocks have been protected. At present it looks as though dealers were pretty well booked. Cut nails are steady on the recent advance to $2.70.

New List on Screws.—The manufacturers of screws have brought out a new price list covering substantial advances. This has not been unexpected for some time owing to the rising cost of raw materials. The new discounts are as follows:

Wood, F. H., bright, 85, 10, 10 per cent.

Wood, R. H., bright, 80, 10, 10 per cent.

O. H., bright, 80, 10, 10 per cent. off list.

Wood, F. H., brass, 67½ per cent.

Wood, R. H., brass, 65 per cent.

The Shoe Findings List.—There have been some complications as the result of the new list on shoe findings printed in detail last week. As has been pointed out, the new basis upon which it is figured makes it difficult for the average retailer to understand. For this reason there are negotiations with the manufacturers in the hope that a new net list may be brought out. In the meantime some of the wholesalers are going to the trouble to prepare a net list of their own.

Fence Wire Higher.—Further advances in the quotations for barbed and other varieties of fence wire have been put into effect. This is another increase following the developments in the steel situation. The new prices and recent advances follow:

	New Price.	Advance.
Barb	$ 3 85	35c
Plain twist	4 32½	...
No. 9, coil spring	3 50	15c
No. 9, plain galvanized	3 45	15c
No. 12, plain galvanized	3 65	20c
No. 13, plain galvanized	3 70	15c
O. & A., No. 10	3 16	15c
O. & A., No. 11	3 22	15c
No. 12, plain galvanized	3 65	15c

Smooth Wire Also.—There is an advance of 15c also on smooth steel wire, the new base being $3. The base with the principal advances above are as follows:

No. 0-9 gauge, $3 base; No. 10 gauge, 6c extra; No. 11 gauge, 12c extra; No. 12 gauge, 30c extra; No. 13 gauge, 30c extra; No. 14 gauge, 40c extra; No. 15 gauge, 55c extra; No. 16 gauge, 70c extra.

Hay Wire Too.—Hay wire is also included in this week's wire advances, the increase here also being 15c. No. 13 is now quoted at $3.05; No. 14 at $3.10, and No. 15 at $3.20.

Staples are Affected.—Both bright and galvanized staples are advanced a further 10c, this increase being directly the effect of the higher quotations throughout the wire market. The new prices are as follows:

Fence staples, galvanized, in geks	$4 05
Fence staples, galv., 25-lb. boxes..	4 30
Fence staples, bright, in kegs....	3 20
Fence staples, bright, in 25-lb. boxes	3 45

Snow Shovels Advance.—Following the general advance on the shovel list, amounting to about 10 per cent., the rising cost of sheet steel thereby indicated has affected the price of snow shovels. There is a general readjustment throughout the list, the new figures being about 10 per cent. higher.

Valves Affected.—There has been a change on the discount allowed on Jenkins valves. Instead of the old basis of 45 per cent., the allowance is now 40 per cent. to 42½ per cent.

Galvanized Sheets.—Despite the advances already made on galvanized

sheets, the market outlook is that there are further price changes in an upward direction likely to be made. Mills are showing practically no interest in orders, and deliveries on contracts are being delayed. The future is very uncertain, and the prospect that until a supply is assured the quotations will tend upward.

Castor Oil Higher.—Several wholesalers announce another advance in the price of castor oil. The quotation of 20c a pound is now heard as compared with 15c a pound in normal times.

Rubber Heels Cheaper.—A decline in the quotations on rubber heels comes as somewhat of a surprise, considering the general tendency of the rubber market. The price is now $2 on men's and $1.75 on women's; former quotations were 25c higher.

Copper Rivets Strong.—As previously stated in these columns, there is a very strong market for copper rivets. The discounts are much more closely followed than formerly, and a change to a higher level seems the logical development of the situation.

Old Materials.—The market for old materials continues generally strong on the advances which have been recently announced. However, for scrap zinc there is a decline from 13½c to 12¾c. Scrap aluminum is being listed at 27c a pound.

Chloride of Lime.—Dealers handling chloride of lime have had great difficulty in getting supplies since the outbreak of the war. Prices are now a couple of hundred per cent. higher than they were before the conflict started, and deliveries from the manufacturers are far behind.

Christmas Lines.—There has recently been a heavy movement of goods suitable for Christmas gifts. So far this has largely been to the country districts, but in the last few days there has been some awakening in the city. Wholesalers report that practically everything in the hardware line which is suitable for a useful gift is in demand.

Cutlery and Plate Ware.—As Christmas favorites, cutlery and plate ware are finding a good demand, and there is also a good call for electric household appliances, etc.

Winter Lines.—The cold weather of the past few days, coupled with a light fall of snow, has caused a better movement of some seasonable lines. This is particularly noticeable in the city, where there has been a reluctance shown towards snow shovels, bells, etc. Both of the lines referred to are now going well, and there is a good demand for hockey sticks, while skates are attracting renewed interest after a lull.

Stoves.—There is a fairly satisfactory demand continuing for stoves. The bulk of the business is from the country, and in the city there is still a lack of interest shown despite the recent cold weather.

TORONTO

TORONTO, Ont., Dec. 9.—Although many important price changes have taken place this week, there is no change of any particular importance to notice in the general situation. Business in the hardware trade continues to improve and prices are firmer in many lines due to the gradual increase in cost of raw materials. The great success of the Dominion war loan should have a beneficial effect on business, as it shows that there is a spirit of confidence in the country, and incidentally a considerable amount of wealth available for commercial enterprises. Seasonable lines such as sleigh bells, skates and other winter sporting and Christmas goods are moving out very well. Heaters are in good demand and stoves are moving well. The trade is ready for the Christmas business and indications point to considerable activity during the holiday season. Colder weather will no doubt stimulate business in some lines. Some delay is reported in getting shipments of goods from the States owing to congestion on the railways; this is more noticeable with regard to car-load shipments.

NEW DISCOUNTS ON WOOD SCREWS

The advance predicted by Hardware and Metal on wood screws has materialized and the discounts quoted for Montreal, Toronto, Hamilton and London are now as follows:

Flat Head Bright—85-10-10% *off*
Oval Head Bright—80-10-10% *off*
Round Head Bright—80-10-10% *off*
Flat Head Brass—67½% *off list*
Oval Head Brass—65% *off list*
Round Head Brass—65% *off list*
Flat Head Bronze—60% *off list*
Oval Head Bronze—57½% *off list*
Round Head Bronze—57½% *off list*

Terms 2% thirty days.

Price Changes.—A number of important price changes have again to be noted this week. Notwithstanding the many advances which have been made during the past few weeks, the tendency is still in an upward direction. Conditions in the iron and steel trade do not improve and prices of finished and semi-finished steel continue to advance. A number of hardware lines are affected and consequently higher prices may be expected. Some of these advances have been predicated in Hardware and Metal; among these are the following: wire nails, lead pipe and wood screws. Other lines which have advanced include smooth steel wire, hay wire, oiled and annealed wire, fence staples. Makers have advanced prices of screw hooks and strap hinges, and jobbers will consequently be obliged to follow suit, although they have not fixed a new price as yet.

Iron and Steel.—The market is very firm and prices have a higher tendency all round. The volume of business being done is larger than it has ever been and the mills are unable to meet all the demands. The steel companies are booked up for months ahead principally on tonnage for shells, although a large export business is being done in other lines of steel products. The steel trade is passing through a period of prosperity, the like of which was never before experienced. The steel companies, although working night and day, cannot keep pace with the demand, and are therefore getting behind on deliveries. The demand for steel for shells is taxing the capacity of mills to the limit, but plants are being extended to take care of the increased business.

Prices on finished and semi-finished steel products are very firm and have a higher tendency. Lap-welded boiler tubes have advanced and boiler plates are expected to advance. Steel bars are very firm at 2.75c base and iron bars are 2.50c base, and higher prices are expected in the near future. Prices of Pittsburgh bars, plates and shapes are still withdrawn and the situation is unchanged.

In the United States market, the advance in prices continues, and the difficulties of quoting the market are increased by the inability of many producers, particularly on billets and wire rods, to take any of the business offered. As regards buying of shell steel, deliveries reaching to November, 1916, are now being considered in connection with business from one country in Europe. The market for large rounds is very strong but rather less active.

Pig Iron.—The market continues very strong and prices of all American brands of pig iron have advanced. It is reported that a shortage of iron is threatened, particularly at Buffalo. All quotations on charcoal irons have been withdrawn by the principal Lake Superior district producing interests. Lake Superior charcoal iron has advanced to $17.75 Chicago, and grey forge to $16.95 Pittsburgh. Hamilton and Victoria brands are firm but unchanged at $23 per ton.

Machine Tools.—The situation in the machine tool market is unchanged. Dealers are very busy figuring on shell equipments and have lately sold a number of lathes for machining 6-in. lathes. An interesting feature in the trade is the development of special machines for making shells and shell parts. This work is keeping a number of smaller machine shops actively employed and the larger concerns are also very busy turning out machinery for making shells. Machine shops continue to work at full pressure, both those making shells and those making machinery for shells.

Old Materials.—The market generally has a weak tendency, but prices are unchanged, except for No. 1 wrought iron, which is stronger and has advanced to $9.50. Heavy melting steel is in good demand, as also are the different grades of copper.

Metals.—There is an easier tendency in the market this week and both tin and spelter have declined. The tin market is dull in London, the weakness being attributed to the increase in visible supplies. The spelter market appears to be demoralized in New York, following a decline in London. The copper market is quiet and prices nominal. There is no change in lead and the market is dull.

Antimony has an easier tendency and aluminum is also unchanged.

Tin.—The tin market continues to decline to a more normal basis. The recent sharp advance was quite unwarranted and the market will no doubt get back to the price prevailing immediately previous. The visible supply is increasing and there is less fear of any shipments being lost through submarine operations. The local market is weak and has declined 1c, tin being now quoted at 45c per pound.

Copper.—The local market is very quiet and will probably remain in this condition for the next two or three weeks. The recent buying movement has died down and the tendency will be for consumers to stay out of the market for the balance of the year. The market has become a purely nominal one and quotations are unchanged at 20¾c per pound.

Spelter.—The market is demoralized in New York, and there is a lack of support on the part of the large interests. The market has been following London and a sharp drop there affected New York. Buyers are holding off and prices are nominal. Spelter is weak locally and has declined 1c, being quoted at 20c per pound. Zinc ore is quoted from $100 to $115, Joplin, Mo.

Lead.—The market is dull and featureless, the "Trust" price of 5.25c being still held at New York. Local quotations are unchanged at 7c per pound.

Antimony.—The market is dull and prices remain about the same on all positions. Antimony is unchanged locally at 40c per pound.

Aluminum.—The market is easier, but prices are unchanged. Supplies of aluminum are coming in rather more freely, which will have a tendency to weaken the market. Local quotations are unchanged at 65c per pound.

Solder.—The market is weaker, following the decline in tin, and prices have declined approximately 1c per lb. Prices of solders are given in the current market quotations.

Wood Screws Advance.—In a recent issue of Hardware and Metal it was stated that higher prices for wood screws were expected on account of the increase in cost of raw materials. The new discounts are shown in a panel elsewhere and represent an advance of about 7½ per cent.

Wire Nails Again Advance.—After the last advance in wire nails it was stated in these columns that a further advance would be made. Wire nails are now $2.85 base for keg, representing an advance of 10c. Considering the conditions prevailing it is highly probable that wire nails may still go higher within the next month or two. Cut nails are firm at $2.90 per keg, a new price quoted last week.

Wire Advances.—Higher prices for smooth steel wire were announced quite recently. This has been followed by another advance of 15c, making the new price for No. 0-9 gauge $3 base.

O. & A. Wire Also Advances.—On account of the advance in smooth steel wire, new prices have been made for oiled and annealed fence wire. The new prices are 15c higher and are given below. Prices of barb, coil spring and galvanized wire are still withdrawn and quotations are for immediate acceptance only.

O. & A., No. 10	$3.16
O. & A., No. 11	3.22
O. & A., No. 12	3.25

Hay Wire Up.—Hay wire in coils has advanced 15c, following the advance in wire. The new prices are as follows: No. 13, $3; No. 14, $3.10, and No. 15, $3.20.

Lead Sheets Higher.—An advance has been made on lead sheets which are now quoted as follows:

Sheets, 3 lb. sq. ft.	$9.50
Sheets, 3½ lb. sq. ft.	9.25
Sheets, 4 to 6 lbs. sq. ft.	9.25

Lead Pipe Higher.—Higher prices are announced for lead pipe, which has advanced 50c per 100 pounds. The new prices are as follows: Lead pipe, $10, and waste pipe, $11 per 100 pounds.

Fence Staples Advance.—Fence staples have again advanced and are now up 10c per 100 pounds. The new prices are as follows: Fence staples, galvanized, in kegs, $4.05; in 25-lb. boxes, $4.35; bright, in kegs, $3.20; and bright in 25-lb. boxes, $3.45. Poultry netting staples are unchanged.

Screw Hooks. — Manufacturers of screw hooks and strap hinges have raised their prices, so jobbers will make an advance in the near future.

Fittings.—Prices of malleable and cast iron pipe fittings are very firm and it is possible that before the end of the year there will be a revision of discounts in an upward direction.

Galvanized Sheets.—The situation in the galvanized sheet trade does not improve. Manufacturers are handicapped by a shortage of steel, which affects black sheets, a scarcity of acid, and the high price of spelter. Prices are very firm at the recent advance and there is every probability of another advance in the near future unless the situation becomes considerably easier.

Wrought Iron Pipe.—The market is very firm, but prices are unchanged. The continued advance in iron and steel will probably make it necessary for pipe makers to raise their prices. The current price list is given in the market quotations.

Raw Furs.—The outlook in the raw fur trade is promising. At the beginning of the present season, dealers were pretty well cleaned out of fur; there will thus be a good demand to replenish stocks. A good demand is anticipated for manufactured furs, a corresponding demand for raw furs is thus expected. The quality of the furs, considering the early season, has been unusually good and a large catch is anticipated, as last season the trappers were not so active and the catch was light. There is now, of course, a duty on furs which will be an advantage, as there will be a better market for Canadian-caught furs when for domestic consumption. Altogether, prospects in the trade look good and higher prices are expected to rule for all kinds of furs.

Cutlery.—The cutlery situation in Sheffield, England, is daily getting more acute. Manufacturers are advising that orders can only be accepted at prices prevailing on date of shipment. The difficulty of getting shipments is increasing owing to shortage of ocean tonnage. Local stocks of cutlery are fairly good, but some grades of pocket knives are practically out of the market.

LONDON

LONDON, Ont., Dec. 9.—Christmas lines are moving well, and there is a good demand for winter hardware lines. There is a scarcity of some lines of cutlery, and finished and semi-finished steel goods, but no serious shortage.

Many important price changes have taken place this week. Wire nails, O & A wire, fence staples, fence hooks, poultry netting staples have all advanced in price. Wood screws have advanced 7½ per cent. in bright and about 20 per cent. in brass. An advance in glass is expected by next week. Prices on poultry netting are withdrawn as announced some time ago and new quotations have not yet been issued.

Wire and Nails Advance.—An advance of ten cents per keg in the price of wire nails has gone into effect and the new price is $2.85 base. Cut nails are now quoted at $2.95 base. O & A wire has advanced 15 cents per 100 pounds and is quoted at $3 base. Net prices on some sizes are as follows:

No. 10, $3.16 per 100 lbs.; No. 11, $3.22 per 100 lbs.; No. 12, $3.30 per 100 lbs. Hay baling wire, No. 14, is quoted at $3.40 per 100 lbs. Although no change has taken place this week on galvanized fence wire, higher prices are expected in the very near future. Barb wire is quoted at $3.30; No. 9, galv., $3; No. 12, galv., $3.15; No. 13, galv., $3.25. No. 9 coil spring is quoted at $3.05.

Staples and Hooks Advance.—Fence staples have advanced ten cents per keg and quotations are now as follows: Galvanized, in 100-lb. kegs, $4.05 per 100 lbs.; 25-lb. boxes, $4.30 per 100 lbs.; bright, in kegs, $3.20 per 100 lbs.; 25-lb. boxes, $3.45 per 100 lbs.; fence hooks are now quoted in kegs at $4.05 and in 25-lb. boxes at $4.30 per 100 lbs.

A new price has been issued on galvanized poultry netting staples, and quotations are now as follows:

100-lb. kegs, $6.05 per 100 lbs.; 50-lb. kegs, $6.35 per 100 lbs.; 25-lb. kegs, $6.45 per 100 lbs.; 10-lb. kegs, $6.85 per 100 lbs.

Screws Advanced. — Bright wood screws have advanced 7½ per cent.; brass screws have advanced about 20 per cent. New discounts are as follows:

Flat head, bright, 85, 10, 10 per cent.; Oval head bright, 80, 10, 10 per cent.; round read bright, 80, 10, 10 per cent.; flat head brass, 67½ per cent.; oval head brass, 65 per cent.; round head brass, 65 per cent.; flat head bronze, 60 per cent.; oval heal bronze, 57½ per cent.; round head bronze, 57½ per cent.

WEEKLY PAINT DEPARTMENT

Accounting For Big Increased Sales

Eugene Codere, Sherbrooke, Que., Gives Reasons Why Some Lines Have Shown Increases of From 25 to 100 Per Cent. Annually—Aluminum Paint Trade Jumped 500 Per Cent. in Five Years—Boosting a Good Line

"WHAT is the secret of of a successful paint department?" This question was put to Eugene Codere, president of the Codere Hardware Co., Sherbrooke, Que., whose new store was described in last week's issue of Hardware and Metal. "We find," he said, "that the best way to push paint is to keep only one brand, but that must be a good one. When you carry half a dozen lines, and you show Smith's brand, Jones', and then Blank's, he invariably asks 'which is the best?'

"Now, when a clerk is confronted with that question, he is liable to be fooled if he doesn't know for sure which is the best. We keep just one brand, a brand that is advertised, and we know it's the best—that's enough. I am sure of this, that if we handled what was not thoroughly reliable we could not do so well in this department.

"While we handle only one brand, we carry two qualities. Invariably we can show the customer that it pays him to use the best paint. How? Well, we point out that it is easier to spread for the man who lacks experience, and it is a color that will not fade as quickly as the cheaper kind.

A 25 Per Cent. Increase

"Our efforts right along have been centred on selling more of the good paint, and less of the cheaper one. We have done considerable advertising locally in conjunction with the manufacturers. This has resulted in a twenty-five per cent. increase in the sale of good paint annually for the past five years. Even with the fire this year, which destroyed our premises, our increase was 25 per cent. Five years ago we sold 400 gallons of each per year; this year the output was 1,800 gallons of the better quality and 500 gallons of the cheaper one. Thus, five years ago as much of one was sold as the other, whereas to-day the sales of good paint are nearly four times those of the cheaper quality.

Have Fewer Complaints

"It pays us, because the best kind gives us a bigger profit, and it pays the customer as well. There are far less complaints. It used to be that a man would come in and purchase a cheap can of paint and find it unsatisfactory. He brought it back, and we either had to return it to the manufacturers or sell it as a job."

"Have you noticed increases in any other line of this department?" Mr. Codere was asked.

Big Jump in Sales of Linoleum Varnish

"One of our biggest increases," he replied, "has been on linoleum varnish. The public are beginning to appreciate what a splendid thing this is for preserving their linoleums. It stops the wearing. We tell our customers that if they use this preparation, their linoleum will last twice as long. It is the same as hardwood; if you keep it waxed it will last much longer and look better than if you didn't.

Advice to Customers

"There has also been considerable improvement in the demand for ready-mixed varnishes for furniture. When a man comes in for varnish and tells us it is for a bureau or a chair, we advise him we have something that will make his furniture like new. Instead of selling him plain varnish, we give him a varnish stain, which takes out the spots, and gives a shine like the common varnish would. The customer always appreciates this advice; often we have women come back and tell us it is the best thing they ever had for that purpose.

"The sales on this line have been jumping 20 per cent. a year, and we have been handling it for eight years. We used to sell five or six dozen, whereas now we sell a hundred dozen. This has been done by simply handing out advice to customers, who tell their friends, and who in their turn come to the store for the same varnish as their friends have had.

A 500 Per Cent. Increase

"In this part of the country we sell a lot of aluminum paint. There are very few houses that do not use it for the stove pipe, the hot water tanks, and all the piping. There are some people who paint their stoves with aluminum paint."

Mr. Codere drew attention to the fact that this paint had been used in his new store, and that it was almost impossible to distinguish the pipes when the light was on.

"We push this line, and the sales have jumped 500 per cent. in five years. It is coming more and more into use as a substitute for black japan. It is rather inexpensive, too, as it goes a long way. I think it looks neater than black, and is not noticed so much.

A Panel for Brushes

"As regards brushes: we have not been conspicuously successful with this line in the past, partly, I think, because we did not display them. In the new store we are having a special panel inserted in the wall next the paint department, which I have no doubt will have a beneficial effect on the sales."

OUTLOOK IN PAINT TRADE

Optimism is the prevailing note in the paint trade to-day, and this is no doubt the correct attitude to take. The mainstay of the trade for the next six months at least will be the country trade and this is an important factor, as spring bookings will occupy the attention of manufacturers and dealers during the coming months. There is no doubt that conditions in the country districts are distinctly satisfactory. Record crops have been gathered in which spells prosperity to the farmer and enables him to buy those goods necessary for the upkeep of his property.

Many factories in the smaller industrial centres as well as the cities are actively engaged on war orders which brings wealth to the centres affected. Paint being an important factor in the preservation of buildings and plant must therefore be used and can be purchased as financial conditions will permit.

It is generally agreed that there is a more confident spirit prevailing throughout the entire community than existed say twelve months ago. Dealers have not been slow to notice this and are prepared to carry heavier stocks, knowing that the chances are in favor of their being disposed of. The probability of higher prices for mixed paints is a further incentive for placing orders now. A rep-

resentative of a prominent paint house in Montreal stated recently that although this year's business had been better than was anticipated, next year, by all indications, would be a record. His opinion was based on conditions as he had found them during an extensive trip through the Province of Quebec and the Maritime Provinces.

WEEKLY MARKET REPORTS

(Continued from page 45.)

WINNIPEG

WINNIPEG, Dec. 9, 1915.—With the first week in December past, the jobbers of Winnipeg, state that Hardware and Metal's predictions for an increased amount of business are being upheld. The rush of orders has not stopped in any way and it would seem as though the results for this month will exceed all former calculations. There is a big demand for all lines of Xmas cutlery and sporting goods and the Xmas trade this year will far exceed the business of the past couple of years.

There are quite a number of changes to report this week and a note is made of same herewith.

Black sheet steel prices have advanced 45c per 100 lb., this being due to the scarcity and increased cost of the raw material. No. 28 gauge is now quoted at $4.05 per 100 lbs.

Galvanized Sheets.—It was only to be expected that this line would increase in price as black sheets have increased in price, and are very difficult to procure. Apollo galvanized sheets are now 40c higher than our last quotation, the price to-day for 10¾ oz. being $6.25 per 100 lbs.

Shovels and Spades.—New prices have been made in these lines by D. F. Jones Mfg. Co., and the Canadian Shovel and Tool Co. The Jones polished square point is now being quoted at $9.05 per dozen and the Fox and Olds being quoted at $7.70 per dozen. In addition to these lines, snow shovels have also advanced proportionately.

Canada Plate.—The half polished show an advance of 20c per box, and the full polished 5c per box.

New base prices have also been made on bar iron of $3, sleigh-shoe steel $3.25, spring steel $3.75, machinery steel $4 and Black Diamond tool steel $9.50.

Linseed Oil.—The $1 mark has been reached and passed in to-day's quotations for this commodity. Boiled linseed oil now selling at $1.01 per gallon, with the raw oil 2c less.

Wire Nails Advance.—Wire nails have again advanced 10c per keg and manufacturers seem to feel that further advances will be in order before many weeks. Other lines of wire products to be affected are bright annealed, oiled and annealed, tinned and coppered wire, which each show an advance of 15c per 100 lbs. Fence staples have also advanced another 10c per keg.

The wire market seems to be very steady under the influence of the recent advances, and it would appear that with the enormous demand these prices will not hold good for any great length of time.

Prices have been made on different lines of belting, grease cups, and oil cups, and various other lines of thresher supplies for the coming year, and we think it would be well for all merchants to protect themselves at to-day's ruling figure. We cannot anticipate just to what extent the markets of these various lines will be affected, but it is safe to assume that after the first of the year there will be revised quotations made on all lines into which steel, brass or copper enter the manufacture.

SHEET METAL WORKERS' COURSE

(Continued from page 38.)

apart equal to the width as at E F or G H. Draw a line at right angles to P R, connecting it to S T. From P and S mark off the distance B-1 on side view and from the point 1 when obtained, mark off the distance 1—D on side view, connect the points thus obtained as at R T, thus completing pattern on line B—D.

The end to which round pipe collar is attached is a square having two of its sides equal to C—D in side view and the other two sides equal to G H in front view, as shown by C—D and G—H. Outside these lines are marked the laps required to attach end to body of bullhead. When putting together as shown the laps are cut off on a good angle at the corners, and are then formed as shown at X. When the end is slipped on body, it leaves the corners of body clear of the laps on the bottom. These are then turned in with pein end of the hammer, thus holding bottom on securely.

To obtain patterns of piece shown in Fig. 2 it is first necessary to draw the side view and a front view. In this case let A B C D be the side view and E F G H the front view. As the back of side, as on line A C, is straight, it follows that the front view, E F G H, is outline of pattern required for the back as shown on line A C. To obtain pattern on line B—D draw a line as X—X on this line; mark off the distances B—1, 1—2 and 2—D on line B—D of side view; draw lines from these points on line X—X and square from it on both sides. Divide front side in equal parts as shown by line P—S. From this line measure the distance to E or F and mark same on line B drawn from line X—X. As the distance from line P—S is same at E and F and at 1 and 2, mark same distance again on line 1 on both sides of line X—X. Measure from line P—S to point 2; in this case point G and H correspond to point 2. Mark off this distance from X—X on lines 2 and D; connect the points and complete outline of pattern of front as shown by B—D of side view.

To obtain pattern of the two sides, in this case both sides are alike. Draw a line as K—L. On this line mark off distances E to 1, 1—2, and 2 to G of front view; from these points on K—L draw lines at right angles, extending them out at least the width of pipe. Measure the distance from A to B and 1 to 1 on side view—in this case they correspond—and mark out from line K—L on lines K—M and 1—1; measure distance 2—2, and C—D on side view and mark off from K—L on lines 2—2 and L to N as shown. Connect points, completing outline of pattern of side.

A CENT'S WORTH OF ELECTRICITY

(Continued from page 36.)

cleaner has solved the problem of the horrors of housecleaning; it can be kept busy with the aid of electricity for a cost of two cents per hour. The electric fan will bring a good imitation of country breezes to the home or office in the heart of the city and the cost of operation is from one cent per hour to five hours for one cent.

In making these illustrations of cost of operation the humble cent is taken as the smallest fraction of our coinage system. However, it can be explained that it is not necessary to use up one cent's worth of electricity every time the appliance is used. A curling iron heated at a cost of half a cent an hour could be used for many days for a humble penny.

Make a Display

The theme of this article is to show the retailer where he can create a nice little side line by making his customers properly acquainted with electrical appliances, what they will do and the cost of making them do it. This is based upon lack of general knowledge of operating cost of the articles referred to. And yet this lack of knowledge can be made a material asset from an advertising standpoint. An attractive display of these appliances where the public can examine them is bound to attract attention if for no other reason than curiosity; that curiosity can be turned into buying interest with a little initiative in salesmanship. People know of these new inventions through seeing attractive illustrations in advertisements in our leading publications; they know of them, but not about them. Retail merchants by studying the advertisements in the trade papers can learn a great many selling points regarding the leading electrical devices that are being offered to the trade.

A CORRECTION

On page 36 of the December 4 issue of Hardware and Metal it was inadvertently stated that A. A. Letellier, of the Kingan Hardware Co., Peterborough, had secured fourth prize in a window display contest. The item should have stated that Mr. Letellier had won third prize.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Dec. 9.—The close of navigation, together with the setting in of actual winter, not to mention the holiday season, deflects practically all the hardwareman's interest in the paint trade to the spring situation. Dealers report that conditions are satisfactory, and that there is a good volume of orders being booked. In this connection there is a marked improvement over a year ago, and the outlook is for a better spring season, although a normal demand cannot be looked for while the abnormal conditions prevail. An important factor is the fact that prices on ready-mixed lines, while high, are very firm. There is nothing to indicate that there will be any material relief for some months at least, while, on the other hand, a continuance of the present high cost of raw materials is likely to result in even higher prices and further advances would be certain to have this effect. At the present cost of manufacture, paint is a very good buy and the trade seems to be appreciating this.

Linseed Oil.—There has been little change in the general situation in the linseed oil market. For several days the fluctuations have been within a narrower range with the general tendency firm. To the trade the big spread in quotations as between the different jobbers continues, some following the market and others being satisfied with encouraging a larger share of the small demand by basing profits on low price stocks (bought before the advance) and taking much lower figures. Thus there is still the high quotation of 87c and 90c for raw and boiled respectively, and this is said to be quite warranted by the present position of flax, while one firm maintains the old figures of 79c and 82c. Between the two there are different quotations from practically every jobber with the majority, seemingly, about half way between. The usual allowances are made on the different prices for quantities above the single barrel.

Turpentine.—There is still a firmer tone noted in the turpentine market with the different jobbing houses drawing closer together in their quotations. The result is that the range in prices is narrower with the top figure of 83c pretty well maintained. The following figures indicate the market:

1 barrel lots 82c-83c
2 to 4 barrel lots 81c-82c

White Lead.—The market for white lead is steady at the recent advances and there is no indication of easier prices for futures, unless there is some unlooked-for development. This firmness as regards futures is indicated in the fact that the heavy consumers are placing orders freely for spring delivery. To the general trade there is little movement at this season. The basis is $10.05 with 30c added for less than tons.

Gasoline and Benzine.—There are important advances this week in gasoline and the movement has continued fairly active on the rising market, despite the close of navigation. The new and old quotations are as follows:

	New	Old
Gasoline in wood	26c	24c
Gasoline in drums	23½c	21½c
Gasoline, tank wagon	23c	20½c

Oils Firm.—There have been heavy advances in the prices of crude oil, amounting to something like one hundred and fifty per cent. since the outbreak of the war. Under this influence the market for refined oils has been very firm and it is expected that advances will not be much longer deferred.

Paris Green.—Although the new quotations for Paris Green will not be out for a month or so, there is considerable interest in the market. Reports indicate that owing to the difficulty in getting materials and the higher cost thereof that the new prices will show an advance.

TORONTO

TORONTO, Ont., Dec. 9.—An interesting item to note this week is the new window glass list which went into effect on December 8. It has been claimed by jobbers for some time that higher prices were inevitable. The cost of glass, so the jobbers state, had become so high that the margin of profit was too small to make the business at all attractive. Linseed oil has advanced again, and the flax seed situation is becoming serious, as supplies are scarce and coming forward in very small quantities. Turpentine has also advanced, and the market is very firm. Mixed paints are unchanged, but firm, as nearly all raw materials have advanced since the last change. Business in the trade for immediate shipments is quiet, but prospects for spring bookings are good.

Linseed Oil.—The market is upset on account of the flax seed situation. The flax acreage was comparatively small, and a considerable quantity of seed still remains in the farmers' hands, seed consequently is scarce and high. There is practically no seed coming to the crushers, and little prospect of any quantity for some time to come. Crushers cannot say what oil would cost to produce at the present price of seed, and there is very little linseed oil in the hands of the jobbers at the present time. Consequently the oil market is very firm, and higher prices are anticipated. Oil has advanced 2c this week, and the range varies from 84c-87c to 87c-90c. The following prices are more generally being quoted in Toronto:

	Raw.	Boiled.
1 to 2 barrels	87c	90c per gal.
3 to 5 barrels	86c	89c per gal.
6 to 9 barrels	84c	87c per gal.

10 barrels and over, open.

Turpentine.—The local market is very firm, and prices have advanced 2c per gallon. The market at Savannah is higher and very firm. Stocks of turpentine in Toronto are light, and there is very little demand, but the primary market is holding the local market firm. Resin is high, and the market very firm. Resin "G" quality is quoted at 3½c per pound gross weight. The following prices are being quoted for turpentine in Toronto: 1-barrel lots, 87c; 2 to 4-barrel lots, 86c; and 5-gal. lots, 94c per Imperial gallon.

Glass—New List Issued.—There is practically no Belgian glass on the market, and dealers have been paying high prices for American glass, but selling at the old list until very recently, when some slight increases were made for certain sizes. The new list is practically the same in form as the American list, and is based on American costs. The breaks have been revised to suit new conditions, and are now on a more equitable basis. The new prices represent an advance of approximately 25 per cent., and are given in the current paint market quotations.

Gasoline and Benzine.—Crude oil has passed the $2 mark, and is still going up gradually. It is, therefore, more than likely that gasoline will advance in the near future. There is a scarcity of gasoline owing to curtailment of production in Europe and increased consumption on this side. Gasoline is quoted at 25½c and benzine at 25c per gallon.

White Lead.—The market is firm at the last advance. The pig lead market, although weaker, is unchanged.

Putty.—The scarcity of whiting and high cost of same, owing to high ocean freight rates and shortage of labor, is making the price of putty very firm. Linseed oil is also getting more costly; putty may as a result be advanced. The following prices for standard putty in less than ton lots are being quoted in Toronto.

	Per 100 lbs.
Bulk, in casks	$2.50
Bulk, in 100-lb. drums	2.70
Bulk, in 25-lb. drums	2.80
Bladders, in barrels	3.10

Pure putty, 60c per 100 lbs. advance.

B-H

The LEAD Element
and
The ZINC Element
in
B-H "English" Paint

B-B

Every ounce of every pound of all the white base in every can of B-H "ENGLISH" Paint contains 70 units of pure BRANDRAM'S B.B. GENUINE WHITE LEAD to 30 units of pure White Oxide of Zinc. This gives B-H "ENGLISH" PAINT its character and herein it differs from all *other paints*.

There is a point where the excess of any one ingredient is liable to injure or neutralize the effect of the other ingredients. That's why 30% and 70% become the right proportion of White Lead and Zinc in the best house paint.

B-H "English" Paint

Our absolute guarantee of these proportions gives the dealer a forcible and effective selling argument. Write us to-day about our selling plans for 1916.

Strongest

The BT Step Ladder has an all-Steel Top and the Steel Hinge is riveted to it. This holds the risers firmly, and preserves the ladder years after any other ladder has become weak and wobbly.

Safest

Every step is braced with an iron rod and bound to the sides with a galvanized steel plate. The back, too, is bound with iron. The BT Ladder must stay rigid even when given the very roughest usage, indoors or outdoors.

Best

Recommend the BT Iron Bound Step Ladder to your customers. It outlasts a dozen of the cheaper styles. They will always find satisfaction in using it, for they can climb to the very highest step without wobbling or tilting and without fear of a fall.

We also make BT Extension and Fruit-picking Ladders—BT Well and Cistern Pumps, BT Washers and Power Washers, BT Ladders, BT Water Bowls and Tanks, BT Hay Carriers, BT Oat Bowls and Feed Racks, BT Barn Door Track, BT Grain Grinders, BT Butter Workers, and Butter Boxes.

Be sure that you have the BT General Catalog No. 23.

MARTIN-SENOUR
PAINTS AND VARNISHES

(Made in Canada—Sold on Merit)

PIONEERS

of

PURE PAINT

and STILL FIRST in the estimation of PAINT USERS.

If your paint department is to be a success the first essential point is the quality of your line. Sell good paint or none at all. You can expend a vast amount of energy in this branch of your business, but if your paint is not of the right standard, your efforts are wasted.

MARTIN-SENOUR 100% Pure Guarantee Protects the Dealer Agent as Well as the Customer.

The Exclusive Agency for Martin-Senour Paints and Varnishes will give to your Store the reputation of being the place to procure goods which are unsurpassed for Quality.

Next to this it is most important that the line you carry is known to paint users.

Martin-Senour Paints and Varnishes have been brought to the attention of paint users by a more comprehensive campaign through various mediums of the press, interior and exterior displays, mailing campaigns, follow-up systems, etc., than has ever been attempted by a paint company in Canada. The result has been increased sales to the dealer agents.

This policy will be continued and extended during the coming season — connect your paint department with it.

An increase in your Paint sales for 1916 will be doubly assured if you secure the Exclusive Agency for this line of Goods in your community.

No better time than now to get details of our profitable Proposition.

Drop us a line to-day.

DID YOU EVER TRY TO DOUBLE YOUR PAINT SALES ?

Many paint dealers have done it before now—you probably know some of them. Go after the business that is to be seen all over your locality, in the right way, and you can easily double your business.

Paint does not sell itself any more than life insurance does. It's the man who goes after the life insurance business or the paint business who makes the big sales and secures the big profits. With the Canada Paint Co.'s products in your store you can build up a demand for them before spring painting has fairly started.

It took us twenty-five years to discover the way—but we know the secret now. We will tell you, if you want to double your paint sales.

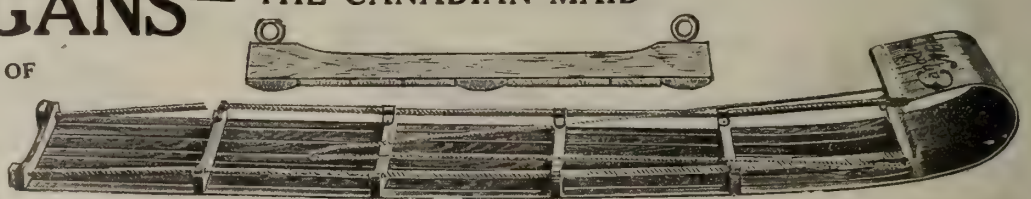
ROCK ISLAND MFG. CO.
Rock Island, Illinois

TOBOGGANS—"THE CANADIAN MAID"

TWO GREAT FEATURES OF "THE CANADIAN MAID"



First—The Raised Front. For about eighteen inches the front of the toboggan has a gradual slant. Result—the toboggan does not PUSH the snow in front of it, and thus you have GREATER SPEED, AN EVEN AND COMFORTABLE MOTION and a LONGER RIDE. Note this sketch—which shows how other toboggans without this feature shove the snow along.

Second—The Three Runners—which give emphasis to the above-mentioned feature and which guarantee safety, as it aids in controlling the toboggan. The runners hold the toboggan to the track. With two, six or eight passengers, the "Canadian Maid" No. 4 toboggan is equally easy to control, the runners helping materially. Accidents have occurred which can be explained by the fact that the usual flat-bottom toboggan was used. Iron and steel Runners fitted at slight additional cost.

PACK-TOBOGGANS A SPECIALTY. Full information on request. Write for Prices and Dealers' Discounts.

WALTER DEAN .·. Foot of York Street .·. TORONTO, CANADA

Like the onward march of the glacier, the force of example is irresistible, but infinitely slow. Advertising, however, is like the snowstorm that covers the country in a single night—but don't forget that if you want to keep the country covered you have got to keep the snow falling or the heat of competition will melt it.

Why Not a Power Washer and Wringer?

They do everything but hang out clothes.

They run by Electric, Engine or Windmill Power.

They meet every need of the city or country housekeeper.

CUMMER-DOWSWELL, Ltd., Hamilton, Canada

Christmas Window Contest

FOR *many years past it has been customary for Hardware and Metal to conduct a Christmas window display contest each year. The contest has become an event of wide interest for all Canadian retail hardwaremen interested in window trimming, and each succeeding competition has been keener and each year has seen a wider and more representative response, culminating in the big success of last year.*

In accordance with past custom, two contests will be conducted this year—one for stores in places under 5,000 population; the other for places of 5,000 and over. No restrictions will be set on the style of display or the goods used in the arrangement, except that each window must be arranged with goods for the Christmas trade.

Eight prizes will be offered as follows:—

PLACES OF 5,000 AND OVER		*PLACES UNDER 5,000*	
First Prize	$10.00	*First Prize*	$10.00
Second Prize	5.00	*Second Prize*	5.00
Third Prize	3.00	*Third Prize*	3.00
Fourth Prize	2.00	*Fourth Prize*	2.00

Contestants will note that an equal number of prizes are offered to the small town window trimmer as to those in the larger towns and cities.

The contest closes on Friday, December 31. No photos received after that date will be entered unless there is proof that they have been delayed in transit.

All matter should be addressed to "The Editor, Hardware and Metal, 143-153 University Avenue, Toronto," and marked "For Christmas Window Contest."

97 Ontario St., Toronto, Canada

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

Big Profit and Satisfaction in Selling

"AYLMER" Force Pumps

They are certain to sell easily because it has several advantages over the ordinary style.
Has longer stroke, more power, and works easier.
While designed for hand use it can be readily converted into a Windmill Pump by the addition of a flat bar, which screws into the cross head at top.
It will be to your interest to write for full particulars now.

Aylmer Pump and Scale Company, Limited
Aylmer, Ont., Canada.

FOOD CHOPPERS

ROBERT DONALDSON & SONS - - - - MONTREAL

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and a clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace—made for machine. Packed singly—packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

What About Brooms? Get Our Prices Now

We invite you to investigate our proposition. All our brooms are made in Canada from the finest American corn obtainable. We are making a broom which is superior to any other on the market, but not higher in price.

ESTIMATING. BY EDWARD NICHOLS, Architect. 128 pp., 22 illus. Cloth binding. Containing invaluable information for the use of Architects, Contractors, Builders, Plumbers and Heaters, Painters, Roofers, Cornice-Makers, and other workers in the building trades. This handbook tells just how to go about the task of making an estimate intelligently. Price, postage paid, $1.00. MacLean Publishing Co., Ltd., 143-153 University Ave., Toronto.

The "PERFECTION" Steel Ankle Support

PAYS A GOOD PROFIT AND WILL INCREASE YOUR SKATE SALES

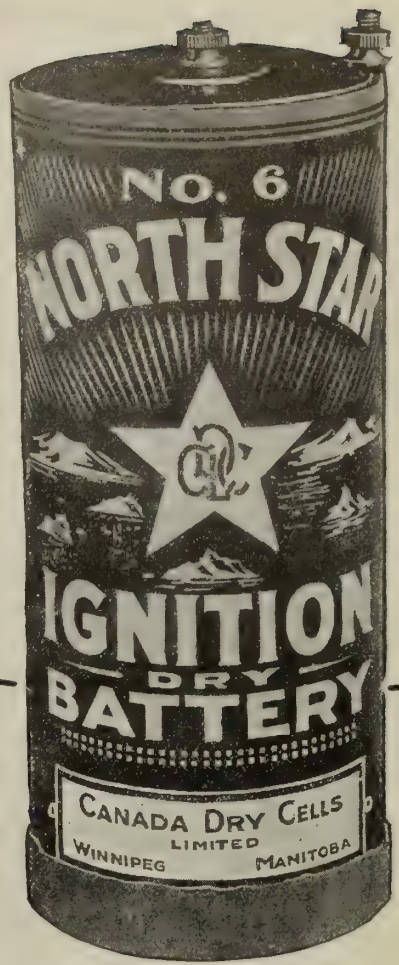
Weak ankles keep many a person from enjoying the splendid winter pastime of skating.

Stock and boost the "Perfection" Ankle Support —it is just the thing for weak ankles.

The sale of the "Perfection" will lead to many others and you'll realize a material increase in your skate sales as a result, because people who heretofore couldn't skate on account of their weak ankles can get in on this splendid winter sport by wearing this ankle support —the more that skate the more is the demand for skates.

Owen Sound Steel Press WORKS

Owen Sound Ontario



"North Star" Dry Cells

give a measure of service that makes them

Cost Less in the End

Their big service is sure to bring the buyer back for more—it is appreciated more than ever since the raise in price of dry cells.

The Western Battery for the Western Need

Stock these favorites now and ensure an increase of dry cell turnover.
Order through your jobber —he'll ship you promptly.

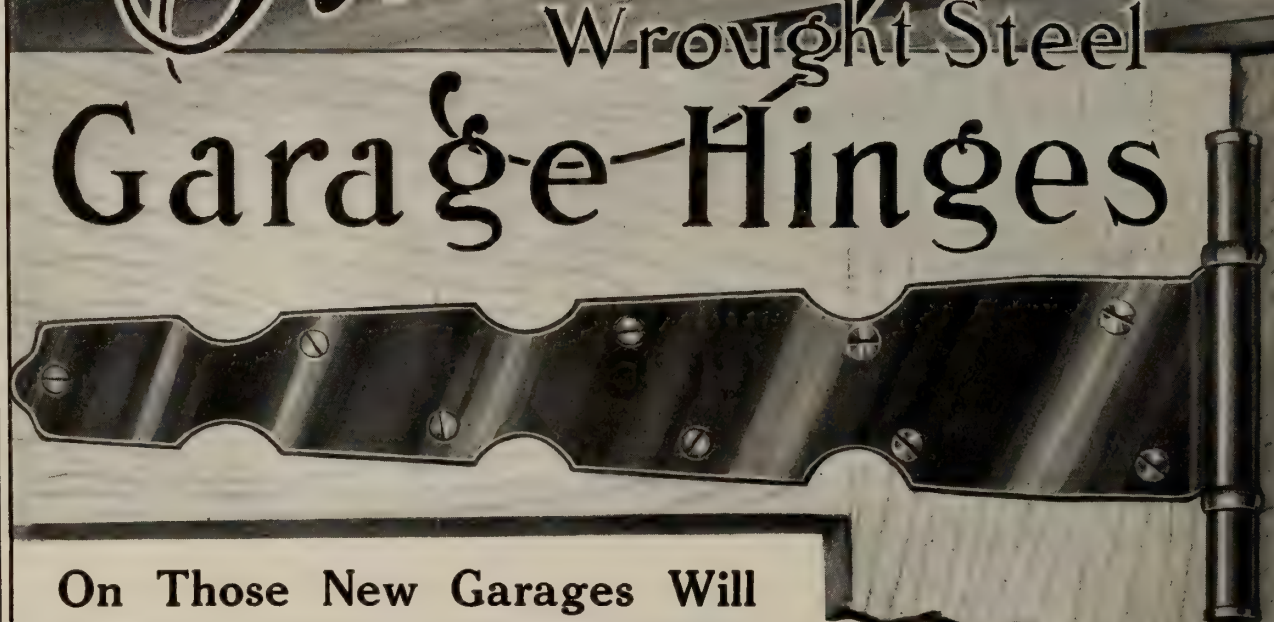
Stanley's Wrought Steel Garage Hinges



On Those New Garages Will Permit Closing Doors Tightly

10—24 and 36-inch sizes.

Equipped with Stanley Patented Ball Bearing Washers.

No. 1457—10 and 24-inch ornamental strap; 1 1/16-inch offset for wood.

No. 1458—36-inch corrugated strap; 1 1/16-inch offset for wood.

No. 1459—36-inch corrugated strap; 2¼-inch offset for brick and concrete.

Made of highest quality Wrought Steel, designed to meet the requirements of heavy garage doors. The Ball Bearing Washers allow the door to swing smoothly and easily, and are so constructed that the case hardened tool steel bearings are protected from dust and moisture, making oiling unnecessary. Each bearing will support a crushing weight of 2000 pounds.

We manufacture complete "Trim" for the garage door, and shall send catalogue "R" on request.

You Can Always Spot a Well-Shod Horse

Draft horses hauling heavy loads slip continually unless their shoes are properly calked. They labor on the shortest hills, even in dry weather, while well-shod horses pass by on a run.

For every horse there is a Neverslip Red Tip Calk. Neverslips can be inserted in twenty minutes without removing the shoe. They save horses' lives, drivers' lives and the lives of pedestrians. What better reason for stocking them!

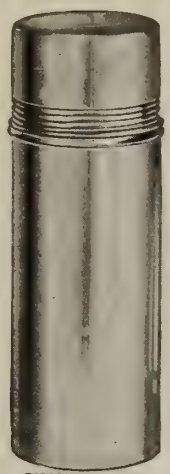
UNIVERSAL
Motor Accessories
As Christmas Gifts



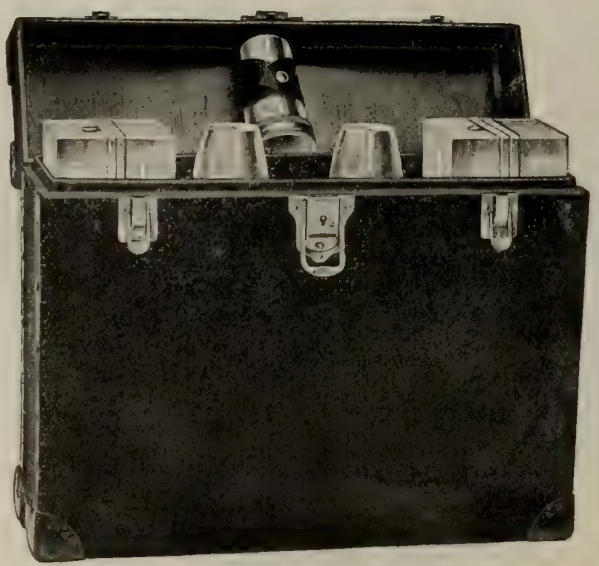
UNIVERSAL
Vacuum
Food Jar
No. 811

UNIVERSAL
Vacuum
Butter Jar
No. 800

The holiday season offers an excellent opportunity for the sale of high-grade motor goods. A well-displayed assortment of UNIVERSAL Vacuum Bottles, Food Jars, Luncheon Sets, etc., will give your customers a timely suggestion of the right gift for "him."

UNIVERSAL
Vacuum Bottle
No. 591 Pint 592 Quart

These Jars embody all the features of UNIVERSAL Vacuum Bottles except that the mouth is wide enough to permit of a table spoon being inserted. Stews, soups, meats, vegetables, etc., are kept steaming hot for hours, while ice cream, ices, butter, etc., are kept ice cold for several hours. Equipped with the patented spring steel bottle retainer and shock absorber, which reduces the possibility of breakage to a minimum.



UNIVERSAL Motor Combination Case. No. 172
New Style Case. Rain and Dust Proof

The above illustration shows a new and exclusive UNIVERSAL Idea—Extra drinking cups which fit snugly into the cover of the pint and quart bottles. Pints have one extra cup, which with the cover makes two. Quarts have three cups and the cover making four. The convenience of this idea and the saving in weight and space will make an instant hit with motorists and other travelers.

UNIVERSAL

The cases and fittings of UNIVERSAL Motor Luncheon Sets are of the finest quality and will appeal to your most discriminating trade.

UNIVERSAL

UNIVERSAL Luncheon Sets are made in various styles, completely equipped for two, four or six persons.

UNIVERSAL
Motor Luncheon Set. No. 462

You can put a stop to faulty hot water systems by installnig

The Knickerbocker Generator

It is a positive remedy that is easily applied to the open or closed systems of hot water heating.

Entirely automatic.

Connects with one-inch nipple to outlet of expansion tank.

Makes a hot water system equivalent to a low pressure steam plant.

Increases radiation from 25 to 30% with same firing.

Reduces the size of pipes and fittings.

Temperature of water can be varied up to 250 degrees.

A top-notch profit producer.

Particulars on request.

It's the Dealer Who Stocks

the best known lines that gets the business.

Your file stock should therefore consist of the following famous brands:

KEARNEY & FOOT
GREAT WESTERN
AMERICAN
ARCADE
GLOBE

(*Made in Canada*)

When you bear in mind that 10,000 dealers in Canada stock these famous five—

When you know that behind you is our 50-year-old experience in the making of files—

When we tell you that the Nicholson output is over 60,000,000 yearly—

The question is: Can you afford to be without these well-known brands of files on your shelves?

To help you, we're educating your customers, through advertising, to throw away their files when the "inefficient" point is reached. And that our efforts are not wasted is proven by the increased demand for files—of the "famous five" mentioned above.

Nicholson File Company
Port Hope, Ontario

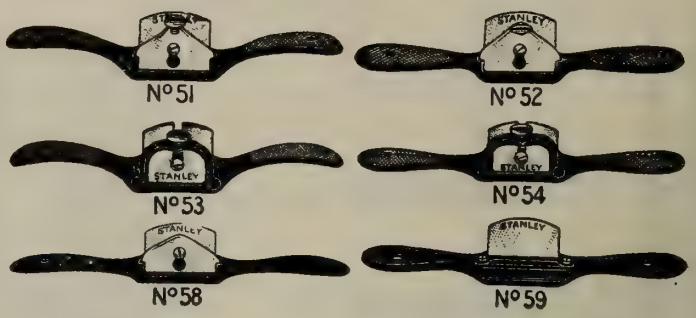
Stanley Tools



"BAILEY" IRON SPOKE SHAVES

MADE IN CANADA

Only a few of the numbers manufactured are shown in the illustration. The cutters of all numbers are made from a high grade of steel, well tempered and sharpened ready for use.

Made with two styles of Handles, raised and straight, and through each a hole is made so that when not in use the tool may be hung up out of the way.

You cannot do better than stock this line.

MAKE MONEY FROM GOOD PUMPS—PROFIT

Unless a metal pump is made just right it will leak at joints or valves.

"Aremacdee" pumps do not give dealers who sell them trouble and loss from defective service in "Aremacdee" pumps sold customers.

Pumps for every use—hand or motor—force or lift — every type a dealer can sell.

All in the big catalogue. Ask for it—for dealer prices—for dealer terms.

Starrett

Hack Saws for Every Job

A Hack Saw that cuts iron pipe will not do satisfactory work in cutting sheet steel.

Good machinists know this and also know that there is a Starrett blade for every purpose. Seventeen different blades—some differ in shape and size of teeth—some in composition, some in hardness. Our free catalog tells what saw to use. Guided by this you can recommend the proper blade for any use and give real service to your customers.

We deal direct with Hardware Stores

is said to follow the finder of a Horse Shoe. Sometimes it is so, but we **know** that satisfaction **certainly** follows the purchase of

"M. R. M." Horse Shoes

They combine all the merits of a high-grade shoe:

High Quality—due to selected materials.

Natural Shape—means less fitting.

Proper Crease—gives right setting to nails.

Clean Punching—less work for the farrier.

Careful Sorting — gives the Smith a "full" keg of "good" shoes.

It is a case of "It pays to buy the best."

Christmas Window Contest

FOR *many years past it has been customary for Hardware and Metal to conduct a Christmas window display contest each year. The contest has become an event of wide interest for all Canadian retail hardwaremen interested in window trimming, and each succeeding competition has been keener and each year has seen a wider and more representative response, culminating in the big success of last year.*

In accordance with past custom, two contests will be conducted this year—one for stores in places under 5,000 population; the other for places of 5,000 and over. No restrictions will be set on the style of display or the goods used in the arrangement, except that each window must be arranged with goods for the Christmas trade.

Eight prizes will be offered as follows:—

PLACES OF 5,000 AND OVER		*PLACES UNDER 5,000*	
First Prize	$10.00	*First Prize*	$10.00
Second Prize	5.00	*Second Prize*	5.00
Third Prize	3.00	*Third Prize*	3.00
Fourth Prize	2.00	*Fourth Prize*	2.00

Contestants will note that an equal number of prizes are offered to the small town window trimmer as to those in the larger towns and cities.

The contest closes on Friday, December 31. No photos received after that date will be entered unless there is proof that they have been delayed in transit.

All matter should be addressed to "The Editor, Hardware and Metal, 143-153 University Avenue, Toronto," and marked "For Christmas Window Contest."

Bright Spots in Business Outlook

Decidedly Optimistic Features in Connection With Business Situation — Retailers Are Booking Freely, Despite High Prices—Scarcity of Skilled Mechanics—Result of Investigation by Credit Mens' Association

ALTHOUGH a great many complaints are being heard in retail hardware circles regarding the abnormally high prices of many lines of finished and semi-finished steel products, and other hardware lines, and the quietness which prevails in the building trades, there are many bright spots on the business outlook at the present time.

Retailers are buying for immediate delivery, and booking for future deliveries with more confidence than at any time in the past year.

It must be admitted that prices of many hardware lines are abnormally high, due to conditions brought about by the war, but there is every reason to believe that a great many further advances will take place during the next few months.

There has been a steady improvement in business during the past two months.

November and December Business Good

Hardware wholesalers in the leading buying centres of Canada report, in nearly all cases, that business for November was quite equal to the average showing for that month in normal years, and considerably better than during the corresponding period of last year.

The improvement in November business was due mostly to the improved demand from the country districts. Farmers preparing for the winter months, purchased supplies freely— and farmers are large users of hardware. This year the farmers have plenty of money to make repairs.

December business has been excellent, right from the first of the month. Some hardware jobbers report that judging from the business transacted to date, December business will reach a record high mark. Hardware merchants are this year securing a larger share of Christmas trade than formerly. This is due in a degree to the fact that there is a heavy demand for practical Christmas gifts, and also because hardware merchants are going after the Christmas trade this year harder than usual.

Scarcity of Mechanics

In the manufacturing centres there is very little unemployment this year. In fact, there is a great scarcity of skilled mechanics, and many of Canada's largest firms are advertising in all parts of Canada for mechanics, and offering high wages, to work at munition making.

The "mechanics wanted" ad. departments in the leading newspapers are carrying a great many more advertisements at present than at any time in the past three years.

Many factories that were running short time before the war are now running overtime. In a large number of cases day and night shifts are employed.

The average mechanic is making more money to-day than he has at any time in several years past.

The manager of the toy department in a department store, in a large industrial centre, stated this week, that the wives of laborers and mechanics were buying more toys and higher priced ones, than in any previous year. Sales of Christmas goods in this store will run, it is expected, over 300 per cent. higher than last year.

COMPARATIVE PRICES—MONTREAL BASIS.

	Dec. 15, 1915	Nov. 15, 1915	Aug. 1, 1915	Aug. 1, 1914

Pipe, galv., 1"	8 42	8 08	9 10	6 00

The above shows how some hardware lines have advanced in price since the outbreak of the war. Only a few of many lines affected are shown in the above list.

Much Repair Work

The building trades of course are quiet. There has recently been considerable improvement in Eastern Canada, while the West remains quiet.

Conditions will not change to any great extent before spring, but with the advent of spring there should be a decided improvement in construction work, especially in higher class residences in the towns and cities, and also in the country districts. The fact must also be taken into consideration that even a fair improvement in building operations would cause a scarcity of help. Thousands of men, including carpenters, masons, plumbers, laborers, etc., have enlisted for active service.

One of the striking features of the building trade during the past few months has been the huge amount of repair work going on. An official at the Builders' Exchange, Toronto, recently stated that sufficient repair work was being done to keep all available mechanics busy. This condition is pretty general throughout the various provinces of the Dominion.

Clearing Up Small Lots of Hardware

All branches of the retail hardware trade report that judging by the demands for small lots of building hardware during the past six months there has been considerable repair work under way.

This has been beneficial to the retailer in many ways, but one worthy of particular note is the fact that owing to the demand for small lots of hardware, retailers have been able to clean out remnants and odd lots of stock lines of lock sets, etc., and the many other hardware

articles which accumulate in builders' departments.

The result is that stocks of builders' hardware, are to-day lower and cleaner than they have been at any time in many years past.

Traffic at High Point

The volume of traffic on the railways is at as high a point as it ever has been and bank clearings of the country on the whole are touching marks not hitherto reached. These are significant factors. In addition to these healthy signs, there has been an accretion of confidence generally in business circles, an evidence of which is the strength of the bond market at the present time. Although the country has just subscribed for over $100,000,000 of the Dominion loan offered, several provinces have since come into the market and obtained funds on better terms than the Dominion. While these loans to a great extent will be placed abroad, quite a number are being absorbed locally, which speaks well for the outlook generally.

Less Stock—Better Pay

As the retail merchant is the basis of the business system of Canada, it is essential to know as nearly as possible what his condition is, and with a view to this end, the Canadian Credit Men's Association during the past few weeks carried out an interesting investigation. Replies to inquiries were received from 165 of the biggest wholesalers and manufacturers throughout Canada, and the results of their replies are as follows:

Question.	Yes.	No.
1. Are retail merchants better able to meet their obligations than they were a year ago?	142	23
2. Are retail stocks less than normal at the present time?	122	42
3. Are retail merchants doing more cash business in proportion than normally?	136	19
4. Are wholesalers selling on shorter terms of credit than normally?	110	57
5. Do you look for any considerable increase in the volume of business in 1916?	111	53

The wholesaler selling goods through out the country is probably, in a better position than anyone else to say whether the retailer is not as well able to pay his debts as he was a year ago. Out of 165 replies, 142 were emphatically that the retailer is better able to meet his obligations than a year ago.

That the quantity of goods the retailer has on his shelves is less than a year ago is believed by 142, while 25 per cent. of the replies say that stocks are not reduced. A good many of those who stated that the stocks are not larger turned out to be provision houses.

The next two questions should be taken together, since they deal with the question of credit as between the wholesaler and retailer and as between the retailer and his customer.

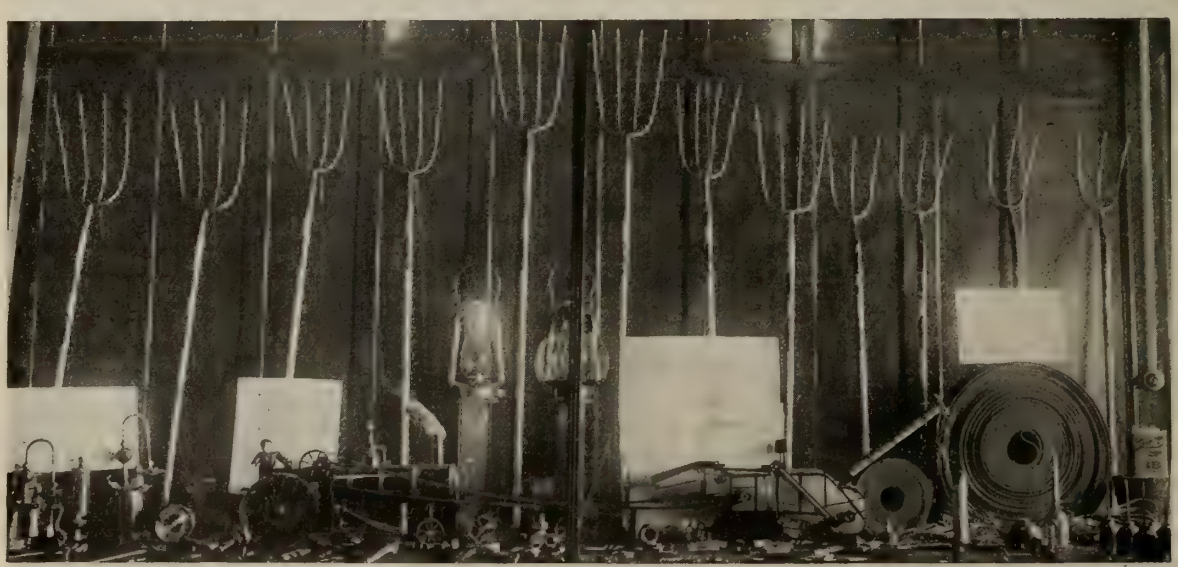
Wholesalers are entirely convinced that the retail merchant is doing a larger proportion of cash business than he does in normal times, and is only slightly less convinced that shorter terms of credit are being exacted from the retailer by the wholesaler.

Inquiries by Hardware and Metal among many retailers in various parts of Canada, reveal the fact that ever since the outbreak of the war, the retail hardware trade has been adhering as closely as possible to the cash basis.

The final question, which has to do with the volume of business in the coming year, is the natural result of the previous questions. If it is true that retailers are better able to meet their debts than they were a year ago, and that their stocks are depleted while at the same time they are doing a strictly cash business, it is natural to suppose that they will be shortly in a position to purchase goods on a larger scale once more than has been the case during the past eighteen months. It is safe to say that the majority in this case are in the right. The volume of business during the coming year will undoubtedly exceed that of the past year. A number of merchants went as far as to say that the increase would be between 10 and 20 per cent. Others suggested even larger increases.

On thing is certain, as far as the hardware trade is concerned, the retailers are buying and booking freely, and with few exceptions are looking to a big improvement in conditions during the early months of 1916.

As previously stated, many retailers are alarmed at the upward strides in the prices of many hardware lines, but they nearly all feel that abnormally high prices will prevail in many hardware lines for some months to come. The table on the preceding page gives comparative prices on a number of hardware lines, dating from Aug. 1, 1914.



The above is an example of how an exceptionally attractive window display can be made of such commonplace articles as threshers' supplies. The display depicting a threshing scene was made recently by A. E. Munro for the J. A. Johnson Hardware Co., Swift Current, Sask. The miniature machines in operation proved great drawing cards. They were operated by electricity from a concealed electric fan. Among the many lines shown in the display were forks, belting, oils, lubricators, oilers, wrenches, belt dressing, engine fittings, lanterns, etc.

Straight Facts on Auto Accessories in the Hardware Store

Most Rapidly Developing Department in United States Hardware Stores

By ROY F. SOULE

The accompanying article, reprinted from Advertising and Selling, tells of the rapid development of the auto accessory line in retail hardware stores of the United States.

Mr. Soule has interviewed a large number of merchants and the interviews related to in the article show conclusively that the sale of auto accessories in hardware stores is not confined to any one section of the States, but is general. There has been a wonderful development during the past five years, and in that time more wholesale hardware houses have taken on the line than there are exclusive automobile supply houses in the country. The development in Canada has not been as rapid as in the United States, but nevertheless, there are hundreds of Canadian retail hardware merchants who are now selling auto accessories, and information gathered by Hardware and Metal indicates that many firms will take on auto accessories during 1916. *In succeeding issues of Hardware and Metal the experiences of Canadian hardware firms handling auto accessories will be related.*

IN writing this article for Advertising & Selling Magazine I realize fully that I am talking to the most critical audience on the top of mother earth. The advertising manager is so accustomed to dressing up advertisements to resemble editorial material that he is the personification of suspicion when he starts to read. I am going to make some statements which may bring a comeback from the other side of the fence, but I shall mention names and places, and if you want better verification than the fact that Advertising & Selling is publishing this story, just write these live wires I have mentioned and benefit by the spark which comes from the contact.

The livest, most interesting, most rapidly developing department of the modern hardware business is automobile accessories. Some advertising managers are keenly alive to the fact that hardware merchants are already rated among the very best distributors of automobile accessories. Others are just waking up to the fact, and a few are asleep at the switch.

Welcomed By the Trade

The National Hardware Association, which includes in its membership practically all of the important hardware wholesalers of the United States, recently held its annual convention at Atlantic City, N.J., in conjunction with the American Hardware Manufacturers' Association. There were over eleven hundred men who rank high in hardware circles at this meeting. Interest centered around forty automobile accessory manufacturers who attended as guests of the association. These accessory manufacturers were given special identification badges, and an important committee made it its special work to see that interested hardware wholesalers and these manufacturers got together. One of the most important sessions of the wholesalers' convention was given over exclusively to the discussion of accessories in the wholesale hardware stock. Over three hundred hardware jobbers are selling automobile accessories to-day. More than one-third of this number issue catalogues. The growth of business in this line is simply astounding, and it is increasing more rapidly right now than at any time since auto accessories became hardware.

Rapid Development

Five years ago accessories in hardware stores was the big exception. The line is still new, but in that five years more wholesale hardware houses have taken on the line than there are exclusive automobile supply houses in the country, and you can depend upon one thing: the hardware jobber did not take on this line heavily until he had seen it tried out and knew that his retail customers could and would push it.

A prominent advertising man recently asked me if the hardware retailers would use the printed matter accessory manufacturers were supplying. "Use it; why, man," I answered, "they are away out beyond that. They use it and add to it good local newspaper advertising, good show case trims, splendid window displays in which good show cards call special attention to certain features of their service. When you couple up to a live hardware store you couple up to a trained selling force."

During the past 15 months I have been in every state in the Union in the interests of the paper I have the honor to edit, and I know from personal observation and contact that this hardware interest in auto accessories isn't a little local interest in the East. It is general, and the interest is gathering a selling power worthy of your most careful attention.

During the past five years I have visited over 2,500 hardware stores. I have come in contact with hundreds of dealers who are putting their shoulders to this accessory wheel. I will mention a few instances:

Baxter's Oil Business

Mamaroneck, N.Y., is a small town in a good automobile district. One of the livest stores there is the Charles M. Baxter hardware. I visited it recently, and it is a model of neatness. Business building ideas naturally sprout in a well-weeded store, and it is not at all surprising that Baxter's business on some of the newer lines of hardware is humming.

A Billy Sunday Punch

A splendid display of Mobiloils started our conversation. "Sell much?" I asked. "You bet," was the reply. "We have been selling oils for years, but until the automobile created a demand for special oils the business was about as interesting as the average mid-week prayer meeting, but special oils developed can business and put Billy Sunday emphasis into the proposition.

"We learned that there was money in oil in New York State as well as in Texas. At first we bought at random and prescribed to car owners as recklessly as a new interne does to charity patients. We meant well, but we lacked experience.

Booklet Makes Oil Sell

"Then we came in contact with a manufacturer who not only knew how to make oil, but how to sell it, and he passed the information on to us in booklets that told just what oil was best suited to each make of automobile. That dope was just like hot sun on a molasses barrel It started things running smoother, and by its use we have established a local reputation as experts on automo-

bile oils. Last year we sold 2,500 gallons. This year we are going to sell 1,500 gallons more. We carry a considerable stock of automobile accessories, but we boost oils. The other business follows and we make a profit out of everything we sell. Our record is pretty good for a little store with only about a seven-thousand-dollar stock, but it is going to be better."

Chandler & Farquhar's Big Record

Twenty men in Chandler & Farquhar's store in Boston are keen on the automobile accessory department. The boys in that store key up quickly to any live proposition. Just a year ago last September the firm put in Weed chain tire grips. In the first sixteen months they sold 5,000 sets, and they certainly set a record.

Profits Produce Chuckle

They sell Lunkenheimer fittings, all kinds of them, but they specialize on small fittings from ⅜ inch down. These fittings are sold almost exclusively to motor boat and automobile owners. Last year they brought over $10,000 worth of such fittings from Lunkenheimer. "What did you sell them for?" I asked. "Well, that would be telling," was Alexander Chandler's answer, but the way he chuckled when he replied was an answer in itself.

A Tip on Tool Sets

I noticed that the tool sets in Chandler & Farquhar's show cases contained nothing but the most standard tools. "Where do you buy them?" I asked.

"Well, you see, it's like this: Opinions sometimes differ as to which are the best tools in certain lines. We have been selling high-grade tools so long we think we know, so we buy the cases and fill them out of our regular stock, and it makes a hit with the trade."

"Is the hardware merchant in the accessory game to stay?" I asked. His answer was another chuckle and a question that parried well. It was this: "Can a fish swim?"

DANGER
between Buffalo and New York
Worst stretch of road
vehicles slow down to
1 mile per hour.

The above show card in an unusual accessory window by Barker, Rose & Clinton, Elmira, N.Y., surely stopped the crowds.

A piece of road near Elmira had a reputation as bad as a two-cylinder car in a mountain country. This display was used just before the Elmira automobile show. It set the town thinking. Local editors sharpened their pencils and wrote luridly of the disgrace of that mile of highway. They all mentioned Barker, Rose & Clinton's window and referred to this concern as one with more than surface interest in the community.

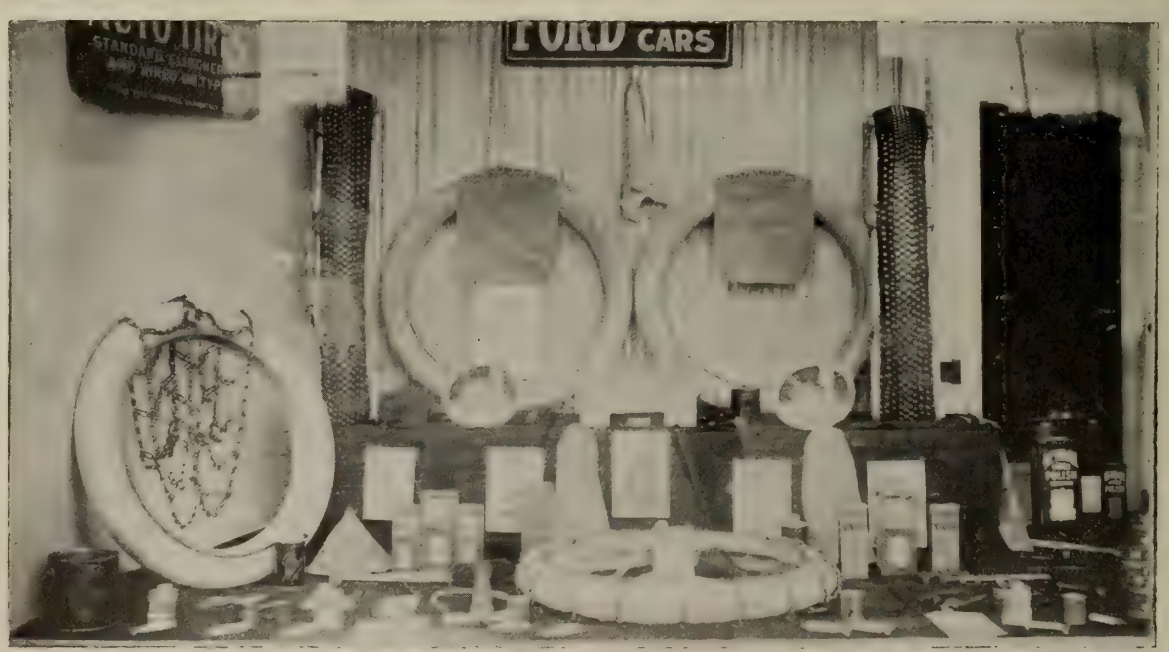
Live advertising, wasn't it? That road was repaired. It is now the pride of the community, and these hardware automobile accessory dealers got and deserved credit for it.

Barker, Rose & Clinton put in automobile accessories last year. This year they are making a record. Every month they have doubled the accessory business of the corresponding month of last year.

From Turnovers to Pie

D. Fletcher Barber, president of the National Retail Hardware Association, didn't just happen to fall into that title. He's a hand-picked man, one who pumped his way into the hardware field on a bicycle long before the mysteries of motor propelled vehicles began to be unfolded. Chandler and Barber were big people in Boston hardware circles long before gasoline became the great national perfume, and they knew a good thing when they saw it. Naturally they met automobile accessories out at the front gate and ushered the line up to a favored place on their screened porch. They treated accessories like one of the family, and it has fitted so nicely that papers of adoption are considered superfluous. They carry about $1,200 worth of accessories in stock, and turn it faster than an eight-cylinder cuts corners with a motorcycle cop on the trail. Five turnovers was their record in 1914, and this year they are counting on going out of turnovers and into the regular pie, for which New England is famous.

They use catalogues which were recommended to them by jobbers. These catalogues illustrate everything from spark plugs to windshields. President Barber says: "Make haste slowly. Buy sample



Window display of auto accessories by the George Taylor Hardware Co., Cobalt, Ont. The Taylor Hardware Co. has handled auto accessories for some years. They not only sell auto accessories but automobiles as well. Show windows are used quite frequently to keep the accessory line before the public.

lots rather than plunge when you start. It takes a year to find out what you want, but when you do find it, it's well worth the trouble."

"Would you consider discontinuing the line?" I asked. "No," was his answer, and it sounded not like the genial New Englander, but like the bark of a Krupp. Yes, Barber knows a business builder when he sees it.

Twenty-five Barrels of Batteries a Year

The Merkle-Miller Hardware Company, of Cleveland, made a Tom Thumb start to a Jess Willard finish when they gradually let automobile accessories edge their way into the bicycle supply department of their store. Their record is good on all standard accessories, but in the twenty-sixth round they beat all selling records on batteries to pieces.

They started buying batteries by the dozen; when they had worked up to the place where they could buy and sell a barrel a year they found confidence, which is the keynote to business, and now without flicking an eyelid they contract for twenty-five barrels of batteries a year and sell them, not at cut prices, but at a good stiff profit. They use two good show cases for accessories, and have no hesitancy in saying that automobile accessories are hardware, not by chance, but by right.

Took Care of the Dull Season

Claude R. Horne, president of the Carrollton Hardware Company, of Carrollton, Miss., recently said: "For fifteen years we worked to equalize our business so that cash sales might run about the same month for month. Credit sales were easily controlled, but cash was hard to govern. The boll weevil made credit too risky in Mississippi. There was just one thing left for us to do, and that was to boost our cash sales, and particularly in our dull period, which is from April to September.

"We tackled automobile accessories because we figured the demand was good in our quiet months. We also thought that a man who could afford to own a car should be able to pay cash. We have found these things to be true, and the percentage of profit is larger than on regular hardware. We turn our accessory stock every thirty days. We felt our way, buying what we thought was a thirty-day supply to start. In tires we chose a limited number of Ford sizes, and have never plunged. We know that fresh rubber means fast sales. Our accessory business is growing and we are making money out of it."

300 Per Cent. Increase for Montana

Helena, Montana, is located out in that section of the Rockies where automobile salesmen talk the climbing power of their cars. The Helena Hardware Company is a progressive western firm. They are quick on the trigger when it comes to stocking modern goods. They are from that section of the country where merchants don't meditate after they are convinced that something will sell; yet they do not plunge on every idea. Their initial cost of accessories amounted to $20. The first year they turned it so many times they wore the corners off and began to roll it. The second year their increase in accessory sales was 300 per cent. over the first year. They say that standard tools and automobile accessories are so closely related that they drifted into accessories just as naturally as a brook flows into a river. They are still breaking records and are rolling their stock over so many times that members of the firm have had to buy motor cars to keep up with the procession.

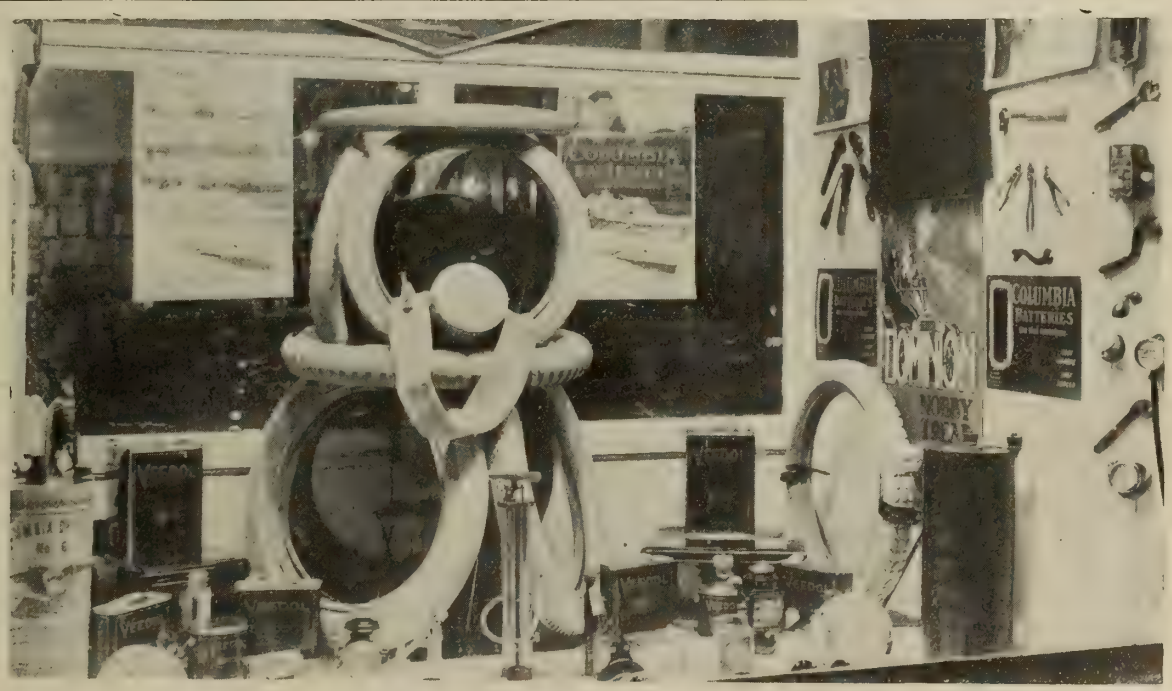
Texas Better for Accessories Than Saddles

Bert Beall, president of the Beall Hardware & Implement Company, of Greenville, Texas, chuckled as he remarked "It was funny. Some of our competitors thought we were crazy, and the village wind-jammers spread the glad tidings. It was a little over four years ago."

"Whatcha do?" I asked.

Bert chuckled again and said: "Well, we put in a stock of automobiles and accessories. Even some of our good friends thought we had gone off our tangent, but we saw cowmen turning their ponies to pasture and come buzzing into town propelled by gasoline, and we knew that Texas was going to be a better state for accessories than for saddles. Automobile accessories can be added to a hardware stock with less expense than any new line I know. A small stock can be turned from twelve to fifteen times a year, and the goods carry from 25 to 35 per cent. velvet.

(Continued on page 32.)



Lariviere, Inc., Montreal, sell automobiles and accessories. The above display of accessories shows some of the lines carried in stock. Window displays of accessories are shown quite frequently and keep the line before the public.

HARDWARE & METAL

CANADA'S ONLY WEEKLY HARDWARE PAPER

Vol. XXVII. TORONTO, DECEMBER 18, 1915 No. 51

BRIEFS

PUTTING ONE defective article in the Christmas window will render ineffective the most elaborate of displays. All goods shown must be perfect.

* * *

THE BUSINESS men of Canada realize that it is just as essential to success in war to keep the lines of business communication open as it is to send troops into the field to defend the colors.

* * *

RETAIL MERCHANTS are doing a larger proportion of cash business at the present time than they have been accustomed to for many years—and business on a cash basis should be encouraged as much as possible.

* * *

THE INCREASING industrial use of wood alcohol has created conditions of carelessness in the handling of it. Wood alcohol is an active poison, and all bottles, cans or other containers of this liquid should be plainly and conspicuously marked "Poison" in compliance with the law.

AN ACUTE SITUATION

THE Canadian hardware and metal trades have probably never faced such a momentous situation as occurred when the steel mills led by the United States Corporation practically dropped out of the Canadian market. HARDWARE AND METAL, from the first, has pointed out the serious significance of this action and a month ago printed a comparative table and an article showing the advances which had already taken place. Accompanying this article was a summary of the situation which was practically a review of the arguments advanced weekly as to why the market was certain to rise to unheard of levels. This summary is reproduced in this issue with the addition of a new column showing the prices on these same lines this week. Note the advances which have taken place in a brief month. They are merely a guide to the general situation to-day as it affects the products of iron and steel and the higher manufacturers thereof.

Let us further consider the future. Far from being relieved the situation is more acute than ever. The mills continue their attitude of indifference as to new business. Dealers state that their prices to-day are low in comparison with the cost of materials and argue that there can be nothing but advances, as the present stocks are depleted and there is no assurance as to future supplies. That the outlook is not improving is indicated in the recent report of the United States Steel Corporation. This report showed that at the end of November there was unfilled tonnage of over 7,000,000 tons and that the increase for the month had been more than 1,000,000 tons, whereas the outside estimate had been 300,000 tons. In other words, the orders came in at the rate of 40,000 tons per day more than the output or practically double. This indicates that the buying movement is not decreasing, but increasing.

As has been previously pointed out, however, the question of price is involved for the reason that heavy consumers protect themselves for about six months in advance and they will not pay the higher cost until their present contracts expire. Thus there may be a reaction, but the probability of this seems to be largely obviated by the fact that heavy consumers are filing specifications with their orders at the present market which is at an abnormal level. This means that they prefer to cover deliveries to taking a chance on a reaction in price. Deliveries in Canada are now from four to six months behind.

The market indications are, therefore, for higher prices. But there are new factors developing with the rise. As usual, there has been a big buying movement, but the higher cost is likely to curtail demand. Eventually there is almost certain to be a reaction from the high point attained. The question is to decide when the high point is likely to be reached. It is doubtful if anybody knows the definite answer, but so far dealers in close touch with the market state that they can see nothing but further advances.

INCREASE ALUMINUM PRODUCTION

THE president of the Aluminum Company of America, in a speech made to a Detroit body of business men interested in aluminum referred to the

efforts his company is making to increase the production of aluminum.

The official stated that his company is now producing 18 pounds of aluminum where 10 pounds were made in 1914. At the present rate of production the output would be about 144,000,000 pounds per annum.

The company is now expending upwards of $20,000,000 to increase its production. Some portions of the new plants will be in operation next May, and the balance by the close of 1916.

This expenditure does not include an extensive plant which the American Company has recently taken over, but which will not be in operation for another 12 months.

Referring to the current high price of aluminum, the official said that it was in part due to the fact that the British Government had commandeered the production of his company's plant located in Canada for the current year and 1916, so that this supply, 8,000 or 10,000 tons per annum, goes to England instead of coming to the United States as usual.

GET IN THE MONEY

ALTHOUGH the merchant who conducts his business on a credit basis, must push collections vigorously at all seasons of the year, there are certain times when it is advisable to make an extra special effort.

During the next few weeks there is need for the prosecution of an unusually active collection campaign. There is plenty of money in the country. Deposits in the savings banks were never greater than at present. The farmers have secured huge sums of money from the abundant crops which have been harvested.

There is little or no unemployment in Canada. Is there any reason why the hardware merchant should not be able to collect the bulk of accounts which are outstanding? A great many retail firms have watched accounts closely, and pushed collections with vigor, ever since the outbreak of the war, and in many instances, they are the ones who are not experiencing any trouble in financing their business at the present time.

The merchant who keeps his accounts collected will not find it necessary to get accommodation at the bank and therefore will not leave himself open to inconvenience should a more serious financial stringency develop in the future.

One department of the store in which the extension of credit has to be watched carefully at the present time is the stove department. A good margin of profit is available for the man who has the agency for a reputable line of stoves and who stands up for a legitimate profit and sells his goods on a quality rather than a price basis. There is, however, one pitfall which retailers have to guard against, and that is the indiscriminate granting of credit terms. The stove business is to a considerable extent a credit business. It is the duty of every retailer to pay close attention to the matter of credits this year. The retailer should sell on time only when investigation into the customer's record, or personal knowledge of character, has convinced him that payments will be met promptly and without fail.

There are some hardware firms doing a strictly cash business in stoves, but this is not always possible. The majority of merchants find it necessary to extend credit in some cases. Where credit is extended a time limit for final settlement should always be set. Another point which deserves earnest thought is that of price-cutting. This business demoralizer is found in all communities. The merchant who has the agency for a good line of stoves should stand up for a good profit. It is quite customary for prospective customers who are not in a position to judge fairly to try the beating down plan and make comparisons between various makes of stoves and prices. The retailer should be the judge of the value of the stove he is selling. He should set a fair price and stick to it.

TREMENDOUS OUTPUT OF STEEL

SOME idea of the tremendous demand for steel may be gathered by a study of the intensive method of production exercised in the steel industry in the United States. According to the *American Metal Market* even the cripples and supposedly incurable ancient blast furnaces are being pressed into service—more came into blast last week—and, favored by the continued auspicious weather, contributed an unexpectedly large share of crude metal to be converted into steel. The mills, too, running double and even triple time prevented any accumulation of ingots.

Signs of distress have appeared here and there among the hard-pressed smelters; "hot spots" have compelled leniency in operation but modern engineering and mechanical surgery, in not a few instances, has overcome the distemper and sent the furnaces back to the firing line.

It is estimated that the industry as a whole is producing steel ingots at the rate of 39,600,000 tons annually and with the help of the crucibles and electric furnaces may be the steel output is at the rate of 40,000,000 tons a year. This indicates that rolled and cast finished products are being produced at the rate of 29,688,000 to 30,000,000 tons a year. The total output of ingots for the calendar year, however, will not be over 31,000,000 tons, or approximately the tonnage produced in 1912 and 1913. Consequently, the total production of rolled products for the year will be about 26,000,000 tons.

Farmers Demand Ready-made Fence

Object Lesson Provided by Quebec Government on New Highways Will Result in Big Sales Next Spring, But Dealers Must Carry it in Stock —Increase in Auto Traffic

WITHIN the past five years, the Quebec Government has been spending huge sums of money, on new highways. Many of these connect with the United States border, and have been extended into American territory by the authorities across the line.

Increased Auto Traffic

This has had the effect of increasing automobile traffic to an enormous extent, and is of importance to the hardware trade in that it has created a big demand for accessories. This is noticed not only in the larger centres, but also in the smaller towns and villages, where some of the general stores have almost lost their identity because of the importance assumed by this new business. One hears from every quarter of the province of hardwaremen introducing automobile accessories, or announcing their intention of doing so in the coming spring.

Stimulate Demand for Fencing

These new highways have had a stimulating effect on another branch of the hardware trade, and in a rather curious manner. In making the roads, the Government has found it advisable in certain cases to change the course of the highway in order to secure a better surface, to avoid a hill, or to shorten the distance between two points. In these cases they have made use of ready-made fencing.

Both the railways and the Government have learned, after experience in the law courts, that it is cheaper to spend a little more money on fencing, and avoid the possibility of maiming cattle.

Will Be Big Demand

The farmers of Quebec Province, especially those on the routes of these new roads, have observed that the use of ready-made fencing eliminates danger to cattle, and are making insistent inquiries regarding the cost. It looks as though the demand in this province will be an exceptionally good one next spring, especially as the farmers in Quebec are unusually well off this year. The only difficulty is the higher cost of ready-made fencing, but the farmers realize that it will be money well spent.

From observation, it appears that sales of fencing direct from manufacturer to consumer do not cut a big figure in P. Q. The farmer here is not so disposed to wait for delivery as his fellows in some other parts of the country. When he decides to buy fencing, he wants it right there if he can get it. Hardwaremen have found that the only successful way to handle fencing is to have it in stock.

One Merchant Lost Business

One of the largest dealers in the Eastern Townships made the admission recently that he had lost hundreds of fence sales because he did not carry a stock. He carries only samples. To use his own words: "I could have sold two hundred rolls where I sold only five, by not having it on spot. The only reason why I have not carried it has been because I had not the necessary space. We intend to go right after this business for the coming season."

AUTO ACCESSORIES IN THE HARDWARE STORE

(Continued from page 29.)

"To hardware merchants who are tackling the line for the first time I just want to say that tires are cash. Don't let any one convince you that they are anything else.

"Our accessory business is growing all the time. We have found it mighty profitable."

Horse-Sense and Conservatism

From Texas let's jump to that other State as big as an empire. In Pennsylvania there is a good town called Pottsville. In Pottsville there's a good store known as the Swalm Hardware Company.

For years these local boosters sent customers to the garages for accessories. One day they threw in the reverse and bought $100 worth of accessories. Store records tell the rest. They keep a young automobile owner out every year boosting their accessories, oils, greases and tires. He pays his own pay plus.

J. S. Swalm says: "It takes a year to learn how to buy accessories. It is different from hardware or sporting goods.

"There are many things of which to be wary.

"There is always a tendency to buy too much.

"There is always a tendency to get the large discount that comes only with quantity purchases.

"There is always a desire to take up every new item, and they are numberless.

"The principal requirements of an accessory buyer are horse-sense and conservatism.

"Buy only for the market in sight.

"The fewer brands you buy the cleaner your stock will be, and the more often you will turn it. Every new brand means new development work for you, and that costs money.

"The line is a money maker. Quality, service and goods in stock compete very successfully with mail-order houses and cut prices. That's our experience."

Birmingham, Ala., is down in that section of the world where the caddies are ebony-hued and where the honk of a horn scatters pickaninnies and game cocks.

The Turner Electric Supply Company are live wires in Birmingham's accessory field. They recently manufactured an automobile which they named the "Spark Plug." It was made of 1,000 empty spark plug boxes.

Wolf a Bear for Business

Out in Paris, Ill., folks say Wolf is a Bear. Sounds sort of contradictory until they explain that he's a bear for business, and that automobile accessories is his pet cub.

Wolf's initials are A. M. Naturally, any one had to get up early to beat him to a sale. Paris is a town of 8,000. Two garages held a mighty monopoly on the accessory business until A.M. bought his car and felt the need of accessories. The local supply was so low that they had to reach up to touch the bottom, so Wolf bought direct, and in a surprisingly short time found his stock of accessories swelling with his fund of information. He now carries about $2,000 worth of accessories in stock, and he displays them from A. M. to P. M., plus a well-lighted window. His show cases and display tables tackle automobile owners, who have replied to the four-page circular mailed out each year, and Wolf says automobile accessories rank right up among the profit leaders in his store. Little town, listless competition with a lop-sided credit rating. Say, it's a great place for a bear to roam! Good luck, Wolf.

Van, the Tool Man

Now, let's jump over to Lansing, Mich., for a talk with A. T. Vandervoort. They call him "Van, the Tool Man," because he has established a reputation as a wonderfully posted man on tools. At the same time he has established a tool business that is big even in Toledo, where tool users are as plentiful as grain growers in Dakota. Van ventured into automobile accessories in 1912. He was one of the first to catch the spirit of the accessory campaign Hardware Age launched at about that time. The first year his accessory sales totaled $2,000. Last year Van sold $6,000 worth of accessories, and this year he will nearly double his record. Van has taken a post-graduate course on tools, but there is one word in the English language he would abolish. It's the word "can't." Van says hardware merchants are the logical distributors of automobile accessories. The dealer who says he can't sell them looks like a lead nickel to Lansing's big tool man, and Van is right. Van also says that if a dealer doesn't watch his P's and Q's in tire adjustments he will puncture the atmosphere with the worst English in his vocabulary.

Criticisms of Christmas Ads

Good and Bad Features in Retailers Advertisements—Three Seasonable and Attractive Ads. by Hardware Firms—Automobiles and Accessories Featured as Gift Lines

JAMES S. NEILL & SONS, Fredericton, N.B., are liberal users of newspaper space. The accompanying illustration shows a reproduction of a full page advertisement, which appeared in the December 11th issue of a Fredericton newspaper. This advertisement features Christmas goods and shows a representative line of practical gifts which form a part of the stock in most modern hardware stores. The ad. is exceptionally attractive and well balanced, and is strengthened by the liberal use of illustrations. It would have been more effective, however, if more descriptive matter had accompanied each illustration.

For instance, in the case of the bread mixer, a short reading notice pointing out the special features of the mixer, would appeal strongly to the housewife. She would be interested to know that the mixer will mix thoroughly in three minutes, that it is simply constructed, and easily cleaned, that it can be clamped to a table or cabinet, that with ordinary care it will last for many years, that it mixes more thoroughly than would be possible by hand-mixing, and that it is a great time saver, etc. This information would occupy very little space in the advertisement, and would create more curiosity, and cause more inquiries to be made, than by simply showing the illustration and quoting prices.

The name of the article does not appear in the advertisement. It is evidently taken for granted that all women who read the advertisement will know that the cut represents a bread mixer, and that it is a handy device to have around the house.

A short reading notice on the value of a food chopper and its many uses would have greatly strengthened the pulling power of the ad., as far as this line is concerned. The weakest feature of the ad. is the absence of a sufficient descriptive matter, but, on the other hand the ad. has a great many more good features than bad ones, and it should have been the means of pulling considerable business, even though many of the inquiries would not have been of a direct nature.

Features Auto Accessories

One very commendable feature of the advertisement, is a section devoted to automobile accessories.

"Nothing would be more acceptable for the auto owner than something for his car. We have many accessories that will please him," states the ad. The suggestions which follow are: Horns, seats, wrench sets, valve grinders, steering wheel covers, paper bag covers for storing cars, pocket air gauges, mud chains, glariscopes, tires and tubes, etc.

The auto accessory line is one that is often overlooked by hardware merchants and it is one of the livest lines that hardwaremen can handle to-day.

The introduction in the Neill advertisement is interesting, and to the point, and strongly emphasizes the fact that the hardware store is a logical place to purchase Christmas gifts. The introduction reads as follows:—"In olden times the hardware store was never considered a suitable place to buy Christmas gifts, nor was it ever thought by the Hardware Merchant that he should lay in a stock of appropriate gifts, cater to the Christmas shopper, and try to bring in a portion at least of the large amount of money spent at the holiday season. In the last few years he has begun to realize that the endless quantity of goods he carries in stock would make the most suitable and useful gifts for every member of the family. The buying public are also beginning to realize that to shop at the Hardware Store means getting something that will be useful 365 days in the year.

Before spending your money on some paltry article which is of no lasting value, come in and look around our three large stores, which we have transformed into a veritable haven of good things at a moderate price.

Our large staff will be only too pleased to wait on you and see that you get dollar for dollar in value for your money."

The foregoing appeal is a strong one, and tells a true story of a change which has taken place in hardware merchandising during recent years.

The ad. of the Rogers Hardware Co., Charlottetown, P.E.I., occupied a space four columns wide and the full depth of the page.

"Early shopping day" is featured in the advertisement. Special train arrangements had been arranged with reduced railway fares. In the introduction an invitation is extended to the public to visit the Rogers store and view the many gift suggestions which are on view for inspection.

Automobile accessories are featured as Christmas gifts in the above advertisement by James S. Neill & Sons, Ltd., Fredericton, N. B.

The ad. is very attractive and is well balanced. The use of illustrations is a very commendable feature, although two or three more illustrations could have been used with splendid effect.

It would have been possible to use a great many more illustrations, had smaller type been used for the descriptive matter.

However, the ad. as it appears is a very creditable one, and should make a good impression on the buying public in the district where the newspaper circulates.

Plays Up Toyland

Adamson Hardware Co., Orangeville, Ont., used space three cols. wide by the full depth of the page to feature Christmas goods, and announce the opening of toyland. The heading and introduction to the advertisement would have been

The Rogers Hardware Co., Charlottetown, P.E.I., featured an "early shopping day," in the above advertisement.

stronger if fewer styles of type faces had been used. The heading and introduction appears to be badly broken up, and rather hard to read owing to the fact that five different styles of type have been used. A much more attractive effect would have been secured by using only two or three styles of type.

Despite a few minor defects the ad. should pull a great many people to the store to see Toyland and to inspect the various Christmas lines which are featured in the ad.

The Adamson Hardware Co. has secured the agency for a new and popular-priced automobile and are featuring it as a suitable gift for the whole family.

Other Christmas Ads.

Dozens of Christmas ads by hardware firms have reached the office of Hardware and Metal. Budge Bros., Thessalon, Ont., used a full page to feature Christmas goods. The ad is headed "Useful Christmas Gifts." The introduction runs as follows: "Our hardware store is just the place to come for your Christmas presents.

"We have suitable, sensible gifts for your friends, for all your family, for the home.

"Buy gifts that are appreciated for their lasting and useful qualities."

"Here are some suggestions that will aid you in settling that vexed question, 'What shall I give?'

"Before you buy, be sure to come in and see what we've got. You'll save money on your gifts at our store, too."

The balance of the ad is divided off into panels in which are listed various lines under the following headings: Cutlery, silverware, cut glass and china, brass goods, household goods, for the kitchen, for the men, for the girls, for the boys; for the boys, girls and baby.

Two large illustrations were used in the advertisement and help to add to its attractiveness.

The introduction in the ad of Fred. W. Karn, Woodstock, Ont., is headed "Christmas Goods at Old Prices," and runs as follows:

"In order to protect our customers from the great advance in prices, we were obliged to place our orders very early before the high prices came into effect. Our import order of cutlery which was placed last April has arrived. These goods have advanced nearly 50 per cent.—but our stock goes at the old prices."

The foregoing is followed by illustrations, descriptions and prices of various cutlery lines.

The George Taylor Hardware Co., Ltd., Cobalt, recently ran an ad featuring silverware. The introduction which was followed by descriptions and prices, ran as follows:

"Give her —— silverware. Appeal directly to her sense of economy and thrift. Make her Christmas happy by giving a piece or a set of —— Silverware. If she is at the head of a home, your gift could not be more appropriate. Nor could it be in better taste, because —— ware carries such a high degree of quality and good appearance, that it's really fit for the home of a king.

"We have a complete stock of this silverware in plain and fancy patterns. Considering service, the prices as quoted below are exceptionally low. Let us have the pleasure of showing you these patterns."

BROOM PRICES ADVANCING

Broom prices are likely to go up again. A couple of weeks ago an advance of from 25 to 50 cents per doz. was referred to but the situation with regard to broom corn in the United States—the source of our supplies—is such that a further rise seems inevitable. It is forecast by some manufacturers that this will at least be another 50c per dozen in next few months.

Our broom corn comes chiefly from the States of Oklahoma, Kansas and Illinois. The heavy rains during the season this year damaged the crop so badly that there is comparatively little good corn to be had.

Into the bargain, dyes which are used in manufacturing brooms have increased greatly; in fact, broom corn dye is out of the question entirely. Wire has gone up on account of demand for steel, around 25 per cent., and twine has also advanced. In view of these conditions, further advances in brooms seem inevitable. The next crop is a long way distant—October and November of 1916.

Since the beginning of the war, bristles for the manufacture of paint and other brushes have risen considerably in price, the extra war tax duty of 7½ per cent. being partly responsible. Bristles come chiefly from Russia, China and France. Germany used to export some, but none since commencement of the war. The brush situation is, therefore, firm but not to same extent as the broom.

Fibre is also high in price. One of the chief sources of this is Mexico, which accounts for the reason. Other sources are India and Brazil.

Adamson Hardware Co., Orangeville, Ont., feature toys and automobiles as Christmas gifts.

Overcoming the Frosted Window

If Window is Enclosed at Rear This Can Be Accomplished by Vent Holes—The Electric Fan and Gas Flame Are Common Methods—Some Chemical Remedies—Importance From Selling Standpoint Keeping the Glass Clear

A FROST-BOUND window is worthless. The front of the store might just as well be boarded up so far as the selling properties of the window are concerned.

Frost can be prevented from forming on windows in many ways. But probably the only permanent method is to so construct the window that the same temperature can be maintained both inside and out. This necessitates a current of air from the bottom to the top. When the air inside is warmer than that on the outside the moisture which forms comes in contact with the colder glass and is frozen on it. Occasionally in very mild weather the air on the outside becomes warmer than that inside, and frost forms from the same cause outside the glass.

When a doctor has a patient ill with some chronic trouble he aims to determine the cause and then to remove it. The same should apply to the frosted window trouble. First determine the cause (and this is given above) and then find a suitable method for removing it.

Window Should Be Enclosed

To bring about this it is essential that the background be built clear up to the top of the ceiling and be as nearly airtight as possible. To insure a good supply of light at the same time, it would be advisable to board up the back of the window five or six feet, and use glass in the rest of the space.

The boards in the background can have a couple of thicknesses of white unbleached muslin pasted to them or a painted background. If white unbleached muslin, with two thicknesses, is used, an excellent effect will be obtained and the muslin can, when desired, be covered with crepe paper or cloth.

A white enameled background is preferred by some, especially if the store itself is finished in white.

The proper ventilation of the window is of the highest importance and the window should be so made that holes can be bored along the frame at the bottom, also at the top. The cold air will go in at the bottom and warm air go out at the top, thus keeping the temperature practically the same as that outdoors. If there is sufficient ventilation frost will not form on the glass. The holes should be covered with a screen to keep dust out. In the hot months the holes can be covered with strips of wood nailed on the back.

Where the windows are not modern ones, or if the floor is even with the lower part of the glass, another plan will have to be used. This consists of boring a hole in the wall under the glass and placing in it a tin tube, or piece of elbow stove pipe, covering the outside with fine screen to keep out the dust. This should open up through the floor. Then bore holes at the top so as to get plenty of circulation of outside air.

Paper or cloth must not be placed over the openings because that would prevent the circulation of air.

Opening In the Side

In the store of Stanley Mills & Co., Hamilton, Ont., an original idea has been used. Small openings have been provided above the plate glass in the sides of the window. The openings are about 6 x 16 inches, and are hinged at the top. They swing inward, and are operated from the interior of the windows. They can be kept open sufficiently long to maintain the temperature inside on a par with that outside. At the same time, being on the sides, they are not exposed to the dust of the street. Neither do they detract from the appearance of the store front.

Gas Flame at Window Base

There are many other methods in use. Butcher shops frequently use a gas flame. A gas pipe extends across the bottom and front of the window on the inside. This contains several small holes short distances apart, and the gas is kept burning all day. This keeps the plate glass on the outside so warm that the moisture of the air does not freeze on it. This method, however, is rather expensive.

The Electric Fan

Another plan is to use the electric fan. This keeps the air circulating throughout the window and comparatively dry. There is considerable expense attached to this, as electricity is being consumed all the time the fan is in motion. The plan, however, is fairly effective.

Chemical Remedies

Rubbing the glass with glycerine has

(Continued on page 46.)

Above is shown a window display of gifts for men and boys. This display demonstrates that there are a great many hardware lines which make suitable gifts for men and boys. The display was arranged by H. E. Stephens for the Calgary, Alta., branch of the Ashdown Hardware Co. and entered in Hardware and Metal's window display contest last year. Among the many articles displayed are shaving brushes, mirrors, razors, mugs, clocks, watches, cuspidors, razor strops, boxing gloves, pocket knives, thermos bottles, dumb bells, swinging clubs, skates, hockey sticks, tool sets, razor hones, skating shoes, paper shears, etc. This display furnishes many excellent suggestions for window trimmers.

What Other Papers Say

Items of Interest From Other Papers—In Each Instance Credit is Given to the Paper From Which the Item is Taken—No War Stamp: Fined $20—Free Industrial Alcohol—Russia Wants Cannon—Canadian Inquiries for Steel.

NO WAR STAMP—FINED $20

From Journal of Commerce, Montreal.

IT is announced from Ottawa that Hon. Mr. Casgrain, Postmaster-General, "has decided to issue a three cent stamp for convenience in war time. This," the report continues, "will obviate the necessity of affixing the ordinary two cent stamp and a one cent stamp upon each letter." True, very true. This stamp annoyance is one of the things that we have been hammering at for many months. We welcome the announcement of reform, tardy though it is. But can anybody give a reason for the adoption of a three cent stamp to-day that did not exist as fully when the war stamp taxes were first imposed? What should be Hon. Mr. Casgrain's reward for having for so many months subjected the whole people of Canada to an exasperating annoyance?

Now that the Postmaster-General has seen the error of his way we have a hope that the Minister of Finance also will awaken to the need of reform. Nobody is disposed to complain of his stamp tax on cheques. It is a legitimate war tax. But why not make its application as easy as possible? In Ottawa last week a man was fined $20 for having sent out a cheque without the necessary stamp. A witness swore that the stamp had been affixed. There was no stamp on the cheque when it reached the party for whom it was intended. The man was convicted and fined. The case, we believe, was the first of the kind that has occurred in our courts since the stamp tax was imposed. But if everybody who when making a cheque neglected to affix a stamp had been prosecuted the jails of the country would be crowded. The offence is committed a hundred times every day. The stamp has to be affixed in a great many cases by the receiver of the cheque or by the bank when the cheque is presented. Why should not the Minister of Finance arrange with the banks for the issue of stamped cheque books as in England? His hundred million dollar loan should not draw his attention entirely away from the smaller things of life, which often are more immediately important than things that may seem bigger.

FREE INDUSTRIAL ALCOHOL

From Industrial Canada.

WHEN casting about for ways and means to stimulate production, to increase employment and to add to Canada's material prosperity, the Government should not overlook the simple and inexpensive expedient of removing the excise duty on alcohol (always of course under suitable regulations and restrictions) when used for industrial purposes.

For a great many industries alcohol, either pure or denatured, is a necessary raw material. In one form or another its use is desirable, if not actually necessary, in the manufacture of varnishes, polishes, lacquers, stains, paints, enamels, oil cloth, linoleum, photographic plates and papers, soaps, fulminate, electric lamp filaments, incandescent mantles, rubber, aniline dyes, fireworks, matches, steel pens, artificial flowers, inks, celluloid, felt hats, crepe, chloroform, ether, bromide, collodion, disinfectants, liniments, lotions, capsules, insecticides, surgical dressings and numerous other articles.

Recognizing its wide application to industry nearly every progressive country has adopted regulations to encourage rather than discourage its use. The United Kingdom, for example, has not only made alcohol free of excise when employed in manufacturing processes, but permits it to be denatured by any one of a score of methods, according as to the use to which it is to be put may require. Usually the denaturant employed must have the effect of making the alcohol non-potable, but where anything other than pure spirit would be unsuitable to the purpose to be served, even it may be had duty free under proper restrictions and safeguards.

The United States made alcohol free for industrial purposes in 1906, after a thorough investigation of the whole subject by a special Committee of Congress.

* * *

RUSSIA WANTS CANNON

From American Metal Market

THE Russian government wants to buy cannon. American manufacturers of ordnance want the orders. Many difficulties are in the way for speedy closing of contracts; among them is the shortage of skilled labor in the machine shops of the ordnance companies. The Russian inquiry now in the market is for 5,000 three-inch guns. The largest prospective contract that Russia has placed during the present war. Each gun requires 2,000 lbs. of high grade nickel steel, and with the recoil mechanism, jackets, trucks and wheels, each piece of ordnance will weigh from 5,000 to 7,000 pounds. Delivery is asked during 1916 as may be convenient for the ordnance manufacturers. It is understood that even if the order were accepted now it would be March or April of next year before work could be started in the foundries and shops. It is estimated that each piece of ordnance would cost from $7,000 to $8,000, which means the expediture of from $35,000,000 to $40,000,000. The inquiry comes from the foreign interest that placed the original contract for high explosive shells for Russia with the Canadian Car & Foundry Co., which contract called for the expenditure of $83,000,000. Previous reports that the Canadian Car & Foundry Company obtained its contract direct from the Russian government is now known to be incorrect.

* * *

CANADIAN INQUIRIES FOR STEEL

From American Metal Market.

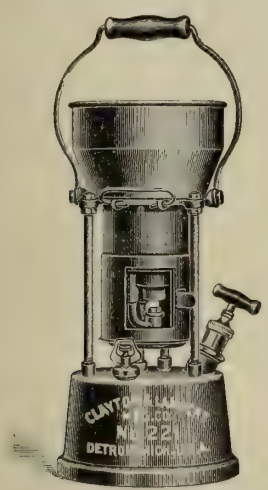
CANADIAN manufacturers, who recently secured contracts for high explosive shells from the Dominion Shell Commission, are negotiating with American Steel Companies for steel billets, forgings and round steel bars, aggregating between 40,000 and 50,000 tons, which will call for an expenditure of about $20,000,000 in the aggregate. The inquiries come from several different sources and are for lots ranging from $3,000,000 to $6,000,000 or $7,000,000 each. It is understood that the shells range in size from 4 to 12 inches in diameter. Some of the above inquiries it was reported later, came from domestic manufacturers of munitions who are on the point of closing sub-contracts for shells with the Canadian manufacturers who received the original awards from the Commission.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

IMPROVED KEROSENE FIRE POT

The Clayton & Lambert Mfg. Co., Detroit, Mich., have recently introduced to the trade their No. 221 Kerosene Fire Pot, illustrated herewith, which they claim embodies many improved features in construction. The burner is made with a powerful generator that superheats the kerosene gas before it is burned and which, the makers claim, is remarkable in heat producing qualities, burning little fuel and producing a clear blue flame, free from smoke and odor. All parts are made of the best metals



Clayton & Lambert No. 221 Fire Pot.

and are strong and can be easily cleaned, should they become clogged from impurities in the fuel. A cleaning needle is supplied free. The large automatic brass pump quickly produces all needed air pressure for operating. The pressure can be released when desired to extinguish the flame by means of the air valve screw in the filler plug. The tank is of heavy gauge welded steel and is said to be practically indestructible. An adjustable wind shield makes the fire pot excellent for all outside work in bad weather as well as for use indoors.

SAFETY LADDER GRIP

The Morrison Safety Ladder Foot Suction Grip Co., Lowell, Mass., offers to the trade the Morrison safety ladder foot suction grip, which is made for all sizes of ladders. The device is claimed to make the ladders extremely safe. The castings are made so that their life is practically unlimited, even though the ladder wears out, and the rubber suction grip pad can be renewed at a small cost.

It is stated by the company that the more weight on the ladder the tighter

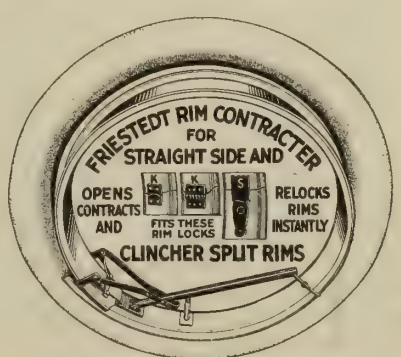
Morrison safety ladder foot suction grips in use.

is the hold of these suction grips, even on such surfaces as polished iron, glass, marble, ice, polished floors, asphalt, etc.

Aside from the safety feature, the grips are said to prevent the ladder from scratching and marring delicate surfaces which it is placed against.

RIM CONTRACTOR

Friestedt Rim Contractor Co., 2934 Lake street, Chicago, Ill., offers to the trade the Friestedt rim contractor for



Friestedt Rim Contractor.

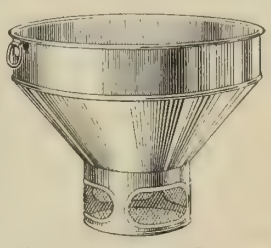
straight side and clincher split rims. The makers claim that the device opens, contracts and relocks straight-side and clincher split demountable rims instantly, without clamps to adjust, nor bolts to tighten. They also claim that with this device quick tire changes are as easy by the roadside as in the garage.

The makers of the device claim that kinked rims, which give the wheels the appearance of being wobbly, are the result of prying off tires or pulling the rims out of them by sheer strength, and likewise replacing them. Twisted and displaced flaps make the relocking of rims difficult, and a misguided screwdriver will puncture the tube.

FRIBERG SANITARY STRAINER

Sanitary Strainer Co., Maiden Rock, Wis., offers to the trade the Friberg sanitary milk strainer.

The makers claim that the Friberg strainer has four times the straining



Friberg Sanitary Strainer.

surface of the ordinary strainer, and is guaranteed to leave no dirt in the milk. The straining cloth resists wear, because it stands upright. Portions of the strainer cloth can be replaced if broken. The straining cloth can be easily cleaned, because it is easy to get at the cloth with soap and water.

The makers state that the strainer can be used either for a milk pan or milk can, and it can also be milked into when in use on the pail.

Reinforcements prevent the strainer rolls from breaking down.

PEERLESS AUTO SPECIALTIES

The Columbus Varnish Co., Columbus, Ohio, now offer to the Canadian hardware a line of Peerless automobile specialties, including mohair, top dressing, Peerless cylinder enamel, auto body polish, lining dye, cushion dressing, lamp enamel, leather top dressing, rim paint, etc. Complete descriptive matter will be mailed upon request.

EVENTS IN THE TRADE

New Firms

St. Catharines, Ont.—Remball & Ker have opened a hardware store here.

Hardware Firm Wants Catalogues

Charlottetown, P.E.I.—The Crabbe Hardware Co., Ltd., has taken over the business and goodwill of the late L. W. Crabbe. The new firm would like to receive catalogues from wholesalers and manufacturers.

Equipping Plant

Peterborough, Ont.—The Peterborough Metal Products Co., located in the building formerly occupied by the Canadian Cordage Co., is installing machinery and expects to have the plant running by the first of the New Year. E. G. Sutton is general manager of the company.

Business Changes

Toronto, Ont.—The hardware business of C. P. Godden has been taken over by Thos. Meredith & Co., Ltd.

Winnipeg, Man.—Hero Mfg. Co., manufacturers of fanning mills, etc., have amalgamated with Munro Steel & Wire Co.

Alameda, Sask.—Scott & Truscott, hardware and harness, are selling out to McDonald & McLennan.

Montreal, Que.—Krasel Hardware & Plumbing Co. has changed to L. P. Barber Hardware & Plumbing Co.

Lucan, Ont.—W. J. Young, tinsmith, has discontinued business.

Krydor, Sask.—Scherban & Szntiak, hardware, have been succeeded by Szntiak & Stus.

Obituary

The death occurred in France of Lt.-Col. Harvey Macleod, Sydney, B.C., second in command of the second brigade, Canadian Field Artillery. Lt.-Col Macleod was 33 years of age and had been at the time of enlisting for overseas service, connected with the Canadian artillery for eleven years. Just prior to his death he had disposed of his business in Sydney to Thompson & Sutherland.

Hamilton, Ont.—The death occurred here suddenly of Harry James, of Wood-Vallance & Co., after a short illness. In 1889, as a boy, he obtained employment with Wood, Vallance & Co., and remained with the firm for some years, finally severing his connection to join the staff of the Canadian Northern Railway, where he was employed until 1911, and then returned to his old home. He again joined the staff of Wood, Vallance & Co., and remained with the firm until his death.

Dominion Incorporations

Canadian Electro Products Co., capitalized at $500,000, head office Montreal, to manufacture and deal in metal products.

Diamond Metal Co., capitalized at $20,000, head office Montreal, Que., to deal in metal, junk, rubber and waste material.

HON. JOHN MILNE

Senator. President and managing director, Burrow, Stewart & Milne Co., Hamilton, Ont. The announcement of Mr. Milne's appointment appeared on page 41 of last week's issue of Hardware and Metal.

International Steel Corporation, capitalized at $100,000, head office Toronto, to manufacture and deal in iron, steel, and other metals, etc.

Chemical Refinery, capitalized at $100,000, head office, St. Catharines, to manufacture and deal in fertilizers, chemicals, and drugs, etc.

The Federal Brass Co., capitalized at $50,000, head office Montreal, to acquire the business now carried on by the Federal Electric & Mfg. Co.

Imperial Cordage Co., capitalized at $150,000, head office Walkerton, Ont., to manufacture rope, binder twine and by-products of manila, hemp, etc.

The Montreal Steel & Foundry Co., capitalized at $150,000, head office Montreal, Que., to manufacture and deal in machinery, iron, steel and other metals.

Canadian Vincent Valve Co., capitalized at $25,000, head office, Victoria, B. C., to acquire certain patents, and to carry on the manufacture of valves, etc.

Travellers Hold Meeting

Halifax, N.S.—The annual meeting of the Maritime Commercial Travellers' Association was held last Saturday and the following officers and directors were elected for the ensuing year:

President—J. E. Petrie, St. John.

Vice-President for Nova Scotia—W. G. Smith, Halifax.

Vice-President for New Brunswick—D. McKinney, St. John.

Directors for Nova Scotia—G. H. Laidlay, F. A. Graham, E. A. Corbin, F. C. Carten, C. W. Smith, Geo. W. Winters.

Directors for New Brunswick—E. A. Hoyt, H. C. Simmons, J. Pringle, J. H. Prichard, T. E. Simpson, A. F. Stillwell.

The membership for 1915 is 1,243, of whom 710 are registered at Halifax, and 533 at St. John.

Personal

Wilbert Lendon of H. Lendon & Son, hardware merchants, Leamington, Ont., has enlisted for overseas service.

A. G. McAvity, manager of the Canadian Blower & Forge Co., Berlin, Ont., has been engaged by the Imperial Munitions Board in an advisory capacity.

J. P. McNaughton, sales manager of the Dominion Iron & Steel Company, Sydney, C.B., was in Montreal recently; he was registered at the Windsor.

Hon. W. H. Thorne, of W. H. Thorne & Co., wholesale and retail hardware, of St. John, N.B., was a week-end visitor in Montreal, being a guest at the Ritz-Carlton.

E. L. Warner has been appointed sales manager of the Dominion Paint Works, Ltd., Walkerville, Ont. Mr. Warner's office will be in the Lumsden Bldg., Toronto. Mr. Warner formerly represented the company in Eastern Canada.

C. C. Ballantyne, vice-president and managing director, Sherwin-Williams Co., of Canada, Ltd., was a recent visitor in Toronto. Interviewed by Hardware and Metal, Mr. Ballantyne stated that since September last, there had been a continuous improvement in all branches of the company's business. The outlook for 1916 is very promising.

HARDWARE LETTER BOX

Ice Skidding Irons

The Mills Grocery and Hardware Co., Grimsby, Ont.—"Please advise where we can secure ice skidding irons."

Ice skidding irons are sold by Robt. Donaldson & Sons, Montreal.—Editor.

Canada Steel Range

Thos. Magladeny, Englehardt, Ont.—"Please advise who makes the 'Canada' steel range."

The Canada steel range is made by the Moffat Stove Co., Weston, Ont.—Editor.

Round Wood Sifters

Subscriber (name on request).—"Please advise where we can secure round wood-rimmed ash sifters and covers."

The above can be supplied by Hanson, Tilley Co., Montreal.—Editor.

Steel Clad Iron

R. A. Wells, Dresden, Ont.—"Please give name of maker of American Steel Clad Electric Iron."

Can any of our readers kindly supply address?—Editor.

REDUCTION IN COST OF PARCELS TO FRANCE

The Postmaster-General of Canada has been successful, as a result of negotiations entered into with the Imperial Postal Authorities, in effecting an arrangement with the British Government whereby parcels from Canada for Canadian soldiers in France and Flanders will be carried at the same rate of postage as applies to parcels from the United Kingdom for the Expeditionary Forces on the Continent, that is:

For parcels weighing up to three pounds, 24 cents.

For parcels weighing over three pounds and not more than seven pounds, 32 cents.

For parcels weighing over seven pounds and not more than eleven pounds, 38 cents.

This means a material reduction on the cost of parcels. This reduction has been brought about by Canada foregoing all postal charges for the conveyance of these parcels in Canada and on the Atlantic.

The public are reminded, however, in accordance with the circular issued by the Department recently, that until further notice, no parcel can be sent weighing over seven pounds.

MONTREAL H. & M. ASS'N
Alex. Gibb Re-elected President at Annual Meeting

A number of important matters which have had the active attention of the Montreal Metal and Hardware Association were referred to at the annual meeting by the President, Alex. Gibb. The majority of these dealt with transportation problems and included such questions as the collection of cartage charges by the railway companies, the marking of small lots of iron and steel for rail shipment, the proposed increase in freight rates in Eastern Canada and the threatened advance in import rates from Halifax, St. John and Portland to points in Quebec and Ontario

The election of officers resulted in the re-appointment of Mr. Gibb as chief executive with T. Esmond Peck, vice-president, E. Goodwill, treasurer, and directors: J. H. Hanson, W. S. Leslie, A. Prud'homme and J. W. Pyke. Geo. J. Growdy was unanimously selected as the association's nominee for re-election to the council of the Board of Trade.

ALEX. GIBB

Montreal, re-elected president, Hardware and Metal Association, Montreal.

Industrial

New Glasgow, N.S.—The Nova Scotia Steel & Coal Co. are building an addition to their steel plant at Sidney Mines, estimated to cost $100,000.

Quebec, Que.—Fire damaged the Eastern Canada Steel Co. plant, St. Malo, recently. The cause of the fire is not exactly known, but it is supposed that it originated through an explosion in the furnace room. The damage, which is said to be around $100,000, is covered by insurance.

Trade Inquiries

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

1244. **Agent.**—An agent in Ireland is open to represent Canadian houses disposed to do business in wood boards, such as washboards, handles of all descriptions, clothes-pegs, etc., also firms in the lumber trade.

1245. **Scrap Metals.**—A Birmingham firm is open to purchase all kinds of scrap metals.

1246. **Steel Billets**—A firm in Birmingham is prepared to buy 1½-inch steel square billets lead, soft quality. Prices should include delivery to West Bromwich.

1257. **Hardware Specialties, Household Articles, Etc.**—A London company are desirous of securing the agency of Canadian manufacturers of hardware specialties, household articles and labor-saving devices.

1258. **Fire Hose.**—An important London manufacturing company wishes to get into touch with Canadian manufacturers of canvas and other fire hose.

1261. **Paper.**—A South African firm of paper merchants asks for mill agency on unglazed imitation parchment, genuine vegetable parchment, kraft browns, drab sealings and waxed tissue in the ream and roll. Mills desiring representation are asked to send samples and prices with particulars covering agency proposition.

1263. **South African Agency.**—Iron tubes, agricultural implements, dairy implements, dairy machinery, washing machines, hand and power farm machinery, pumps and similar lines are asked for by a South African agent who has an established connection covering South Africa twice each year.

1264. **Motor Ploughs.**—A London company wishes to get into touch with Canadian manufacturers not already represented in the United Kingdom, of light two-share motor ploughs, who are requested to forward catalogue, f.o.b. export prices and discounts, boxing charges and particulars of weights, measurements, etc.

Ontario Incorporations

York Paper Box Co., capitalized at $40,000, head office Toronto, to manufacture all kinds of paper boxes.

Wood Products Company, capitalized at $100,000, head office Toronto, to engage in the distillation of wood and carry on the manufacture of charcoal, wood alcohol and other products.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

December business with the hardware jobbers continues brisk and there is a heavy demand for Christmas goods. The recent cold snap and heavy falls of snow in many localities have stimulated the demand for winter hardware lines. In the iron and steel trades the upward tendencies of the market continues and many price changes of a far-reaching and important nature have taken place since last week. Among the many lines which have advanced this week are horseshoe iron, band iron, reeled machinery, toe calk, mining tool and spring steel; black and galvanized pipe, tinned iron, Canada plates, pressed spikes, sash cord, tinned wire. There has been a wide change in the discounts on tin, enameled and other wares.

Several advances are predicted for the near future. There are so many important phases dealt with in the Montreal, Toronto, London and Winnipeg reports this week that it would be impossible to even briefly refer to them in this summary. Hardwaremen should read the markets closely.

MONTREAL

MONTREAL, Dec. 16.—A tendency on the part of the trade to defer buying of holiday and other seasonable lines, together with a late arrival of heavy snow, have had the effect of continuing the rush on the wholesalers into the period which is usually deemed so dull that stock-taking is the common arrangement. For this reason December should make an unusually good showing and it will be a marked contrast to the same month of last year. It is evident that the demand for holiday lines has been greater than the retailers had been counting on as is evidenced by the volume still moving to country districts and the changed conditions in the city. The snow has brought a demand for sleds, sleigh bells, snow shovels, snow shoes, and similar lines , and in the holiday trade there is a good call for skates, cutlery, plated ware, electrical utilities, etc.

In the iron and metal trades the upward tendencies of the market continues. The attitude of the mills in avoiding or refusing business is being continued. That their difficulty is being increased is to be found in the fact that the November statement of the United States Steel Corporation showed that the unfilled tonnage had increased by over 1,000,000 tons to more than 7,000,000 tons, whereas it had been estimated that the increase would not be more than 300,000. What is more significant of the future trend of the market is the fact that a large proportion of the big orders are accompanied by specifications. This means that consumers are not looking for a reaction at the expiration of the specification privileges of their present contracts with the mills. Under the circumstances, dealers see nothing but a continued upward movement as the present stocks move out and there is no assurance of future supplies. As yet many lines have not been brought to the high level warranted by the position of the market and the cost of raw materials. On the other hand it must always be considered that the top mark of a bull market is seldom a sound one, and that there is nearly always a reaction.

Advances recorded include: refined and horseshoe iron and band, domestic, reeled machinery, toe calk, mining tool and spring steel; black and galvanized pipe; tinned iron, Canada plates, pressed spikes, sash cord, tinned wire, etc. Also there has been a wide change in the discounts of tin, enamelled and other wares. The metals have been fairly steady, although aluminum has gone up another 5c and lead is fractionally higher.

An advance in black and galvanized sheets at an early date is predicted as well as still higher figures on black and galvanized pipe. Lanterns are said to be slated for higher prices.

Tin Firming Up.—Following a weaker tendency shown last week, following the decline in the American market, tin has recently developed a firmer tone, but the change is not sufficient to alter the prices. The local tendency of the market appears to be somewhat contrary to the developments in both New York and London, the former quoting fractionally lower than at last writing on the influence of the English situation. Montreal quotation: 45c-46c—firm.

Spelter is Firmer.—Although the quotations on spelter are locally the same as last week, there is a much firmer tendency. The tone has stiffened in sympathy with the American market where advances have been recorded, but the price on this market is unchanged because it did not sink to the level indicated by the New York decline. Late advices from the States are that the market is strong with higher prices for both spot and futures; spot at E. St. Louis has advanced 1½c since last report. Montreal quotation: 22c-22½c—firm.

Lead Higher.—An increase of ¼c a pound on lead has been made this week. The strength of the local market appears to be a development of its own and probably the result of the increased demand for shell production. New York, which usually rules the price situation, reports no change in the Trust price of 5¼c and only a quiet demand, while London also reports little or no change. Montreal quotation: 7½c-7¾c.

Copper is Strong.—The copper market is strong, and here, as with some of the other metals entering into the manufacture of munitions, the local situation seems to have discovered an identity of its own. New York reports the domestic situation practically unchanged from a week ago and the interest of buyers very small; such new prospective demand as has developed has been for export. Montreal quotation: 22½c—strong.

Antimony.—The tone in the antimony market is somewhat easier and the quotations have shaded down a couple of cents from the top, thus narrowing the range but not reducing the minimum. The change comes with a weaker tendency in New York where Chinese and Japanese are down about ½c since last report. Montreal quotation: 42c-43c—steady.

Aluminum Still Higher.—Aluminum continues to soar in price, with the result that for most domestic purposes the charges are prohibitive and the market is, therefore, a very narrow one. The local quotation has advanced another 5c but the increase seems to be a domestic development, as there is practically no change in the quotations. Montreal quotation: 70c.

Solder is Steady.—The solder situation is steady, the weaker tone of last week in sympathy with the tin market having been lost in the change in the latter metal. Prices cover a considerable range in quality and the following quotations are for a standard product.

Half-and-half 26c-27c
Strictly 28c-29c

Sheet Zinc.—There is practically no change in the market for sheet zinc, although some jobbers are quoting higher prices than those which have prevailed. The situation may, therefore, be regarded as firm on the basis of recent quotations. Montreal: casks, 27½c; part casks, 28c.

Steel Market More Acute.—There appears to be no relief in sight for the steel situation. The attitude of the mills has not improved and on top of the further increases made this week, the fore-

cast is made that there will be still higher prices for pipe, sheets, nails, wire and other products of iron and steel. Advances, it is pointed out, will be in order so long as existing stocks are subject to exhaustion and their replacement doubtful. On the other hand, there is the fact that higher prices are likely to eventually reduce consumption and it may be a question of how far the market will go before demand is interferred with. Thus far, as is usually the case, the advances have been attended by heavy buying. As indicating that the position of the mills has not recently improved it may be pointed out that the unfilled tonnage of the United States Steel Corporation at the end of November was over 7,000,000 tons, an increase of over 1,000,000 tons over the preceeding month. This increase was 300,000 tons in excess of the expectations, and booking during the month were 40,000 tons per day more than shipments made—virtually one hundred per cent. more than was turned out. The prices of the month's bookings were the highest in three years and in some cases the highest in eight years—and many of the contracts contain a non-cancellation clause. The latter is an indication that consumers generally will have to meet the higher prices when their present contracts expire.

Iron and Steel Advances.—Throughout the list of iron and steel there are a number of new high prices recorded. Comparison of these new figures with those prevailing a couple of months ago will indicate the radical nature of the increases and the abnormal conditions prevailing. Where the stop in the upward trend will be is difficult to say, but buyers should consider that there is more than a possibility that when the high mark is reached it will not be maintained but will be followed by a reaction. Following are new prices and advances shown over last week:

	New Price	Advance
Refined iron, per 100 lbs...	$ 2 60	20c
Horseshoe iron, per 100 lbs.	2 60	20c
Band steel	2 55	5c
Domestic	2 55	25c
Reeled machinery steel	3 20	10c
Toe calk steel	3 50	20c
Mining cast steel, per lb...	0 09½	1¾c
Silver tool steel, lb.........	0 15½	2c
Spring steel	3 30	20c

Another Advance in Pipe.—Still another advance has been made in the prices for both black and galvanized pipe. The increase this time is about eight per cent. This is the direct result of the developments in the steel situation and the difficulty in insuring future supplies. Still other advances are predicted in the trade for the near future. Both buttweld and lapweld pipe are affected, but the quotations on the latter have not yet been readjusted; for the time being they are under suspension. The new buttweld prices are as follows:

Size.	Black	Galvanized
¼ in. and ⅜ in.	$ 2 40	$ 3 81
½ inch	2 98	4 63
¾ inch	3 45	5 69
1 inch	5 10	8 42
1¼ inch	6 90	11 39
1½ inch	8 25	13 61
2 inch	11 10	18 32
2½ inch	17 55	28 96
3 inch	22 95	37 87
3½ inch	27 60	45 54
4 inch	32 70	53 96

Tinned Iron Goes Up.—Following the general tendency of the steel and iron markets, there has been a material advance made in tinned iron. These advances vary to some extent between different firms but the following figures may be taken as a basis and if there are any quotations now shading below it may be expected that they will be changed in the very near future. New prices:

72 x 30 up to 24 gauge, case lots..$11.00
72 x 30, 26 gauge, case lots...... 11.50

Less than case, 25c extra per 100 lbs. extra.

Canada Plates Advancing.—Canada plates are also advancing with the general situation in iron and steel products. As yet the higher quotations do not appear to be general and for this week the following range is given:

Ordinary, 52 sheets	$3.25	$3.50
All bright, 52 sheets	4.60	4.75

Sheets Are Very Strong.—Although there are no further advances on black and galvanized sheets this week, higher prices on both lines may be looked for in the near future. On the black at least, developments may be looked for before another week. In this market it is not a question of what the price should be, but what holders of stocks want to charge; the advances would be much more rapid if the actual market conditions were being followed. However, with stocks running short and future supplies doubtful, the jobbers must be expected to protect themselves to some extent. Following are the figures on black sheets based on last week's advance of 20c and likely to be changed again in the very near future:

10 gauge	$3 20
12 gauge	3 25
14 gauge	3 05
16 gauge	3 10
18-20 gauge	3 25
22-24 gauge	3 35
26 gauge	3 40
28 gauge	3 50

NEW PRICES ON WARES, ETC.

Enameled Ware—
Run of kiln, 70 and 12½%.
Grey ware, 60 and 10%.
Canada ware, 50 and 2½%.
White ware, 70 and 10%.
Stamped Ware—
Plain, 70 and 10%.
Retinned, 70%.
Tinners' Trimmings—
Trimmings, 40%.
Trimmings, plain, 70 and 10%.
Trimmings, retinned, 70%.
Copper boiler and kettle pitts, 10%.
Cans—
Creamery cans, 30 and 5½%.
Railways cans, 40 and 2½%.
Milk can trimmings, 10%.
Japanned Ware—
Regular, 40%.
White, 35%.
Watering pots, 35%.
Fire shovels, 45%.
Patent stove pipe, 35%.
Elbows, sturdy, 40%.
Elbows, light, 7", $1.15; 6", $1.00.
Stove Boards—
Wood lined, 60 and 10%.
Paper lined, 60, 10 and 10%.
Spanish copper, 38c.

Other Metal Products.—Lead pipe is steady to firm on the advance of 50c announced last week, an increase of ¼c in the quotation for lead being a factor for strength. Brass and copper sheets, tubes, etc., are verv firm and there are prospects of higher prices.

Pressed Spokes Higher.—With the market for wire nails strong on the advance to $2.90 recorded last week, there has been an upward change in the quotation for pressed spikes, which are now listed at $3.45 as compared with $3.20.

Rivets Firm.—Both iron and copper rivets are firm and one firm reports an advance on the trade price of the former. Screws are steady on the new discounts announced last week.

Wire Market Steady.—There have been no further developments in the wire situation after the advances recorded last week. However, the situation is firm, and with the general tendency of the steel market to go to higher levels the indications are that even the present high basis may be advanced.

Sash Cord Higher.—There are generally higher prices this week for sash cord. The advance is about 1½c on the following sizes, which are generally known to the trade:

No. 6, lb.	30½c
No. 7, lb.	29½c
No. 8, No. 9, No. 10, No. 12	29c

Halters.—The cost of manufacture of certain lines of leather halters has increased under the unusual conditions prevailing and some wholesalers are making changes in their quotations to the trade.

Lanterns.—There is a report that higher prices on lanterns are to be expected. The cost of manufacture of these lines has undoubtedly materially increased during the past year or so.

Rope.—Although the standard rope quotations—for Manila and sisal—have recently been without change, there have been advances in other miscellaneous lines covering advances on manufactures of hemp, jute, etc.

Old Materials.—There is a very firm market continuing for old materials, all quotations being well maintained and advances recorded for heavy melting steel and scrap aluminum, the latter now bringing 9½c and the latter 29c.

Enamelled Ware.—As will be seen from the new discounts printed in a panel in connection with this report, there have been general readjustments throughout the list of enamelled, tin and other wares. These cover advances averaging 5 to 7 per cent., and are made in view of the higher cost of raw materials following the general advances in the metals.

Stoves.—Despite the approach of the holiday season, stove dealers report that there is a very good demand for the season and December should make a showing 50 to 75 per cent. better than the same month a year ago.

Holiday Goods.—There is a marked demand for goods for the holiday trade both in the country and the city. The call for these goods has been later this year than usual and the rush promises to last for some time yet. Dealers have evidently been arranging their buying pretty close to the demand and the latter has probably been better than expected. Cutlery and electrical utilities are two popular lines.

Winter Lines.—The heavy fall of snow this week has caused a strong demand for sleds, snow shovels, sleigh bells and other winter lines, while skates, snowshoes, toboggans and other similar lines are evidently popular as gifts.

TORONTO

TORONTO, Ont., Dec. 16.—The outlook in the hardware trade continues favorable and the cooler weather is stimulating business in seasonable lines. Jobbers report a large Christmas trade and an improved demand for cutlery, clocks, silverware, pocket knives, etc. Skates, sleigh bells, snow shovels and all lines of winter sporting goods are moving out freely. Shelf hardware is in good demand in the country districts, while stoves and heaters are also moving well.

There is little change to note in the general situation. The revival in trade continues and the outlook is distinctly favorable. The export trade is increasing in volume while domestic trade has improved considerably of late. Railways report substantial increases in earnings and bank clearings exceed last year as also those of previous years, which are favorable indications as to the increase in the volume of trade, and improvement in conditions generally. The shortage of tonnage and high ocean freight rates are a serious inconvenience to importers and exporters and has not only increased the cost of certain products but has affected deliveries also.

The steel market continues very strong with every possibility of higher prices. The demand for steel for shells is increasing and is greater than the Canadian mills can produce. Preparations are being made for turning out the large-calibre shells which will call for a considerable increase in tonnage. The machine tool trade is active and dealers report very satisfactory business. In the metal market, tin and spelter have declined, otherwise prices are unchanged.

More Price Changes.—There are again a number of important price changes to note this week. Wrought iron pipe, iron tinners, rivets, padlocks, cabinet locks, cotton waste, sash cord, hemp and jute twines, poultry fencing, are among those principally affected. This higher tendency for prices shows no signs of abatement; in fact, there is every indication that prices will gradually increase throughout the entire market. The iron and steel market is very strong and with raw materials increasing in cost, the hardware market will naturally be affected. The expected advance in wares has been made and includes milk cans and trimmings, enamelled ware, stamped ware and japaned ware.

Iron and Steel.—The extraordinary activity in the iron and steel trade continues and there is no sign of any recession. The steel companies have more business than they can handle and are booked up for months ahead. The demand is so much greater than Canadian mills can supply that concerns working on shell contracts are obliged to buy raw materials from the States. It is stated that several large contracts for steel forgings and round steel bars which have been under negotiation between Canadian concerns and American mills are held in abeyance temporarily. It is understood, however, that the contracts will eventually be placed in the States. Under prevailing conditions, the market being very strong, higher prices for domestic steel and iron bars are expected any time. There is no change in the situation with regard to American bars, shapes, etc., and prices are still withdrawn.

Prices continue to advance in the States and the export demand is increasing. The French Government is enquiring for thousands of tons of round steel bars. Many of the mills are increasing their capacity, but are as far behind as ever on delivery. Steel bars are quoted at 1.70c base and iron bars 1.80c base, Pittsburgh. Billets continue to advance on heavy demand. Bessemerr billets are now quoted at $30 and openhearth billets at $31 Pittsburgh. Forging billets are unchanged at $52, and wire rods are higher at $40, Pittsburgh.

Pig Iron.—The pig iron market is very strong and prices continue to advance. A large percentage of tonnage is going into steel, there being little demand for foundry grades. "Hamilton" and "Victoria" brands have advanced $1, and are now quoted locally at $24 per ton. The market for pig iron in the States is becoming excited and prices are advancing. "Grey Forge" is now quoted at $17.95, Pittsburgh. It is understood that quotations on "Lake Superior" iron ore for the coming season have been made. "Mesaba Bessemer" is quoted at $4.25, which is 80c above this year's basis. On "Mesaba non-Bessemer," 70c advance over this year is asked.

Old Materials.—There is little change to note with regard to the situation in old materials. The market generally is firm with higher prices for heavy melting steel, aluminum and lead, while the various grades of copper have also advanced slightly. The market is not very active, but there is a fair demand for copper and heavy melting steel. There is a continued scarcity of aluminum; this has strengthened the market for scrap metal.

Machine Tools.—The market is very active and there is a good demand for machinery for shells, principally for the larger sizes. Some orders for 8-in. shells have been placed, and the concerns thus favored are getting their plants in shape for machining them. There appears to be a possibility of the situation as regards getting machine tools being considerably relieved. There is a growing belief in the American market that purchases of machine tools for shipment to England will in the future be of comparatively small proportions. It is believed that munition plants in Great Britain are now capable of meeting all requirements; the demand for tools is, therefore, less urgent. In this event, machine tools will be easier to obtain for this market and deliveries will be better. It is understood that Russia is buying a large amount of equipment, not only lathes, but practically a general line of tools.

Metals.—The market is quiet this week and lower levels for tin and spelter have again to be noted, other metals being unchanged. Copper is quiet, although the market is in a strong position. The lead market is quiet, but firm. There is no change in the antimony situation, and the aluminum market is featureless. There is a continued active demand for metals for munitions, but ordinary business is quiet.

Tin.—Although the primary markets are firm, tin is weaker locally and has declined 1c. There is a fair demand, but stocks are accumulating which may depress the market. Tin is quoted locally at 44c per pound.

Copper.—The market is in a strong position, although quiet and unchanged. There is apparently a lull in demand both for domestic and export. "Lake Copper" is quoted at 20¾c per pound.

Spelter.—The market is in a very peculiar condition and it is difficult to size up the situation. There is good inquiry but sellers are not showing much disposition to do business. Spelter has declined 1c locally and quotations are more or less nominal at 19c per pound. Zinc ore is quoted from $80 to $105, Joplin, Mo.

Lead.—The market is quiet but firm at the "Trust" equivalent of 5.25c, New York. The ore is quoted at $70 to $73, Joplin, Mo. Lead is unchanged locally at 7c per pound.

Antimony.—Conditions in the antimony market are unchanged. Spot stocks are scarce but futures are being freely offered at a concession of about 2c less than the spot market. Local quotations are unchanged at 40c per pound.

Aluminum.—There is no change in the situation. Supplies are scarce and the demand continues heavy. Quotations are nominal at 65c per pound.

Solders.—The market is weaker following the decline in tin and prices of solders range from ½c to ¾c lower, according to grade. Prices are given in the current market quotations.

Wrought Iron Pipe Advances.—Higher prices for wrought iron pipe have been predicted in these columns as the cost or raw materials have been steadily increasing since the last advance in pipe on No. 5. Galvanized pipe has also advanced. The new prices represent an advance of 2 points and are given in the current market quotations.

Kitchen Utensils Advance.—The higher prices on some lines of ware predicted in Hardware and Metal have materialized. The increase in cost of raw materials has, as was expected, resulted in an advance of stamped and enamelled ware, while milk cans are also affected. The new discounts are given in the current market quotations.

Galvanized Sheets.—The galvanized sheet market is very irregular. Many makers have discontinued quoting on sheets on account of the fluctuations in the spelter market. Prices of black sheets continue to advance and all other materials used in the manufacture

of galvanized sheets are also higher. Prices of galvanized sheets are very firm and are expected to go higher.

Locks Higher.—Yale padlocks have advanced 10 per cent., and all cabinet locks are approximately 10 per cent higher.

Sash Cord, New Prices.—Prices of Hercules sash cord have advanced and are as follows:

No. 6, per lb.	30½c
No. 7, per lb.	29½c
Nos. 8 to 12, per lb.	29c

Wire Nails.—Quotations on wire nails are very firm at the advance made last week, and indications point to still higher prices. Wire nails are quoted at $2.85 base per keg, and cut nails at $2.90 base per keg.

Wire.—All lines of wire products are very firm at the advances published last week. Smooth steel wire, No. 0-9 gauge, is quoted at $3 base. Prices of galvanized wire are still withdrawn in the local market, and manufacturers are only quoting against immediate acceptance. While present conditions prevail in the raw material market, it is practically impossible to give firm prices on galvanized wire.

Poultry Fencing Advances.—New prices have been issued for "Invincible" poultry netting, which is an advance of about 15c. The new prices for "Invincible" netting are: No. 1,640, 56c; 1,848, 61c, and 2,060, 67c per rod.

Iron Rivets Advance.—The new discount on blocked and tinned iron rivets and burrs is 65 per cent., as against 67½ per cent. formerly.

Waste Advances.—A new price list for cotton waste has been issued in effect on December 13. The advance is approximately 1c per pound for all grades. The market is strong and manufacturers are only quoting for immediate acceptance and prompt delivery. Small contracts for lots of one ton or less are only being made, the uncertain condition of the market being the cause of this arrangement. The new list will only be in force for the remainder of this year, as a new list will be issued early in 1916, when a further advance may be expected. The high cost of raw material and difficulty in obtaining same is the cause of the strength in the waste market.

Grape Twine.—Bookings of jute grape twine are now being made for spring delivery. The following prices are now in effect:

1-ply heavy	13½c	per lb.
2-ply medium	15c	„
3-ply fine	16c	„

Rope.—There has been a sharp advance in wrapping twines, 2c for hemp twines and 2c to 3c for jute twines. Cordage has advanced 1c per pound all round in the States. It will be noted from the above that the market is very firm and higher prices are expected for some lines. The situation as regards raw materials is unchanged, and prices continue high.

The Tariff.—There is a report circulating in unusually well-informed quarters that the tariff on many lines will be increased 5 per cent. next month. If true, this will come as a surprise to many in the trade, who did not expect any advance over the 7½ per cent. which was added early in the year. However, it is known that some firms are buying in anticipation of a higher tariff.

LONDON

LONDON, Ont., Dec. 16.—Many important price changes have taken place this week, and in all probability many more will take place in the near future. The markets are very unsettled owing to recent developments in the iron and steel trades. Rumors of further proposed tariff changes have also caused a buying movement in some lines.

Linseed oil and turpentine have both advanced in price locally. Galvanized wire has again advanced. Other lines which have advanced during the week are sash cord, curry combs, cabinet locks, snow shovels, castor oil, glass, screw and strap hinges, hemp packing.

There will undoubtedly be further advances on many lines during the next four weeks.

December Business Good.—December business is brisk. Orders are larger and show an increase over December, 1914. There is a good demand for Christmas goods and all winter lines. Among the many lines slated for advances in the near future are enamelled ware, milk can trimmings, japanned wares, etc.; lanterns, iron pipe.

Oils, Paints, etc.—Linseed oil has advanced 2c per gallon, and is now quoted as follows: Raw linseed oil—1 to 2 barrels, 87c per gal.; 3 to 5 barrels, 86c per gal.; 6 to 9 barrels, 84c per gal. Boiled linseed oil is quoted in 1 to 2-gal. barrels at 90c per gal.; 3 to 5 barrels, 89c per gal.; 6 to 9 barrels, 87c per gal.

Turpentine has advanced 1c per gallon, and is quoted in 1-barrel lots at 86c per Imperial gallon; 2 to 4-barrel lots at 85c per gallon; 5-gallon lots, 93c per gallon.

White lead and paints remain firm and unchanged.

Wire Advances.—An advance of 10 cents per pound has taken place on fence wire and quotations are now as follows: Barb, $3.45 per 100 lbs.; No. 9 galvd., $3.10 per 100 lbs.; No. 12, galvd., $3.25 per 100 lbs.; No. 13 galvd., $3.35 per 100 lbs.; No. 9 coil spring, $3.15 per 100 lbs.

O and A wire remains unchanged as follows: No. 10, $3.16 per 100 lbs.; No. 11, $3.22 per 100 lbs.; No. 13, $3.30 per 100 lbs.; hay baling, No. 14, $3.40 per 100 lbs.

Sash Cord Advances.—An advance of 2c per pound has taken place in sash cord, and quotations are now as follows: No. 6, 30½c per lb.; No. 7, 29½c per lb.; Nos. 8, 9, 10, 12, 29c per lb.

Curry Combs Advance.—An advance of 5 per cent. has taken place in curry combs, and the discount is now 25 per cent.

Castor Oil Advances.—Castor oil has advanced 2c per pound, and is quoted as follows: 1sts, 18c per lb.; 2nds, 17c per lb.

Glass Advances.—Following the advance on glass, shown in the Toronto report last week, the following prices are now in effect here:

NEW CASE LIST.

	Single	Double
Up to 25	$ 7 80	$11 90
26 to 34	8 15	12 85
35 to 40	8 50	13 60
41 to 50	11 75	15 50
51 to 60	12 25	15 85
61 to 70	13 10	16 80
71 to 80	14 75	18 35
81 to 84	....	22 75
85 to 90	....	24 35
91 to 94	....	25 00
95 to 100	....	29 00
101 to 105	....	32 00
106 to 110	....	37 00

Less Single Dia., 30%.
Less Double Dia., 30%.
Cut Lights Net Light List.

The net prices on glass figured at 30 per cent. off new list are as follows:

	Single	Double
Up to 25	$ 5 46	$ 8 33
26 to 34	5 71	9 00
35 to 40	5 95	9 52
41 to 50	8 22	10 85
51 to 60	8 58	11 10
61 to 70	9 17	11 76
71 to 80	10 33	12 85

Locks Advance.—Yale cabinet locks have advanced 10 per cent. Some advances in padlocks are expected.

Booking Lines.—Poultry netting quotations are still withdrawn. Other lines for spring delivery are still offered at the prices recently quoted in this report.

Seasonable Lines.—The cold weather has improved business in winter lines, and there is a good demand for snow shovels, sleigh bells, etc. Goods for winter sports, such as skates, hockey sticks, etc., are also in good demand.

WINNIPEGG

WINNIPEG, Man., Dec. 16, 1915.—It is interesting to note from the various jobbers that business has been remarkably brisk during the month of December, and the usual falling off in the amount of orders has not been noticeable so far this month. In speaking to one of the jobbing houses the other day, the sales manager stated that they will have to arrange for stock-taking in the evenings, and devote most of the day to filling orders. This is a very encouraging state of affairs, and it would certainly appear that Western Canada in 1916 will enjoy a year of exceptionally good business.

Rush orders for Christmas cutlery and sporting goods are being sent in by mail, and jobbers' stocks are becoming very much depleted. The unusual conditions with which they have had to contend during the past year accounts for this, but they expect that within another year the cutlery market will have adjusted itself to such an extent that supplies will be much easier to obtain.

In spite of the Christmas spirit which seems to be predominating everywhere just now, the manufacturers are still in-

(Continued on page 46.)

WEEKLY PAINT DEPARTMENT

Keeping Stock in Good Condition

Stock-Taking Time Should Serve Many Purposes—Making Changes in Department—Neat Arrangement of Stock Assists Salesmen

TRADE in the paint department at this season of the year is naturally a little quiet, but there should be a fair movement in all lines of inside finishes. Wall paints, floor varnishes, floor paints, enamels, varnish stains and many lines of sundries are all-year-round sellers. They should always be prominently displayed.

The stock should be kept in good condition, and although it is not always advisable to carry a heavy stock at this season of the year, the merchant should be able to supply current demands.

Stock Taking

Within the next few weeks a large number of Canadian hardwaremen will take the annual inventory, including all the departments in the store. The tendency in some cases is to rush the annual stock-taking without paying much attention to the condition of the stock. Stock-taking can be made to serve many useful purposes. Besides showing value of stock on hand and other important information for the dealer, it can also be used to show the condition of the stock. This applies particularly to the paint department.

If a number of labels have become soiled or torn it is only a matter of a few minutes to take a note of the size of the labels and also the numbers. At little or no cost, new labels can be secured from the manufacturer, and when applied to the cans will greatly improve their appearance.

Keep Stock Clean

Dusting should also be a feature in the annual stock-taking. Dust will accumulate on the tops of the cans and should be cleaned off. Dustless dust cloths and mops are now used by a good many hardwaremen; these cloths and mops gather the dust instead of scattering it around.

Stock-taking time is a good time to inaugurate any changes which you think advisable to make in the paint department. It may be that a re-arrangement of the goods would make a wonderful change in the appearance of your paint department.

Changes In Department

One dealer made a change last year which greatly improved his paint department. Under the old plan of arrangement the large sizes, including gallons and half-gallons, were placed on the top shelves, and the smaller sizes, such as half-pints, pints and quarts, were on the bottom shelves.

The whole display looked top-heavy, and the dealer had the arrangement reversed. The gallon cans were placed on the bottom shelves, and the balance of the cans were placed on the shelves above, in order of size, the half, and quarter pint sizes occupying the top shelf. The new arrangement looked much better than the old, and the larger cans were much more easily handled on the lower shelf than in their former high location.

Customers visiting the paint department are much more favorably impressed with the importance of the department, if they see the goods in a well-arranged and attractive condition.

Assists the Salesman

Neat arrangement of the paint stock shows that the dealer and his salesmen are alert to the importance of the paint department, which, in reality, is one of the most important in the modern hardware store.

Neat arrangement of the stock not only favorably impresses the customer, but also aids the salesmen in obtaining goods from the shelves quickly, and without keeping the customer waiting. There is nothing more annoying to a customer who has just ordered a quart of paint than to see the salesman moving rows of cans, in order to see if he can find a can of the paint selected.

Customers do not like delay; they like to deal in a store where the salesman can tell at a glance if he has the goods in stock. This can be done, if the paint stock is properly arranged.

Attractive Labels

It is strange, but true, that very few paint orders are taken over the counter without first showing the customer a can of the paint. Even though the color is not shown on the outside of the can, very often the number only appears, the customer in nearly all cases desires to see a can of the paint.

If the sample can shown to the customer has a clean and attractive label, the customer will make the purchase more quickly than if the label is torn, or discolored, or finger marks, etc., a condition ofttten found in paint departments.

In some stores an inventory of the paint stock is taken every week during the busy season. One firm carrying a $2,000 stock of paints makes it a point to have the stock taken every week, and two men can take stock of the full line in less than twenty minutes. This can be accomplished on account of the orderly arrangement of the goods, whereby the caller-off can tell at a glance just how many cans there are in each row.

Preventing Shortages

The stock is taken every week in order to prevent loss of sales on account of shortage in any of the lines.

It is the aim of those in charge of the paint department to make as many sales as possible, and to always have a good stock of each color on hand.

In many of the smaller stores the stock is not taken quite as often, but it is important, nevertheless, that the small dealer should also have a complete range of colors in stock, in order to meet the demands of customers, and that the stock be neatly and conveniently arranged.

INDUSTRIAL

Montreal, Que.—The Canadian Electro-Products Co., whose incorporation with a capital of $500,000 was announced recently, expects to have a new electric furnace plant for the manufacture of high-grade steel in operation in Montreal in about a month or six weeks. The plant is being designed on the basis of two units, each of a capacity of 25 tons of steel a day, and at least one of these units should be in operation within the time mentioned.

BEX-O-LAC REGD. 1912 —*the King of Brush-Settings*

BEX-O-LAC is a brush-setting of an entirely different nature to any of the so-called compounds used by Brush Manufacturers to set the Bristles in, as we found that we could not depend on the many mixtures with rubber, resin, etc., for their basis.

And Furthermore

BY USING BEX-O-LAC THE BRUSHES ARE NOT SUBJECTED TO ANY PROCESS INVOLVING INTENSE HEAT, TO HARDEN THE SETTING, AS SUCH IS VERY INJURIOUS TO THE ELASTICITY AND PAINTING QUALITIES OF THE BRISTLES.

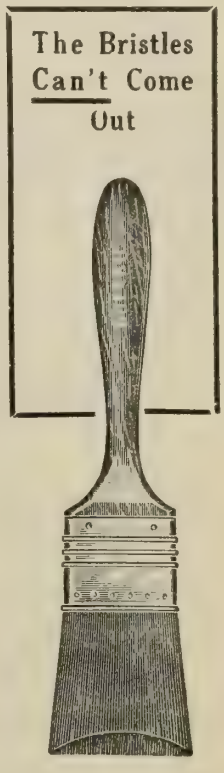
BOECKH TRADE MARK EST'D 1856 TORONTO

After several years of experimenting, we have been successful in working out a formula—the product being superior to anything now used as a brush-setting, and one that will absolutely, under all conditions, hold each and every bristle firmly in its place.

This brush-setting is protected under the registered name of "Bex-o-lac," and is used only in the manufacture of

BOECKH'S PAINTERS' BRUSHES

which are guaranteed not to shed the bristles.



THE BOECKH BROS. COMPANY, LTD.

WEEKLY HARDWARE MARKETS

(Continued from page 43.)

creasing their prices, and the jobbers have to follow suit in order to protect themselves. As usual, the lines which have been mostly affected are wire and steel products, and note is made of several changes which have gone into effect during the past week.

Fence Staples Advance.—Fence staples are now being quoted at $3.65 per keg at Winnipeg, and $3.25 at Fort William.

Bale ties have also advanced, and today's Winnipeg price, $4.35 per 100 lbs., with the Fort William price changed to $3.95.

Other Lines Advance.—Other lines in which revised prices have been made are barbed wire, galvanized wire, annealed wire, and wire nails. Wire rope and poultry netting staples have also taken a jump, and you will find correct prices listed below.

Revised prices have gone into effect on iron wood screws, the discounts now being as follows: Flat head, bright, 85 per cent.; round head, bright, 80 per cent.; flat head, brass, 62½ per cent.; round head, brass, 60 per cent.

Manufacturers of grain or coal scoops have revised their prices, and the correct Winnipeg price now appears in the Winnipeg hardware quotations.

Cotton rope is now quoted at 25c per lb.

Crow bars are now quoted at 4½c per lb.

Readers of Hardware and Metal have been urged time and again to take advantage of prices made on booking orders as soon as possible. The advantage in so doing can easily be seen by looking over the changes which go into effect each week. The markets are very unsettled, and there has not been any tendency towards making a reduction in any line of wire or steel

Annealed wire is now quoted as follows: 100 lbs.—No. 8, $3.40; No. 10, $3.46; No. 11, $3.52; No. 12, $3.60; No. 13, $3.70; No. 14, $3.80; No. 15, $3.95; No. 16, $4.10.

Wire Rope: 100 ft.—¼ in., $5; 5-16 in., $5.25; ⅜ in., $5.50; ½ in., $6.25; ⅝ in., $8.15; ¾ in., $10; ⅞ in., $14; 1 in., $18.

Poultry Netting Staples—10-lb. boxes, $7.25; 100 and 50-lb. boxes, $6.75.

Fence Staples, Winnipeg, $3.65; Fort William, $3.25.

Bale Tties, 14 gauge, 9 ft. 6 in.—Winnipeg, $4.35; Fort William, $3.95.

OVERCOMING THE FROSTED WINDOW

(Continued from page 35.)

been tried, but this method usually leaves the glass smeared. A solution of alcohol or methylated spirits is also sometimes used, but here again expense arises. The cost is too high to make such a remedy general.

Still another method is found in the use of double windows. The placing of a second plate glass outside the permanent one making an airtight compartment is effective in preventing frost, because it keeps the air between the windows at a sufficiently medium temperature to overcome the cause of frost. This plan has a disadvantage in that it obscures the view of the goods displayed to a certain extent.

On account of the loss entailed by the frosting of windows, the question of proper construction of the store front becomes an important consideration. Theoretically what is needed is to reduce the humidity and thus prevent moisture from condensing on the glass surface by means of the circulation of cool dry air. In a general sense this sums up the situation, but several conditions must be taken account of. First, the windows, to produce best results, should be enclosed from the store proper and the enclosure should be practically air tight. Second, air from the outside must enter the window near the edges and at the surface of the glass in order to make the circulation greatest at the glass surface. Third, a sufficient amount of dry air must be admitted in order to absorb the moisture.

These conditions are being borne in mind in the construction of modern store fronts when vent holes are provided in the metal sash.

Christmas Window Contest

FOR many years past it has been customary for Hardware and Metal to conduct a Christmas window display contest each year. The contest has become an event of wide interest for all Canadian retail hardwaremen interested in window trimming, and each succeeding competition has been keener and each year has seen a wider and more representative response culminating in the big success of last year.

In accordance with past custom, two contests will be conducted this year—one for stores in places under 5,000 population; the other for places of 5,000 and over. No restrictions will be set on the style of display or the goods used in the arrangement, except that each window must be arranged with goods for the Christmas trade.

Eight prizes will be offered as follows:—

PLACES OF 5,000 AND OVER

First Prize	$10.00
Second Prize	5.00
Third Prize	3.00
Fourth Prize	2.00

PLACES UNDER 5,000

First Prize	$10.00
Second Prize	5.00
Third Prize	3.00
Fourth Prize	2.00

Contestants will note that an equal number of prizes are offered to the small town window trimmer as to those in the larger towns and cities.

The contest closes on Friday, December 31. No photos received after that date will be entered unless there is proof that they have been delayed in transit.

All matter should be addressed to "The Editor, Hardware and Metal, 143-153 University Avenue, Toronto," and marked "For Christmas window contest."

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Dec. 16.—With the rush of the Christmas trade at hand, the average retailer is naturally not finding much movement in the paint department. However, it is noted that the spring situation is not being altogether overlooked, even at this time, and that the placing orders show a very satisfactory improvement over a year ago. With the whole situation continuing firm, the conviction appears to be growing that quotations are on a good basis, and that delays seem likely to bring higher than lower prices. This condition of affairs finds emphasis in the jobbing trade, where the business in futures is even better. Altogether, however, the improvement, though marked, does not restore a normal market state and conditions unsettled to a more or less extent must be expected to continue while there are so many factors which make for uncertainty.

In the industrial department the demand is in streaks. Along certain lines there has been a new market opened, while along others there has been disorganization. Conditions are particularly unsettled as regards paints for agricultural implements. Not only is the output of such plants smaller, but a large portion of the consumption has been of high reds and the cost of these—owing to shortage of dyes—has advanced materially, and such an advance is particularly emphasized on the large quantities which these concerns usually require.

Linseed Oil.—The situation in linseed oil shows little change, and the fluctuations of the market have shown no effect on the wide range of prices offered to the trade. This range continues as last week. Some quotations on old stock secured before the recent advance are as low as 79c and 82c for raw and boiled respectively, and others as high as 87c and 90c; while there are several prices in between. Usual allowances are made on these different figures for quantities.

Turpentine.—There is an easier tone to the turpentine market. Local refiners' quotations have declined 2c, and some of the jobbers have followed this downward trend. The result is that, while the majority of the quotations are 82c to 83c, as a week ago, there are now figures as low as 78c heard.

White Lead.—The white lead situation is steady, and there is no indication of an immediate change. Actual movement of stocks is light since the close of navigation, but there was good business during the last couple of weeks of the cheaper transportation season, largely owing to the fact that there was an opportunity to book for these deliveries prior to the last advance. Booking for spring on the part of jobbers is very fair, and indicates that materially lower prices are not expected.

Gasoline and Benzine.—The market for gasoline and benzine is steady on the higher prices of a week ago. There is a fair seasonable business in the city, but the movement to outside points has been slow, following the closing of the port. The basis is $10.05, with 30c added for less than tons.

Oils Strong.—On the steadily advancing price of raw oil there is a very strong market for refined, and the indications are that there will be advances in a number of lines if there is not soon some reaction in the price of raw material.

Glass Unsettled.—The local glass situation is unsettled. A new list covering an advance is under consideration, but at writing no understanding has been reached regarding it between the different dealers. However, arrangements have been made for a meeting to discuss the matter, and an announcement may be expected in a few days. In the meantime, the list prices are strong, although the demand is small.

TORONTO

TORONTO, Ont., Dec. 16.—There is a seasonable quietness in the paint trade, and no great activity is anticipated until the early part of 1916. Some houses have their travellers off the road, while others will be doing so very shortly. The linseed oil market is very strong, and the situation with regard to seed shows no improvement. The turpentine market is rather weaker, but prices are unchanged. The resin market is also weaker, due to a falling off in demand. The new glass list has been favorably received in the trade, and the situation in this respect has considerably improved. It is expected that there will be a great scarcity of whiting in the spring, and prices will no doubt be higher. Gasoline, benzine and coal oil are unchanged, but higher prices may be expected early next year. Mixed paints are firm and unchanged, while white lead is also strong.

Linseed Oil.—There is no improvement in the flax-seed situation, and there is practically no seed coming to the crushers. Seed is high at Winnipeg, and there is a shortage in that market. Navigation has closed, and all shipments will have to come by rail. There is very little demand for oil locally, and prices are firm but unchanged at about the same range as prevailed last week. The following prices are being generally quoted in Toronto:

	Raw.	Boiled.
1 to 2 barrels	87c	90c per gal.
3 to 5 barrels	86c	89c per gal.
6 to 9 barrels	84c	87c per gal.

10 barrels and over, open.

Turpentine.—The turpentine market is slightly weaker at Savannah, but available supplies for the next few months are comparatively light; the market, therefore, will no doubt become firmer. The resin market is also weaker, the demand having fallen off; but this is thought to be only temporary, as a large quantity of resin is being used in shrapnel shells. Prices of resin are unchanged. Turpentine is being quoted in Toronto at the following prices:—1-barrel lots, 87c; 2 to 4-barrel lots, 86c, and 5-gallon lots, 94c per Imperial gallon.

Glue.—The market is very strong for imported glues, and prices on these grades are very firm. Prices of English glues have advanced and freight rates are very high. Prices of glue from stock would be equal to those given in the current paint market quotations, but on recent shipments prices would be 1c to 1½c per pound higher.

Gasoline.—The market is very firm, but prices will probably remain at the present level for the balance of the year, after which higher prices may be expected. Crude oil continues to advance, which will affect the price of gasoline in time. Benzine and coal oil may also advance early next year. Gasoline is quoted at 25½c and benzine at 25c per gallon.

Glass.—The new list has been accepted by the jobbers, and promises to be a satisfactory solution of past difficulties. The list conforms to conditions prevailing in this market, and the prices are also more in keeping with present conditions.

Whiting.—This product is scarce, and will be more so in the spring. Shipments are difficult to obtain in England, and the high freight rates are also increasing the cost of whiting.

Mixed Paints.—There is no change in the situation, and prices are very firm, with an upward tendency.

White Lead.—The market continues firm, with a fair volume of business moving.

Putty.—The high cost of whiting and oil may affect the putty market, but as the demand has fallen off, no immediate change in price is anticipated. The following prices are being quoted for standard putty in less than ton lots:

	Per 100 lbs.
Bulk, in casks	$2.50
Bulk, in 100-lb. drums	2.70
Bulk, in 25-lb. drums	2.80
Bladders, in barrels	3.10

Pure putty, 60c per 100 lbs. advance.

B-H

The LEAD Element
and
The ZINC Element
in
B-H "English" Paint

B-B

Every ounce of every pound of all the white base in every can of B-H "ENGLISH" Paint contains 70 units of pure BRANDRAM'S B.B. GENUINE WHITE LEAD to 30 units of pure White Oxide of Zinc. This gives B-H "ENGLISH" PAINT its character and herein it differs from all *other paints*.

There is a point where the excess of any one ingredient is liable to injure or neutralize the effect of the other ingredients. That's why 30% and 70% become the right proportion of White Lead and Zinc in the best house paint.

B-H "English" Paint

Our absolute guarantee of these proportions gives the dealer a forcible and effective selling argument. Write us to-day about our selling plans for 1916.

Do You Believe In Featuring Well-Advertised Goods?

If so, you should be interested in the Martin-Senour exclusive agency proposition.

The well-known trade-mark that directs trade to the store that features it.

MARTIN-SENOUR
PAINTS AND VARNISHES
(MADE IN CANADA—SOLD ON MERIT)

through our widespread advertising campaign throughout Canada, are to-day better known and more in demand than any other line. Martin-Senour dealer-agents reap the benefit of this forcible advertising. The public are attracted to the store showing the familiar trade-mark, and the result is an increase, not only in the sales of paint, but of many other lines as well.

The Martin-Senour exclusive dealer-agency proposition offers the most advantages. A line of 100% pure, guaranteed paints and varnishes, a complete line, a paint or varnish for every use and to suit every condition — a line that is well and consistently advertised and a line that carries with it more sales co-operation than has ever been attempted.

Surely this is the line for you—write for complete details.

SEASONABLE LINES

That are Profitable to Carry in Stock

The articles named below give a mere indication of our stock, which is comprehensive, high class in quality, and profitable to retail. The advantage of a varied showing to offer customers is particularly emphasized at this season, with Christmas so close. Do not hesitate about sending in your orders—even though small they will be appreciated and meet with as great care and prompt dispatch as those of greater volume.

Winter Sporting Goods

In Sporting Goods we stand in a very strong position, and invite your attention to the following list:

Skates, great selection; Hockey Sticks, Pucks, Sweaters, Knickers, Goalkeepers' Pads, Shin Pads, English-made Hockey Boots, Stockings, Toques, Gloves, Knee Pads, etc.; Toboggans, good showing; Curling Stones, Skis, Ski Harness, Snowshoes, Moccasins, and all kinds of Training Accessories, including Boxing Gloves, Punching Bags, Punching Bag Platforms, Basket Balls, etc.

Appropriate for Christmas

CUTLERY—Our lines are by such world-famed makers as **Joseph Rodgers & Sons, Harrison Bros. & Howson,** and include **Dessert and Table Knives** in genuine ivory, imitation ivory, and Pearl handles; **Carvers,** fine assortment in pairs and cases; **Pocket Cutlery and Scissors,** in good variety.

BRASSWARE—Handsome designs—**Kettles, Kettles and Stands, Curates, Desk Sets, Jardinieres, Trays, Flower Baskets, Candlesticks, etc.**

Also a most attractive selection of **Fireplace Furnishings, Silver-Plated and Sterling Silver Flatware, Percolators, Chafing Dishes, Cut Glass, Safety Razors: Gillette, Auto Strop** and other popular makes.

Your Customers Know This Trade-Mark

More paint buyers are guided by this trade-mark than any other paint trade-mark, because they know it stands for Sherwin-Williams Paints, the standard of quality and value by which other paints are judged.

Let it work for you—not against you. If you are interested in securing the Sherwin-Williams Agency for your territory, we will send our book, "How to Make Money in the Paint and Varnish Business," free of cost or obligation.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

"AYLMER" Force Pumps

They are certain to sell easily because it has several advantages over the ordinary style.
Has longer stroke, more power, and works easier.
While designed for hand use it can be readily converted into a Windmill Pump by the addition of a flat bar, which screws into the cross head at top.
It will be to your interest to write for full particulars now.

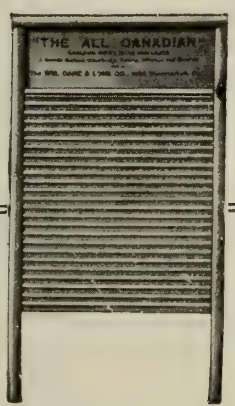
Atlas
10 Cent Fly Swatter

This swatter has an extra long handle — 10 inches. It is very neatly and securely bound with soft green felt — cannot mar the finest furniture. Especially adapted for parlor or drawing room use. We have made it extra strong and flexible — will outlast any now on the market.

Our 5 cent swatter is the best ever sold for a nickel. Also it has a triangular fold, permitting the insertion of your ad. if you desire.

Now is the time to place stock orders. We'll gladly quote prices and terms.

Atlas Mfg. Co.
New Haven, Conn.



COSTS LESS

than aluminum and zinc wash boards, is just as good and is more serviceable.

The All-Canadian
All-Wooden
Wash Boards

are the result of great scarcity and high price of zinc and aluminum—a price that has greatly handicapped washboard sales.

All-Canadian grown wood, Canadian-made nails, and by Canadian workmen—that's why it's all-Canadian.

The finest grained hardwood is used for rubbing surface.

Retails at 20c and leaves a BETTER profit.

Standard zinc, glass and enamel wash boards always on hand for prompt delivery, until notice to the contrary.

The Wm. Cane & Sons Co., Limited
Makers of the New Wooden Wash Board
NEWMARKET, ONT.

WIRE NAILS

ANY SIZE OR PATTERN

One quality—the best.

The points and heads are perfect, and we have taken special care in the drawing so as to obtain a regular gauge.

WIRE BALE TIES

For baling hay, pulp, box shooks and many other things.

POULTRY NETTING STAPLES
Bright or Galvanized

WIRE FENCE STAPLES

WIRE

Bright, annealed, coppered, stove pipe, liquor finished, square, etc.

We are the exclusive manufacturers for Canada of the Carnegie Steel Co.'s

BRAINARD PATENT STEEL BARREL HOOP

for All Slack Cooperage.

THE "WANT" AD.

The "want ad." has grown from a little used force in business life into one of the great necessities of the present day.

Business men nowadays turn to the "want ad." as a matter of course for a hundred small services.

The "want ad." gets work for workers and workers for work.

It gets clerks for employers and finds employers for clerks. It brings together buyer and seller, and enables them to do business though they may be thousands of miles apart.

The "want ad." is the great force in the small affairs and incidents of daily life.

Condensed or "Want" Advertisements

Those who wish to sell or buy business or stocks, obtain competent help, connect with satisfactory positions, or secure aid in starting new enterprises, should not fail to use the Want Ad. Advertisement Page of HARDWARE AND METAL. It is the central market place of the hardware trade throughout Canada. There is always someone somewhere looking for just such proposition as you have to offer. RATES (payable in advance):—2c. per word first insertion, 1c. per word subsequent insertion, 5c. additional each insertion, when Box Number is required. Each figure counts as one word.

WANTED

WANTED—POSITION AS MANAGER OF retail hardware store, by a sober, industrious, competent hardware salesman. Good experience, good stock-keeper; can furnish best of references and guarantee results. Apply Box 234, Hardware and Metal. (53)

MANUFACTURER WANTS TRAVELLER with connection among large consumers bar iron and steel, also hardware jobbers in Ontario. Apply to Box 237, Hardware & Metal. (51)

FREE SERVICES GIVEN BY WESTERN hardware traveller, now in Toronto, to parties intending entering hardware business in Northern Alberta or Manitoba. Apply to Box 236, Hardware and Metal. (51)

SALESMAN WITH FIRST-CLASS CONNECTION in three provinces desires high-class line on commission basis for January 1st, 1916. Apply Box 226, Hardware and Metal. (tf)

AGENCIES WANTED BY A WIDE-AWAKE, aggressive and successful house of hardware and electrical sales agents covering thoroughly the Western Canadian territory. Firms requiring representation or unsatisfied with present arrangement should immediately write to Houston & Co., Ltd., 12 and 13 Cumberland Blk., Winnipeg, Man. (51)

FOR SALE

BARGAINS IN SKATES—WE OFFER THE following bargains in Hockey Skates. Every pair warranted Perfect. Made in Canada. 100 pair, size 11, Plain Finish. 100 pair, size 12, Plain Finish. 100 pair, size 12, Nickel Plated, 25 cents pair. Box 231, Hardware and Metal. (52)

FOR SALE—ONE 40-FT. WALL CABINET, oak, with 250 metal boxes, wood face, and 40 large drawers. 2 sections of silent display cases for saws, etc. One set of tinsmith and plumbing tools. One Daisy hot water boiler No. 16. These goods must be sold by Dec. 15th. Cuts and description will be sent to interested parties. Apply to W. J. McAllister, Sarnia, Ont. (tf)

MISCELLANEOUS

FIRE INSURANCE. INSURE IN THE HARTford. Agencies everywhere in Canada.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

GOOD STENOGRAPHERS ARE WHAT every employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

ADDING TYPEWRITERS WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314, Stair Building, Toronto.

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis-Fensom Elevator Co., Toronto.

HARDWARE STORE BUSINESS METHODS—The authors of the articles in this book are for the most part practical and progressive hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infinite value to that trade. The 40 subjects discussed include: Rules and Regulations for the Hardware Store; Hardware Buyer; Good Methods in Stock Taking; Prices and Catalogues; Collecting Accounts; The Merchant and His Employees; Changing Business Conditions and How to Meet Them; Profit Figuring System; Starting in Business; Changing a Credit into a Cash Business, etc. 220 pages. Price $1.10, postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE WINDOW DRESSING—THIS IS the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. Size 8x11 inches. Price $2.60 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.

5c. extra per insertion for box number if desired.

Hardware and Metal
MONTREAL TORONTO WINNIPEG

Too Many Hardware Merchants

Look at the immediate profit when deciding what line they will carry. This is one of the greatest detriments to success because it often results in buying goods of inferior quality—a quality that makes no friends or repeat orders.

If the line of files you are carrying is not producing the desired results it will pay you to replace it with the "Delta"—it is the kind that has friends and steady users everywhere — it is the kind that assures the maximum of file turnover to you because of its faster cutting and longer service to your customers.

Our claims are based on past and present performances.

This is the only line of files from 3 to 24 inches made absolutely of crucible steel.

There is a shape and size for every requirement and a positive guarantee to back them.

Your jobber sells them.

BOOKS FOR HARDWAREMEN

Every hardwareman can get valuable pointers and make his business a more profitable proposition if he will study the experiences of experts who have 'made good.' Our Technical Books for hardwaremen cover a wide range of subjects, among which may be mentioned Metal Working Books, Hardware Window Dressing, Store Business Methods, Paints and Painting, Salesmanship and Sales Plans and Advertising. We have also the very latest books on the plumbing and heating problems.

Technical Books, 143-153 University Ave., TORONTO

A Straight Talk by the Manager

No. 25

"The really successful way to improve business is to develop selling efficiency."

ON the train, the other day, I met a hardware merchant who is known as the most successful dealer in his town. Naturally, we talked about the problems of selling hardware at retail.

"The building slump which followed the outbreak of war," said he, "taught us a good lesson, because it compelled us to watch the advertisements in Hardware and Metal for new lines to replace those for which there was no demand. In this way we got in touch with many articles which are paying us a handsome profit."

"You employ the advertisements in your buying," said I, "but do you ever use them to develop the selling ability of your staff?"

"No," he admitted, "the advertisements seem very persistent in urging me to buy, but mighty few of them have ever told me how or where I could sell the goods they are talking about." This is a pet subject with me, so I launched forth with enthusiasm:

"Trade paper advertising is undergoing a great change. It is being humanized, and already manufacturers are acting on the principle that the more strenuously retailers push the sale of goods they already have in stock, the sooner will they be in the market for fresh supplies.

"Moreover, they are realizing that retailers must first see prospects for selling an article before they will stock it at all. And so you will find that a great many far-seeing advertisers are now using their space to say 'Sell my goods,' instead of 'Buy my goods,' and they are giving selling talks in their advertisements which will prove invaluable in developing the efficiency of your sales staff.

"For instance, suppose a woman comes in and wants to buy a range which carries a profit for you of $5. Your clerk has been reading the advertisements in Hardware and Metal of a high-class range, one of which is on your floor, and which allows a profit of $10. He himself is so saturated with the talking points of this range that he promptly enthuses the customer as well, and sells the better article. The additional profit on that one sale will pay your subscription to Hardware and Metal for 2½ years.

"Now, every issue of Hardware and Metal contains upwards of 150 advertisements, embracing every class of goods you sell in your store. Your clerks can get talking points on all of them by studying the advertising pages of Hardware and Metal as they would a text-book.

"When business is dull the really successful way to improve it is to develop selling efficiency, and you can promote selling efficiency among your clerks by insisting on their studying Hardware and Metal's advertisements every week and applying the knowledge they acquire in their daily work."

The merchant was delighted with the idea.

"Won't you drop off at my town some of these days," he asked, "and give my boys a talk along that line?"

And I promised that I would. J. G. L.

The profit the OTHER MAN makes this season on Ross Rifles won't pay for YOUR Christmas Dinner

Some of your customers will buy Ross Rifles for Xmas Gifts. Make sure that they will buy them in your store.

Ross Sporting Models and Cadet Rifles should be displayed by every Sporting Goods Department looking for maximum returns from the Christmas Trade.

If you lack any information concerning prices, we solicit correspondence.

MAKE IT

"Automobile Hardware"

One of our manufacturing friends suggested to us, not long ago, that instead of referring to "Automobile Accessories" we should coin the phrase "Automobile *Hardware*."

This suggestion should set you thinking. Already you are selling many articles—such as wrenches, greases, oils, gasoline—probably without realizing that you are running an automobile hardware department. Yet you are selling these articles to motorists for use in the upkeep of their cars. It does look as if automobile supplies and hardware were just naturally linked together.

In this issue there is a strong article showing what hardwaremen in the United States have done in developing sales to motorists. Read this and take a leaf from the book of your brother hardwaremen in the States.

Make it "Automobile *Hardware*" in 1916.

MARTIN-SENOUR PAINT & VARNISHES

Made in
La Salle, Ill
by
Westclox

BIG Ben is the biggest thing to-day in the American alarm clock industry. He has everything in his favor—quality, looks, and style. He runs on time, he rings on time, he stays on time.

Slender, massive, richly plated, he stands seven inches tall, with well-shaped distinct hands and a big broad dial easily visible in the dim morning light.

He rings just when you want and either way you want—*five straight minutes* or every other half minute *during ten minutes* unless you shut him off.

His keys are large, strong, easy to wind; his voice deep, jolly, pleasing to hear. The movement plates are bridged like on a Waltham watch—you can change both mainsprings *without taking the movement apart*. The pivots are of hard steel piano wire $\frac{22}{1000}$ of an inch thin. The escapement is a hardened steel pallet escapement—not a pin escapement like that of other alarm clocks.

We are carrying on hand a stock of Big Ben specially put up for *Canadian* trade, 6 in a carton together with a full set of Store Selling Helps, (posters and show cards.) On an order for 12 we give a solid mahogany display stand. On an order for 24 we print your name free on dials and with an order for 48 we send a striking, electric flashing sign, just the thing for your window or counter.

The [illegible] price [illegible] is $5.00, and there's a $3.00 resale tag on everyone you buy.

Brooms of Quality

may always be had by ordering our brands. We have them at $3.00, $3.25, $3.50, $3.75, $4.00, $4.25, $4.50, $4.75, $5.00, $5.50, $6.00 per dozen.

FACTORY and MILL Brooms $3.75, $4.25, $4.75 per dozen.

Christmas Window Contest

FOR *many years past it has been customary for Hardware and Metal to conduct a Christmas window display contest each year. The contest has become an event of wide interest for all Canadian retail hardwaremen interested in window trimming, and each succeeding competition has been keener and each year has seen a wider and more representative response, culminating in the big success of last year.*

In accordance with past custom, two contests will be conducted this year—one for stores in places under 5,000 population; the other for places of 5,000 and over. No restrictions will be set on the style of display or the goods used in the arrangement, except that each window must be arranged with goods for the Christmas trade.

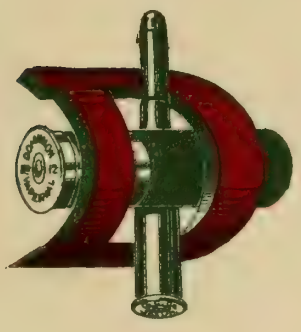
Eight prizes will be offered as follows:—

PLACES OF 5,000 AND OVER		*PLACES UNDER 5,000*	
First Prize	$10.00	*First Prize*	$10.00
Second Prize	5.00	*Second Prize*	5.00
Third Prize	3.00	*Third Prize*	3.00
Fourth Prize	2.00	*Fourth Prize*	2.00

Contestants will note that an equal number of prizes are offered to the small town window trimmer as to those in the larger towns and cities.

The contest closes on Friday, December 31. No photos received after that date will be entered unless there is proof that they have been delayed in transit.

All matter should be addressed to "The Editor, Hardware and Metal, 143-153 University Avenue, Toronto," and marked "For Christmas Window Contest."



Appreciation

The success of any business depends on the co-operation of its selling forces. Our business is successful and we take this opportunity to thank our dealers and their assistants for their hearty co-operation—
to wish them the Compliments of the Season and greater sales for 1916.

High insurance rates;
High up-keep expense;

Here are three worries on every building owner's mind which can be avoided with your help. And you will gain by helping them. Simply cover your customers' buildings with

Rust and Corrosion-Resisting

TONCAN METAL

ROOFING AND SIDING

Run a Toncan Metal Conductor Pipe from the Toncan Metal Roof into the ground and you have a lightning-proof building.

Toncan Metal cannot burn. It's absolutely fireproof. That means less insurance. Your insurance agent will confirm this.

And Toncan Metal's ability to resist rust and corrosion means less repairs, less annoyance and, of course, less expense.

What Happened in Hardware in 1915

The Most Unusual Year on Record—A Review of the Hardware Markets — How the War and Tariff Changes Affected Prices—Many More Price Changes to be Made in Near Future

THE year just drawing to a close will go down in hardware history as one of the most unusual on record.

Among the distinguishing features of 1915 have been rapid and far-reaching price changes, new and sudden developments having an important bearing on various branches of the hardware trade, shortage in many lines of goods, abnormally high prices on some lines, extremely low prices, considering conditions, on others.

There has been price fixing and price cutting. New markets have developed. New lines have been taken in by the hardware trade.

New sources of supply have been discovered for many products, and Canadian manufacturers are to-day turning out goods, the manufacture of which, in this country was undreamed of two years ago.

Biggest Year's Business

Retailers in adapting their businesses to meet new conditions which have developed as a result of the war, have taken on many new lines—many of them bearing a good deal of profit.

Building in Canada, outside of repair work, has not been active. The curtailment of building operations affected adversely the sale of builders' hardware, and the latter line in past years formed a very considerable portion of the hardwareman's trade.

Even with the trade in builders' hardware cut off to a great extent, there are hundreds of retail hardware merchants who will wind up 1915, with the largest annual volume of business transacted in the history of their firms.

These enviable records have been made as a result of hard work. The merchants realized that if they wanted to keep up to, or surpass, the records of previous years it would be necessary to do so by hard work, by intensive cultivation, and by branching out and pushing the sale of goods—in some cases new lines, not hitherto featured to any great extent.

What One Firm Accomplished

A short time ago Hardware and Metal referred briefly to a large firm—one of the largest in the world—telling how this firm had sent a message to all employees, directing their attention to results which had been achieved by intensive cultivation of sales.

The message read as follows:—

"The loss of business in certain parts of the world has led us to investigate the possibilities of the remaining territory, and has led to a salutary intensive cultivation of sales. It has served to teach us the boundless possibilities of any given territory provided we will concentrate upon it. With our organization and its equipment we can develop an amount of business hitherto unsuspected.

"The individual employee, also, has learned much from this experience that will be helpful to him throughout life. Forced economy had reduced the amount of assistance each man has had in the past and all have been compelled to assume greater burdens of work. We have learned that a man can do two or three times as much as he would have believed in easier times, and do this as quickly and thoroughly as ever. We have learned the results that may be secured from concentration and the careful investment of time and energy.

Uncover Hidden Possibilities

"It is in times of plenty that we tend to grow fat and lazy, but in times like these we uncover hidden possibilities."

Just as this large corporation has uncovered hidden possibilities, so have many wholesale and retail hardwaremen throughout Canada. By intensive cultivation of their territories many firms have kept their sales so far this year on a par with the sales of corresponding periods of former years. In many cases there are retailers whose businesses this year will reach larger proportions than in any previous year in the history of their business careers.

Retailers Advertised

The retail hardwaremen of Canada used printers' ink to a greater extent this year than in any past year. They ran better advertisements. They devoted more time to their advertising and prepared better advertisements than in any previous year.

More illustrations have been used in retail hardware advertisements during 1915, than in any previous year. Not a little of the credit for this condition is due to Hardware and Metal. The electro service department of Hardware and Metal has supplied upwards of 4,000 small hardware electros to the retail hardwaremen of Canada—and the hardwaremen have used them.

The Christmas electro service instituted by Hardware and Metal several weeks ago, has proven decidedly popular. Orders came in from all parts of Canada, and the result has been that the Christmas advertisements of hardware, as a whole, have been brighter and more attractive this year than in any previous.

The hardwaremen of Canada have not been asleep at the switch. They had many opportunities to reach out for new business during 1915, and in the majority of cases they reached out and secured a good share. The fall and winter trade has been exceptionally good. There is little or no unemployment in Canada.

Many manufacturers are running their plants night and day on war orders. There has been during the past few weeks a considerably improved demand for metals for domestic purposes and this can be taken as an encouraging sign.

As a result of the war a number of

(Continued on page 54.)

Trade Revival in Western Canada

Large Winnipeg Jobber Says That 1916 Will be a Hummer—December one of the Healthiest Months for Year's Past—Spirit of Optimism Returns, And Big Things Looked For—Selling Hardware for Repair Work.

ALL indications point to a tremendous revival in business west of Winnipeg. Considerable theorizing has been done during the past few months, arguments being based on the big crop, but every man was "from Missouri," and required to be shown. It is now easy to show. Most people will concede that if the people of Western Canada are buying hardware, groceries, and dry goods to an extent unknown in that part of the Dominion since the outbreak of war, the outlook is certainly a bright one. It is possible to go further than that. Not only are the people of the West buying necessities of life, they are going extensively into luxuries. In the hardware trade it takes the form of sporting goods, cutlery, and Christmas supplies.

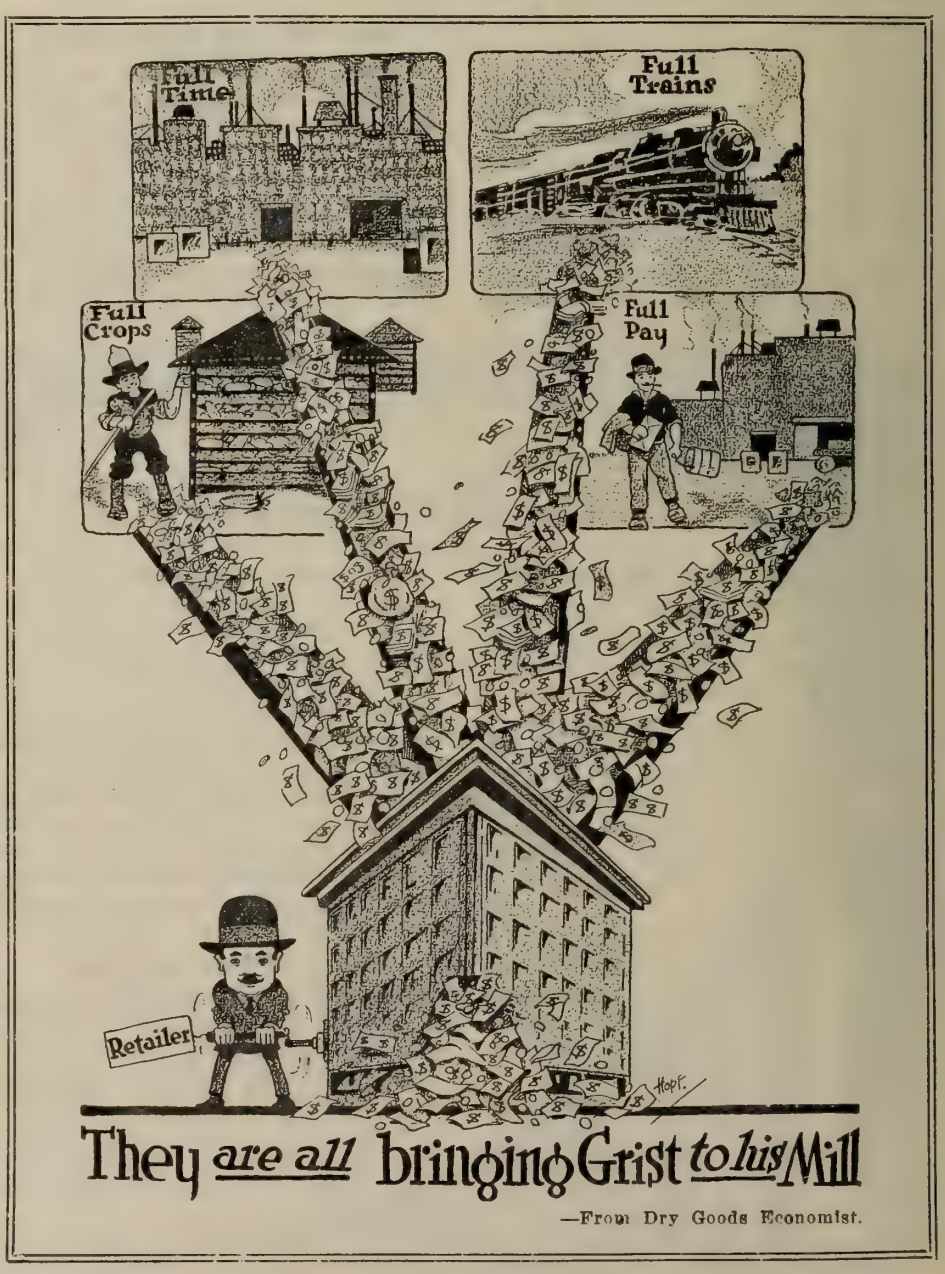
Sporting goods are exceedingly active, which is the best indication one could have of a return to normal conditions. When the war broke out, the sporting goods trade went dead, and since that time the public have either been doing without this line altogether, or have been making the best possible use of what they had. It is inconceivable that a man, when conditions were as they have been during the past eighteen months, should spend money on a gun, say, if he had on old one that could be used. To-day the Westerner has money for the necessities of life, as well as for the pleasures, and he is buying sporting goods freely. This is made evident by the fact that the jobbers of the West are rushed with orders in this department. And the hardware retailer would be the last man to buy sporting goods if the demand were not there, for it does not take him long to tie up a lot of money in such goods; and if he is not selling them, they very soon become dead stock.

1916 to be a Hummer

However, this does not apply only to the sporting goods line. One of the largest hardware jobbers in the West states that every department in the house is busy, which is very unusual at this time of the year. One of the head men of this concern, speaking to the Western representative of Hardware and Metal, used the following words: "We believe that 1916 is going to be a hummer. We venture to say that this December is the healthiest our business has experienced since we went into business. We do not pretend to be prophets, but we do say this: that there is every indication of a big revival in trade. Everything is moving, with the exception, perhaps, of building supplies required in the large cities. We are busy from the top floor to the basement, and it stands to reason that if we are busy, other houses are busy too. As we ship only to the West, it is easy to see that conditions generally in the West are exceptionally good. During the past four or five months, something has come back to the West which has been lacking for two years—a spirit of optimism.

New Conditions This Year

"Collections and business are both good; that's the Western situation as far as we are concerned in a nutshell. And they are going to keep good. In former years the crop has come and been rushed through; the money came with a rush and disappeared as quickly; before we knew where we were, the whole thing was over. This year everything is different. Farmers have got lots of money, and they are threshing all over the country, and trying to get cars to move the grain. This means that they are buying



hardware at a time when, in former years, things were quiet. Naturally, at this time of the year, retailers' stocks had become depleted, and they are coming into the market with a rush.

Hardware for Repair Work

"Builders' supplies are moving fairly well, but these are being bought by the farmers for repair work more than by builders for construction work. It is not the cities of the West which are playing a part in this revival of trade; it is the country which is the great factor. The farmers have got to keep their barns and other outhouses in shape; consequently nails and other supplies are moving out steadily. It is not a colossal movement, but they are moving satisfactorily. We do not look for a resumption of building in the West on a large scale until the spring, and it may not come until the tide of immigration turns this way again."

Another View of the Situation

The general manager of another large Winnipeg jobbing house corroborated the above statement, and added that he expected business would be spread right over the winter months, and that merchants at local points especially expected good business right through in view of the large amount of grain still to be marketed. At one point on the C. N. R. Goose Lake line, where they were expecting 1,500 cars to ship their grain, they had until recently only received 60 cars.

H. M. Klassen, Herbert, Sask., who was in Winnipeg on a buying trip last week, reported that they were expecting 3,000 cars in their town, and at the time he left, had only received 1,500. Furthermore, they had not yet finished threshing. The town of Herbert claims up to date to have shipped more wheat than any other point in Saskatchewan, so that it can easily be gathered that the amount of grain to be shipped throughout the coming season will be enormous.

Some idea of the increase in grain production in the West can be gathered when it is stated that last year at Herbert only 30 cars were raised, which was all taken by the local mill. This year there are 3,000 cars, and as each car is worth $1,000, it can easily be seen that there will be considerable money in the town of Herbert for some months to come.

The above firm of hardware jobbers anticipate that next spring will be the heaviest they have experienced for years especially at country points. At certain places where the crop has been poor in previous years, farmers have had to economize, but now that they have had a big crop, they are able to buy things which they formerly had to deny themselves. Consequently, the demand for hardware is expected to be very general.

An example might be given of how big the crop in the West has been this year. A farmer in Southern Manitoba, who has been paying for his farm in crop payments, for the last two years was not able to pay his rents. Last spring the owner had to furnish him with $700 to buy seed grain. This year he has harvested 50,000 bushels of wheat, paid off all back debts, paid for his seed grain, and made all other current payments. He has grown enough grain on the cultivated portion of the farm to pay for the whole farm, if he had not had other payments to meet. On this particular farm the crop was 30 bushels to the acre, which is almost phenomenal. The average for this year in Manitoba was 27 bushels, whereas the average for this province in former years has been 15 bushels to the acre.

Business on Solid Basis

The real estate game in the West has been knocked into a cocked hat, and business is now down to a solid basis. The banks have been holding on tight to their money, and, while they are not letting much of it out, are willing now to do so for legitimate business. Farmers are paying their debts to local storekeepers, who have carried them through the period of depression, and who in turn are paying the wholesaler, and are now in a position to replenish their stocks. That, in a nutshell, is the reason for the present commercial prosperity.

M. O. Houses Busy

It is only natural that the mail order houses of Winnipeg and Eastern Canada should have realized the situation quickly, and are taking strong measures to cope with the demand. The merchant in the country, having exercised extreme care in his buying, finds himself without the goods, and is ordering for immediate shipment in a manner the like of which Eastern houses cannot remember. In spite of this, merchants' stock are in many cases not big enough to meet the

(Continued on page 54.)

Contest Closes Dec. 31

Hardware and Metal's annual window display will close on Friday, December 31. No photos will be received after that date unless there is proof that they have been delayed in transit. A number of entries have already arrived at the office of Hardware and Metal. There will be a flood of entries during the next few days. Are you going to enter?

In accordance with past custom, two contests are being conducted this year—one for stores in places under 5,000 population; and the other for places of 5,000 and over, no restrictions will be set on the style of display or the goods used in the arrangement, except that each window must be arranged with goods for the Christmas trade.

Contestants will note that an equal number of prizes are offered to the small-town window trimmer as to those in the larger towns and cities. Eight prizes are offered as follows:

PLACES OF 5,000 AND OVER

First Prize	$10.00
Second Prize	5.00
Third Prize	3.00
Fourth Prize	2.00

PLACES UNDER 5,000

First prize	$10.00
Second Prize	5.00
Third Prize	3.00
Fourth Prize	2.00

An announcement of the prize winners will be made early in the New Year. Hardware and Metal's annual contest has become an event of wide interest for all Canadian retail hardwaremen interested in hardware window-trimming. In past years the contest has been a huge success. This year's contest promises to be one of the most successful ever conducted by Hardware and Metal.

All matter should be addressed to "The Editor, Hardware and Metal, 143-153 University Avenue, Toronto," and marked "For Christmas Window Contest."

HARDWARE & METAL

CANADA'S ONLY WEEKLY HARDWARE PAPER

Vol. XXVII. TORONTO, DECEMBER 25, 1915 No. 52

CHRISTMAS GREETINGS

THE date of publication of this issue of HARDWARE AND METAL falls on the one day of the year when sorrow is forgotten in thanksgiving, when selfish ways are forgotten, when the hearts of men are hallowed anew and when the people throughout all lands joyously acclaim the birth of Christ. The tongues of a thousand pealing bells, the music of the choirs, and the early morning footsteps of the little children will scatter the news that the day has dawned—the multitudes will celebrate.

Christmas looms up as a blessed relief, something to take one's thoughts away from the grim realities of racial strife which have been constantly before us during the past year, and yet, there is bound to be an all-pervading sorrow over the European tragedy. Many of Canada's finest men will spend Christmas in the trenches. Not a few of them are from the ranks of the hardware fraternity. They have not been forgotten. All that is possible has been done to make their Christmas as happy as possible under trying conditions. The best wishes of the whole trade are extended to them and to their comrades.

Never was good-will so hearty as that which we all extend to our own boys and to those of our gallant Allies at the front.

This is the second Yuletide which we shall spend under the shadow of the war. In some ways we stand where we stood last year. In other ways we have moved forward. Except for the sorrow caused by the war there is no reason for Canadians to find less pleasure in the Christmas festivities than last year.

It is indicative of the splendid feeling in Canada that preparations for Yuletide have gone on almost as though nothing untoward were happening in other parts of the world. There has been a better all-round and more confident feeling than existed last year. Business is improving, and gift-buying has been done on a larger scale than last year. The limit of possible depression has been gauged and the outlook for the future, at the present time, is brighter than it has been at any time since the outbreak of the war.

That every hardwareman will find abounding reasons for a pleasant Christmas, that every heart may be glad, and that the Christmas spirit will pervade every home is the sincere wish of the editors of HARDWARE AND METAL.

THE CHRISTMAS WINDOW CONTEST

FOR some weeks past announcements giving details regarding HARDWARE AND METAL'S annual Christmas window display contest, have been appearing in this paper. We expect that the entries this year will be more numerous than in any past year, although it must be admitted that the interest taken in last year's contest was far in excess of our expectations. Despite the fact that a state of war existed, the window displays submitted in last year's contest were of a higher order than those submitted in any previous contest. With each succeeding year the contest has grown in popularity, and entries have been made from all parts of Canada. Although the contest closes on December 31, there is still time for those who have not yet sent in displays. Many of the finest window displays which appear, are arranged during the week preceding Christmas. Many of these displays are allowed to run until New Year's. This is the final announcement. The contest closes on the last day of the year. Why not enter the contest? Why not be one of the eight cash prize winners?

In order that the window trimmers in the smaller centres may not have to compete with those in the larger centres, the contest is divided into two sections. Places of 5,000 population and over, and places under 5,000. The judges, as in past years, will be competent men who will extend fair treatment to all.

STEEL MARKET QUIETING DOWN

FOR some time past Canadian hardware merchants have been following changing conditions in the steel trades with a feeling of expectant uncertainty. Prices on finished and semi-finished steel products have been advancing by leaps and bounds. Each week, for many weeks past, we have reported price changes on many lines of iron and steel goods, and the end is not yet in sight.

The withdrawal of one large steel company from the Canadian market some weeks ago caused a flurry of excitement throughout the trade and caused many anxious inquiries to be made regarding the future of the steel market.

A report by the *American Metal Market* this week from the Pittsburg office states that the steel market is certainly quieting down if one measures the situation by the volume of new business placed. The market has been sold to a standstill, the mills having very little unsold capacity for the period for which they are willing to commit themselves. Except on specific jobs they do not care to enter any business that would involve delivery after July 1, 1916. In some departments they are already sold up beyond that date, taking into account specifications and orders on hand together with specifications due later on open contracts.

Doubtless with prices advancing so rapidly and the news well disseminated that the mills were very well filled with business, every buyer who had prospects of requiring steel in anything like the near future has tried in the past few weeks to get under cover, and naturally there ought to be less buying pressure by this time, particularly so since this is not the time of year when strictly new projects come up in large volumes. It is significant, however, that structural lettings last month are reported at 105% of the fabricating capacity for a month, or 19% more than in the best month since the war started, that month having been last July. It is quite abnormal for an increase to occur at this time of year, but the report confirms statements made in Pittsburg steel circles a few weeks ago, and reported at the time, that there was a large increase in the amount of structural steel business in sight. There will presumably be further heavy lettings if buyers do not balk at the prices demanded.

Except for the personally conducted movement of war material for the Allies, export shipments of steel from the mills are now practically shut off. Steel production is maintained just the same, correspondingly more steel being shipped to the domestic trade, where the additional steel seems to be entirely welcome.

It is doubtful whether the extent of the domestic demand, as compared with the war demand, is fully realized by the iron and steel public. For many months, as the steel trade was improving, one heard the opinion vouchsafed by the wiseacres that "it's all the war demand," but no such condition obtains at present. Witness the October export statistics, the direct exports representing about 300,000 tons of finished steel or about 3,600,000 tons a year, while all the finished steel involved in indirect exports could not possibly be estimated at as much, so that the total involved in all exports, whether war or peace, for belligerents or neutral countries, was not in October running at the rate of 25% of the total production, for the country was making finished steel at the rate of 28,000,000 tons a year.

Furthermore, it is to be noted that the freight blockade has changed conditions further since October. Undoubtedly the mills are shipping less steel for export this month than they were in October. It is not a question of what is being moved out of the country this month, but of what is not being shipped from mills, the mill shipments to the strictly domestic trade being correspondingly increased. Very likely the mill shipments of finished steel this month will be 80% or more for strictly domestic consumption, and 20% or less for export, direct or indirect.

TAX ON STOCK FOODS

QUITE recently a merchant was fined for not properly carrying out the provisions of the war tax which went into effect in April last. The merchant neglected to place a war tax stamp on a package of medicated stock food. HARDWARE AND METAL has referred to this tax on a number of occasions, but we would again remind our readers that stock foods, if medicated, and other articles, such as animal regulators, lice killers, heave cure, etc., must have war tax stamps of the requisite value mentioned in the Schedule of the Act, affixed to each package by the dealer, and cancelled, at or before the time of sale to the consumer. Thus it will be necessary for the dealer to attach stamps equivalent to 4% of the selling price of the goods—a dollar package of medicated stock food would require stamps to the value of four cents—a twenty-five cent package requires a one-cent stamp.

MAIL ORDER HOUSES BUSY

REPORTS received by HARDWARE AND METAL indicate that the mail order departments of catalogue houses are securing a large volume of trade from Canadian farmers, who are now spending the proceeds of the wonderful 1915 harvest.

What is the retail dealer doing about this? Why should so much money be sent from outside communities, impoverishing them greatly, to be localized in the big centres? While the retailer of course is not to be blamed for all of this, he certainly could prevent a great deal of this business going to the mail order houses.

What appears to be needed is more co-operation between merchants and farmers, so that the latter's wants will be better understood. One retailer can do nothing. If everyone of the thousands of retailers in the country, started out with the endeavor to study his customers carefully, to determine their wants, their likes and dislikes, and succeeded in keeping $500 or $1,000 each year of this money that goes to the mail order houses, in their home town, the mail order houses would very soon be feeling the pinch.

Trying To Tax Mail Order Houses

Effort Being Made to Make U. S. Mail Order Houses Pay a Tax—Parcel Post Involved—Efforts Will be Closely Watched by Canadian Retailers—Does Canadian System Pay?

A UNITED STATES contemporary in a recent issue gave some interesting data regarding a whirlwind campaign which has been undertaken to compel mail order houses to bear a share of the burden of supporting the Federal Government, by returning to the Treasury in the form of a tax a small part of the gigantic bonuses they have received through the operation of parcel post and rural free delivery.

On the first day of the session of Congress three members introduced similar bills imposing a tax of 2 per cent. on the total cash value of all goods sold and shipped from one State to another. Transactions within a State do not come within the scope of a Federal statute.

Other Taxes Proposed

Congress is proposing to tax the incomes of small business men, clerks holding responsible positions. President Wilson has recommended a tax of 50 cents per horse-power on the gasoline engines used mostly by the farmers. The President also suggests a tax of 25 cents per ton on the pig iron made by the small merchant furnaces throughout the country, while the big steel works, which makes its products by continuous processes, will probably escape the tax.

If the President has his way, hardware merchants will have to figure on an crease due to the imposition of a tax of 25c per ton on manufactures of iron and steel superimposed upon the pig iron tax.

"Why not," states our contemporary, "a tax on the mail order houses? Uncle Sam has presented them with many millions of dollars during the past two years in the form of reduced postage rates via parcel post. Is it not time they came across with a modest little 2 per cent.?"

Canadians Interested

Hardware and other merchants throughout Canada will watch with interest the efforts which are being made to tax the mail order houses of the United States.

Mail order houses on a large scale originated in the United States, and were later introduced into Canada. The parcel post system was introduced in the United States, and a system modeled on similar lines was later introduced into Canada.

The merchants of the United States are evidently finding out that the mail order houses of the United States are the only ones who are making money out of the parcel post system.

Report Shows Deficit

The Postmaster-General's report recently issued shows that instead of producing a surplus of $3,000,000, as in each of the two preceding years, the postal service for the fiscal year ending June 30, 1915, incurred a deficit of $11,333,-309.97. This is said to be the largest shortage in a quarter of a century, with the exception of two or three years, when it is claimed the postal revenues were looted through the reckless extension of rural free delivery service. The American paper states:

"The Postmaster-General ascribes a part of this deficit to the war and the remainder to 'certain large increases in postal expenditures which were mandatory under the law,' which is probably an euphonious way of describing the outgo on account of parcel post. In the same breath he states that the decrease in receipts for the year 1915, as compared with 1914, was only $686,400. Ascribing this small decrease, amounting to less than one-fourth of 1 per cent., wholly to the European war—for certainly no part of the increase in gross expenditures can be accounted for by a shrinkage in receipts — it would appear that nearly $11,-000,000 of the big deficit must be charged to the parcel post."

Does Canadian System Pay?

The turn of affairs in the United States naturally causes Canadians to wonder whether or not the parcel post in Canada pays.

Hardware and Metal stated editorially on Oct. 9 of this year:

PROVISIONS OF FIRST U.S. CATALOGUE HOUSE BILL

Be it enacted, that all persons, firms, or corporations in the United States which are now conducting, or which may hereafter conduct, an interstate mail order business for the purpose of selling goods, wares, and merchandise direct to the consumer shall pay a tax of 2 per cent. upon the total cash value of all goods, wares, and merchandise sold within any state.

Sec. 2. That every person, firm, or corporation conducting a mail order business as defined in section one of this Act shall keep in proper books, to be provided by the Secretary of the Treasury of the United States, an accurate and complete account of all good, wares, and merchandise of every character and description so sold, together with the actual selling price of the same.

Sec. 3. That on the thirty-first day of December, after the passage of this Act, and on the thirty-first day of December of each succeeding year, every person, firm, or corporation engaged in such business shall render a full and complete statement to the Secretary of the Treasury, upon blanks to be funished by him, of the total cash value of all goods, wares, and merchandise sold during the year in the various States of the United States.

Sec. 4. That the Secretary of the Treasury shall determine the amount of the tax to be paid by each person, firm, or corporation (at the rate of 2 per cent. upon the total cash value of all goods, wares, and merchandise sold within any State) engaged in such mail order business, and shall give notice of the amount of said tax due and payable, pursuant to the terms of this Act in such manner as in his judgment is most practicable.

Sec. 5. That every person, firm, or corporation subject to said tax under the provisions of this Act shall pay said tax on or before March 1 of each year and every year after this Act shall become a law.

Sec. 6. That the Federal courts of the United States shall have power to enforce the collection of said tax upon the application of the Secretary of the Treasury.

Sec. 7. That the Secretary of the Treasury shall apportion said tax among the several States in the ratio of the actual amounts of goods sold in each State.

Sec. 8. That the tax so apportioned shall be paid by the Secretary of the Treasury to the various State treasurers entitled thereto; said tax to be used for the construction and maintenance of public roads, under such rules and regulations as the said States may by law direct.

"In a recent issue of a Toronto daily paper an item referring to Canada's parcel post system appeared as follows:

"People have no idea how easily and cheaply parcels can be sent by parcel post in Canada," said C. Gleeson, of Winnipeg, who has practically the jurisdiction of the whole parcel post system from Ottawa to Dawson City.

"The department stores are about the only institutions that are really making a thorough use of the system, and they do so because it pays." Mr. Gleeson stated that the small parcels from six pounds down were most frequently sent. The maximum limit is 11 pounds in size up to 2 feet 8 inches by 3 feet 6 inches.

Here is an admission from the post office officials that the parcel post system is a failure. Last year the then Postmaster-General, L. P. Pelletier, in arguing for increased revenue for his department, stated that the parcel post was not yet paying its way.

The Bill establishing it was forced through Parliament after many setbacks; the fight extending over a number of years. It was strongly opposed by the business press of the country which showed that it was of value only to a few big stores in Montreal, Toronto and Winnipeg, and that it would build up these cities at the expense of the other centres and particularly the small towns and villages, which are so essential to satisfactory rural conditions. The Post Office officials and others promoting the Bill finally overcame the opposition by representing that under the zone system the proposed parcel post system would be of no value to the big departmental stores; that it was really in the interests of the smaller cities and towns.

The Bill was based on one adopted by the United States, but neither there or here has the zone system been found of value to the public at large. Instead the big mail order houses send their goods and catalogues by express to post offices in zone centres from where they are distributed at a lower rate than the efficiently managed express companies can afford to carry them. It is apparently not paying in the States. A representative of one of the largest mail order houses in Chicago volunteered the information recently that the system was a great advantage to them, but some day the country would employ a good cost accountaant who would discover that the business was being done at a heavy loss; that the country was paying much more to carry the parcels than they received from the shippers.

The present parcel post system is clearly transferring the business of centres to a few big cities, and if this business is being done at a loss, it is up to the government and M.P.'s outside the big cities to deal with this matter. If these are the facts, as they undoubtedly are, in these times of heavy and increasing taxation, it would be a great public economy to abandon the present parcel post system entirely and establish one on a self-sustaining basis.

Mail Order Houses Benefit

There is a feeling throughout the retail trade of Canada that the large mail order houses are the chief benefactors as a result of the parcel post system, and, largely at the expense of the tax-paying public.

It is time that some statement should be forthcoming regarding the failure or success of the Canadian parcel post system.

If the Canadian mail order houses are making money at the expense of others the injustice should be remedied.

Provisions of U.S. First Catalogue House Bill

The provisions of the first catalogue house bill of the United States, proposed by Representative Robert, and which is typical of the three measures, are shown in the panel accompanying this article.

The American contemporary in referring to Postmaster Burleson's parcel post policy states as follows:—

"The further extension of the parcel post in various directions is foreshadowed in Mr. Burleson's closing remarks on the subject, which should be carefully read "between the lines." He says:

"The Congress charged the Postmaster-General with the duty of administering the parcel post law in the interest of the public, and it is the desire to make this service of the greatest possible benefit to the people and at the same time render it at the lowest possible cost. As a governmental function the facilities must be extended to the unprofitable as well as the profitable territory, as the government must serve all the people; also, in fixing the rates and promulgating the regulations, no charge should be superimposed for taxation, but the service as a whole should be self-supporting, as the law directs. By following this policy the parcel post will meet the needs of the public and at the same time fulfill the purpose for which the law was enacted."

It is safe to say that in view of the deficit, amounting to nearly a million dollars a month, which accrued during 1915, the mail order houses cannot complain that any charge upon their merchandise has been "superimposed for taxation." It would be interesting, however, to have a somewhat detailed exposition from the Postmaster General's facile pen as to how he conceives he has made the service "self-supporting, as the law directs."

GREAT SUCCESS OF HOLMAN DAY

Summerside Firm Ran Special Train on Sale Day—Huge Crowds Attended—Biggest Day in 58 Years of Business

R. T. HOLMAN, Limited, Summerside, P.E.I., recently celebrated "Holman Day," and demonstrated that one firm can make a success of an event of this kind, provided the proper methods are adopted.

A press report from Summerside, referring to the day stated: "Unquestionably the largest crowd of people ever seen in Summerside, except possibly on Exhibition days, was that which was attracted to town by the advertisements of Holman Day. The special train from the West was crowded with people all the way from Tignish, as well as from intermediate points, while the regular trains from east and west were filled to capacity. Needless to say, Holman's store and warehouses were filled all day, and probably more customers were waited on and more goods delivered than on any other day in the history of the store. While Holman's was the centre of attraction, other business houses shared in the benefits, and both citizens and merchants are loud in their commendation of the enterprise that made such a big day for the whole town. The record attendance is a distinct compliment to the Messrs. Holman, Limited, and an evidence of the faith the people have in their advertisements."

In a letter to Hardware and Metal, the manager of the advertising department of R. T. Holman, Ltd., stated as follows: "All the regular trains to the town were crowded. The special train was crowded to the last step on the platform. People drove to the town by thousands.

"It was the biggest day in our 58 years of business, and even then we could not handle much more than half the people who came to the store, and consequently the other stores in the town did well also. It was the biggest day in the history of the town. More goods were bought and more goods left the town than on any day on record. We consider this phenomenal in view of the fact that we did it all single-handed.

"We pulled off an event some weeks previously called "Dollar Day," which is probably an over-worked term in some centres. We invited our competitors in the town to co-operate with us in boosting it generally for the town. They did not see their way clear to do this, and we went at it alone. We met with such excellent success that we were encouraged to put on "Holman Day" a short time following.

What Other Papers Say

Items of Interest From Other Papers—In Each Instance Credit is Given to the Paper From Which the Item is Taken—The Indispensable Man—Buying vs. Salesmanship—Pig Iron for Next Year—Shortage of Metal Toys

THE INDISPENSABLE MAN

From the Ironmonger.

THE London Chamber of Commerce has issued copies of correspondence which has passed between Lord Derby and the Secretary, chiefly in respect of the suggestion that employers should further substitute female for male labor and the question of what constitutes an "indispensable" employee. The Chamber of Commerce has collected information from 735 firms in London, which shows that approximately 50 per cent. of the men in their employ have already enlisted, while many firms have expressed themselves willing to release others provided absolutely indispensable men can be retained or kept in reserve until the latest possible moment. There has also been issued a report of the Committee appointed by the Home Secretary to consider the conditions of the retail trade in relation to further enlistment. The Committee found that in certain trades, including ironmongery and furnishing, where physical strength is a consideration, the number of women already employed cannot be largely increased. Inquiry shows that 85,591 firms in the retail trades are still employing 123,739 men of military age, of whom it is estimated that 34,000 might be released. The report also suggests that the proposal to introduce a system of joint delivery of goods at fixed times in each district has not been favorably received by shopkeepers, the objection being that the department stores will take advantage of the curtailment of service to attract customers from the smaller shopkeepers.

* * *

BUYING VS. SALESMANSHIP

From the National Bulletin.

YOU have heard of Forest Crissey. He is a well-known writer whose stories touching retail problems appear frequently in the popular magazines.

He has some good ideas on retail questions, and in a recent article he discusses the business of buying and agrees that buymanship is just as important as salesmanship. His logic is good. We believe his views are correct.

We have recognized for some time that salesmanship has been overworked to the point where it has added something to wholesale prices. This places those who are obliged to carry it at a serious disadvantage when brought into competition with those who, through quantity purchases or their skill as buyers, are able to exact prices which do not carry this superfluous increment.

We are using the term "superfluous" advisedly.

An employer of travelling salesmen in speaking of small territories and weekly trips recently said: "It is my judgment that this is entirely unnecessary and adds to the expense of doing business without the proper return."

We will not enter into details as to what brought this about. It is explained in one word—competition.

The retailer himself can largely remedy this trade evil by becoming a better buyer.

Matching wits is not buymanship. The salesman will beat you at this game practically every time. Nothing will take the place of a knowledge of market prices and the goods.

The salesman who simply drops in, jots down your order and mails it in to his house is rendering you an unnecessary service. Your stenographer could do the same work at much less expense.

But the salesman who comes to you with live ideas, who has a knowledge of new and profitable lines, who can get you the goods you need, who in reality collaborates with you in keeping up a live stock of goods, is a useful adjunct to your business.

You are working together, but he is a seller and you are a buyer, so some of your objectives are different. He may be ever so good a salesman and do his part most creditably, but he cannot lift certain of your own responsibilities.

To be able to forecast and interpret business conditions so that one can have the right goods when he needs them, in right quantities and at the right price, is an art calling for ability of a high order.

PIG IRON FOR NEXT YEAR

From Iron Trade Review.

CONSUMERS of pig iron are endeavoring to sound the market for delivery during the last half of next year, but furnaces as a rule as not encouraging the placing of business so far ahead. A few furnaces are willing to quote the same prices for the last half of next year as have been named for the first half, but others are quoting an advance of about $1 a ton, or are refusing to quote at all.

Plates are very strong and one leading eastern Pennsylvania company has practically withdrawn from the market. Iron ore sales are being made rapidly and the advance of 75 cents per ton announced last week has been favorably received by buyers.

The recent order of the Government of Great Britain preventing the importation of machine tools into the Kingdom except under governmental regulations is believed to be merely an attempt of England to regulate sales and prices.

* * *

SHORTAGE OF METAL TOYS

From Weekly Report, Department of Trade and Commerce.

THE stoppage of the supplies of toys received in normal times from Germany led some of the large London wholesalers to despatch buying representatives to North America, and it is stated that both the United States and Canada have been thoroughly scoured for certain classes of goods, in some cases with success and in other cases the reverse. At the present time the shortage in the supply is confined chiefly to mechanical novelties, metal goods and dolls. There is no dearth of the large wooden toys, such as rocking horses and similar lines; in fact, dealers are able to secure all they require of this kind of toy from English manufacturers who have lately gone more extensively into the manufacture of same. Another factor, which, it appears, would preclude any extensive export of large wooden toys from Canada at the present time is the high shipping freights ruling, as toys of this kind are not compact; on the contrary they take up much space, thus adding to the cost of transit.

Sheet Metal Workers' Course

By Chas. Sievers

IN this article is shown how to develop a pattern plate, from which five different elbows may be made—namely, 2-piece, 90 degrees; 2-piece, 70 degrees; 3-piece, 90 degrees; 4-piece, 90 degrees, and 6-piece, 90 degrees.

The two-piece 90-degree elbow being actually cut out, whereas the others are punched. The best way to develop this plate is to take a piece of white cardboard and use a lead pencil; next make a plan, as shown, of whatever size of elbow required. Then divide off the circle as shown at 1, 2, 3, 4, 5, 6, 7, 8, 9, and draw dotted lines downward from these points. Next rule off the base line, which must be as far away from the plan as necessary. Then develop the two-piece 90-degree pattern first by following out the rules laid down in previous articles. After this pattern has been developed, erase the mitre line and divide off the arc in two from base line to 70 degrees, giving a mitre of 35 degrees. This is then marked off at each point where the dotted lines cross the mitre, and each point is carried along to its respective dotted line described by the stretchout measurements. The first to be marked off being the highest point on the mitre to 9, the next to 8, 8, the next to 7, 7, aniidi so on until all points have been used. Then erase the mitre line, as was done before, and repeat these operations, until all the patterns have been developed. Next lay the cardboard over a sheet of galvanized iron, or any other sheet iron which is to be used and cut out the 2-piece 90-degree pattern, beginning at A, or if it is desired to leave the sheet square, then simply punch each point, as shown in the case of the lower patterns B, C, D, E, all of which will only require one plate. It must not be overlooked that no allowance has been made for seams, therefore whatever size of seam is required must be added on to the pattern. The reader will note every pattern shown in these articles is the same radius, and it may be necessary to increase the radius of an elbow. This is done by simply increasing the length from the curves of the pattern to the

THE JUNIOR CLERK'S PAGE

Splendid Living, But Poor Life

We Rise or Fall by Our Ideals—Red Letter Men of the World Have High Ideals—The Measure of a Successful Man

By DR. ORISON SWETT MARDEN

WRAPPED up in every human being there are divine energies which, if given proper direction, will develop the ideal from stage to stage. Who sees a sculptor at work upon a block of marble sees what appears to be only a mechanical performance. But, out of sight in the sculptor's brain, there is a quiet presence we do not perceive; and every movement of the hand is impelled by that shining thought within the brain. That presence is the ideal. Without it he would be a mason; through it he becomes an artist.

"The ideal is the real." By it we shape our lives as the sculptor shapes the image from the rough marble. External means alone will not accomplish this. You must lay hold of eternal principles, of the everlasting varieties, or you never can approach your ideal. Your first advance toward it lies in what you are doing now, in what you are thinking. Not on some far-off height, in some distant scene, or fabled land, where longing without endeavor is magically satisfied, will we carve out the ideal that haunts our souls, but "here and now in this poor, mean Actual, here or nowhere is our ideal!"

In the humble valley, on the boundless prairie, on the farm, on sea or land, in workshop, store, or office, wherever there is honest work for the hand and brain of man to do,—within the circumscribed limits of our daily duties, is the field wherein the outworking of our ideal must be wrought.

The great curse of the average person is commonness, the lack of aspiring ideals. There are thousands of farmers who never get above oxen and wheat, of doctors who never become superior to prescriptions and diseases, of lawyers who never wholly subordinate their briefs. The ideals of the masses rarely rise out of mediocrity. Most of us live in the basement of our lives, while the upper stories are all unused. Millions of human beings never get out of the kitchen of their existence. We need aspiration and great thought-models to lift us.

The Creator has whispered into the ear of all existence, "Look up." There is potential celestial gravitation in every mortal. There is a spiritual hunger in humanity, which, if fed and nourished, will lead to the upbuilding and developing of great souls. There is a latent divinity in every son of Adam, which must be aroused before there can be any great progress in individual uplift.

In a factory where mariners' compasses are made before the needles are magnetized, they will lie in any position, but when once touched by the mighty magnet, once electrified by that mysterious power, they ever afterwards point only in one direction. Many a young life lies listless, purposeless, until touched by the Divine magnet, after which, if it nourishes its aspirations, it always points to the north star of its hope and its ideal.

Every faintest aspiration that springs up in our heart is a seed within us which will grow and develop into rich beauty if only it be fed, encouraged. The better things do not grow either in material or mental soil without care and nourishment. Only weeds, briers, and noxious plants thrive easily.

The aspiration that is not translated into active effort will die, just as any power or function that is not used will atrophy or disappear. The ostrich, naturalists say, once had wonderful wings, but not caring to use them, preferring to walk on the earth rather than mount in the air, it practically lost its wings, their strength passing into its legs. The giraffe probably once had only an ordinary neck, like other animals, but being long used to reach up to gather its food from the branches of trees, it lifted its body in the upward direction until it is now the tallest of all animals, its elongated neck enabling it to gather the leaves from lofty trees.

Something like this takes place continually in human lives. We rise or fall by our ideals, by our pursuit or our disregard of them. The majority of us make bungling work of our living. We spend much precious time and effort catering to the desires of our animal natures, and live chiefly along the lines of life's lower aims and opportunities when we might be soaring.

Everywhere we see men making a splendid living, but a very poor life; succeeding in their vocations but failing as men, swerving from their own highest ideals for the sake of making a little more money. On every hand we see people sacrificing the higher to the lower, dwarfing the best in them for a superficial, material advantage, selling the birthright of the soul's ideal for a mess of pottage.

Yet the ideal is indeed the "pearl of great price," in the balance with which "all that a man hath" besides is as nothing. The red letter men of the world have always been men of high ideals to which they were ever loyal, men who have said "this one thing I

(Con. on page 54.)

CONFIDENCE

The following verses were read by Robt. Bremner at the recent convention of the traveling staff of the Canada Paint Co., Montreal.

I know a man who hunts for snakes, and kills them for their grease.
He says 'twill cure rheumatic aches, and make your anguish cease.
The doctors say that serpent oil no sort of virtue owns;
It will not cure the pains that coil around your joints and bones.
But this old gun who kills the snakes has never had a doubt;
He says all other cures are fakes, when reptile oil's about.
He is so everlasting sure that what he says is true,
That even skeptics buy his "cure," to see what it will do.
And so it keeps him toiling hard, the keen demand to meet,
And he has bought with bullsnake lard a home in Easy Street.

If you believe in what you sell, have faith in what you say,
In that same avenue you'll dwell, upon a future day.
If one is not supremely sure that what he has for sale
Makes all competitors look poor, his eloquence will fail.

A man can sell me setting hens, or swarms of bumble bees,
Or double action fountain pens, or cures for housemaids' knees,
If he's convinced that what he sells beats everything around;
That sort of salesman's wearing bells, wherever he is found.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

THE UTILITY HEATER

The Hill Pump Valve Co., 18-20 Kinzie street, Chicago, Ill., offers to the trade the Utility Heater for gasoline cars.

The Utility Heater

The makers state that the heater keeps a car heated at comfortable temperature in coldest weather without costing a cent for maintenance.

The Utility Heater is a radiator and footrest combined. It utilizes the hot gases from the engine exhaust. The gases, instead of being wasted, pass through the heater when it is in operation and escape into the air beneath the car. The temperature is kept at the desired point by means of a regulating valve inside the car.

The makers also state that the Utility Heater is simple, ornamental and indestructible. It's an attractive addition to any car. It cannot get out of order. It gives off no obnoxious odors or gases, and cannot burn anything. Can be permanently installed in half an hour by drilling two small holes in floor of tonneau and one in the exhaust pipe ahead of the muffler.

The company also makes the Utility Junior Heater for Ford cars. Complete descriptive matter will be supplied on request.

THE "DAISY" DUSTPAN

The Burrowes Manufacturing Co., 607-611 King street west, Toronto, are making the "Daisy" dustpan, a large, well-made, black japanned dustpan with a long handle, made of No. 9 coppered wire, twisted. With the long-handled pan there is no necessity for bending when sweeping. The long handle enables the sweeper to sweep up all dirt without bending over. The edge fits the floor tightly and all sweepings go into the pan.

When raised, the dust falls into the pocket and the pan can be carried from room to room until all the dust is taken up.

The pan can be sold as a regular stock line or given out as an advertisement. Special prices are given for large lots with an ad stenciled thereon.

NEW ALUMINUM PRODUCTS

Aluminum Sales & Mfg. Co., Inc., Indianapolis, Ind. and New Yorn, N.Y., offer to the trade two new aluminum products in the form of an oval roaster and a collapsible alcohol boiler. The new roaster is made in two sizes and has, the makers state, some decidedly exclusive features. The top of the roaster is designed to insure extreme rigidity and handiness. Because of its indented top, the roaster will fit into small and shallow ovens that will not accommodate the larger styles. The two air vents shown in the top are quickly and easily adjusted to suit the ideas of the housewife. The roasters are made in two sizes, of thick, heavy, 99 per cent. pure aluminum throughout, except for the handles, which are heavy tinned steel.

New Oval Roaster

The collapsible alcohol boiler is a heating device that is said by the makers to be ideal for use about the home and in travelling. It is made of aluminum, light in weight and may be carried in a small space in a suit case or trunk. The handles fold in closely and the stand is nested into the boiler.

The device burns solidified alcohol, thus doing away with the danger of leakage or explosion. The boiler has a capacity of 1½ quarts. Among other new articles recently produced by the company are a milk pail, fry pan, tea pot,

Collapsible Alcohol Stove

round griddle, dish pan, colander. Descriptive matter will be supplied on request.

CATALOGUES AND BOOKLETS

1916 Calendar

The Whitman & Barnes Mfg. Co., St. Catharines, Ont. and Akron, Ohio, has issued an attractive 1916 calendar.

Goodell-Pratt Tools

Three attractive booklets have been issued by the Goodell-Pratt Company, Greenfield, Mass., descriptive of hack saws, bench grinders and hack saws, respectively. Copies for distribution by dealers will be supplied on request.

Lips Safes and Locks

Lips, Limited, London, England, have issued a number of attractively illustrated booklets, featuring security locks, steel safes and doors, safety rack bolts, etc., etc.

One catalogue consisting of 30 pages features cylinder locks in a number of designs required for private houses, offices, factories, shops, etc.

Another booklet issued by Lips, Ltd., gives some details regarding the severe and disastrous fire at the Brussels International Exhibition in 1910, and shows a number of photographs of Lips safes which were removed from the ruins after the fire had burned itself out.

"Ancient Egyptian Locks" is the title of another interesting booklet issued by the firm. The booklet contains some exceptionally interesting data concerning the art of lock making from the ancient Egyptian locks to the locks of the present day. Copies of the catalogues and booklets may be secured by writing to the manufacturer.

EVENTS IN THE TRADE

Fire Losses

Milton, Ont.—The tinshop of E. F. Earl was destroyed by fire.

Tofield, Alta.—The hardware and furniture store of McLaughlin & Woods was razed by fire, causing a complete loss of the building and contents.

New Firms

Halifax, N.S.—J. J. Cragg & Co. have opened a new store at 98 Gottingen street. The senior member of the new firm was formerly associated with Morton & Cragg. The firm will carry hardware, kitchen furnishings, sporting goods, etc.

Enlists For Service

St. John, N.B.—William W. Dorman of the McClary Mfg. Co. local branch, has enlisted for active service. Fellow employees in the office and warehouse presented Mr. Dorman with a wrist watch, pipe and purse.

New Credit Manager

W. R. Saults, formerly branch manager of the Union Bank, Winnipeg, has been appointed credit manager of the J. H. Ashdown Co., in succession to the late F. C. J. Hawkins.

Started as Hardware Clerk

Hon. A. C. Flummerfelt, who has just been called to be Minister of Finance in the new Cabinet of British Columbia, is an old York county boy, being a son of Geo. Flummerfelt, one time general storekeeper at Markham. His business career was begun with G. R. Van Zant, a hardware merchant of Markham.

Appointed Western Manager

Edmonton, Alta.—W. P. Mellar has been appointed Western manager of the Jas. Smart Mfg. Co., Brockville, Ont. Mr. Mellar succeeds the late Wm. Sutherland, whose death took place last month. Mr. Mellar was for some years associated with the company at Brockville as head of the stove and furnace department.

To Develop Zinc Industry

Vancouver, B.C.—The zinc industry of British Columbia will receive a big impetus in the establishment at the Trail Smelter of a large plant for treating zinc ore, to be operated by the Canadian Consolidated Mining and Smelting Company. The plant is expected to be complete by January 1. It will cost in the neighborhood of $1,000,000. The The owners are mostly C. P. R. directors.

Big Addition to Plant

Hamilton, Ont.—The Canadian Cartridge Co. has purchased four acres of land from the city and will commence at once to build an addition to the present plant. It is said that the addition with equipment will mean an expenditure of nearly one-half million dollars, and employment will be provided for several hundred more skilled workmen. The company will extend its foundry in order to roll brass sheets and do other work.

Travellers' Society Elects Officers

Toronto, Ont.—A representative meeting of the Commercial Travellers' Mutual Benefit Society, of Toronto, was held in the Commercial Travellers' Building, 51 Yonge street, called for the purpose of nominating the officers and directors for 1916. Joseph Oliver, ex-Mayor, retired from the presidency.

Following is the list of officers nominated and elected by acclamation: President, Chas. S. Parsons; vice-president, Robt. Maxwell; treasurer, H. Goodman; directors, John Gibson, W. J. Sykes, Adam Johnston, A. J. Tipping, Robt. Forbes, L. R. Arnett, S. M. Sterling, John Burns, S. R. Wickett.

Hardware Catalogues Wanted

W. J. Carter, of Carter Bros., Picton, Ont., whose store was recently gutted by fire, has requested Hardware and Metal to ask manufacturers to forward catalogues and discount sheets. All the firm's catalogues were destroyed in the fire.

Carter Bros. are contemplating erecting a strictly modern office in the new store which they are equipping, and would be interested in catalogues or descriptive matter pertaining to office fittings and equipment.

Obituary

Todmorden, Ont.—The death took place here recently of R. P. Robinson, who for many years conducted a tinsmithing business here.

Dutton, Ont.—The death took place here after a brief illness from heart trouble of Jas. B. Crawford, who for 25 years was in the hardware business here. At the time of his death Mr. Crawford was 58 years of age.

Newcastle, N.B.—The death occurred here after a week's illness of Frank Masson, who for a number of years conducted a tinsmith and stove business.

Personal

W. H. Wiggs, president of the Mechanics Supply Co., of Quebec city, has returned after a seven weeks' trip through Western Canada and the United States, where he spent some time sojourning in the Southern portion, and Mexico. Mr. Wiggs stopped over at Winnipeg, Calgary and Banff and found considerable improvement in conditions in the prairie country. Mr. Wiggs also visited the Panama-Pacific Exposition at San Francisco.

W. W. Cooper, of the W. W. Cooper Co., in Swift Current, Sask., has returned from a trip to the eastern cities of Canada and the United States. Mr. Cooper was away for about a month, and visited several manufacturing centres.

Winnipeg Notes

W. R. Saults, of the J. H. Ashdown Hardware Co., Ltd., Winnipeg, has been elected to the board of directors of the Canadian Credit Men's Association.

Advantage is being taken of the presence in Winnipeg during the holidays of travelling representatives of wholesale houses, to hold a banquet at the Fort Garry Hotel on Dec. 28. Among the speakers announced are C. H. S. Bamford, sales manager of the J. H. Ashdown Hardware Co., Ltd.; W. J. Wilson, sales manager of the Winnipeg Ceiling and Roofing Co., and H. Annis, manager of the Marshall-Wells Co.

W. J. Wilson, sales manager of the Winnipeg Ceiling & Roofing Co., Ltd., Winnipeg, will leave for Toronto and other eastern points early in the new year.

H. M. Klassen of Herbert, Sask., visited Winnipeg last week accompanied by his son. Mr. Klassen reports a record crop in his district.

Norman Henderson, of Henderson Bros., Vanguard, Sask., visited the city on Monday last as representative of the Vanguard Board of Trade, in an effort to get more cars furnished for shipping grain east.

E. L. Fitzgerald of the Merrick-Anderson Company, has been out on a buying trip East, visiting stove factories, and arranging for new lines.

Greeting

To the Hardware Trade—

We desire to extend to each of our Customers and Friends our best wishes for

A Happy Christmas

May the New Year bring you prosperity in abundance and a full measure of health and happiness.

Supplies may be secured from E. H. Harris & Co., Toronto; The Art Metropole, Toronto; The Art Emporium, Montreal, Que.—Ed.

SHEET METAL WORKERS' COURSE

(Continued from page 35.)

base line. For instance, suppose the pattern of a 6-inch 6-piece elbow is made for an elbow of 18-inch radius, and it is desired to make an elbow 24-inch radius, simply open up the compasses to 24 inches, and draw an elevation of an elbow of that radius, then add length, say, from E to base line, which will in that way give the desired result. By making a plate as shown in this article, it will only be necessary to have one plate for each of every size of elbow, namely—one plate for 4-inch, one plate for 5-inch, and so on; whereas by having a separate pattern for each size as well as number of piece elbows, it would require 5 patterns for every size, to say nothing of the trouble of having to hunt through a whole host of patterns before the right one can be found. No allowance has been made for lock or seams.

W. L. Helliwell Goes to Montreal

W. L. Helliwell, who for eight years has been the Winnipeg manager of the Gurney Northwest Foundry Co., has received the appointment of manager of the Gurney-Massey Co., Montreal, and left on Saturday last to assume his new duties. Mr. Helliwell was the guest at a dinner given in the Fort Garry Hotel, Winnipeg, Wednesday, Dec. 15, by the directors of the Canadian Credit Men's Association, of which body he was president. He was presented with the gavel used during his term of office, mounted with a silver inscription. He was also the recipient of a handsomely framed photograph of himself, and his picture is being placed in the head office of the association. Mr. Helliwell was one of the original members of the Canadian Credit Men's Association. He is succeeded as president by L. J. Mylius, Winnipeg manager of the National Drug and Chemical Co.

W. L. HELLIWELL

who is leaving Winnipeg to become manager of the Gurney-Massey Co., Montreal, Que.

CATALOGUES AND BOOKLETS

Soldering Kinks

The M. W. Dunton Co., 150-152 Niagara street, Providence, R.I., recently issued a very interesting and instructive 32-page booklet entitled "Soldering Kinks." The book contains detailed instructions and improved methods of using solder. The drawings and diagrams with which the book is fully illustrated, also tend to make the instructions readily understandable to all.

De Vine Safety Razors

De Vine Safety Razor Co., Inc., 608 South Dearborn Street, Chicago, have issued an attractive 15-page booklet descriptive of the De Vine safety razor. A number of decidedly new features are embodied in the De Vine razor. Copies of the booklet will be mailed on request.

Shakespeare Fishing Tackle

Catalogue No. 19, consisting of 303 pages, attractively illustrated, has been issued by Wm. Shakespeare, Jr. Company, Kalamazoo, Mich., featuring fishing tackle and sporting goods.

An extensive range of fine fishing tackle is featured in the catalogue, several hundred illustrations being necessary to show the many products of the company. Hunters' clothing, baseball and other sporting lines are also featured.

Trade Inquiries

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

1269. Broom Handles.—A firm of timber exporters at Manchester wishes to be placed in touch immediately with Canadian exporters of broom handles of the following sizes: 50-inch by 1½-inch, 50-inch x 1 1-16-inch—white spruce or red pine.

1270. Wood Button Moulds.—A London firm is in the market for Canadian-made wood button moulds.

1271. Box Boards.—A firm in London wishes to get into touch with Canadian makers of box boards.

1272. Staves.—A correspondent in Portugal reports a large market for Canadian oak staves for use in making port wine barrels.

1274. Flax Straw.—A Swiss firm desires an offer on 5,000 tons of shelled flax straw, c.i.f. Marseilles and Amsterdam, from three or four large Canadian producers.

1276. Corrugated Paper. — A very large concern in Glasgow is anxious to obtain a supply of corrugated paper made in rolls 250 feet long by 26 inches deep.

1277. Box Shooks, Broom Handles, Washboards.—A large importing house in Glasgow would like to receive quotations c.i.f. Glasgow for the above.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

The Markets at a Glance

The Christmas rush is over, and travelers are all in, until the New Year. A large number of sales-staff conventions are scheduled for next week. Christmas trade this year, in all branches of the hardware trade, has been exceptionally brisk; and there has been a heavy demand for the many gift lines which are now carried by the hardware trade. Stocks of many lines of skates, sleighs, cutlery, etc., are almost depleted.

A large number of price changes have taken place this week and many more are slated to take place in the near future. Among the many price changes this week are advances in the price of carriage and machine bolts, sleigh shoe bolts, coach screws, bolt ends, plough bolts, elevator bolts, fancy head bolts, step and shaft bolts, square and hexagon nuts, rivets, hammers, augers, brass tubing, glue, screw eyes, hooks, etc., bright screw eyes, cornice hooks, stove pipe eyes, gate hooks and eyes, brass screw hooks and eyes, planes.

Reports from Winnipeg state that following the recent advances in the East, higher prices have gone into effect on black and galvanized pipe and hoop steel. Higher prices will take place in the near future on bolts and many other lines which have advanced in the Eastern markets this week, and are referred to in the reports which follow.

MONTREAL

MONTREAL, Dec. 24.—The holiday trade is over for another year. That is the outstanding feature of the hardware situation to-day. As regards the Christmas business there is every indication that it has been better than had been expected and perhaps better than had been hoped for. It may not have been so good as in some of the more prosperous pre-war seasons, but it will generally present a marked and favorable contrast to a year ago. The actual statements of the retailers are not available on the point, but the manner in which the demand upon the wholesalers continued until the eleventh hour is an indication that the public bought better than the average merchant has counted on—for it is safe to say that none of these purchases were made without reasonable assurance that they would be disposed of before the end of this week. Recently the bulk of the business has, of course, been in the city, but the country demand was also continued later than usual. Altogether signs are not wanting that in the hardware trade if the average feelings are not altogether merry they will at least indicate satisfaction so far as the Christmas trade was concerned.

Such was the late demand for many holiday lines that stocks were seriously depleted and in some lines, where there has been interference with supplies on account of the war, orders were filled with difficulty and only after a partial revision of stock lists. This applied to skates and cutlery particularly, the stocks of the former being pretty well cleared up while a reorganization of displays of the latter indicates the difficulty of maintaining stocks.

With the actual Christmas rush there has been a falling off in the demand for metal products, the result being that there are fewer changes this week than for some time. However, the movement still continues unusually heavy and the trade is evidently protecting itself so far as possible against further advances. There is no evidence that the top has as yet been reached and in fact there are some features indicating anything but an improvement so far as the prospects for future supplies are concerned. However, demand is a factor in the situation as well as supply and when the buying drops off the upward movement will undoubtedly be less rapid and under such conditions prices may be continued on a basis below what is actually warranted to encourage consumption. At the same time there are advances on such lines as bolts, rivets, hammers, augurs, etc., which indicate that, as has previously been pointed out, a continuance of high prices for iron and steel will be felt from time to time in increased prices on the higher manufactures of these metals

Tin Strong.—The tin market has continued to gain in strength since last report and the quotations, although unchanged, are now very firm. This strength comes in sympathy with the outside markets, New York having advanced a couple of cents since the first of the month. An important factor in the situation is the indication that the British Government will issue a regulation to the effect that 4,000 tons of tin must be in England at all times and this would mean an increase over the present stock of about 1,500 tons. However, New York, feels that there is no great apprehension on the part of consumers on this side as the present visible supply is about 50 per cent. greater than at the same time a year ago. Even the closing of the Suez Canal would only mean a longer haul and a delay on shipments for a few weeks, and this would not be serious. Montreal quotation: 45c-46c—very firm.

Spelter Steady.—Although the local spelter quotation is firm on recent advances in the outside markets, a readjustment without an increase seems likely owing to recent developments which indicate an effort to depress the market. The American Metal Market claims that there is evidence of this in quotations being generally circulated which are materially below the prices being paid. New York conditions show that while there is a good demand for December for first quarter, spelter buyers are not interested in far-off futures. Montreal quotations: 22c-22½c—steady.

Lead is Easier.—Following the advance of ¼c on lead last week in the local market, there has been an easier tone develop with the result that the advance has been written off. This change in the situation evidently follows the New York influence, for while the Trust price is still maintained at 5.40 cents, the outside market is only 5.35 cents. This latter condition of affairs is an indication that there is no new demand developing at the present time. Montreal quotation: 7¼c-7½c—steady.

Copper Very Strong.—The local copper situation is described as being very strong, although there have been no general advances to the trade. New York has been very strong following advances in London, and producers report that the demand is as insistent as at any time during the past six weeks. The American market is controlled by six large producers and the dealers and the smaller producers are not inclined to be cheap sellers. Montreal quotation: 22½c, very firm.

Antimony. — There is considerable spread developing in the antimony market, quotations depending on the nature of the demand and stocks on hand. There has been no change in the general

conditions and New York is a shade lower than at last report. However, locally the top of the range is inclined to go higher. Montreal quotations: 43c-45c.

Aluminum Slightly Lower.—With an easier tone in the local aluminum situation, there has been a shading of the quotation to the extent of 2 cents. The market appears to be in a very unsettled condition. Montreal quotation: 68c.

Solder Somewhat Higher.—Although there has been no general change in the solder situation, the tone is firm and some jobbers have advanced their prices about 1c per pound. The following quotations give a general idea of the market values of standard products:

Half-and-half 26c-27c
Strictly ... .28c-29c

Sheet Zinc.—The local situation as regards sheet zinc is unchanged at the recent high values established. Some quotations are heard above the following, but they may be regarded as generally indicating the market. Montreal: casks, 27½c; part casks, 28c.

Steel Market Stronger.—The steel situation continues to gain in strength and as yet there is no indication of a reaction or even that the high is in sight. Not only are the mills maintaining their attitude of disinterestedness and delaying shipments on contracts for several months, but recently there has been a tendency to enforce restrictions that under normal conditions have been regarded as merely nominal stipulations.

Iron and Steel.—The quotations for the different varieties of iron and steel have remained stationary this week, but whether this is due to better conditions in the market or whether it is the result of a slackening in the demand during the rush of the holiday trade is not indicated. However, even though there has been a decline in buying interest, the present movement is much better than a year ago, this being the result of the advancing prices rather than consumption. In connection with this and other markets influenced by the steel situation, it must be remembered that there has been heavy buying on the advances recently made and that the actual consumption is small. When the demand falls away the up-movement will probably be checked to a certain extent and in some cases where there are stocks available there may be such a thing as fractional declines to create interest, even though this may not be warranted by the cost of production.

Pipe Very Firm.—Following the advance recorded last week, the market for both black and galvanized pipe has been very firm and there are indications that higher prices may be put into effect if there is a revival of demand after the turn of the year.

New Prices on Plates.—There have been some further readjustments on the quotations for Canada plates, the net result being that the low is advanced 5c and the high 25c. There is now a range of 20c on the ordinary and 25c on the polished and it is interesting to note that the low figure on the former and the high on the latter are from the same firm. The range is now as follows:

Ordinary, 52 sheets ....$3.30-$3.50
All bright, 52 sheets 4.75- 5.00

Sheets Very Strong.—The market for black and galvanized sheets is very firm on the recent advances and there are indications that further advances may be made if the demand revives after the new year in such a manner as to threaten the exhaustion of available stocks before further supplies are obtainable.

Other Metal Products.—Other manufactures of metal are also very firm on the advances which have been recorded, although the demand has slowed down somewhat with the approach of Christmas. One house advises an advance on brass tubing to the following basis per hundred feet:

Close joint—⅜ in., $5.50; ½ in., $6.30; ⅝ in., $7.70; ¾ in., $10.50; ⅞ in., $11; 1 in., $12.40.
Seamless—⅜ in., $8.50; ½ in., $9.25; ⅝ in., $11; ¾ in., $12.40; ⅞ in., $18.70; 1 in., $25.

Advance in Rivets.—There has been an advance made in iron rivets and burrs on the local market, while copper rivets continue very firm. The discount on both iron rivets and iron burrs is not 65 per cent. as compared with 67½ per cent.

Nails and Wire.—Nails and all other wire products are in a firm position on their recent advances and developments are being watched with interest. Just at present the demand is not heavy, but there may be stronger booking after the opening of the new year.

New List on Bolts.—A new list on bolts covers further important advances on a number of lines. This is the direct development of the higher iron and steel market. The discounts are now as follows on the lines affected by this change:

Carriage Bolts ($1), list, ⅜ in. diameter and smaller, 60 and 5%.
Carriage Bolts ($1), list, 7-16 in., 45 and 5%.
Machine Bolts, ⅜ in. diameter and smaller, 60%.
Machine Bolts, 7-16 in. diameter and larger, 50 and 5%.
Sleigh Shoe Bolts, ⅜ in. diameter and smaller, 50 and 5%.
Sleigh Shoe Bolts, 7-16 in. dia. and larger, 45 and 5%.
Coach and Lag Screws, 65, 5 and 5%.
Skein Bolts, 65 and 5%.
Square Head Blank Bolts, 50%.
Plow Bolts, 50%
Elevator Bolts, 50%.
Fancy Heads Bolts, 40%.
Whiffletree Bolts, 40%.
Nuts, square, 3¼c off list.
Nuts, hexagon, 3½c off list.

Hammers Advance.—Hammers are another line which have been affected by the rising market for manufactures of iron and steel. Practically all lines are affected to the extent of about 5 per cent. New list prices on sledge hammers are as follows:

Can., 5 lb. and over $0.07
Masons, 5 lb. and over 0.07
Napping, up to 2 lb............. 0.10½

Augers Are Higher.—Augers are also similarly affected, although as yet the advances have not been very general. One firm reports an increase of about 5 per cent. on a number of the lines carried

Hinges Affected. — Quotations on hinges are generally firm in sympathy with the market for raw materials. One firm reports an advance on corrugated lines of 5c the doz. pairs.

Glue is Higher. — General advances have been made on the quotations for glue. The following figures are heard: No. 1, 25c; white, 18c; Medal, 16c; American broken, 21c.

Old Materials.—The tendency in the market for old materials continues to be to higher levels. No. 1 wrought iron is up ½c a pound and No. 1 machine compositions also ½c a pound. Scrap aluminum has been increased 4c a pound and is now being quoted at 32c.

Late Holiday Demand.—Wholesalers report that the holiday demand has continued right up to the last days before Christmas. This applies largely to the city, where there has evidently been a buying demand on the part of the public which the retailers were hardly prepared for.

TORONTO

TORONTO, Ont., Dec. 22.—The Christmas trade is the all-absorbing feature in hardware circles this week and indications point to a good volume of business quite equal to expectations, if not better. Christmas lines, such as cutlery, silverware, clocks, pocket knives and skates, are moving out well, and the favorable weather is helping business. The demand for general lines is good, although somewhat quieter on account of the season. Most hardware houses have their travellers off the road, in many cases until after the New Year. Trade in the country has been good this fall and a good spring business is also anticipated. The industrial situation generally has improved considerably, and many factories are busy on war orders. The outlook in this respect is very favorable. The placing of war orders is being done on a more systematic basis and as a result more business is coming to Canada. Money is circulating more freely and collections are improving.

Many Important Price Changes.—As has usually been the case for some weeks past, there are a number of important price changes to note. A new list for bolts and nuts has been issued showing an advance from 5-10 per cent. The lines affected include carriage bolts, machine bolts, sleigh shoe bolts; plow, elevator, skein, fancy head, shaft, step and whiffletree bolts. Stove bolts and rods, tire bolts and bolt ends are unchanged. Bright wood screw hooks and eyes, screw eyes, cornice hooks and stove pipe eyes, brass screw eyes, have all advanced approximately 10 per cent. A new price list on "Stanley" tools is in the jobbers' hands and the new prices, which are generally higher, will go into effect immediately. Owing to the recent large advance in iron, considerably higher prices are looked for in cow chains in 1916. It is freely predicted that an advance of from 25c to 50c per keg on wire nails will be made in the States, which will no doubt result in a corresponding advance in Canada. The shortage of galvanized fence and barb wire is becoming daily more acute and to-day makers will

not accept orders for shipment until after the first six months of 1916. Makers of ammunition freely predict a serious shortage in many calibres for next year on account of the heavy demand for service ammunition.

Iron and Steel.—The situation in the iron and steel market continues much the same; the mills are operating at capacity and prices are holding very firm. Iron bars are higher at 2.60c. Norway iron has advanced to 5.25c, and band steel to 2.50c per pound. Boiler plates and tubes are expected to advance in the near future. Deliveries are getting more backward than ever as the mills are working almost entirely on steel for shells. Prices on Pittsburgh bars for Canadian consumption are still withdrawn and the situation is unchanged.

No new developments have to be noted in the American market. The mills are sold up for from four to six months and much of the business now being placed is for delivery at convenience of the mill. The export demand for finished iron and steel continues heavy but a railroad blockade in the East is holding up shipments and causing considerable delay and inconvenience. No important advances in prices have been made during the week, it being the general opinion that values are quite high enough. The market, however, is very strong and the quotation of 17c, Pittsburgh, on bars, plates and shapes has become almost nominal. Prices of billets are unchanged, but are expected to advance as the scarcity is becoming more acute.

Pig Iron.—Sales of Lake Superior ore have been very heavy at 75c advance over the 1915 quotations. The pig iron market is very strong and prices are very firm. Lake Superior charcoal iron has advanced to $19.25 per ton; other quotations are unchanged. "Hamilton" and "Victoria" brands are quoted at $24 per ton.

Coal and Coke.—The coal and coke market is very strong, and prices have advanced on most grades. A big demand and shortage of labor has stiffened the market which may advance again in the near future. The new prices are given in the current market quotations.

Old Materials.—The market for old materials is much firmer and improved business is reported. Steel melters are taking large tonnages of heavy melting steel, and prices are very firm. Scrap copper is also in good demand and quotations are slightly higher. Prices of other metals are unchanged.

Machine Tools.—An important development in the machine tool market has been the publication of a proclamation in London prohibiting the importation into the United Kingdom of all machine tools and parts thereof, except small tools. An exception is made in favor of machine tools being imported under a Board of Trade license. The best opinion seems to be that this proclamation does not aim to cut off imports of machine tools, but to centralize purchases in the future and eliminate small dealers and speculators, thus protecting the market against inferior tools. The machine tool requirements in Great Britain are to a large extent satisfied which should indirectly relieve the situation in Canada as regards deliveries. Locally, dealers report no change in the situation and are actively employed figuring on equipment for machining the large-calibre shells. Suitable second-hand tools have become scarce and prices are higher.

Metals.—A slight advance in both copper and spelter are the most important features to note this week. The copper market has been strong for some time and higher prices were expected. The spelter market is probably being manipulated. The Suez Canal scare has cropped up again, but there appears to be a probability that the Canal will be closed for military reasons. In this event steamship routes will have to be adjusted and steamers will be obliged to use the Cape of Good Hope route. This arrangement will no doubt affect the tin market on account of the delay involved to cargoes. The delay will not, however, be serious, as good stocks are available. The lead, antimony and aluminum markets are quiet and unchanged.

Copper.—The market is very strong and is said to be controlled by the large producers. It is reported that the demand is as insistent as at any time during the last six weeks. The markets in London and New York are strong and higher. The local market has advanced ½c and Lake Copper is now quoted at 21¼c per pound.

Tin.—The London market is higher and prices are entirely nominal. There appears to be a possibility of the Suez Canal being closed, in which case shipments of tin would have to come round by the Cape. The delay entailed to shipments en route would not necessarily be very serious, as available stocks are sufficient for immediate requirements. The market, however, may be affected temporarily and may go higher. Local quotations are unchanged at 43c per pound.

Spelter.—The market is again unsettled and is apparently being manipulated. It is thought that there is a move on foot to depress prices. Local quotations are higher and nominal at 19c per pound.

Lead.—The London and New York markets are quiet and unchanged. The "Trust" price is 5.40c, New York. Local quotations are unchanged at 7c per pound.

Antimony.—Recent arrivals of antimony in New York have caused the market to become easier. Business is quiet and quotations unchanged at 40c per pound.

Aluminum.—The market is easier but supplies continue to be scarce. Local quotations are unchanged at 60c per pound.

Solders.—Prices of solder are steady at the lower level noted last week. Prices are given in the current market quotations.

Rivets.—Iron rivets are holding firm at the advances made last week. Copper rivets are expected to advance.

Bolts and Nuts Advance.—A new list has been issued for bolts and nuts showing an advance of from 5 to 10 per cent. according to line. The new discounts are given below:

Carriage Bolts ($1), list, ⅜ in. diameter and smaller, 60%.
Carriage Bolts ($1), list, 7-16 in., 45%.

Sleigh Shoe Bolts, 7-16 in. diameter and larger, 45%.
Coach and Lag Screws, 65 and 5%.
Skein Bolts, 60 and 10%.
Square Head Blank Bolts. 50%.
Bolt Ends, 50%.
Plow Bolts, 50%.
Elevator Bolts, 50%.
Fancy Head Bolts, 40%.
Shaft Bolts ($3 list), 40%.
Step Bolts, large head ($3) list, 40%.
Whiffletree Bolts, 40%.
Nuts, square, 3¼c off list.
Nuts, hexagon, 3½c off list.
Stove rods, per lb., 5½ to 6c.
Stove bolts, 82½%.
Tire bolts, 72½%.

Screw Hooks and Eyes Advance.—A number of lines of screw hooks and eyes have advanced approximately 10 per cent. The new discounts are as follows: Bright wire screw hooks and gate hooks and eyes, 60 per cent.; screw eyes, cornice hooks and stove pipe eyes, 50 per cent. Brass screw eyes are now net list.

Mechanics' Tools.—A new price list on Stanley tools has been issued to the jobbers. The prices are higher and will go into effect at once.

Door Checks and Springs Higher.—Owing to the increase in cost of raw materials, makers of door checks and springs have advanced their prices 10 per cent.

Wire Nails.—The market is very strong and higher prices for wire nails are looked for. Makers of wire nails in the States are expected to advance prices from 25c to 50c per keg which will result in a corresponding advance in this market. Wire nails are quoted at present at $2.85 and cut nails at $2.90 per keg.

Galvanized Wire.—The situation in fence wire has for some time been very unsettled owing to the increase in cost of raw materials and prices have been practically nominal for some weeks. There is a serious shortage in galvanized fence and barb wire and the situation is becoming daily more acute. It is impossible to get prompt deliveries and makers will not accept orders for shipment within six months. As stated last week, prices have been withdrawn.

Ammunition.—Owing to the heavy demand for service ammunition which is taxing the makers to the utmost, it is freely predicted that there will be a serious shortage in many calibres of sporting ammunition for next year. Prices of all raw materials are increasing in cost, as higher prices for ammunition may be expected.

Cow Chains.—Higher prices are looked for in cow chains next year on account of the increase in cost of iron.

Galvanized Sheets.—There is no improvement in the galvanized sheet situation, the market being demoralized with the continued advance in raw materials. Quotations are extremely irregular; some mills have withdrawn

from the market, while others are quoting on the basis of the cost of spelter. Prices given in the current market quotations are pretty close to the market, but are liable to advance any time.

Black Sheets.—The market is very strong on account of the scarcity of steel. Prices of black sheets have advanced 10c per 100 lbs.; the new prices are given in the current market quotations.

Pipe.—Wrought iron pipe is very firm at the new list published last week. Lead pipe is unchanged, and is quoted at 10c, and waste pipe at 11c per pound.

Kitchen Utensils.—Business continues in good volume and prices are firm at the advance made last week. The new discounts will no doubt remain in force for some little time but with present conditions prevailing in raw materials, there is little or no possibility of wares becoming any cheaper, the tendency is rather in the other direction.

Stoves.—A good demand is reported for heaters and stoves are moving out fairly well. The furnace business is quieter.

Rope.—The rope market is seasonably quiet and prices firm but unchanged. There is no improvement in the situation as regards raw materials and prices continue high. The rope market in the States is very firm and prices have a higher tendency.

LONDON

LONDON, Ont., Dec. 23.—All retail hardware merchants are exceptionally busy this week handling the pre-Christmas rush. There has been a heavy demand for Christmas gifts and nearly all merchants state that business is better than they had hoped for.

Jobbers are receiving the usual last minute rush orders, and the express companies are rushed with business.

Cutlery, silver-plated ware, sleigh bells, skates, sleighs, bells, etc., are in big demand. Collections are good.

Many Price Changes

Many price changes have taken place this week, and a great many more will follow in the near future.

An advance in the price of bolts has gone into effect. This advance was recently predicted by Hardware and Metal. The discounts on bolts, are now as follows:—

Carriage, ⅜ and smaller, 60%; carriage, 7-16 and larger, 45%; machine, ⅜ and smaller, 60%; machine, 7-16 and larger, 50%; sleigh shoe, ⅜ and smaller, 50%; sleigh shoe, 7-16 and larger, 45%; coach screws, 65 and 5%; bolt ends, 50%; plough bolts, 50%; elevator bolts, 50%; fancy head bolts, 40%; step and shaft bolts, 40%; whiffletree bolts, 40%; square nuts, less 3¼c lb.; hexagon nuts, less 3½c lb.; tire bolts, 72½%; stove bolts, 80%.

Iron Pipe Up

Iron pipe has advanced about 5 per cent. following the advance reported in the Toronto and Montreal reports last week. The quotations in effect on butt-weld pipe, are now as follows:

Price Per 100 Feet.

	Black	Galvanized
¼ inch	$ 2 40	$ 3 81
⅜ inch	2 40	3 81
½ inch	2 98	4 64
¾ inch	3 45	5 70
1 inch	5 10	8 42
1¼ inch	6 90	11 39
1½ inch	8 25	13 62
2 inch	11 10	18 32
2½ inch	17 55	28 96
3 inch	22 95	37 87
3½ inch	27 60	45 54
4 inch	32 70	53 96

New Prices on Wares

The advance on enamelware, stamped ware, tinners' trimmings, cans, japanned ware, stove boards, etc., predicted last week has gone into effect. Quotations the same as those shown in a panel for Toronto and Montreal last week.

Other Lines Advanced

There have been advances in the price of screw eyes, hooks, etc.

The new prices are as follows: Bright screw eyes, 50 per cent.; square cornice hooks, 50 per cent.; stove pipe, eyes; screw hooks, 60 per cent.; gate hooks and eyes, 60 per cent. Brass screw hooks and eyes, and gate hooks and eyes are now quoted at net list.

Spring Booking

Quotations on poultry netting are still withdrawn. Harvest tools are quoted at 40-12½ per cent.; painted screen wire cloth is quoted in 100 ft. rolls at $1.70 per 100 feet; in 50 ft. rolls at $1.75 per 100 sq. ft.

Quotations on other lines recently quoted, remain unchanged, but changes are expected at an early date on a great many lines of iron and steel goods.

WINNIPEG

WINNIPEG, Dec. 22.—Business during the past week has been very brisk and there has been a heavy demand for Christmas gifts. December business with hardware jobbers has been exceptionally brisk.

Rush orders for Christmas goods are coming in on every mail, and phone orders from various nearby districts are being received in large numbers.

Price Changes

Following the many price changes reported last week, there has been an advance of about 5 per cent. on black and galvanized pipe. Hoop steel has advanced 25 cents per 100 lbs.

An advance on bolts and nuts will take place almost immediately and will probably be about 10 per cent.

A great many other lines including tools, wire and brass goods, etc., will be advanced in the near future.

Several travelers' conventions are scheduled for next week. Travelers are all in, and they report that the outlook for 1916 business is very bright at present.

AGAINST TRADING STAMP ACT

The "popular voting" contest put on by a Toronto firm recently, has been judged illegal by Judge Winchester. After listening to the arguments pro and con, his Honor found the promoters guilty of doing business in contravention of the Trading Stamp Act of 1905.

Voting contests have been held in various places in Canada during recent years, and the Retail Merchants' Association were frequently asked to test their legality. On account of the cost that would have attended their efforts if they had fought the point away from home, the matter was deferred. However, when a Toronto firm opened for business, the home of the head office, the opportunity was seized. Secretary E. M. Trowern, of the R.M.A., states that had the case gone against them, the association would have gone to the Government for amendments covering the deficiencies of the Act.

While the promoter of the contest was found guilty, the judge on request granted right to appeal, and, after the matter has been dealt with by the Court of Appeal, sentence will be imposed if the judgment is upheld.

GREAT SUCCESS OF HOLMAN

(Continued from page 33.)

Hired Special Train

"For 'Holman Day' we arranged for a special train, and deposited a cheque for $126 with the railway as a guarantee that the special would be a paying proposition, but the success of the day exceeded our highest anticipations. It has demonstrated one thing clearly to us, and that is that one merchant can make a success of an event of this kind provided he goes about it the right way, and puts sufficient energy behind it."

"Holman Day" was advertised extensively in the newspapers. A large number of attractive values were offered.

There was no fare-refunding, as is customary in some special sales. An exceptionally low rate was secured for the special train. The newspaper advertisements carried time tables showing the time at which the special train would leave the various stations along the line.

The fares from each town, including war tax, were also listed in the advertisement.

THE LAUGH LINE

"Kultur"

They tell in Milwaukee of a subscription book agent who tried to sell a set of Shakespeare to a wealthy German. After talking for five minutes he was interrupted by his listener, who exclaimed impatiently:

"You vant to sell me somedings—no? Vell vat it is?"

"Shakespeare," said the agent.

"Don't vant it. I got Pabst's beer and Schlilz's beer and Blatz's beer. I know nuttin' about dis Shake's beer und I don't vant any."

* * *

"Casey," said Pat, "how do ye tell th' age of a tu-u-rkey?"

"Oi can always tell by the teeth," said Casey.

"By the teeth!" exclaimed Pat. "But a tu-u-rkey has no teeth."

"No," admitted Casey, "but Oi have."

WEEKLY PAINT DEPARTMENT

All Paint Lines Higher

Retailers, When Stock-Taking, Will Have to Take Into Consideration the Present High Costs of Paint Materials—Review of Prices During the Past Twelve Months—Big Advances on Some Lines

JUST prior to the annual stock-taking, which will be in full swing in a great many hardware stores during the next few weeks, it might be advisable to again direct attention to conditions which prevail in the paint markets.

All readers of Hardware and Metal who follow the market pages from week to week, know that since last stock-taking period, or in other words, since January of 1915, there have been many advances in the price of products which are sold in the paint department.

Some products have almost doubled in price. Many dry colors and colors in oil are exceedingly high in price at the present time.

Linseed oil is much higher than it was at the beginning of the year.

Glass has advanced during the past three weeks. White lead is at a fairly high level, although lower than it was some little time ago.

Turpentine is considerably higher in price than it was a year ago.

Trend of Linseed Oil During the Year

At the beginning of the year raw linseed oil was quoted in single barrel lots at 56c per gallon at Toronto.

By Feb. 1, the price had reached 68c, an advance of 12 cents per gallon.

The flax market continued its upward movement and by March 1, the price of raw oil in single barrel lots had reached 71c per gallon at Toronto.

Eighty-cent oil was quoted by April 1, although there had been considerable fluctuating in prices during the month previous.

On May 1, the price of raw oil in single barrel lots still remained at 80c.

By June 1 raw oil had reached 82 cents per gallon in single barrels. Of course, at the time there was still considerable cheap oil on hand, and jobbers were cutting prices to a considerable extent in order to reduce stocks, and if possible stimulate business.

Towards the end of June there was a drop of six cents per gallon, and by July 1, the price had receded to 74c per gallon. In some quarters considerably lower prices were quoted.

On July 1, the market was still unsettled, and there was still considerable price-cutting in evidence. Further declines had taken place and raw oil was quoted in single barrels at 70c per gallon.

A Big Drop

The market was still weak on Aug. 1, and quotations had receded to 67c per gallon. The demand for oil at this time was very light, there was still a considerable amount of cheap oil on hand, and Hardware and Metal predicted a further decline.

The prediction came true and by the middle of August oil was down to 65c per gallon in single barrels, with even lower prices being quoted in some quarters.

On September 1, the situation remained unchanged, and although 65c per gallon for raw in single barrels was the price most frequently quoted, there were a number of firms quoting 63c per gallon.

By October 1, quotations on raw oil in single barrels had reached a price of 70c per gallon. The flax seed market at this time was said to be in a very bad condition. Inclement weather and repeated frosts were said to be the chief factors in boosting the flax seed market, and in sympathy with the high levels attained in the flax seed markets, the price of linseed oil advanced considerably. During the month following, oil continued to advance, and by November 1, an advance of 7 cents per gallon had taken place, making the quotations for raw in single barrels 77c per gallon.

The amount of seed reaching the crushers at this time was said to be very small, although the demand for oil was not heavy.

A much higher level had been reached by December 1, and a price of 85c per gallon was quoted at Toronto, for raw oil, in single barrel lots.

Since the first of the month oil has advanced further and a week ago the price in single barrel lots was 87c.

The foregoing quotations are all based on conditions at Toronto, and all figures quoted, apply to single barrel lots of raw oil.

Prices for larger quantities, or for boiled oil may be ascertained by taking off the regular quantity allowances, or adding the regular advances for boiled linseed oil.

It will be seen from the foregoing that linsed oil to-day is quoted at a much higher figure than the price quoted a year ago, in fact the price to-day is higher than it has been at any time since the first of the year.

There are many retailers who still have on hand, oil which was bought at a much lower figure than the price prevailing to-day, or likely to prevail for some time to come. This is an important matter that should not be overlooked by the retailer when stock-taking.

Turpentine Also Higher

The price of turpentine is also at a high level at present. On the first of January, 1915, turpentine was quoted in single barrel lots at 15 cents per Imperial gallon at Toronto.

The price last week, for the same quantity at Toronto was 87c per gallon, and the market is firm at present. There has been considerable fluctuation in prices during the year, as reported in Hardware and Metal's weekly reports

White Lead Higher

Pure white lead ground in oil, on January 1, 1915, was quoted at $8.60 per 100 pounds at Toronto in ton lots. The price to-day is $10.20 per 100 pounds in ton lots, an advance of $1.60 per 100 pounds over the cost in January.

Ready Mixed Paints Higher

Pure prepared paints in quart cans was quoted at $2 per gallon on January 1, 1915. The same paint to-day costs $2.20 per gallon in quart cans, and the market at present is firm owing to the high costs of raw materials.

During the fall, pure prepared paint reached a price of $2.30 per gallon in quart cans. Towards the end of October the price was reduced ten cents per gallon, and since then has remained as at present.

Glass Higher

Although the demand for glass is not heavy there have been price advances during the past two weeks as announced

in the market reports of Hardware and Metal.

As has been announced in this paper several times during the past year stocks of Belgian and English glass are practically exhausted, and for some time the trade has had to depend on the United States for supplies. In stock-taking, retailers will have to carefully consider the relative values of the glass when put into stock, and the cost to-day.

Recent issues of Hardware and Metal have given complete details with prices, regarding the recent advance in the cost of glass.

A great many other paint lines including dry zinc, and zinc in oil, dry colors, etc., are considerably higher in price at present than they were a year ago.

The foregoing will give the reader some idea of the important price changes which have taken place during the past twelve months.

WHAT HAPPENED IN HARDWARE IN 1915

(Continued from page 27.)

new industries have been developed in Canada.

The prospects for future business are much brighter now than they were at the corresponding period of last year.

The Markets

For many months past—in fact ever since the outbreak of the war—but more particularly during the past two months, attention has been centred on the hardware markets. Startling and rapid price changes have taken place week after week—and the end is not yet in sight.

Comparatively recent developments in the steel industry, rumors of further tariff changes and predicted shortages of many lines of finished and semi-finished steel goods have kept the trade on the qui vive.

Following the outbreak of war in August, 1914, there were many changes in the prices of various hardware lines.

The Tariff Changes

The upward tendency continued until February of the present year, when the tariff change took place.

With an increase in the general tariff of 7½ per cent. and 5 per cent. in the British preferential and the abolishment of the free list, save for a few specified articles, the effect on hardware lines was very wide in its scope. American and English goods were immediately advanced from 7½ to 15 per cent.

Many Canadian manufacturers were forced to advance prices on their products as a result of the tax on supplies, caused by the abolishment of the free list.

Advances Due to Manipulation

At various times during the year there have been price advances on some lines of goods, caused almost entirely by manipulation in the metal markets.

The remarkable developments in the steel industry have been comparatively recent, and came into prominence during October and November.

For a period after the outbreak of the war the steel situation was very much depressed. The domestic consumption fell to low levels, with the railroads buying very little.

The war consumption was not seriously considered as an important factor. In fact, prices on many steel products declined and were lower a year after the war broke out than they were at the start of the great conflict.

A Great Change

Within the past two or three months there has been a great change. The manufacture of munitions has grown to be an immense industry, requiring huge quantities of steel. There has been a big revival of the domestic demand in Canada and the United States, but more particularly in the latter country.

The result is that the big steel companies are booked for many months ahead. All branches of the industry are working to full capacity. Some companies are refusing to book further orders, and the result is that prices on many lines of iron and steel goods carried by the hardware trade are soaring skywards.

Every week brings its heavy budget of price changes. The comparative tables of prices on steel products, published in recent issues of Hardware and Metal, show how remarkable and important these price changes have been to the hardware trade. This week's market reports in Hardware and Metal clearly indicate that many more price changes may be expected in the near future.

SPLENDID LIVING, BUT POOR LIFE

(Continued from page 36.)

do," and have put the whole strength of their lives into their effort to realize their ideal.

If from the start you listen to and obey that something within which urges you to find the road that leads up higher; if you listen to and obey the voice which bids you look up and not down which ever beckons you on and up, your life cannot be a failure, no matter what its outward seeming. The really successful men and women are those who by the nobility of their example contribute to the uplift, the happiness, the enlargement of life, to the wisdom of the world—not those who have merely piled up selfish dollars. A rich personality enriches everybody who comes in contact with it. Everybody who touches a noble life feels ennobled thereby.

There is machinery so delicate that it can measure the least expenditure of physical force. If similar machinery could be devised for measuring character, many a millionaire would be chagrined at the record of his own just measurement, while many a humble worker would be amazed at the high mark his earnest unceasing efforts to reach his ideal had achieved.

I believe the time will come when not money, but growth, not lands and houses, but mental and moral expansion in larger and nobler living, will be even the popular measure of true riches, real success. The measure of a successful man will be that of his soul; he will be rated in a new sort of Bradstreet, a spiritual Bradstreet, as a large heart, a magnanimous mind, a cultured intellect, instead of as a great check book.

Phillips Brooks said: "The ideal life of full completion haunts us all. We feel the thing we ought to be beating beneath the thing we are. God hides some ideal in every human soul. At some time in his life, each feels a trembling, fearful longing to do some great good thing. Life finds its noblest spring of excellence in its hidden impulse to do one's best."

Everyone who substitutes the finer for the cheaper goal, each one who to-day and every day holds to his high ideal despite the stress and turmoil of modern daily living, in such measure hastens the day when such an ideal will be the inspiration of the masses and the power that moves the world.

TRADE REVIVAL IN WESTERN CANADA

(Continued from page 29.)

demands of the farmer, who is turning to his catalogue and buying by mail. Even the mail order houses were taken by surprise, and in many cases were not able to cope with the orders.

The big demand for seasonable hardware is beginning to be felt now that winter has arrived. There has been snow out West as far as Moose Jaw, which has resulted in an influx of orders for children's sleighs. At the time of writing there has been no snow further West than Moose Jaw. Retailers up to this point report a fair demand for skates. Throughout Manitoba and Saskatchewan during the first two weeks of December, skating clubs were being organized and rinks flooded.

Montreal, Que.—The shareholders of the Canada Cement Company, at a special meeting recently unanimously authorized an application for supplementary letters patent permitting the company to embark on the manufacture of war munitions. General Manager Jones gave an optimistic forecast of the results expected from the business, and the shareholders were informed that no new financing would be necessary.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Dec. 23.—For the season the conditions in the paint trade are all that could be reasonably expected. The situation remains very firm so far as future prospects are concerned and, in fact, a material advance in linseed oil has strengthened the indications that an increase is more likely than a decline. However, no change is likely to be made in the immediate future for the reason that it is never considered good policy to alter the quotations in the middle of a selling campaign. Outside of the advance in oil the other raw materials entering into the manufacture of the mixed lines are all firm. A feature of the week is a new list on glass covering material increases of the list and more liberal concessions in discounts to the trade.

The indications are that the usual custon of making contracts with manufacturing companies at the beginning of the new year will not be generally followed. The conditions are too unsettled to permit of this.

Linseed Oil.—With a further advance in the flax market and the cost of production of linseed oil, there has been a much firmer tone in the market. Result has not been so much the raising of the high prices but the increasing of the bottom. Thus, while 79c and 82c were heard last week for raw and boiled, respectively, the lowest quotation this week is 86c and 89c. In some instances the change has meant an advance of as much as 8c for certain jobbers who had been maintaining low prices. The situation may now be summed up in the following quotations:

	Raw	Boiled
1 to 2 barrels	86c-87c	89c-90c
2 to 5 barrels	85c-86c	88c-89c
6 to 9 barrels	84c-85c	87c-88c

Turpentine.—There is little change in the turpentine situation and prices are generally maintained on the basis established last week, although there is a slight shading from the top figure. Quotations: 1-barrel lots, 78c-82c; 2 to 4 barrels lots, 77c-81c.

White Lead.—The white lead market is firm and steady. For some days there was a stronger feeling on the advance of the American Trust but since then, although the Trust quotation has been maintained, second-hands have been taking lower prices.

Gasoline and Benzine.—There are new quotations of gasoline and benzine covering further advances. Following are the new figures:

Gasoline in wood	27½c
Gasoline in drums	25½c
Gasoline, tank wagon	25c

Benzine, 1c lower.

Oils to Advance.—In view of the advances in crude oil, higher quotations for lubricants are to be expected and it is predicted that there will be an advance through many lines after the turn of the year. This advance will probably be 1 cent to 2 cents.

New Glass List.—The dealers have finally reached an agreement as to the new Montreal base quotations on glass. There is a material advance on the list but there are more liberal concessions in the discounts. Following is the new basis:

Country Base Price

United Inches.	Star.	Double Diamond.
Up to [illegible]	$ 7.80	$11.90
26 to 34	8.15	12.85
41 to 50	11.75	15.50
51 to 60	12.25	15.85
61 to 70	13.10	16.80
71 to 80	14.75	18.35
81 to 85	....	22.75
86 to 90	....	24.35
91 to 95	....	25.00
96 to 101	....	29.00
101 to 105	....	32.00
106 to 110	....	37.00

With the following discounts: Any quantity up to 35 cases, 30-5%.

TORONTO

TORONTO, Ont., Dec. 22.—Business is quiet in the paint trade this week. It is more or less an off season and travellers are off the road until the New Year. The situation as regards spring business is good and indications point to considerable activity. The possibility of higher prices for many lines in the near future should stimulate business. Mixed paints, for instance, are almost certain to advance early in next year. Linseed oil is another line that is expected to advance, as there is little expectation of any considerable amount of flax seed coming east for some time to come. Turpentine is unchanged and prices are more likely to go up than down as supplies are getting lower every week. Higher prices on gasoline and benzine are expected early next year, and coal oil may also be affected. White lead and putty are both firm but unchanged.

Linseed Oil.—Flax seed continues high, and there is none coming east, with little prospect of any considerable amount for some time to come. The whole situation is very unsettled and is causing considerable anxiety to the crushers. Stocks of oil are low and the demand is light. Prices are at practically the same range as last week and are unchanged but an advance in oil early next year is expected. The following prices are being quoted in Toronto.

	Raw	Boiled
1 to 2 barrels	87c	90c per gal.
3 to 5 barrels	86c	89c per gal.
6 to 9 barrels	84c	87c per gal.

10 barrels and over, open.

Turpentine.—The market is firm at Savannah. Receipts of turpentine are light and becoming less as the month moves on. It is expected that after this month lots arriving will be down to very small proportions, and prices are expected to resume their former high levels or even advance. The demand is light locally and prices are firm but unchanged. The resin market is weak and prices are lower on all grades. The following prices are being quoted locally on turpentine: 1barrel lots, 86c; 2 to 4 barrel lots, 85c, and 5-gallon lots 93c per Imperial gallon.

Mixed Paints.—The market is firm and prices unchanged. It is generally believed that mixed paints will be advanced early in January as all raw materials have become more costly and there is no indication of cheaper materials.

White Lead.—The situation as regards white lead is unchanged, and the market is steady but firm. Pure lead in oil is quoted at $10.20 per 100 lbs. in ton lots.

Gasoline.—The market is very firm and higher prices for gasoline and benzine are expected in the near future. Crude oil is high and gasoline is rather scarce, making the market particularly strong. Gasoline is quoted at 25½c, and benzine at 25c per gallon.

Glass.—There is a fair demand for glass at the new price. The new list is being favorably received in the trade and the situation is much improved in that respect.

Putty.—The demand is lighter but the market is very firm. Prices are unchanged, but may advance as raw materials continue to increase in cost. The following prices are being quoted in Toronto for standard putty in less than ton lots.

	Per 100 lbs.
Bulk, in casks	$2.50
Bulk, in 100-lb. drums	2.70
Bulk, in 25-lb. drums	2.80
Bladders, in barrels	3.10

HELLER-ALLER TANK HEATER

the only thing on earth that will keep a stock tank from freezing

Heater is Made of High-Grade Charcoal Iron, and Will Remain on Bottom of Tank Without Being Fastened Down.

The entire heater is cast in one piece, including the draft flue, takes on a uniform temperature and will not crack. Is 24 inches high (exclusive of pipe), and 12 inches in diameter. Has ash pan and grate, and basket, firepot and grate; ALL heavy cast iron.

Will burn any kind of fuel and with proper care will last a lifetime.

One farmer customer will lead to many others. Drop a line for full details.

"BAKER" Windmills, Pumps, Tanks, Pump Tanks. Prompt Shipments—Good Goods

The Heller-Aller Company

WINDSOR, ONTARIO

14 Years A Dealer But Finds No Better Fence Than PEERLESS

Read This Letter

Forestville, Ont., Jan 13, 1913

The Banwell-Hoxie Wire Fence Co.,
Hamilton, Ontario

Dear Sirs:—I have been in the fence business for the last fourteen years putting up fence for farmers and have erected as high as four thousand rods per year. I have put up a good many different makes of fence but can positively say that "The Peerless" has given the best satisfaction taking into consideration even wire, no slack wires, no wires breaking, no wires rusting, and fence holding its tension which keeps the fence tight. "Peerless Fence" that I put up six years ago with posts thirty feet apart is tight and free from rust and does not sag.

Truly yours, E. G. Hooner

He's but one of the thousands of satisfied Peerless dealers—satisfied there's no better, no more profitable, no bigger producer of return orders than Peerless Fencing. His Peerless Fence agency is one of his biggest assets. If you had it you would say the same.

Peerless Farm Fence

is made of Open Hearth steel wire—heavily galvanized in such a thorough manner that it will not flake, chip or peel off. The wires are tough, elastic and springy and will not snap or break under sudden shocks or quick atmospheric changes. The joints are securely held with the "Peerless Lock" which will successfully withstand shocks and strains and yet, it can be erected on the most hilly and uneven ground without buckling, snapping or kinking. We also build a full line of poultry fence, ornamental fence and gates.

We Offer You This Coveted Agency

If you are located in our unassigned territory, we want to offer you the selling rights for this remarkable fencing. We want to add you to our list of satisfied, money making agents. We have a very attractive agency proposition. Want it? A postal brings it. Write today — now.

Banwell-Hoxie Wire Fence Co., Ltd.
Winnipeg, Manitoba
Hamilton, Ontario

PINK'S LUMBERING TOOLS

The Standard Tools in every province of the Dominion, New Zealand, Australia, etc.

We manufacture all kinds of lumber tools. Light and Durable.

WAREHOUSE DEPARTMENT

At Your Service

Pays Good Profits to Hardware Dealers

Let us have your name and address so that we can send you our monthly stock list regularly.

Send us your sorting orders for heavy hardware. Our stock on hand is very complete, and we can ship same day as order is received.

Our big foundry and machine shops are equipped to rush your orders for machinery or special equipment.

We supply power transmission machinery for grain elevators, saw mills, mines, etc., either new or repair work. Machinery repairs a specialty.

We offer you both service and price equal, or even better than you can obtain elsewhere.

Stephens

HOUSE PAINT

Stephens House Paint is made by experts for the use of both the Painter and Consumer.

The professional painter, as well as the amateur, is a steady user of "Stephens House Paint" because it saves him time and money, and always gives satisfaction. Stephens House Paint has wonderful weather-resisting qualities and no superior as a surface coverer.

If not already represented in your town we will be glad to explain our exclusive agency proposition. Write us about it.

How to Invest Money

By GEORGE GARR HENRY

One of the most useful and easy-to-read books ever written on the elementary principles of investment.

Will save the ordinary investor many mistakes. Price, prepaid, $1.00. Insure your capital by ordering this book at once from

TECHNICAL BOOK DEPARTMENT

MACLEAN PUBLISHING COMPANY, Limited

143-153 University Avenue, Toronto

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

"AYLMER" Force Pumps

They are certain to sell easily because it has several advantages over the ordinary style.
Has longer stroke, more power, and works easier.
While designed for hand use it can be readily converted into a Windmill Pump by the addition of a flat bar, which screws into the cross head at top.
It will be to your interest to write for full particulars now.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and a clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace—made for machine. Packed singly—packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

MISCELLANEOUS

FIRE INSURANCE. INSURE IN THE HARTford. Agencies everywhere in Canada.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

GOOD STENOGRAPHERS ARE WHAT every employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

ADDING TYPEWRITERS WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314, Stair Building, Toronto.

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B." Otis-Fensom Elevator Co., Toronto.

HARDWARE STORE BUSINESS METHODS—The authors of the articles in this book are for the most part practical and progressive hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infinite value to that trade. The 40 subjects discussed include: Rules and Regulations for the Hardware Store; Hardware Buyer; Good Methods in Stock Taking; Prices and Catalogues; Collecting Accounts; The Merchant and His Employees; Changing Business Conditions and How to Meet Them; Profit Figuring System; Starting in Business; Changing a Credit into a Cash Business, etc. 220 pages. Price $1.10, postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE WINDOW DRESSING—THIS IS the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. Size 8x11 inches. Price $2.60 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.

--A handy household and Amateur Vise

Easily fitted to any Table or Bench by means of the clamp.

Screw is made from ½" heavy Screw Stock. Material is cast iron, of good grade throughout. Jaws are ground and 1½ inches wide, opening 2 inches. Shipped in Black Japanned finish, unless otherwise ordered.

A STRAIGHT TALK FROM THE MANAGER

No. 26

"The Royal Road to Ideas"

"BUSINESS is exceptionally good this Fall," writes a subscriber from a town in Wellington County. Then, this condition is partly accounted for by his next sentence: "Under separate cover, we are sending you our local paper, containing our Christmas advertisement. We would like your opinion of it."

The hardware merchant who advertises, and shows a real interest in his advertising, should be getting "exceptionally good business" just now, especially if a good part of his trade is with farmers. His customers and prospects are in a position to satisfy all their needs, and, consequently, are in the proper mood to be influenced by good advertising.

* * *

Right here, you will be likely to say: "It is all very well for you to talk about writing good advertisements, when you, yourself, are living in an atmosphere of advertising. Perhaps you would realize the difficulties I am up against when I sit down to write an ad., if you were a retail hardware merchant yourself and had the thousand and one different things to look after that I have."

See here, don't you ever believe that I think it an easy thing to write a good advertisement. On the contrary, I know that many a hardwareman finds it a most exhausting thing to turn out a trade-pulling advertisement. That is why so many of them call up the newspaper man just before his paper goes to press, and tell him to run the same ad. over again. First thing they know, they are advertising refrigerators in December. Yes, I saw an ad. just like that a few days ago, when I was looking over a copy of the afternoon paper, in a city of 14,000. And the dealer who perpetrated it, is generally wide awake, at that.

* * *

But what I started out to tell you, was that there is an easy way of catching the idea which must come before a successful advertisement can be written. And Hardware and Metal furnishes the solution of that difficulty as it does of so many other troubles of Canadian hardwaremen.

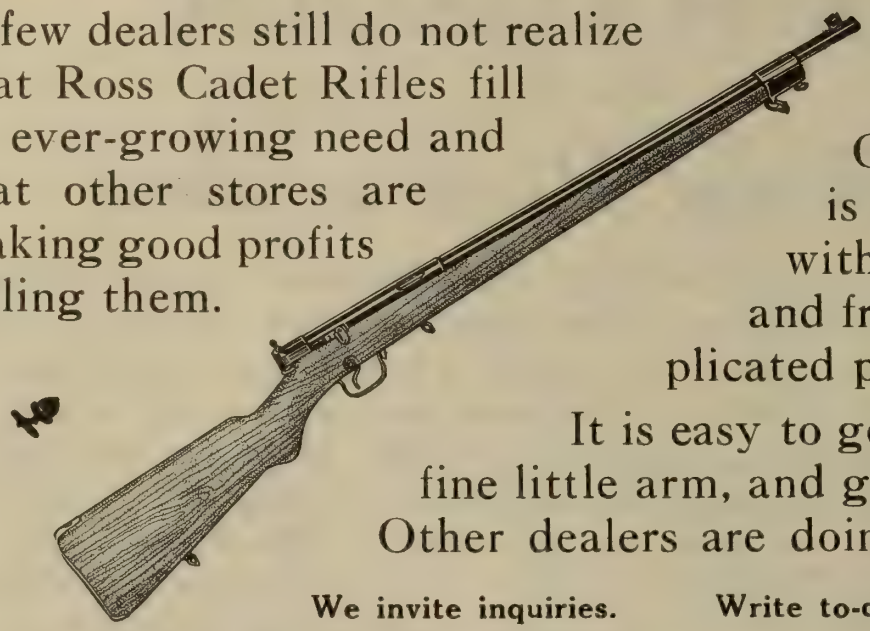
There's no great trick about it. Just sit down for a solid half hour with pad and pencil beside you, and look through the advertising pages of Hardware and Metal. Every time you come across the advertisement of an article you wish to push, jot down the talking points given in the advertisement. Nearly every page in the advertising section will give you some strong points for your own copy, and, the first thing you know, you will have enough ideas for a dozen good ads.

Of course you should use cuts. But here again Hardware and Metal can help you, with its Electro Service. Drop a line to the Editor, and he will tell you all about it.

J. G. L.

Don't Put It Off To 1916

A few dealers still do not realize that Ross Cadet Rifles fill an ever-growing need and that other stores are making good profits selling them.



The Ross Cadet is an ideal .22 Calibre Rifle. It is accurate, fitted with excellent sights and free from all complicated parts.

It is easy to get $12.00 for this fine little arm, and get it fairly often. Other dealers are doing it every day.

We invite inquiries. Write to-day for particulars.
